ANDHRA LOYOLA COLLEGE

AUTONOMOUS :: VIJAYAWADA - 520 008

Established : 1954

A CHRISTIAN MINORITY COLLEGE WITH CONSTITUTIONALLY PROVIDED RIGHT OF ADMISSION

(AN ISO 14001 : 2015 INSTITUTION)

THE ONLY COLLEGE IN BOTH THE TELUGU STATES TO HAVE BEEN RANKED AMONG THE TOP 150 COLLEGES BY NIRF SINCE THE INCEPTION OF THE RANKING IN 2017

SELECTED UNDER THE STAR COLLEGE SCHEME OF DBT AND FIST PROGRAMME OF DST, GOVT.OF INDIA

SELECTED FOR ENHANCEMENT OF QUALITY AND EXCELLENCE UNDER RUSA BY MHRD, GOVT.OF INDIA

A College Dedicated to All-Round Development of its Students

Andhra Loyola College
(Autonomous)
VIJAYAWADA-520 008.
Accredited in III Cycle at A+ Grade with a CGPA of 3.66 / 4.00
Web: www. andhraloyolacollege.ac.in e-mail: contactalc@gmail.com

STD	: 0866
Main Off.	: 2476082
Inter	: 2476965
Degree	: 2481907
P.G.	: 2474902
CoE	: 2473251
Fax (Principal)	: 2474531
Fax (Correspondent)	: 2486084

Course Outcomes

DEPARTMENT OF ECONOMICS			
Program	**Semester**	**Course Code**	**Course Name**
B.A	I	ECO111 MEA	MICRO ECONOMIC ANALYSIS

On successful completion of the course, students will be able to;

CO 1: Explain evolution and growth of economics, what economics is and why it is important, how economists use economic models, Difference between positive and normative economics, static and dynamic economics.

CO 2: Define the concept of utility and satisfaction, Differentiate between marginal utility and total utility, calculate the concept of marginal utility, how consumers maximize total utility within a given income using the Utility Maximizing Rule, Explain how consumer's utility changes when income or prices change, Describe the behavioral economics approach to understanding decision making.

CO 3: Elucidate the determinants of demand, determinants of supply, concept of elasticity, price elasticity of demand and price elasticity of supply, and compute elasticity using common economic variables.

CO 4: Describe the term "production" and explain what a production function is; define the term "production inputs," and differentiate between labor, land, capital, entrepreneurship, technology, economies of scale, diseconomies of scale, and constant returns to scale.

CO 5: Analyze and differentiate between marginal, average, and total product; compute and graph marginal, average, and total product; diminishing marginal product and diminishing marginal returns, Explicit and Implicit Costs, Accounting and Economic Profit.

Program	**Semester**	**Course Code**	**Course Name**
B.A	II	ECO122 MEA	MACRO ECONOMIC ANALYSIS

On successful completion of the course, students will be able to
CO 1: Define and explain the process of calculating national income, identify its components, demonstrate circular flow of income.
CO 2: Understanding Say's law of market, classical theory of employment and Keynes' objectionto classical theory, demonstrate the principle of effective demand and income determination.
CO 3: Explain the meaning of consumption function, relationship between APC and MPC, consumption and income, concept of multiplier and analyze the theories of absolute and relative income hypothesis.
CO 4: Understand the relationship between investment and savings, demonstrate investment multiplier, and understand the meaning of MEC and MEI.
CO 5: Demonstrate the meaning and function of money, high powered money, monetary and paper system, illustrate various versions of quantity theory of money.

Program	Semester	Course Code	Course Name
B.A	III	ECO233DE	DEVELOPMENT ECONOMICS

On successful completion of the course, students will be able to
CO 1: Students will understand the importance of Economic Growth and development, the present chapter creates an awareness on covid-19 immunity aspects.
CO 2: Student's become aware of the growth of different countries and it also help to understand ways to develop with different models.
CO 3: It will develop knowledge among students about the role of developmental theories related to Economic development of a country.
CO 4: Understand Strategies of Economic Development and Role of Infrastructure in Economic Development.
CO 5: India is a developing country so as a student of this country there must know the role of economic development and also must have an idea about market failure and attaining economic development with the help of International Institutions.

Program	Semester	Course Code	Course Name
B.A	IV	ECO244EDIAP	ECONOMIC DEVELOPMENT- INDIA AND ANDHRA PRADESH

On successful completion of the course, students will be able to
CO 1: To understand the basic features of the Indian economy and its development since independence, and also to understand the planning structure and the place of the Indian economy in the Human Development Index.
CO 2: Be able to understand the national income, trends and the problems of unemployment, poverty in the economy along with the measures to correct them.
CO 3: Get to know about Indian agriculture, various policies relating to agriculture and the programmes implemented by the government to improve the industrial sector.
CO 4: Utilize the knowledge of taxation to understand the impact on commerce and industry and also to analyze the state central relations.
CO 5: The key changes in Andhra Pradesh state after bifurcation in 2014 and the problems faced by it after separation.

Program	Semester	Course Code	Course Name
B.A	IV	ECO245SME	STATISTICAL METHODS FOR ECONOMICS

On successful completion of the course, students will be able to
CO 1: Understand about the nature and importance of statistics in economics, types of data and sampling, and its collection methods.
CO 2: To analyze the data collection methods, and tabular and graphical presentation of data.
CO 3: To understand about the measures of central tendency namely mean median, mode and measures of dispersion.
CO 4: Able to know correlation and various types along with regression and its uses in real life.
CO 5: Analyze time series and measurement of time series and also index numbers, types, uses and limitations.

Program	Semester	Course Code	Course Name
B.A	V	ECO356IS	INSURANCE SERVICES

On successful completion of the course, students will be able to
CO 1: Understand the framework of insurance in India.
CO 2: Assimilate different types of insurance products sold in India & how insurance policy satisfy customer requirements.
CO 3: Adapt different types of life insurance products sold in India & how product meets customer needs.
CO 4: Understand documentation & processing of life insurance proposal forms, claim settlement and surrender of life insurance policy.
CO 5: Be provided with the knowledge of risk and rewards of general insurance

Program	Semester	Course Code	Course Name
B.A	V	ECO357BFS	Banking and Financial Services

On successful completion of the course, students will be able to
CO 1: Understanding the Meaning, Function and role of commercial banking. Knowing the procedure of an account opening, operating and closing.
CO 2: Knowing the structure, function and role of RBI in economic Development and Judging the progress of financial inclusion.
CO 3: Evaluating the importance, characteristics and components of the financial market. Along with the role and types of development bank and non banking financial intermediaries.
CO 4: Realizing the banking reforms and Basel Norms I and II and baking services such as E-banking, Loan clearing, ATMs, Digital Currency, Credit card, Debit Card, Travelers cheque.
CO 5: Analyzing the concept of money laundering and various acts to check laundering.

DEPARTMENT OF HINDI			
Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	I	HIN 111 PNG	Prose, Non-Detailed & Applied Grammar - I

At the end of the course Student will
CO 1: Get the scope for linguistic skills of Hindi.
CO 2: Understand 'Unity in Diversity'.
CO 3: For the better understanding in grammar concepts
CO 4: Adapt noble values of Life.
CO 5: Get the knowledge of different Grammar concepts in Hindi.
CO 6: Help the society by their skills & abilities.

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	II	HIN 122 PNG	Prose, Non-Detailed & Applied Grammar - II

At the end of the course Student will
CO 1: Get the scope for linguistic skills of Hindi.
CO 2: Promote perfect use of Vocabulary
CO 3: For the better understanding in grammar concepts
CO 4: Adapt moral values and ethical values so that students can try to build good character
CO 5: Understands the structure of translation methods
CO 6: Help the society by their skills & abilities.

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	III	HIN 233 HLT	Poetry, History of Hindi Literature & Translation

At the end of the course Student will
CO 1: Get a brief knowledge of history of Hindi literature
CO 2: Get the scope for literary skills of Hindi
CO 3: Gain Hindi translational skills.
CO 4: Emphasize the responsibilities of humans towards nature.
CO 5: Behave as a Virtual Oriented person in society.
CO 6: Attain skills in writing and speaking.

DEPARTMENT OF SANSKRIT			
Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	I	SAN 111 PPG	Prose, Poetry and Grammar
At the end of the course student will CO1: Get a brief knowledge of Sanskrit literature CO2: Understand the Sanskrit syntax through the grammar CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently. CO4: Can analyze merit sand demerits of the society CO5: Understand the structure of translation methods CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavadgita which are the source of Indian culture and traditions			
Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	II	SAN 122 PPG	Prose, Poetry and Grammar
At the end of the course student will CO1: Get a brief knowledge of Sanskrit literature CO2: Understand the Sanskrit syntax through the grammar CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently. CO4: Can analyze merits and demerits of the society CO5: Understand the structure of translation methods CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavad Gita which are the source of Indian culture and traditions			
Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	III & IV	SAN 233 DHS	Drama, Alankaras and History of Sanskrit Literature
At the end of the course student will CO1: Get a brief knowledge of Sanskrit literature CO2: Understand the Sanskrit syntax through the grammar CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently. CO4: Can analyze merit and demerits of the society CO5: Understand the structure of translations CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavad Gita which are the source of Indian culture and traditions			

DEPARTMENT OF COMPUTER SCIENCE			
Program	Semester	Course Code	Course Name
B.Sc. (MPCs, MSCs, MECs, MEtCs)	I	CSC111PPP	Problem Solving using Computers & Python Programming

Upon successful completion of the course, a student will be able to:
CO 1: Learn to apply fundamental problem-solving techniques.
CO 2: Describe the core syntax and semantics of Python programming language.
CO 3: Learn and understand python looping, control statements and string manipulations.
CO 4: Define and demonstrate the use of built-in data structures lists, dictionaries, tuples and sets
CO 5: Understand the Python programming language and it's rich set of libraries, applications where Python programming is effective

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	II	CSC122DS	Data Structures

Upon successful completion of the course, a student will be able to:
CO 1: Understand available Data Structures for data storage and processing.
CO 2: Comprehend Data Structure and their real-time applications - Stack, Queue, Linked List, Trees and Graph
CO 3: Choose a suitable Data Structures for an application
CO 4: Develop ability to implement different Sorting and Search methods
CO 5: Have knowledge on Data Structures basic operations like insert, delete, search, update and traversal
CO 6: Design and develop programs using various data structures
CO 7: Implement the applications of algorithms for sorting, pattern matching etc

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	III	CS233DBMS	DBMS

On completing the subject, students will be able to:
CO 1: Understand the fundamental concepts of DBMS with special emphasis on relational data model.
CO 2: Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database
CO 3: Model database using ER Diagrams and design database schemas based on the model.
CO 4: Create a small database using SQL.
CO 5: Store, Retrieve data in database.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	IV	CSC244OS	Operating Systems

At the end of the course student will
CO 1: Know Computer system resources and the role of operating system in resource management with algorithms
CO 2: Understand Operating System Architectural design and its services.
CO 3: Gain knowledge of various types of operating systems including Unix and Android.
CO 4: Understand various process management concepts including scheduling, synchronization, and deadlocks. 5. Have a basic knowledge about multithreading.
CO 5: Comprehend different approaches for memory management.
CO 6: Understand and identify potential threats to operating systems and the security features design to guard against them.
CO 7: Specify objectives of modern operating systems and describe how operating systems have evolved over time.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	IV	CSC 245OPJ	Object Oriented Programming With Java

After successful completion of the course, the students are able to At the end of the course student will
CO 1: Understand the benefits of a well-structured program
CO 2: Understand different computer programming paradigms
CO 3: Understand underlying principles of Object-Oriented Programming in Java
CO 4: Develop problem-solving and programming skills using OOP concepts
CO 5: Develop the ability to solve real-world problems through software development in high-level programming languages like Java.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	V	CS356WDT	Web Interface Designing Technologies

Upon successful completion of the course, a student will be able to:
CO 1: Understand and appreciate the web architecture and services.
CO 2: Gain knowledge about various components of a website.
CO 3: Demonstrate skills regarding creation of a static website and an interface to dynamic website.
CO 4: Learn how to install word press and gain the knowledge of installing various plugins to use in their websites.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs, MEtCs)	V	CS356WDT(P)	Web Interface Designing Technologies (LAB)

. On successful completion of this practical course, student shall be able to:
CO 1: Create a basic website with the help of HTML and CSS.
CO 2: Acquire the skill of installing word press and various plugins of Word press.
CO 3: Create a static website with the help of Word press.
CO 4: Create an interface for a dynamic website.
CO 5: Apply various themes for their websites using Word press.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	V	CS357WAD(P)	Web Applications Development using PHP & MYSQL LAB

On successful completion of this practical course, student shall be able to:
CO1: Write, debug and implement the Programs by applying concepts and error handling techniques of PHP.
CO2: Create an interactive and dynamic website.
CO3: Create a website with reports generated from a database.
CO4: Write programs to create an interactive website for e-commerce sites like online shopping, etc

DEPARTMENT OF STATISTICS

Program	Semester	Course Code	Course Name
B. Sc., (MSP, MSCs)	I	STA111DSP	Descriptive Statistics & Theory of Probability

CO 1: Organize, manage and present data and to analyse statistical data graphically using frequency distributions and cumulative frequency distributions.
CO 2: Analyze statistical data using measures of central tendency, dispersion and location and to use the basic probability rules, including additive and multiplicative laws, using the terms, independent and mutually exclusive events
CO 3: Translate real-world problems into probability models and to derive the probability density function of transformation of random variables.
CO 4: Calculate probabilities and derive the marginal and conditional distributions of bi-variate random variables and to analyze Statistical data.
CO 5: Expectation of random variable and its properties and various function of random variable.

Program	Semester	Course Code	Course Name
B.A.	I	LSC111ES	Elementary Statistics

CO 1: Understand the concept of Statistics and its merits and demerits. Distinguishing Primary and secondary data. Classification, Tabulation and Pictorial representation of data.
CO 2: Understand the basic nature of data and how a single value describes the entire data set. Measuring the degree of departure of a distribution from symmetry and Reveals the direction of scatteredness of the items.
CO 3: Understand the spread of the data and to draw conclusions from the comparison of averages. To understand the concept of correlation and regression and to learn the degree of Association between two variables and establishing relationship between the variables

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	II	STA122PD	Probability Distributions

CO 1: Develop problem-solving techniques needed to accurately calculate probabilities.
CO 2: Apply problem-solving techniques to solving real-world events.
CO 3: Apply selected probability distributions to solve problems.
CO 4: Equipping students with essential tools for statistical analyses at the graduate level.
CO 5: Fostering understanding through real-world statistical applications.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	II	SDC112SAR	Survey and Reporting

COURSE OBJECTIVES: On successful completion of the course, students will be able to;
CO1: Understand the basics of survey and reporting needs and methods
CO2: Comprehend designing of a questionnaire
CO3: Conduct a simple and valid survey and Collect data
CO4: Organize and interpret data and Prepare and submit reports.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	III	STA233SMS	Statistical Methods & Exact Sampling Distributions

CO 1: Analyze the data pertaining to attributes and to interpret the results.
CO 2: To recognize and evaluate the relationship between two quantitative variables through simple linear correlation and regression.
CO 3: To understand the relationship between sample statistics and population parameters.
CO 4: Knowledge of interval estimation and estimation of parameters using the method of moments and MLE.
CO 5: To understand exact sampling distribution

Program	Semester	Course Code	Course Name
B. Sc., (MSP, MSCs)	IV	STA244SI	Statistical Inference

CO 1: Advances knowledge of statistical modeling via point estimation, hypothesis testing and confidence intervals.
CO 2: Ability to convert various problems of practical interest into statistical models and make inference on it.
CO 3: Students will be able to discern the different aspects of statistical modeling.
CO 4: Able to understand the difference between parametric and non parametric tests and applications of various non parametric tests
CO 5: Ability to apply statistical concepts and statistical techniques with respect to the point estimation, hypothesis testing and confidence sets.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	IV	STA245AS	Applied Statistics

CO 1: Understand census data, Fertility and Mortality rates, standardized death rates, components of complete and abridged life tables, reproduction rates. Notation of population projection.
CO 2: Able to understand the different components of time series, analysis of time series data and measurement of trend and its applications.
CO 3: Analysis of time series data and measurement of seasonal variations – methods and its applications. Use of multiplicative model in measurement of seasonal fluctuations.
CO 4: Understanding the Concept of Index numbers, calculation of unweighted and weighted different index numbers for price and quantity, construction of cost of living index number and whole sale price index numbers.
CO 5: Understanding the Concept of demand and supply, price elasticities of supply and demand, methods of determining demand and supply curves and Pareto law of income distribution curves of concentration

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MES, MSCs)	V	STA356OR	Operations Research

CO 1: Development of Operations Research(OR), Scope, Features and Management application of OR, Role of OR in decision making, Development of OR in India. Role of computers in OR.
CO 2: Understand the concept of Sequencing Problem, Johnson's algorithm for Processing n Jobs through two machines, processing n jobs through three machines, processing two jobs through m machines.
CO 3: Understand the concept of Assignment problem, Formulation of mathematical model and to solve Assignment problems with Hungarian method.
CO 4: Understand the concept of Transportation problem, Formulation of mathematical model and to find initial basic feasible solution and optimal solution using Modified Distribution method.
CO 5: Understand the concept of Competitive strategies, Principle of Minimax and Maximin rule, definitions of Saddle point, Payoff matrix, Zero Sum game and Value of the game, Dominance and modified dominance property and its applications.

Program	Semester	Course Code	Course Name

B. Sc.,(MSP, MES, MSCs)	VI	STA357BDR	Basic Statistical Data Analysis Using R

CO 1: Get basic knowledge on data types, functions and packages in R.
CO 2: Understand the functioning of the data in R
CO 3: Apply R-functions to data visualization.
CO 4: Generate statistical analysis viz., fitting of curves and probability distribution using R.
CO 5: Importing data and code editing, applying Hypothesis testing and generating statistical analysis.

Statistics - Big data Analytics, Artificial Intelligence

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	I	STA111SM	Statistical Methods

CO 1: Organize, manage and present data and to analyze statistical data graphically using frequency distributions and cumulative frequency distributions
CO 2: Concept of Principle of least squares and fitting of curves viz., polynomials, exponential and power curves
CO 3: Bivariate data- graphical representation, frequency distribution, conditional frequency distribution. Karl Pearson's Correlation coefficient, Spearman's Rank Correlation Coefficient and its properties.
CO 4: Regression line and its properties, diagnostics of regression line, Multiple correlation, Partial correlation and multiple regression lines for trivariate data
CO 5: Dealing attributive nature of data, classification and its frequencies, consistency, independency and association of attributes and their properties

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	II	STA112BPT	Basic Probability Theory

CO 1: Understand the basic concepts of probability, various definitions and axioms and discrete and continuous random variables
CO 2: Calculate probabilities, and derive the mathematical expectation, marginal and conditional distributions of bivariate random variables.
CO 3: Expectation of random variable and its properties and various functions of random variable.
CO 4: Concept of bivariate random variable and its joint and marginal probabilities. Properties of bivariate random variables. Applications of Cauchy Schwarz Inequality .
CO 5: Concept of weak law of large numbers, Bernoulli's Law of Large Numbers. Applications of Chebyshev's Inequality and central limit theorem

Program	Semester	Course Code	Course Name

B. Sc., (Big data Analytics, Artificial Intelligence)	III	STA233PD	Probability Distributions

CO 1: Univariate discrete probability distributions viz., Bernoulli Binomial and Poisson distributions, properties and their applications
CO 2: Univariate discrete probability distributions viz., Negative Binomial, Geometric and Hypergeometic distributions, properties and their applications
CO 3: Univariate continuous probability distribution - Normal distribution properties and its applications, standard normal variate, problems on normal area property
CO 4: Univariate continuous probability distributions viz., Cauchy, Exponential, Gamma and Beta Hypergeometic distributions, properties and their applications
CO 5: Concept of population, sample, parameter and statistic. Sampling distribution of data and basic sampling distribution viz., t, F and Chi square and its properties and their interrelationships

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	IV	STA244ETH	Basic Theory of Estimation & Testing of Hypothesis

CO 1: Concept of Estimation –properties of good estimator and method of parametric estimation and confidence intervals
CO 2: Applications of large sample tests for variables and attributes and Fishers Z transformation and its applications
CO 3: Applications of small sample tests viz., t- test for single mean, equality of two means, paired observations and sample correlation coefficients,. F test for equality of two variances
CO 4: Chi-Square test for Goodness of fit and Independence of Attributes
CO 5: Able to understand the difference between parametric and non parametric tests and applications of various non parametric tests

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	V	STA355AS	Applied Statistics

CO 1: Concept of population and sample, census and sample survey, sampling errors, probability and non-probability sampling techniques. Simple random sampling, Stratified and Systematic sampling and their properties
CO 2: Select and design an appropriate method of data collection for a research project; Apply basic principles in the design of simple experiments viz., ANOVA, CRD and RBD designs
CO 3: Able to understand the different components of time series, analysis of time series data and measurement of trend and its applications.
CO 4: Understanding the Concept of Index numbers, calculation of unweighted and weighted different index numbers for price and quantity, construction of cost of living index number and whole sale price index numbers.
CO 5: Idea of Statistical Quality Control (SQC), process and product control, 3 sigma limits and control charts for attributes and variables.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	I	MAT 111 DE	Differential Equations

CO1: be able to find the General solution for the LDEs of first order.
CO2: be able to solve a given Differential Equation of first order but not of first degree and identify Clairaut's Equations.
CO3: be able to solve homogeneous LDEs of higher order with constant coefficients.
CO4: be able to solve second order LDEs with Variable coefficients.
CO5: be able to find Orthogonal Trajectories of a family of curves, be able to solve Simultaneous differential equations.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	II	MAT 122 ASG	Analytical Solid Geometry

CO 1: get the knowledge of various forms of planes, straight line, sphere, cone and cylinder.
CO 2: be able to find the angle between the planes, Bisector planes, perpendicular distance from a point to the plane, point of intersection of lines.
CO 3: be able to describe coplanar lines and compute angle between planes and lines.
CO 4: get the knowledge of skew lines and be able to find the shortest distance.
CO 5: be able to define the plane section of the sphere and to find the limiting points.
CO 6: be able to understand the concept of right circular cone and right circular cylinder.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	III	MAT 233AA	Abstract Algebra

At the end of the course students will be able to:
CO 1: acquire the basic knowledge and structure of groups, subgroups and cyclic groups.
CO 2: get the significance of the notation of a normal subgroup.
CO 3: understand permutations in Group Theory and operations on them.
CO 4: study the homomorphisms and isomorphisms with applications.
CO 5: understand the basic concepts in ring theory.
CO 6: understand the applications of ring theory in various fields.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	III	MAT233DM	Discrete Mathematics

At the end of the course students will be
CO 1: able to apply principles and concepts of discrete mathematics in practical situations.
CO 2: able to Identify basic concepts of trees, rooted trees and boolean algebra expressions.
CO 3: able to compute the distance in graphs and weighted graphs.
CO 4: able to find a relation that is reflexive, anti-symmetric and transitive.
CO 5: able to apply this knowledge in computer science applications.
CO 6: able to understand the various types of properties of sets and logical gates

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	IV	MAT244RA	Real Analysis

At the end of the course students will be able to:
CO 1: identify the behavior of a sequence by employing relevant results
CO 2: analyzethe nature of a series by applying suitable test ofconvergence
CO 3: verify the continuity of a function and type of discontinuity
CO 4: apply the geometrical interpretation of differentiation and mean value theorems
CO 5: prove fundamental theorem and mean value theorems using the concept of Riemann integration
CO 6: solve problems in Real analysis using the inter dependability of continuity and differentiation of the real valued functions and Riemann integration of a bounded function

.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	IV	MAT 245 LA	Linear Algebra

At the end of the course student will
CO 1: understand the concepts of vector spaces, subspaces and their properties
CO 2: understand the concepts of basis, dimension and their properties
CO 3: understand the concepts of elementary matrix operations
CO 4: understand the concepts of linear transformations and their properties
CO 5: be able to describe the concepts of eigenvalue, eigenvector andcharacteristic polynomials
CO 6: understand the properties of inner product spaces and determine orthogonality in inner product spaces.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	IV	MAT244NA	Numerical Analysis

At the end of the course students will be able CO CO 1: gain basic knowledge in Numerical methods.
CO 2: use several methods of solving algebraic and transcendental equations of one variable.
CO 3: recognize the contribution and impacts of Numerical Analysis in real life problems.
CO 4: analyze and interpret information from a variety of sources relevant to Numerical Analysis.
CO 5: use information and communication technology to discuss problems relevant to Numerical Analysis.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	V	MAT356NM	Numerical Methods

CO 1: understand the subject of various numerical methods that are used to obtain approximate solutions
CO 2: Understand various finite difference concepts and interpolation methods.
CO 3: Work out numerical differentiation and integration whenever and wherever routine methods are not applicable.
CO 4: Find numerical solutions of ordinary differential equations by using various numerical methods.
CO 5: Analyze and evaluate the accuracy of numerical methods.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	V	MAT357MSF	Mathematical Special Functions

CO 1: Students will gain a comprehensive understanding of special functions,
CO 2: Students will develop strong problem-solving skills by applying properties, transformations, and generating functions associated with special functions.
CO 3: Students will learn to create mathematical models for real-world phenomena using special functions.
CO 4: Students will master various analytical techniques, including orthogonal properties, recurrence relations, and generating functions.
CO 5: Students will be introduced to advanced mathematical concepts such as differential equations and integrals.

Program	Semester	Course Code	Course Name
B.Sc / B.A (Mathematics CC)	I	MAT CC QA	Quantitative Aptitude

At the end of the course student will be able to
CO 1: improve the basic Mathematical skills which will be useful in the preparation for any type of Competitive examination.
CO 2: Enhance the problem solving skills by developing a strong foundation in Mathematics.
CO 3: apply the skills and competencies acquired in the related areas.
CO 4: demonstrate number sense, including dimensional analysis and conversions between fractions, decimals, and percentages.
CO 5: determine when approximations are appropriate and when exact calculations are necessary.

DEPARTMENT OF ELECTRONICS

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	I	ELE111NAE	Network Analysis and Analog Electronics

At the end of the course student will
CO 1: Students will be able to know the basic concepts of an electrical circuit and can be able to analyze the networks
CO 2: Ability to solve different electrical circuits and using different solving methods
CO 3: Acquires the basic knowledge of physical and electrical conducting properties of semiconductor devices like diodes and their real time applications
CO 4: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret device applications CO 5: Able to design various amplifier circuits using BJT and FET and observe their frequency of responses and applications.
CO 6: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in electronic circuits
CO 7: Will be able to analyze, build, and troubleshoot electronic circuits using diodes and transistors
CO 8: Also, able to know a wide range of applications of transistors, feedback concepts and its applications as oscillators.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	II	ELE123LDC	Linear and Digital Integrated Circuits

At the end of the course student will
CO 1: Understand the concepts needed to explain the basic electronics of logic circuits and be able to use integrated circuit packages.
CO 2: Analyze the fundamentals and areas of applications for the integrated circuits and analyze important types of integrated circuits.
CO 3: Demonstrate the ability to design practical circuits that perform the desired operations and will be
able to interpret logic functions, circuits, truth tables, and Boolean algebra expressions.
CO 4: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in integrated circuits
CO 5: Will be able to analyze, build, and troubleshoot combinatorial circuits using digital integrated circuits
CO 6: Design, set up, and carry out experiments; analyze data, Select the appropriate integrated circuit modules to build a given application

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	II	ELE124PEP	PCB and Electronic Product Design

At the end of the course student will
CO 1: Understanding the Electrical & Electronic Components: Different Active and passive Components and their Symbolic representations and notations, Electrical & Electronic circuit

representations, Surface Mount Technology, Need for SMD, Surface Mount Semiconductor packages
CO 2: Understand the concepts needed to explain IPC standards block diagrams circuit Schematic representations, Circuit Documentation and Editing.
CO 3: Understand the evolution of PCBs, components of PCBs, Characteristics of PCB, Types of PCBs, IPC standards of PCBs, Terminology in PCB's PCB Design Techniques: Layout planning & Design – Block diagram, schematic diagram, General PCB design considerations, Artwork
CO 4: Understanding the Types of laminates, properties of laminates-electric, dielectric strength, dielectric break down properties, selection of copper clad laminate, Useful standards, PCB design check list Image transfer techniques, plating process, etching process. Conformal coating, drilling, solder mask.
CO 5: Analyze Production methods Lead Forming, lead Stand Offs, Lead Clinching styles, soldering, importance of soldering Eutectic Solder, Wetting Actions, Soldering tools- Soldering iron, solder, Cutter, flux, tweezer & Cleaning sponge,
CO 6: Equipment harness and testing Wire Harness and Crimping - Different types of wires and cables, different terminations, different connector styles, Different types of Lugs, Crimping methods, Lacing methods, Wire wrapping method Testing Methods – Module testing, Functional Testing, Routine testing, Environmental testing, Reliability testing.

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	III	ELE235MP	Microprocessors

At the end of the course student will
CO 1: Describe the architecture of 8085 and 8086:
CO 2: Illustrate the organization of registers and memory in microprocessors.
CO 3: Differentiate Minimum and Maximum Mode bus cycle.
CO 4: Identify the addressing mode of an instruction.
CO 5: Develop programming skills in assembly language. CO 6: Explain the need for different interfacing devices. CO 7: Compare the concepts of CISC and RISC processors.
CO 8: Recall and apply a basic concept of digital fundamentals to Microprocessor based personal computer system.
CO 9: Identify a detailed s/w & h/w structure of the Microprocessor.
CO 10: Illustrate how the different peripherals (8255, 8253 etc.) are interfaced with Microprocessor.
CO 11: Train their practical knowledge through laboratory experiments.

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	III	ELE236LDF	LED Lighting Design Fundamentals and Testing

At the end of the course student will
CO 1: Understand basics of LED technology and distinguish working principle of LED, incandescent, fluorescence, CFL and HID lamps.

CO 2: Know importance of proper thermal, electrical, mechanical and optical design of LED luminaires and interpretation of LED data sheets.
CO 3: Understand importance of secondary optics in LED luminaries and dependance of viewing angle, illuminance factor of a luminaire on secondary optics.
CO 4: Analyze role of diffuser in elimination of multiple source shadow effect of LED luminaire and minimizing glaring effect.
CO 5: Estimate viewing angle, Illuminance pattern and efficacy of a given luminaire.
CO 6: Design constant voltage, constant current power supplies with required power rating and protections.
CO 7: Estimate heat dissipation at different stages of LED luminaire- at junction, on PCB footprints, bottom of PCB and inside the enclosure. Thermal performance'
CO 8: Access LED luminaire electrically, thermally, optically and mechanically.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	IV	ELE247EI	Electronic Instrumentation

At the end of the course student will

CO 1: Measure various electrical parameters with accuracy, precision, resolution.
CO 2: Use AC and DC bridges for relevant parameter measurement.
CO 3: Select appropriate passive or active transducers for measurement of physical Phenomenon.
CO 4: Use Signal Generator, frequency counter, CRO and digital IC tester for Appropriate measurement.
CO 5: Test and troubleshoot electronic circuits using various measuring instruments. vi. Maintain various types of test and measuring instruments.
CO 6: Ability to identify, apply and distinguish sensor and transducers for measurement of Biological parameters in medical instrumentation systems.
CO 7: Ability to design, assemble, analyze, and evaluate basic circuits in medical Instrumentation.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	IV	ELE248SLA	Solid State Lighting Applications

At the end of the course student will
CO 1: Understand various photometric quantities, importance of these quantities in lighting applications.
CO 2: Identify different types of solid state luminaires and their applications. Suggested

illuminance levels for various applications.
CO 3: Plan and design lighting for residential and retail areas, able to draw lighting design layout and ableto evaluate lighting design.
CO 4: Plan and lighting design for any type of road, able to design lighting poles with arm inclination.
CO 5: Evaluate given light source electrically, optically and thermally. Estimate efficiency of given light source.
CO 6: Understand difference between rail and road signal lighting and evaluation Design smart lighting control system with Wi-Fi, Bluetooth and IR communication.

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	V	ELE359MCI	Micro Controller and Interfacing

At the end of the course student will
CO 1: Give an understanding about the concepts and basic architecture of 8051
CO 2: Provide an overview of difference between microprocessor and microcontroller
CO 3: Provide background knowledge and core expertise in microcontroller
CO 4: Study the architecture and addressing modes of 8051
CO 5: Impart knowledge about assembly language programs of 8051
CO 6: Help understand the importance of different peripheral devices & their interfacing to 8051
CO 7: Impart knowledge of different types of external interfaces including LEDS, LCD, Keypad Matrix, Switches & Seven segment display

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	V	ELE35XCS	Communication Systems

At the end of the course student will
CO 1: Understand different modulation and demodulation techniques used in analog communication Compare and contrast design issues, advantages, disadvantages and limitations of analog communication systems
CO 2: Apply knowledge in
A. Elements of Pulse and Digital Communication systems
B. Various types of pulse modulations
C. Digitization techniques such as PCM & DPCM
D. both the multiplexing techniques
E. Digital carrier modulation techniques ASK, FSK
CO 3: Overview of optical fiber communication system, its importance and applications
CO 4: To make students familiar with various generations of mobile communications 2G, 2: 5G, 3G with their characteristics and limitations.
A. To understand the concept of cellular communication
B. To understand the basics of wireless communication
CO 5: Understand GSM, CDMA concepts and architecture, frame structure, system capacity, services provided.
A. summarize the principles and applications of wireless systems and standards
B. Demonstrate an ability explain multiple access techniques for Wireless Communication

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	VI	ELE36XIAMC	Advanced Microcontrollers

At the end of the course student will
CO 1: Importance of C in embedded systems, ANSI standards, fundamentals of C, data types, constants, formatted IO, loops, function, arrays and pointers.
CO 2: Understanding of PIC microcontroller, features of PIC, register organization, PIC reset

actions, oscillator connections, PIC memory organization, PIC instructions, PIC addressing modes, I/O ports & interrupts, PIC timers, PIC ADC.
CO 3: Understand the ARM7TDMI, cortex –m0, m3, m4, multi core processors and feature trends, study of ARM cortex-m3 and core and controllers, introduction to firmware life cycle basics on firmware IDE's and their debugging & simulation technologies.
CO 4: Data communication, Serial communication, communication modes and interrupt programming.
CO 5: Introduction and interfacing controllers of wired & wireless communication UART, SPI, I2C, CAN interfacing Zigbee, wi-fi and Bluetooth.
CO 6: Understanding the basic concepts of sensors and actuators, cloud computing and atmega328 microcontrollers, Arduino platform, open-source microcontroller platforms, Arduino board layout & architecture Arduino programming fundamentals, sensors interfacing with Arduino, temperature sensor, DHT11, Ultrasonic sensor and wi-fi.

Program	**Semester**	**Course Code**	**Course Name**
B.Sc. (MECS)	VI	ELE36XIIC1PE	Power Electronics

At the end of the course student will
CO 1: Will know about the generation of power electronics and family of thyristors
CO 2: Will know about the basic thyristor-SCR and its applications.
CO 3: Will know about other thyristors like diac, triac ,igbt, power MOSFET.
CO 4: Will know about the procedure to convert ac to dc as a chopper concept.
CO 5: Will know about single phase power supply and their types with and without reactive feedback.
CO 6: Will know about the types of motor, their construction, thyristor-based motors

Electronics Technology			
Program	**Semester**	**Course Code**	**Course Name**
B.Sc.(ELE CS)	I	ELE111NAE	Network Analysis and Analog Electronics

CO 1: Students will be able to know the basic concepts of an electrical circuit and can be able to analyze the networks
CO 2: Ability to solve different electrical circuits and using different solving methods
CO 3: Acquires the basic knowledge of physical and electrical conducting properties of semiconductor devices like diodes and their real time applications
CO 4: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret device applications
CO 5: Able to design various amplifier circuits using BJT and FET and observe their frequency of responses and applications.
CO 6: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in electronic circuits
CO 7: Will be able to analyze, build, and troubleshoot electronic circuits using diodes and transistors
CO 8: Also, able know wide range of applications of transistors, feedback concepts and its applications as oscillators

Program	**Semester**	**Course Code**	**Course Name**
B.Sc.(ELE CS)	I	ELE112FEC	Fundamentals of Electrical and Electronic Components

At the end of the course student will

CO 1: Understand generation of AC signal, different types of AC wave forms, and terms of AC signal, rectangular to polar and polar to rectangular conversions.
CO 2: Know about basic circuit elements and their behavior in DC circuits. Transient response of RC & RL in DC circuits.
CO 3: Analyses frequency response, Q- factor and bandwidth of series and parallel resonant circuits.
CO 4: Understand construction and working of Transformers & analyzes line and load regulation in transformers.
CO 5: To identify different types of switches and select suitable switches for specific applications.
CO 6: Know the construction and working of DC linear motor, stepper motor, buzzer and loudspeaker.
CO 7: Identify different types of sensors, know their sensing techniques of LDR, Thermistor, LPG, Load cell and LVDT.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	I	ELT111CE	Consumer Electronics

At the end of the course student will

CO 1: Will know about the Microwaves (Range used in Microwave Ovens), Microwave oven block diagram, LCD timer with alarm, Single Chip Controllers, Types of Microwave oven, Wiring and Safety instructions, Care and Cleaning.
CO 2: Will know about the Electronic controller for washing machines , Washing machine hardware and software, Types of washing machines , Fuzzy logic washing machines Features of washing machines.
CO 3: Will know about the Air Conditioning, Components of air conditioning systems, All water air conditioning systems, All air conditioning systems, Unitary and central air conditioning systems, Split air conditioners.
CO 4: Will know about the Facsimile machine, Xerographic copier, Calculators, Structure of a calculator, Internal Organization of a calculator, Servicing electronic calculators, Digital clocks, Block diagram of a digital clock.
CO 5: Will know about the Digital computer, Internet access , Online ticket reservation, Functions and networks, Barcode Scanner and decoder, Electronic Fund Transfer, Automated Teller Machines (ATMs) , Set-Top boxes , Digital cable TV, Video on demand.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	II	ELE123LDC	Linear and Digital Integrated Circuits

At the end of the course student will

CO 1: Understand the concepts needed to explain the basic electronics of logic circuits and be able to use integrated circuit packages.
CO 2: Analyze the fundamentals and areas of applications for the integrated circuits and analyze important types of integrated circuits.
CO 3: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret logic functions, circuits, truth tables, and Boolean algebra expressions.
CO 4: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in integrated circuits
CO 5: Will be able to analyze, build, and troubleshoot combinatorial circuits using digital integrated circuits
CO 6: Design, set up, and carry out experiments; analyze data, Select the appropriate integrated circuit modules to build a given application

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	II	ELE124PEP	PCB and Electronic Product Design

At the end of the course student will

CO 1: Understanding the Electrical & Electronic Components: Different Active and passive Components and their Symbolic representations and notations, Electrical & Electronic circuit representations, Surface Mount Technology, Need for SMD, Surface Mount Semiconductor packages

CO 2: Understand the concepts needed to explain IPC standards block diagrams circuit Schematic representations, Circuit Documentation and Editing.

CO 3: Understand the evolution of PCBs, components of PCBs, Characteristics of PCB, Types of PCBs, IPC standards of PCBs, Terminology in PCB's PCB Design Techniques: Layout planning & Design – Block diagram, schematic diagram, General PCB design considerations, Artwork

CO 4: Understanding the Types of laminates, properties of laminates-electric, dielectric strength, dielectric break down properties, selection of copper clad laminate, Useful standards, PCB design checklist Image transfer techniques, plating process, etching process. Conformal coating, drilling, solder mask.

CO 5: Analyze Production methods Lead Forming, lead Stand Offs, Lead Clinching styles, soldering, importance of soldering Eutectic Solder, Wetting Actions, Soldering tools-Soldering iron, solder, Cutter, flux, tweezer & Cleaning sponge,

CO 6: Equipment harness and testing Wire Harness and Crimping - Different types of wires and cables, different terminations, different connector styles, Different types of Lugs, Crimping methods, Lacing methods, Wire wrapping method Testing Methods – Module testing, Functional Testing, Routine testing, Environmental testing, Reliability testing.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	II	ELT122PMT	PC Maintenance and Trouble Shooting

At the end of the course student will

CO 1: Will know about the generations of computers based on technology, what things he/she sees inside the central processing cabin, and different types of input and out devices.

CO 2: Will know about motherboard design, different types of components presented on the motherboard and internal process of motherboard.

CO 3: Will know about different ports and their communication between inputs, output devices with the CPU section.

CO 4: Will know about different power connection sockets and their importance and different ways to apply power to the computers.

CO 5: Will know about different types of memory and storage devices with internal structures.

CO 6: Will know how to assemble a personal computer and installation procedures of operating systems and applications with examples like windows XP, MS office etc.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELE235MP	Microprocessors

At the end of the course student will
CO 1: Describe the architecture of 8085 and 8086:
CO 2: Illustrate the organization of registers and memory in microprocessors.
CO 3: Differentiate Minimum and Maximum Mode bus cycle.
CO 4: Identify the addressing mode of an instruction.
CO 5: Develop programming skills in assembly language.
CO 6: Explain the need for different interfacing devices.
CO 7: Compare the concepts of CISC and RISC processors.
CO 8: Recall and apply a basic concept of digital fundamentals to Microprocessor based personal computer systems.
CO 9: Identify a detailed s/w & h/w structure of the Microprocessor.
CO 10: Illustrate how the different peripherals (8255, 8253 etc.) are interfaced with Microprocessor.
CO 11: Train their practical knowledge through laboratory experiments.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELE236LDF	LED Lighting Design Fundamentals and Testing

At the end of the course student will

CO 1: Understand basics of LED technology and distinguish working principle of LED, incandescent, fluorescence, CFL and HID lamps.
CO 2: Know importance of proper thermal, electrical, mechanical and optical design of LED luminaires and interpretation of LED data sheets.
CO 3: Understand importance of secondary optics in LED luminaries and dependence of viewing angle, illuminance factor of a luminaire on secondary optics.
CO 4: Analyze role of diffuser in elimination of multiple source shadow effect of LED luminaire and minimizing glaring effect.
CO 5: Estimate viewing angle, Illuminance pattern and efficacy of a given luminaire.
CO 6: Design constant voltage, constant current power supplies with required power rating and protections.
CO 7: Estimate heat dissipation at different stages of LED luminaire- at junction, on PCB footprints, bottom of PCB and inside the enclosure. Thermal performance'
CO 8: Access LED luminaire electrically, thermally, optically and mechanically.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELT233BN	Basics of Networks

At the end of the course student will

CO 1: Know about Computer Network basics and types of Networking, different types of Network Topologies. Definitions and introduction of Internet, Ethernet, Wi-Fi, Bluetooth, Mobile Networking, Wire and wireless Networking.
CO 2: Know about Communication Media & Connectors and different types of cable. Understand color codes of CAT5 cable.
CO 3: Know about Data Communication types of Communication and Serial port Checking Software in both terminal and nonterminal methods.
CO 4: Know about Sessions and presentation aspects of DNS, Telnet, rlogin, FTP, SMTP WWW Basics of Firewalls
CO 5: Packet switching networks, Frame Relay networks, Asynchronous transfer mode ATM in detail.
CO 6: Know about different types of Networking Components like Hubs, Bridges, Gateways.
CO 7: How to address, types of addressing, Subnetting , types of subnetting, Domain, types of domain.
CO 8: Know about networking protocols.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE247EI	Electronic Instrumentation

At the end of the course student will
CO 1: Measure various electrical parameters with accuracy, precision, resolution.
CO 2: Use AC and DC bridges for relevant parameter measurement.
CO 3: Select appropriate passive or active transducers for measurement of physical Phenomenon.
CO 4: Use Signal Generator, frequency counter, CRO and digital IC tester for Appropriate measurement.
CO 5: Test and troubleshoot electronic circuits using various measuring instruments. vi. Maintain various types of test and measuring instruments.
CO 6: Ability to identify, apply and distinguish sensor and transducers for measurement of Biological parameters in medical instrumentation systems.
CO 7: Ability to design, assemble, analyze, and evaluate basic circuits in medical Instrumentation.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE248SLA	Solid State Lighting Applications

At the end of the course student will
CO 1: Understand various photometric quantities, importance of these quantities in lighting applications.
CO 2: Identify different types of solid state luminaires and their applications. Suggested illuminance levels for various applications.
CO 3: Plan and design lighting for residential and retail areas, able to draw lighting design layout and able to evaluate lighting design.
CO 4: Plan and lighting design for any type of road, able to design lighting poles with arm inclination.
CO 5: Evaluate given light source electrically, optically and thermally. Estimate efficiency of given light source.
CO 6: Understand difference between rail and road signal lighting and evaluation Design smart lighting control system with Wi-Fi, Bluetooth and IR communication

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE249MCI	Micro controller and Interfacing

At the end of the course student will
CO 1: Give an understanding about the concepts and basic architecture of 8051
CO 2: Provide an overview of difference between microprocessor and microcontroller
CO 3: Provide background knowledge and core expertise in microcontroller
CO 4: Study the architecture and addressing modes of 8051
CO 5: Impart knowledge about assembly language programs of 8051
CO 6: Help understand the importance of different peripheral devices & their interfacing to 8051
CO 7: Impart knowledge of different types of external interfaces including LEDS, LCD, Keypad Matrix, Switches & Seven segment display

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELT244CNS	Computer Networks and Network Security

At the end of the course student will
CO 1: Know about implementing a computer network mainly on fundamentals of wireless network, performance, Wireless Network Structure and components, Difference between Wired and Wireless Network
CO 2: Know about Packet switching and circuit switching and different types of data processing methods
CO 3: Know about Hardware upgrade, Software upgrades and Network upgradesCO 4: Know about Backing up network data- different types of Backups, scheduling backups, backing up and restoring data.
CO 5: Know about Network security, Authentication and authorization, user level security and share level security. Auditing and configuring auditing audit policy.
CO 6: Know about Firewall-architecture of firewall, types of firewalls, internet protocol security-enabling Internet Protocol Security (IP Sec) on windows 2000 server.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XCS	Communication Systems

At the end of the course student will

CO 1: Understand different modulation and demodulation techniques used in analog communication

A. Analyze transmitter and receiver circuits
B. Compare and contrast design issues, advantages, disadvantages and limitations of analog communication systems

CO 2: Apply knowledge in

A. Elements of Pulse and Digital Communication systems

B. Various types of pulse modulations

C. Digitization techniques such as PCM & DPCM

D. both the multiplexing techniques

E. Digital carrier modulation techniques ASK, FSK

CO 3: Overview of optical fiber communication system, its importance and applications

CO 4: To make students familiar with various generations of mobile communications 2G, 2: 5G, 3G with their characteristics and limitations.

A. To understand the concept of cellular communication

B. To understand the basics of wireless communication

CO 5: Understand GSM, CDMA concepts and architecture, frame structure, system capacity, services provided.

A. summarize the principles and applications of wireless systems and standards

B. Demonstrate an ability explain multiple access techniques for Wireless Communication

CO 6: Solve problems pertaining to modulation schemes, transmitters and receivers.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIAMC	Advanced Microcontrollers

At the end of the course student will

CO 1: Importance of C in embedded systems, ANSI standards, fundamentals of C, data types, constants, formatted IO, loops, function, arrays and pointers.
CO 2: Understanding of PIC microcontroller, features of PIC, register organization, PIC reset actions, oscillator connections, PIC memory organization, PIC instructions, PIC addressing modes, I/O ports & interrupts, PIC timers, PIC ADC.

CO 3: Understand the ARM7TDMI, cortex –m0, m3: m4, multi core processors and feature trends, study of ARM cortex-m3 and core and controllers, introduction to firmware life cycle basics on firmware IDE's and their debugging & simulation technologies.
CO 4: Data communication, Serial communication, communication modes and interrupt programming.
CO 5: Introduction and interfacing controllers of wired & wireless communication UART, SPI, I2C, CAN interfacing Zigbee, wi-fi and Bluetooth.
CO 6: Understanding the basic concepts of sensors and actuators, cloud computing and atmega328 microcontrollers, Arduino platform, open source microcontroller platforms, Arduino board layout & architecture Arduino programming fundamentals, sensors interfacing with Arduino, temperature sensor, DHT11, Ultrasonic sensor and wi-fi

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIIPE	Power Electronics

At the end of the course student will
CO 1: Will know about the generation of power electronics and family of thyristors
CO 2: Will know about the basic thyristor-SCR and its applications.
CO 3: Will know about other thyristors like diac, triac ,igbt, power MOSFET.
CO 4: Will know about the procedure to convert ac to dc as a chopper concept.
CO 5: Will know about single phase power supply and their types with and without reactive feedback.
CO 6: Will know about the types of motor, their construction, thyristor-based motor

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIIIRES	Renewable Energy Sources

At the end of the course student will

CO 1: Identify energy demand and relate with available energy resources. Describe the environmental aspects of non-conventional energy resources. In Comparison with various conventional energy systems, their prospects and limitations. Know the need of renewable energy resources, historical and latest developments.

CO 2: Estimate the solar energy, Utilization of it, Principles involved in solar energy collection and conversion of it to electricity generation with respect to applications like - heating, cooling, desalination, power generation, drying, cooking etc.

CO 3: Explore the concepts involved in wind energy conversion system by studying its components used in energy generation and know the classifications, types and performance.

CO 4: Illustrate Ocean energy and explain the operational methods of their utilization.

CO 5: Acquire the knowledge on Geothermal energy.

CO 6: Solve problems pertaining to modulation schemes, transmitters and receivers.

CO 7: Acquire the knowledge of fuel cells, wave power, tidal power and geothermal principles and applications.

Program	Semester	Course Code	Course Name
B.Sc.	I	PHY111MWO	MECHANICS WAVES AND OSCILLATIONS

At the end of the course student will

CO 1: Understand Newton’s laws of motion and motion of variable mass system and its application to rocket motion and the concepts of impact parameter, scattering cross section.

CO 2: Apply the rotational kinematic relations, the principle and working of gyroscope and it applications and the precessional motion of a freely rotating symmetric top.

CO 3: Comprehend the general characteristics of central forces and the application of Kepler’s laws to describe the motion of planets and satellite in circular orbit through the study of law of Gravitation.

CO 4: Understand postulates of Special theory of relativity and its consequences such as length contraction, time dilation, relativistic mass and mass-energy equivalence.

CO 5: Examine phenomena of simple harmonic motion and the distinction between undamped, damped and forced oscillations and the concepts of resonance and quality factor with reference to damped harmonic oscillator.

CO 6: Evaluation of Fourier constants and the analysis of square wave and Saw-tooth wave using Fourier’s theorem.

CO 7: Figure out the formation of harmonics and overtones in a stretched string and acquire the knowledge on Ultrasonic waves, their production and detection and their applications in different fields.

Program	Semester	Course Code	Course Name
B.Sc.	II	SDC122SE	ELECTRICAL APPLIANCES

By successful completion of the course, students will be able to:
CO 1: Acquire necessary skills/hand on experience/ working knowledge on multimeters, galvanometers, ammeters, voltmeters, ac/dc generators, motors, transformers, single phase and three phase connections, basics of electrical wiring with electrical protection devices.
CO 2: Understand the working principles of different household domestic appliances.
CO 3: Check the electrical connections at house-hold but will also learn the skill to repair the electrical appliances for the general trouble -hoots and wiring faults.

Program	Semester	Course Code	Course Name
B.Sc.	II	PHY122WO	WAVE OPTICS

On successful completion of this course, the student will be able to:
CO 1: Understand the phenomenon of interference of light and its formation in (i) Lloyd's single mirror due to division of wave front and (ii) Thin films, Newton's rings and Michelson interferometer due to division of amplitude.
CO 2: Distinguish between Fresnel's diffraction and Fraunhofer diffraction and observe the diffraction patterns in the case of single slit and the diffraction grating.
CO 3: Describe the construction and working of the zone plate and make the comparison of the zone plate with a convex lens.
CO 4: Explain the various methods of production of plane, circularly and polarized light and their detection and the concept of optical activity.
CO 5: Comprehend the basic principle of laser, the working of He-Ne laser and Ruby lasers and their applications in different fields.
CO 6: Explain about the different aberrations in lenses and discuss the methods of minimizing them.
CO 7: Understand the basic principles of fiber optic communication and explore the field of Holography and Nonlinear optics and their applications

Program	Semester	Course Code	Course Name
B.Sc.	II	PHY121SE	SOLAR ENERGY

After successful completion of the course, students will be able to:
CO 1: Acquire knowledge on solar radiation principles with respect to solar energy estimation.
CO 2: Get familiarized with various collecting techniques of solar energy and its storage
CO 3: Learn the solar photovoltaic technology principles and different types of solar cells for energy conversion and different photovoltaic applications.
CO 4: Understand the working principles of several solar appliances like Solar cookers, Solar hot water systems, Solar dryers, Solar Distillation, Solar greenhouses

Program	Semester	Course Code	Course Name
B.Sc.	III	PHY233TH	THERMODYNAMICS

On successful completion of this course, the student will be able to:
CO 1: Understand the basic aspects of kinetic theory of gasses, Maxwell-Boltzman distribution law, equipartition of energies, mean free path of molecular collisions and the transport phenomenon in ideal gasses
CO 2: Gain knowledge on the basic concepts of thermodynamics, the first and the second law of thermodynamics, the basic principles of refrigeration, the concept of entropy, the thermodynamic potentials and their physical interpretations.
CO 3: Understand the working of Carnot's ideal heat engine, Carnot cycle and its efficiency
CO 4: Develop critical understanding of the concept of Thermodynamic potentials, the formulation of Maxwell's equations and its applications.
CO 5: Differentiate between principles and methods to produce low temperature and liquefy air and also understand the practical applications of substances at low temperatures.
CO 6: Examine the nature of black body radiations and the basic theories.

Program	Semester	Course Code	Course Name
B.Sc.	IV	PHY244EME	ELECTRICITY MAGNETISM & ELECTRONICS

On successful completion of this course, the students will be able to:
CO 1: Apply knowledge of electricity and magnetism to explain natural physical processes and related technological advances.
CO 2: Use an understanding of calculus along with physical principles to effectively solve problems encountered in everyday life, further study in science, and in the professional world.
CO 3: Design experiments and acquire data in order to explore physical principles, effectively communicate results, and critically evaluate related scientific studies.
CO 4: Assess the contributions of physics to our evolving understanding of global change and sustainability while placing the development of physics in its historical and cultural context.
CO 5: Understand electric and magnetic fields in matter
CO 6: Apply Maxwell's equations to various physical problems
CO 7: Calculate EM wave propagation

Program	Semester	Course Code	Course Name
B.Sc.	IV	PHY245MP	MODERN PHYSICS

Successful completion of this course, the students will be able to:
CO 1: Develop an understanding on the concepts of Atomic and Modern Physics, basic elementary quantum mechanics and nuclear physics.
CO 2: Develop critical understanding of concept of Matter waves and Uncertainty principle.
CO 3:Get familiarized with the principles of quantum mechanics and the formulation of Schrodinger wave equation and its applications.
CO 4: Examine the basic properties of nuclei, characteristics of Nuclear forces, salient features of Nuclear models and different nuclear radiation detectors.
CO 5: Classify Elementary particles based on their mass, charge, spin, half life and interaction.
CO 6: Get familiarized with the nano materials, their unique properties and applications.
CO 7: Increase the awareness and appreciation of superconductors and their practical applications.

Program	Semester	Course Code	Course Name
B.Sc.	V	PHY356EE	APPLICATIONS OF ELECTRICITY & ELECTRONICS

On completion of this course, the students will be able to:

CO 1: Define, state and explain various Electronic components, batteries, AC & DC generators, Modulations techniques, Transformers etc

CO 2: Understand the concepts needed to explain charging and discharging of capacitors understand the applications of thermodynamics in other disciplines like materials science and chemistry.

CO 3: Apply the laws of thermodynamics to real physical systems and processes, isothermal and adiabatic processes to heat engines, Maxwell's relations to latent and specific heat calculations and adiabatic demagnetization technique for cooling expressions.

CO 4: Integrate and apply a wide range of mathematical techniques to derive various thermodynamic laws and principles and for analyzing and solving problems in thermal physics.

CO 5: Analyze radiation phenomena in thermodynamic systems, radiation principles in designing pyrometers, Carnot's cycle in designing automobile engines, transport phenomena in process industries with reference to fluids and fluid mixtures.

CO 6: Design, set up, and carry out experiments; analyze data, compare with theoretical predictions and understand the orders of magnitudes of various quantities.

Program	Semester	Course Code	Course Name
B.Sc.	V	PHY35EI	ELECTRONIC INSTRUMENTATION

On completion of this course, the students will be able to:

CO 1: Students will be able to understand the fundamental concepts of measurements, differentiate between analog and digital instruments, and analyze sources of errors in measurements. They will also gain proficiency in using analog and digital multimeters, comprehend their specifications, and identify the significance of instrument accuracy and sensitivity in practical applications.

CO 2: Upon completion of this unit, students will acquire a comprehensive understanding of cathode ray oscilloscopes, including their principles, functioning, and various controls. They will be capable of utilizing oscilloscopes to measure DC and AC voltages, frequencies, and time periods. Additionally, students will gain knowledge about different types of oscilloscopes and their specific applications, including digital storage oscilloscopes.

CO 3: Students will be proficient in working with various transducers, such as LVDT, resistive, capacitive, inductive, and piezo-electric transducers. They will also have a deep understanding of different types of bridges, including Wheatstone's bridge, Maxwell's bridge, Schering bridge, and Wien's bridge. Students will be able to measure inductance, capacitance, and frequency accurately using these bridge circuits.

CO 4: After completing this unit, students will be skilled in designing and analyzing A/D and D/A converters, specifically understanding binary ladder and successive approximation types. They will also comprehend the principles of operation for display devices, including LED displays, seven-segment displays

CO 5: Students will have a deep understanding of amplifier classification, including RC-coupled amplifiers and their frequency response characteristics. They will be proficient in analyzing feedback in electronic circuits, understanding positive and negative feedback, gains expressions, and the advantages of negative feedback. Additionally, students will comprehend the basic operating principles and applications of biomedical instruments such as ECG machines, radiography, ultrasound scanning, ventilators, and pulse oximeters.

Program	Semester	Course Code	Course Name
B.Sc.	I	CC111PEL	PHYSICS OF EVERYDAY LIFE

Students will understand

CO 1: The importance of applications of Applied Physics in daily life
CO 2: The cause behind the relative change in motion of fluids
CO 3: The relationship between physics & technology
CO 4: To have questions & analyze the world around them
CO 5: to make students think and have abstract thinking

DEPARTMENT OF BOTANY

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	I	BOT111FMN	Fundamentals of Microbes and Non - vascular Plants.

On completion of this course, the students will be able to:
CO 1: Understand the classification of Micro organisms. Understand the Origin and Evolution of Life. Understand the general characters of special groups of Bacteria and their Importance.
CO 2: Understand the structure, replication Viruses and transmission of Plant viral diseases and their control.
CO 3: Understand and identify the structure and metabolic processes like mode of Nutrition, reproduction and economic importance in Bacteria.
CO 4: Understand and identify morphological characters, reproduction in algae(Oedogonium, Ectocarpus and Polysiphonia), classification and economic importance of Algae.
CO 5: Understand and identify morphological characters, reproduction in Rhizopus, Penicillium, Puccinia, Classification of Fungi and Economic Importance.
Understand and differentiate the structure of Lichens and their Economic Importance.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	II	BOT122BVP	Basics of Vascular plants and Phytogeography

On completion of this course, the students will be able to:
CO 1: Understand the general characters and classification of vascular plants and realize the structure of representative examples. Understand the evolutionary process
CO 2: Understand the general characters and classification of and realize the structure of representative examples
CO 3: Understand the general characters and classification of Gymnosperms and realize the structure of representative examples. To gain knowledge about life cycles of Gymnosperm plants.
CO 4: To gain knowledge of phytogeography
CO 5: To gain knowledge of geographical distribution, factors.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	III	BOT233AEAP	Anatomy, Embryology of Angiosperms, Ecology and Biodiversity

On completion of this course, the students will be able to:
CO 1: Understand the general characters and classification of Bryophytes and realize the structure of representative examples. Understand the evolutionary process of Sporophyte in Bryophytes..
CO 2: Understand the general characters and classification of Pteridophytes and realize the structure of representative examples.
CO 3: Understand the general characters and classification of Gymnosperms and realize the structure of representative examples.
CO 4: To gain knowledge of Plant cells, tissues and their functions.
CO 5: Understand the Process of Normal secondary growth and Anomalous secondary growth and realize the structure of representative examples. To gain knowledge of locally available timber plants and their economic importance

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	IV	BOT245GGP	Cell Biology, Genetics & Plant Breeding

On completion of this course, the students will be able to:

CO 1: Understand the importance of water, Understand the physical properties of water Gain knowledge on transpiration, ascent of sap etc.

CO 2: Understand the importance of ions, ionic absorption, Understand the role of nutrients and symptoms, Understand the nitrogen fixation mechanism

CO 3: Understand and explore about the structure and functions of Chloroplast and Understand carbon fixation mechanisms Understand the path of organic solutes

CO 4: Understand the importance of respiration and its types.

CO 5: Understand the plant growth and its parameters, Understand the types and role of phytohormones and physiology of flowering Understand the ageing and senescence mechanism.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	V	BOT356TC	TISSUE CULTURE

On completion of this course, the students will be able to:

CO 1: Comprehend the basic knowledge and applications of plant tissue culture.

CO 2: Identify various facilities required to set up a plant tissue culture laboratory.

CO 3: Acquire critical knowledge on sterilization techniques related to plant tissue culture.

CO 4: Demonstrate skills of callus culture through hands-on experience.

CO 5: Understand the biotransformation technique for production of secondary metabolites.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	V	BOT357MC	MUSHROOM CULTIVATION

On completion of this course, the students will be able to:

CO 1: Understand the structure and life of a mushroom and discriminate edible

CO 2: Identify the basic infrastructure to establish a mushroom culture unit.

CO 3: Demonstrate skills in preparation of compost and spawn.

CO 4: Acquire critical knowledge on cultivation of some edible mushrooms.

CO 5: Explain the methods of storage, preparation of value-added products and marketing different types of casing mixtures, commonly used materials.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	I	SDC111PN	PLANT NURSARY
On successful completion of the course, students will be able to CO 1: Gain the knowledge of different types of Nurseries, Plant Propagation, Management of Nurseries and Economics of Nurseries CO 2: Understand the importance of a Plant Nursery and Basic Infrastructure to establish a Nursery. CO 3: Learn to use the tools and techniques required for a Nursery. CO 4: Obtain skills to get employment or become an entrepreneur in the Plant Nursery sector. CO CO 5: Gain expertise related to various practices in a Nursery.			

DEPARTMENT OF COMMERCE

PROGRAM	**SEMESTER**	**COURSE CODE**	**COURSE NAME**
B.Com(GENERAL, COMPUTERS)	I	COM111FOA	FUNDAMENTALS OF ACCOUNTING
On completion of this course, the students will be able to: CO 1 To develop conceptual understanding of fundamentals of financial accounting system & to impart skills in accounting for various kinds of business transactions. CO 2 To understand knowledge of new trends in corporate accounting, preparation of subsidiary books, bank reconciliation statements, final accounts. CO 3 To develop the skills of recording financial transactions & preparation of reports using accounting packages tally etc. CO 4 Enables students to pursue professional courses like CA, CMA & CS. CO 5 Students will be ready for employment in functional areas of accounting. CO 6 Each student shall understand economic and industry issues and role of accounting within that environment			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Com(GENERAL, COMPUTERS)	I	COM111FOA	FUNDAMENTALS OF ACCOUNTING

On completion of this course, the students will be able to:

CO 1 To develop conceptual understanding of fundamentals of the financial accounting system & to impart skills in accounting for various kinds of business transactions.

CO 2 To understand knowledge of new trends in corporate accounting, preparation of subsidiary books, bank reconciliation statements, and final accounts.

CO 3 To develop the skills of recording financial transactions & preparation of reports using accounting packages tally etc.

CO 4 Enables students to pursue professional courses like CA,CMA & CS.

CO 5 Students will be ready for employment in functional areas of accounting.

CO 6 Each student shall understand economic and industry issues and role of accounting within that environment

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	I	COM111BOM	BUSINESS ORGANISATION AND MANAGEMENT

At the end of the course student will:

CO 1: students will be able to understand different forms of business organizations.

CO 2: Comprehend the nature of Joint Stock Company and formalities to promote a Company. Describe the Social Responsibility of Business towards the society.

CO 3: Critically examine the various organizations of the business firms and judge the best among them.

CO 4: Design and plan to register a business firm.

CO 5: Prepare different documents to register a company at his own. Articulate new models of business organizations

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (COMPUTERS)	I	COM111BOM	BUSINESS ORGANISATION AND MANAGEMENT

At the end of the course student will:

CO 1: At the end of the course, the student will be able to understand different forms of business organizations.

CO 2: Comprehend the nature of Joint Stock Company and formalities to promote a Company. Describe the Social Responsibility of Business towards the society.

CO 3: Critically examine the various organizations of the business firms and judge them.

CO 4: Design and plan to register a business firm.

CO 5: Prepare different documents to register a company at his own. Articulate new models of business organizations

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	I	SDC111OS	OFFICE SECRETARYSHIP
By the successful completion of course, the student will be able to; CO1. Understand the organizational hierarchy and outlines of functioning CO2. Comprehend the role of office secretary ship in a small and medium organization CO3. Acquire knowledge on office procedures and interpersonal skills CO4. Apply the skills in preparing and presenting notes, letters, statements, reports in different situations.			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (COMPUTERS)	I	SDC111OS	OFFICE SECRETARYSHIP
By the successful completion of course, the student will be able to; CO1. Understand the organizational hierarchy and outlines of functioning CO2. Comprehend the role of office secretary ship in a small and medium organization CO3. Acquire knowledge on office procedures and interpersonal skills CO4. Apply the skills in preparing and presenting notes, letters, statements, reports in different situations.			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	I	COM111BENV	BUSINESS ENVIRONMENT
At the end of the course, the student will able to; CO 1 Understand the concept of the business environment. CO 2 Define Internal and External elements affecting business environment. CO 3 Explain the economic trends and its effect on Government policies. CO 4 Critically examines the recent developments in economic and business policies of the Government. CO 5 Evaluate and judge the best business policies in Indian business environment. CO 6 Develop the new ideas for creating good business environment			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	II	COM121BTP	BANKING

At the end of the course student will:
Co 1: To have basic institutional and practical knowledge supported by text books including up-to-date information in the field of Banking.
CO 2: To carry out financial analysis of banks and insurance companies
CO 3: To express their opinions about banking and insurance in written and oral form, based on the basic knowledge and skills they acquire.
CO 4: Apply their knowledge and skills to demonstrate autonomy, expert judgment, adaptability and responsibility as a practitioner and learner in the field of banking and finance law.
CO 5: Advanced working skills in the use of new technology

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	II	COM122FA	FINANCIAL ACCOUNTING

On completion of this course, the students will be able to:
CO 1 To develop conceptual understanding of fundamentals of financial accounting system & to impart skills in accounting for various kinds of business transactions.
CO 2 To understand knowledge of new trends in Consignment business, different methods in depreciation, joint venture business and bills of exchange.
CO 3 To develop the skills of recording consignment accounts, writing of bills of exchange, joint venture business accounts.
CO 4 Enables students to pursue professional courses like CA,CMA & CS.
CO 5 Students will be ready for employment in functional areas of accounting.
CO 6 Each student shall understand economic and industry issues and role of accounting within that environment

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	II	SDC121AD	ADVERTISING

On completion of this course, the students will be able to
CO1: provide basic knowledge to the students about various internal & external factors which influence the ADVERTISING
CO 2: know about economic growth and development of advertising
CO 3: To provide basic knowledge to the students about types of advertising

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL, COMPUTERS)	II	COM121BPP	Banking procedure and practice

On completion of this course, the students will be able to:

CO 1 Make the students aware of the fundamentals of banking and knowledge of banking operations.

CO 2 Relate the Regulation of Indian Banking Act 1949 and their Progress & performance

CO 3 Apply the impart knowledge about functions, role and monetary policy of Reserve Bank of India

CO 4 Acquaint the students with Bank Nationalization Process and its effects

CO 5 To make them understand about various foreign exchanges across the globe Analysis the Role and organization structure of Indian banking system

CO 6 To identify the risk faced by the Industry and Banks in the International Market. Demonstrate the techniques of banking and finance in real • time scenarios

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	II	SDC121AD	ADVERTISING

On completion of this course, the students will be able to

CO1: provide basic knowledge to the students about various internal & external factors which influence the ADVERTISING

CO 2: know about economic growth and development of advertising

CO3: To provide basic knowledge to the students about types of advertising

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com(GENERAL)	II	SDC122LSC	LOGISTICS AND SUPPLY CHAIN MANAGEMENT

At the end of the course student will:

CO 1 Summarize relationship between marketing and Logistic Management

CO 2 Understand the concepts of Supply Chain Management in connection with products.

CO 3 Understanding various types of seller and suppliers

CO 4 Evaluate best logistic method among all means of transport operations

CO 5 Analysis of different distribution strategies - online and physical distribution

CO 6 Design and develop new methods and models of Logistics in SCM

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	II	LSC121ED	ENTREPRENEURSHIP DEVELOPMENT

At the end of the course student will:
CO 1 Understand the concept of Entrepreneurship, its applications and scope.
CO 2 Know various types of financial institutions that help the business at Central, State and Local Level
CO 3 Understand Central and State Government policies, Aware of various tax incentives, concessions
CO 4 Applies the knowledge for generating a broad idea for a starting an enterprise/startup
CO 5 Understand the content for preparing a Project Report for a star up and differentiate between financial, technical analysis and business feasibility

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (COMPUTERS)	II	COM356EW	E COMMERCE AND WEB DESIGNING

At the end of the course student will:
CO 1: Recognize different concepts related to E-commerce.. Differentiate between E-commerce business models of a firm, and determine the role that the Internet and related technologies can play to support this model
CO 2: Recognize the different applications of E-commerce
CO 3: Recognize issues related to E-commerce technologies, risks and information security.
CO 4: Identify social, ethical and cultural aspects related to E-commerce.
CO 5: Realize the impact of E-commerce on individuals and organizations. And learn to create web pages using html

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com GENERAL	III	Com231AA	Advanced accounts

At the end of the course student will:
Co 1:understand the concept of non profit organizations and its accounting process
Co 2: comprehend the concept of single entry system and preparation of statement of affairs.
Co 3: familiarize with the legal formalities at the time of dissolution of firm
C0 o 4: prepare financial statements for partnership on dissolution of the firm.
Co 5: employ critical thinking skills to understand the difference between dissolution of the firm and dissolution of partnership.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	III	COM233MAKT	MARKETING

On completion of this course, the students will be able to:

CO 1 To introduce the marketing concept and how we identify, understand and satisfy the needs of customers and markets

CO 2 To describe major bases for segmenting consumer and business markets, define and able to apply the three steps of target marketing, market segmentation and market positioning.

CO 3 Students will demonstrate strong conceptual knowledge in the functional area of marketing management.

CO 4 Enables students to pursue good marketing courses in future

CO 5 Students will be familiar about the product life cycle stages and new product development process, so through this they will be develop entrepreneur skills.

CO 6 Each student shall understand marketing and industry issues and role of marketing activities within that environment

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Com (COMPUTERS)	III	COM355DBMS	DATABASE MANAGEMENT SYSTEM

On completion of this course, the students will be able to:

CO 1 To understand Data and Information, Database, Database Management System, Objectives of
DBMS, Evolution of Database Management System, Classification of Database Management System.

CO 2 To understand the knowledge of File-Based System. Drawbacks of File-Based System, DBMS Approach, Advantage of
DBMS, Data Models, Components of Database System, Database Architecture, DBMS Vendors and their products.

CO 3 To develop the skills The Building Blocks of an Entity-Relationship, Classification of Entity Set,
Attribute Classification, Relationship Degree, Relationship Classification, Generalization and Specialization, Aggregation and Composition, CODD's Rules, Relational Data Model, Concept of Relational Integrity.

CO 4 Enables students to pursue History of SQL Standards, Commands in SQL, Data types in SQL, Data Definition Language (DDL),Selection Operation Projection Operation, Aggregate Functions,
Data Manipulation Language, Table Modification, Table Truncation, Imposition of Constraints, Set Operations.

CO 5 Students will be ready to understand Structure of PL/SQL, PL/SQL Language Elements, Data Types, Control Structure, Steps to Create a PL/SQL Program, Iterative Control Cursors, Steps to Create a Cursor, Procedure, Functions, Packages, Exceptions Handling, Database Triggers, Types of triggers.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	III	COM232BST	BUSINESS STATISTICS
On completion of this course, the students will be able to CO 1: Understand the importance of Statistics in real life, CO 2: Formulate complete, concise, and correct mathematical proofs, CO 3: Frame problems using multiple mathematical and statistical tools, CO 4: measuring relationships by using standard techniques Build and assess data-based models, CO 5: Learn and apply the statistical tools in day life and Create quantitative models to solve real world problems in appropriate.			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (COMPUTERS)	III	COM232BST	BUSINESS STATISTICS
On completion of this course, the students will be able to: CO 1: Understand the importance of Statistics in real life, CO 2: Formulate complete, concise, and correct mathematical proofs, CO 3: Frame problems using multiple mathematical and statistical tools, CO 4: measuring relationships by using standard techniques Build and assess data-based models, CO 5: Learn and apply the statistical tools in day life and Create quantitative models to solve real world problems in appropriate contexts.			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (COMPUTERS)	III	SDC231IP	INSURANCE PROMOTION
By successful completion of the course, students will be able to; CO 1: Understand the field level structure and functioning of insurance sector and its role in protecting the risks CO 2; Comprehend pertaining skills and their application for promoting insurance coverage CO 3: Prepare better for the Insurance Agent examination conducted by IRDA CO 4: Plan ‘promoting insurance coverage practice’ as one of the career options			

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	IV	COM241AU	AUDITING

On completion of this course, the students will be able to:

CO 1 Apply and demonstrate the accounting knowledge and skills in auditing

CO 2 Have a basic working knowledge of auditing reporting, internal control over financial reporting, auditing for fraud etc…

CO 3 This course is intended to acquaint the student with duties of auditor, rights of auditor, qualifications and disqualifications of auditors according to companies act, 2013.

CO 4 To provide the understanding by the students of general chronology of audit, audit strategy, audit program and documentation and procedure involved in audit.

CO 5 To enable students to assess the audit techniques and the concepts of internal check in detail and also different types of audits.

CO 6 To enable the students in detailed knowledge about vouching of cash and trading transactions in organizations.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	IV	COM241CA	CORPORATE ACCOUNTING

At the end of the course student will:

CO 1 Recognizing different types of shares, identifying the steps for formation of a company

Aware of the process of valuation of shares

CO 2 Preparation of accounts related to issue of shares and debentures

CO 3 Preparation of accounts related to valuation of goodwill and valuation of shares

CO 4 Preparation of accounts related to company final accounts

CO 5 Identifying the Provisions of the Companies Act, 2013 relating to issues of shares and debentures

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	IV	COM241ITP	INCOMETAX LAW& PRACTICE

On completion of this course, the students will be able to:

CO 1 Students will apply enhanced analytical skills to resolve complex problems.

CO 2 Students will understand the legal, regulatory, and professional environment of accounting.

CO 3 Students will demonstrate professional skills.

CO 4 Students will understand the ethical expectations of the accounting profession including the ability to recognize and respond appropriately to ethical dilemmas.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	IV	COM241CMA	INCOMETAX LAW& PRACTICE

On completion of this course, the students will be able to:

CO 1 Students will apply enhanced analytical skills to resolve complex problems.

CO 2 Students will understand the legal, regulatory, and professional environment of accounting.

CO 3 Students will demonstrate professional skills.

CO 4 Students will understand the ethical expectations of the accounting profession including the ability to recognize and respond appropriately to ethical dilemmas.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, COMPUTERS)	IV	COM241CMA	COST AND MANAGEMENT ACCOUNTING

On completion of this course, the students will be able to:

CO 1: Basic concepts and enables the student to understand the basics of Cost accounting, its features and objectives and techniques used to compute the Cost of different areas of business.

CO 2: On materials, deals with the valuation of material purchased by business entities and talks about the best means of purchasing large volumes at cheaper rates.

CO 3: Marginal costing deals with cost volume profit analysis and the activity level at which the company earns neither profit nor loss.

CO 4: Job costing and Batch costing is useful for students to evaluate the job cost per unit and Batch costing is evaluating a lot of units in the same product.

CO 5: Financial statement analysis evaluates the various statements like profit and loss account and balance sheet.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B.Com (Computer Applications)	IV	COM-245 OOPJ	Object oriented Programming Using Java

On Completion of this Course , The students will able to:-

CO-1 Develop programming skills and declaration of variables and constant use of operators and expressions.

CO-2 Learn the syntax and semantics of programming language and be familiar with object-oriented concepts.

CO-3 Analyze difference between Procedure– Oriented Programming and Object-Oriented Programming.

CO-4 Packages, Different Types of Packages, Creating Package and Accessing a Package. Streams, Creating a File using File Input- Output Streams

CO-5 Exception Handling, Types of Exceptions, creating a Thread using Thread class methods.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B. Com General	IV	COM246GST	Goods and services tax

On completion of this course, the students will able to :-

CO-1 Understand the basic principles underlying the indirect taxation statutes.

CO-2 Examine the method of tax credit, input and output tax credit and cross utilization of input tax credit.

CO-3 Identify and analyze the procedural aspects under different applicable statutes related to GST.

CO-4 Compute the assessable value of transactions related to goods and services for levy and determination of duty liability.

CO-5 Develop various returns and reports for business transactions in tally.

CO-6 Understand tax invoice and bill of supply.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B.Com General	IV	COM241BL	BUSINESS LAW

On completion of this course, the students will able to :-

CO 1 Essential elements of valid contract, valid, void and voidable contracts, Indian Contract, Act 1872

CO 2 Offer (unilateral contract, Revocation of offer), Acceptance and Consideration.

CO 3 Minor contracts, Different modes of discharge of contracts, Rules relating to remedies to breach of the contract.

CO 4 Contract of sale, Rights of unpaid vendor.

CO 5 Cyber Crimes, Digital signature, electronic governance.

CO 6 Regulation of certifying authorities, Duties of subscribers, Penalties and adjudication, Appellate tribunal, Offences and Cyber Crimes.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL), BBA	V	COM356ACA	ADVANCED CORPORATE ACCOUNTING

At the end of the course student will:

CO 1 Prepare the Consolidated Balance Sheet of Holding and its Subsidiary Company and also able to understand the legal requirements relating to presentation of Accounts of Holding Companies and its Subsidiaries

CO 2 Understand the meaning of Liquidation-Modes of Winding Up-Order of Payment-Preferential Creditors-Statement of Affairs- Deficiency or Surplus Account-Liquidator's Final Statement

CO 3 Understand the meaning of Amalgamation-Types of Amalgamation-Computation of Purchase Consideration-pass the Entries in the books of Transferor and transferee-special Adjustment Entries for Inter-Company Owings and Holdings

CO 4 Understand the meaning of Alteration of Share Capital and Reduction of Share Capital-Pass Accounting Entries-adjust Surrender of Shares-Dissenting Shareholders-Reconstruction Schemes

CO 5 Understand the meaning and terms used in Leasing-Popularity of Leasing-Advantages and Disadvantages-Classification-Operating and Financial Lease-Accounting for Financial Lease-Books of Lessee and Lessor-Operating Lease-Accounting for Operating Lease-Books of the Lessee and lessor.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com GENERAL	V	COM365SM	STOCK MARKET

At the end of the course student will:

CO 1: The basic trade-off between risk and return and how it applies to various types of financial instruments, stocks, bonds, futures, options

CO 2: Market efficiency and arbitrage. Are markets efficient or are they dominated by irrational investors

CO 3: Diversification: how to select a portfolio of securities that maximizes returns, while minimizing risk? How does diversification work in practice?

CO 4: Financial instruments: bonds, stocks, currencies and derivatives (futures options). How are these related to Hedging and speculation?

CO 5: The money management industry and its key players: Mutual funds and pension funds. Do they have any superior investment skills?

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B. Com (COMPUTERS)	V	7A	Data Science using Python

On completion of this course, the students will be able to:

CO 1 Understand basic concepts of data science

CO 2 Understand why python is a useful scripting language for developers.

CO 3 Use standard programming constructs like selection and repetition.

CO 4 Use aggregated data (list, tuple, and dictionary).

CO 5 Implement functions and modules.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL, Computers)	V	COM355GIP	General insurance procedure and practice

On completion of this course, the students will be able to:

CO 1 Students apprehend the various products and their significance of General Insurance

CO 2 Students realize the statutory requirements and procedure to be followed while filling the various General Insurance policy forms and documents

CO 3 Students know the prospects of Indian and International General Insurance Market

CO 4 Students will understand the role of underwriters & Actuaries in fixing the premiums by Risk Sharing and Risk Management techniques

CO 5 Students understand the process and documents necessary for different types of claims.

CO 6 Students also learn about the frauds, fraud prevention and different types of reserves of Insurance Companies

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V	COM355AMP	ADVERTISING AND MEDIA PLANNING

On completion of this course, the students will be able to:

CO 1 Determine, analyze and respond to clients' advertising and marketing communications objectives by applying principles of marketing and communications

CO 2 Perform a market segmentation analysis, determine the organization's target market/audience and define the consumer behaviour of each segment.

CO 3 Evaluate the effectiveness of integrated advertising and marketing communications initiatives.

CO 4 Evaluate the effectiveness of integrated advertising and marketing communications initiatives.

CO 5 Develop advertising and marketing communications material in compliance with current Canadian legislation, industry standards and business practices

CO 6 Develop creative solutions to address advertising and marketing communications challenges.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V	COM351GST	GST WITH TALLY

On completion of this course, the students will be able to:

CO 1 To introduce the students to Basic of Accounts and the usage of Tally for accounting purpose and basic concepts of gst

CO 2 Students will learn to create company, enter accounting voucher entries including advance voucher entries, do reconcile bank statement, do accrual adjustments, and also print financial statements, etc. in Tally ERP.9 software.

CO 3 Demonstrate an understanding of various predefined inventory vouchers to suit the various business requirements and flexibility to create unlimited stock items, use simple to complex conversion units and generate invoices with the required information and dimensions.

CO 4 Demonstrate an understanding of how to maintain a payroll register. This helps to understand how to maintain management related information, statutory forms and reports in the prescribed formats such as: Pay Slip, Payroll Statements, Attendance and Overtime Registers et

CO 5 Develop the students use the Tally software, that helps to prepare Accounting, Payroll, Billing, Sales and Profit Analysis, Auditing Banking Inventory, Taxation such as GST

CO 6 Synthesize company accounts into Tally software Evaluate GST in the accounting software Create a career as Accounting professional.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B. Com (General &Computers)	V	COM355LIP	Life insurance with Practice

On completion of this course, the students will able to :-

CO-1 Understand the features of Life insurance, schemes and policies and insurance companies in india.

CO-2 Analyze various schemes and policies related to the life insurance sector.

CO-3 Choose a suitable insurance policy for a given situation and respective persons.

CO-4 Acquire insurance agency skills and other administrative skills.

CO-5 Acquire skill of settlement of claims under various circumstances.

Programme	Semester	Course code	Course Name
B.Com (General & computers)	V	COM357SMA	Stock Market Analysis

On completion of this course, the students will able to :-
CO-1: Understand overall share market.
CO-2: To identify the trends, support and resistance in the stock market.
CO-3: Understand how to build portfolio and investment decision in appropriate manner
CO-4: Understand fundamental, technical and quantitative analysis of stock.
CO 5: To identify bullish and bearish patterns of securities in stock markets.

Programme	Semester	Course code	Course Name
B. Com (General)	V	COM351ITAPP	Income tax procedure and practice

On completion of this course, the students will able to:-
CO 1: Understand the application of taxation knowledge in both theoretical and practical.
CO 2: Determine the procedure and schedule to be followed on preparing financial statements of companies
CO 3: File income tax return and compute tax liability of individuals.
CO 4: Develop critical thinking skills in students
CO 5: Understand E-Filling of tax returns and tax procedures

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V	COM354SPP	SALES PROMOTION AND PRACTICE

On completion of this course, the students will be able to:
CO 1: Understanding of basic concepts of sales promotion and to develop the skills to manage sales operations in a business firm.
CO 2: Discuss and make the student understand complexities of sales promotions involved in various organizations
CO 3: Take effective decisions for launching a new sales promotion technique in organization
CO 4: Understand the implications of the different promotional techniques and personal selling strategies
CO 5: To develop the skills among the students to enable them to design the personal selling strategies and make them aware of the selling strategies in the current era.

PROGRAMME	SEMESTER	COURSE CODE	COURSE NAME
B. Com (Computer Applications)	V	COM351BDAR	Big Data Analytics using 'R'

On Completion of this Course , The students will able to:-
CO 1: Understand data and classification of digital data.
CO 2: Understand Big Data Analytics.
CO 3: What is R? Why R? , advantages of R over other programming languages, Data types in R
CO 4: Data frames in R, Operations performed on data Frames. Load data into R.
CO 5: Reading and getting data into R (External Data), Working with R Charts and Graphs

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	ENG111BWS	Basic Writing Skills

On successful completion of the course, students will be able to;
CO 1: To enable the students to heighten their awareness of correct usage of English Grammar in writing and reading
CO 2: To enable the students to improve their speaking ability in global language both in terms of fluency and comprehensibility
CO 3: To help the students to enlarge their vocabulary by keeping a vocabulary journal
CO 4: To enable the students, strengthen their ability to write academic papers, essays and summaries using the process approach
CO 5: To enhance the ability to use the conventions of grammar when creating paragraphs
CO 6: To enable students to review the grammatical forms of English and the use of these forms in specific communicative contexts, which include: class activities and home tasks

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc. (Vis Comm & E Media)	I	VIS112ICT	Introduction to Communication Theories

On successful completion of the course, students will be able to;
CO 1: Understand the role of communication in personal & professional success.
CO 2: Develop awareness of appropriate communication strategies.
CO 3: Prepare and present messages with a specific intent.
CO 4: Analyse a variety of communication acts.
CO 5: Ethically use, document and integrate sources.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc. (Vis Comm & E Media)	I	VIS113WM	Writing for Media

On successful completion of the course, students will be able to;

CO 1: Understand and be able to apply the principles of news language and news story structure

CO 2: Understand news values and concepts of newsworthiness and be able to apply these

CO 3: Develop an understanding of writing and news story structure that is sufficient to write for news media

CO 4: Apply news writing and news story structure concepts and skills to writing for print, broadcast and online news media

CO 5: Be aware of some common sources of news and how these can be incorporated in news writing.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	VIS114VC	Visual Communication

On successful completion of the course, students will be

CO 1: Demonstrate critical and innovative thinking.

CO 2: Display competence in oral, written, and visual communication.

CO 3: Apply communication theories.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	VIS115AAC	Art, Architecture and Culture (T)

On successful completion of the course, students will be able to;

CO 1: Recognize functional, structural, and aesthetic qualities in architecture and read visual and experiential elements, major monuments, architectural and cultural styles, and symbols. Demonstrate an understanding of works of art and architecture from diverse genres and from a range of historical periods and geographical locations.

CO 2: Demonstrate mastery of analytical skills such as observation and inductive reasoning in interpreting works of art both as formal structures and in relation to social and cultural contexts. Students will demonstrate an effective knowledge of visual vocabulary appropriate for careers in the visual arts, architecture, visual studies, and the media.

CO 4: Acquire a deeper knowledge of a range of chronological periods, geographical areas and methods of analysis of the built world. Learn oral communication of art historical arguments. Learn to produce cogent written arguments supported by visual and textual research.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc. (Vis Comm & E Media)	I	SDC111VC	Visual Communication (P)

On successful completion of the course, students will be able to;
CO 1: Students will learn how the light works with a camera. Students will learn how colour theory works.
CO 2: Students will be able to analyse visual messages in six different perspectives like Personal, Historical, Technical, Ethical, Cultural and Critical.
CO 3: Students will be able to create Ideas for Visual ads, TV ads etc.
CO 4: Students will be able to work in industries like Graphic Designing, Television, Film etc.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	SDC112DSP	Digital Still Photography

On successful completion of the course, students will be able to;
CO 1: An understanding of the industrial and commercial applications of photographic technique
CO 2: Functional knowledge of photographic history and theory, the relationship of photography to the visual disciplines, and its influence on culture.
CO 3: The ability to work in experimental and manipulative techniques, candid and contrived imagery, documentary photography, archival processing, and interpretive studies.
CO 4: The ability to work and study independently.
CO 5: A familiarity with and command of materials, equipment, and library resources related to the study of photography.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	SDC113GD	Graphic Designing - 1

On successful completion of the course, students will be able to;
CO 1: They will demonstrate skills necessary for effective preparation of artwork for public presentation, using a variety of materials and techniques.
CO 2: Students will demonstrate an effective knowledge of visual vocabulary appropriate for careers in the visual arts, architecture, visual studies, and the media
CO 3: The students will employ both analogue media (drawing with pencil and paper, etc.) and digital media -- using up-to-date computer tools (graphics hardware and software - for drawing, painting, layout, typography)
CO 4: Apply graphic design principles in the idealization, development, and production of visual messages.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc. (Vis Comm & E Media)	I	SDC114SW	Screen Writing

On successful completion of the course, students will be able to;
CO 1: To learn the fundamental principles of screenwriting and apply them to your own work in progress.
CO 2: To complete the first half of a feature length screenplay (approx20 pages) over the course.
CO 3: To learn how to read and analyse your own work and the work of others as a screenwriter.
CO 4: To gain an understanding of the business side of screenwriting

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Sc (Vis Comm & E Media)	I	SDC115TA	Theatre Arts

On successful completion of the course, students will be able to;
CO 1: Demonstrate understanding of the social and artistic movements that have shaped theatre and dance as we know it today.
CO 2: Apply discipline-specific skills to the creation of performance.
CO 3: Analyse, and interpret texts and performances both in writing and orally.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	ENG121JE	Journalist English

On successful completion of the course, students will be able to;
CO 1: Demonstrate how the journalistic approach to problem solving and storytelling can produce locally engaged, globally competent citizens
CO 2: Demonstrate competence in a core set of journalistic crafts in reporting, research and storytelling that show versatility across media
CO 3: Express a critical understanding of the contextual factors that shape the media message in a diverse, globalized media landscape
CO 4: Produce journalistic work that showcases an area of specialization that draws on the creativity and entrepreneurial spirit of the students
CO 5: Produce a portfolio of work that demonstrates work produced in a public media setting

Program	**Semester**	**Course Code**	**Course Name**
B.Sc (Vis Comm & E Media)	**II**	VIS122MCT	Mass Communication Theories

On successful completion of the course, students will be able CO 1: To critical think using mass communication theories CO 2: To know the historical necessity for mass communication as a subject in the west in the backdrop of propaganda CO 3: Apply critical thinking and analytical skills in order to create a proposal for a Mass Communication research project grounded in a specific theory. CO 4: Effectively present and defend ideas/concepts orally and in writing.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	**II**	VIS123IJ	Introduction to Journalism
On successful completion of the course, students will be able to; CO 1: A student will learn the history of journalism in the world. CO 2: A student will be exposed to the evolving journalism across India. CO 3: A student will learn news editing and gathering of news stories. CO 4: A student will learn about hard and soft stories besides feature news writing.			

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	**II**	VIS124EF	Elements of Film
On successful completion of the course, students will be able to; CO 1: Students will demonstrate that the critical study of cinema informs their filmmaking and that the study and practice of film production enhance their work as film scholars and analysts. CO 2: Students will demonstrate that they understand the pre-production, production, and post production film making process CO 3: Students will demonstrate the relationship between film form and aesthetic effect through both film CO 4: Analysis and the creation of motion pictures. CO 5: Students will be able to conduct film research and compose cogent, persuasive, and valid essays about film. CO 6: Students will demonstrate a broad knowledge of film history, national cinemas and modes of production.			

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	VIS125BC	Broadcast Communication

On successful completion of the course, students will be able to;

CO 1: The course is beneficial to develop the communication skills of students for broadcasting purposes and to prepare them as competent professionals to meet the challenges posed by rapidly changing environments.

CO 2: It makes the student aware of the art and technology used in broadcasting.

CO 3: The program imparts a deeper understanding of journalism and the forms it takes, and the focus is on content as much as on skills.

CO 4: The course is suitable to provide the students with an insight into the broadcast media and its relevance to rural and urban development, to train students in the basic skills required for broadcast media.

CO 5: It helps to expose students to the basic concepts, characteristics of Indian society to enable them to plan suitable programs on current political, economic, environmental and rural problem.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	**II**	LSC121PSP	Public Speaking & Presentation

On successful completion of the course, students will be able to;

CO 1: To make the student to present to a group, company and individual, learn to speak to the public.

CO 2: Smart way of presenting materials to the public, to understand the nuances of presentation.

CO 3: To gain confidence in whatever one presents to the other

CO 4: Utilizing a variety of delivery skills such as eye contact, gestures, movement & vocal variety.

CO 5: Critically assess their own speaking, and that of others

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	SDC121GD	Graphic Designing – 2

On successful completion of the course, students will be able to;

CO 1: Analyse, synthesize, and utilize design processes and strategy from concept to delivery to creatively solve communication problems. Create communication solutions that address audiences and contexts, by recognizing the human factors that determine design decisions.

CO 2: Utilize relevant applications of tools and technology in the creation, reproduction, and distribution of visual messages. Apply graphic design principles in the ideation, development, and production of visual messages.

CO 4: Confidently participate in professional design practice and management within a collaborative work environment. Employ best practices and management in the design profession and within a collaborative work environment.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	SDC122DVE	Digital Video Editing

On successful completion of the course, students will be able

CO 1: Learn to combine basic design principles in video editing.

CO 2: Learn Adobe Premiere Pro & Final Cut Pro software in basic level.

CO 3: Able to learn techniques of handling the different types edit setup.

CO 4: Application of video software to edit and produce.

Program	Semester	Course Code	Course Name

B.Sc (Vis Comm & E Media)	**II**	SDC123DAP	Digital Audio Production

On successful completion of the course, students will be able to;
CO 1: Learn fundamental knowledge of how sound is digitally produced and recorded.
CO 2: An understanding of how the digital and the analogue protocols differ and the relative advantages of each.
CO 3: Ability to work at a basic level in the Presonus Studio 5 live recording from multiple sources.
CO 4: Hands on experience with live recording, from concept, mixing, and then to mastering a CD.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	VIS231MLE	Media Laws & Ethics

On successful completion of the course, students will be able to;
CO 1: Students will learn the Indian constitution and the four estates of Indian democracy.
CO 2: The students will learn about defamation and its implications.
CO 3: Students will learn about the laws relating to the press.
CO 4: The students will learn some Media related Acts.
CO 5: The students will study the ethical aspects of the Laws.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	VIS232MC	Media & Culture

On successful completion of the course, students will be able to;
CO 1: Learn several theories to discuss the relationship between media and culture.
CO 2: Understanding how different communities and cultures are represented in the media.
CO 3: Examine the ethical implications of media culture.
CO 4: Examine and evaluate the relevance of the various ideas studied in today's world.
CO 5: Apply different ideas and perspectives in order to critically evaluate their existence and role in society

Program	Semester	Course Code	Course Name

B.Sc (Vis Comm & E Media)	**III**	VIS234TP	Television Production - 1 (T)

on successful completion of the course, students will be able to;
CO 1: Gain overall understanding on history of print media during pre and post-independence era.
CO 2: Acquire knowledge on growth of news agencies.
CO 3: Gain understanding on emergence of different genres within newspapers.
CO 4: Acquire knowledge on the role of print media in developed countries.
CO 5: Gain understanding of trends in print media.
CO 6: Acquire knowledge on the changing content in print media due influence of technology

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	VIS233PJ	Print Journalism (T)

On successful completion of the course, students will be able
CO 1: Communicate effectively through film platforms.
CO 2: Conceptualize, write, shoot and edit documentary films independently.
CO 3: Develop characters and write dialogues for a film.
CO 4: Conceptualize, develop and write the screenplay for films.
CO 5: Develop and create a programme of different genres for television.
CO 6: Conduct independent photo shoots and tell a story through the same.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	LSC231CINA	Contemporary Issues & News Analysis

On successful completion of the course, students will be able
CO 1: Identify an issue and argue from ideological perspective.
CO 2: Apply a range of theoretical perspectives to interpret social problems associated with gender, race and ethnicity.
CO 3: Identify the major social problems evident in contemporary Indian society at micro and macro level and interpret it using semiotics and hermeneutics.

By successfully completion of the course, student will be able to
CO 1: Understand the field of Advertising
CO 2: Comprehend opportunities and challenges in Advertising sector
CO 3: Prepare a primary advertising model
CO 4: Understand applying of related skills
CO 5: Examine the scope for making advertising a future career

Program	Semester	Course Code	Course Name
BBA	3	BBA235BR	Business Research

After successful completion of this course, the students are able to

CO 1: Apply an advanced understanding of business research design options, methodologies and analysis methods (both qualitative and quantitative), including respective terms, definitions and applications to the design, implementation and evaluation of a research project.

CO 2: Distill an identified business problem into a succinct research problem (or problems) and articulate this into a comprehensive research brief for investigation by a research team locally or internationally.

CO 3: This brief will include a statement of the resulting research problem and the objectives that need to be achieved to provide the information necessary to tackle the business problem and the decisions that need to be made respective to it.

CO 4: Complete, from the brief created, a research proposal for implementation at either a local or international level. This will include (but not be restricted to), a literature summary at the necessary level of depth to ensure a thorough understanding of what is already known about the problem to be addressed, the proposed research design, data collection, sampling, analysis methods to be employed along with an indicative time frame for each stage of the research proposed and budget.

CO 5: Apply a broad understanding of issues specific to undertaking business research across international boundaries, including cultural, geographical, language and cost related challenges and respective strategies and approaches that may be employed to solve them to the design, implementation and evaluation of a research project.

Program	Semester	Course Code	Course Name
BBA	3	BBA233FM	Financial Management

By successfully completion of the course, student will be able to
CO 1: To understand the concept of business finance and financial management,
CO 2: To analyse the cost of capital, computation of cost of capital
CO 3: To distinguish factors determining capital structure, various theories
CO 4: To determine usefulness of capital budgeting meaning and importance and kinds of investment proposals, factors affecting capital investment decisions
CO 5: To design working capital meaning and need and factors determining the working capital

Program	Semester	Course Code	Course Name
BBA	3	BBA234FOM	Fundamentals of Marketing

By successfully completion of the course, student will be able to
CO 1: To understand the various core marketing concepts and their importance
CO 2: To understand different marketing trends, markets, products & channels
CO 3: To gain knowledge on buyer behaviour and market segmentation
CO 4: To familiarize students about product and its classifications
CO 5: To understand different price strategies & promotion strategies.
CO 6: To understand the importance of regulating marketing.

Program	Semester	Course Code	Course Name
BBA	3	BBA231HRM	Human Resource Management

By successfully completion of the course, student will be able to
CO 1: Acquaint the role and importance, various policies and practices of human resources management.
CO 2: To impart knowledge about the concept of human resource planning, its objectives and process of human resource planning and also the job analysis.
CO 3: To understand the concept of recruitment and selection and its process and principles of placement and overview about induction procedure.
CO 4: To impart the knowledge about the performance appraisal, its various methods and the concept of training and executive development and an overview about evaluation of training and development programmes.
CO 5: To make the student well acquainted with the concept of job evaluation process, compensation management, its approaches and an overview of designing a graded salary structure.

Program	Semester	Course Code	Course Name
BBA	3	BBA232OB	Organizational Behaviour

By successfully completion of the course, student will be able to
CO 1: Discuss the development of the field of organizational behavior and explain the micro and macro approaches.
CO 2: Analyze and compare different models used to explain individual behavior related to motivation and rewards.
CO 3: Identify the processes used in developing communication and resolving conflicts.
CO 4: Explain group dynamics and demonstrate skills required for working in groups (team building).
CO 5: Explain organizational culture and describe its dimensions and to examine various organizational designs.
CO 6: Discuss the implementation of organizational change.

Program	Semester	Course Code	Course Name
BBA	3	SDC231RET	Retailing

After successful completion of this course, the students are able to
CO 1: Know the retailing business, its growth in India and social impact
CO 2: Understand the and organization and supply in retailing
CO 3: Comprehend the opportunities and challenges in retailing
CO 4: Learn the functions that support outlet operations, sales and services
CO 5: Create a shopping experience model that builds customer loyalty and business promotion

Program	Semester	Course Code	Course Name
BBA	4	BBA 241TD	Training and development

By successfully completion of the course, student will be able to
CO 1: To develop an understanding of the evolution of training & development from a tactical to a strategic function.
CO 2: To provide an insight into what motivates adults to learn and the most appropriate methodologies to impart training
CO 3: To understand the concept of training audit & training evaluation
CO 4: To learn how design a training module and execute it
CO 5: To understand the need for and concept of Performance Management
CO 6: To understand various strategies used by organizations to measure performance & reward for the same

Program	Semester	Course Code	Course Name
BBA	4	BBA 241MSME	Micro, Small and Medium Enterprises Management

By successfully completion of the course, student will be able to CO 1: To create an awareness on various Entrepreneurship Development Programme CO 2: To enable them to understand project formulation CO 3: To familiarize the students with EDP schemes CO 4: To give an introduction about MSME and Various measures for their development CO 5: To create an awareness on various sources of finance

Program	Semester	Course Code	Course Name
BBA	4	BB241IB	International Business
CO 1: Basic informational learning by the students regarding Domestic and International/Foreign Trade. Modes of entry- trade theories CO 2: Determining Factors influencing exchange rate fluctuations and Euro market, instruments. CO 3: Analysis of Balance of payment: Contents, disequilibria in BOP, measures to bring back equilibrium in BOP CO 4: Analysis of WTO and Trade blocks – WTO Foundation, advantages and Disadvantages of WTO Procedure and Documents: Export and Import Procedure, Principal and Auxiliary documents			

Program	Semester	Course Code	Course Name
BBA	4	BBA 241CMA	Cost and management accounting
CO 1: Introduction of Cost Accounting and management accounting – Cost Concept and Classification. CO 2: A practical exposer of FIFO, LIFO, Weighted average, (including problems). Labour: Control of labour costs time keeping and time booking Idle time Methods of remuneration labour incentives schemes CO 3: Determining of Financial statement Analysis: Financial Statements Need for analysis of financial statements-comparative statements- common size statements- Trend analysis. CO 4: Practical expose of Ratio Analysis: Meaning - Accounting Ratios - uses - limitations - types of ratios. CO 5: Problematic to the students Marginal Costing -cost classification- differences between marginal costing and absorption costing - marginal cost equation- contribution- p/v ratio- margin of safety			

Program	Semester	Course Code	Course Name
BBA	4	BBA232OB	Business Law

After successful completion of this course, the students are able to

CO 1: Understand the essentials of a valid contract and its kinds . Understand the essentials of offer and acceptance, consideration . Will know how a contract is discharged and when the breach of contract arises followed by its remedies.

CO 2: Make understand the impact of companies act and its kinds . This also helps students to know about the documents lie MOA & AOA in relation to incorporation of a company.

CO 3: Know the impact of factories act 1948 of how the health safety and welfare measures of the labourers are taken into consideration.

CO 4: Ensure about the concept of sale of goods act 1930 of understanding them the differences between sale and agreement to sell , conditions and warranties etc.. Will also know when a seller was unpaid and the various rules of delivery .

CO 5: Know about the essential commodity act as well about the consumer protection act 1986 of how the consumers are protected with reference to various consumer councils.

Program	Semester	Course Code	Course Name
BBA	4	BBA241FS	Financial services

After successful completion of this course, the students are able to

CO 1: Understand the various services offered and various risks faced by banks

CO 2: Determine the need of financial system and describe how and why financial system works.

CO 3: Have a practical understanding of various financial institutions and their functioning

CO 4: Understand the dynamic changes of the banking industry and the policy responses because of the recent crisis

CO 5: Have a practical understanding of the various financial services both domestic and international wise.

CO 6: Be able to understand the management of mutual funds. Be provided with the knowledge of risk and rewards of investing in mutual funds.

CO 7: Have a practical understanding of RBI, its functioning, provision and operations and also able to understand various financial planning like credit and monetary planning

CO 8: Understand the money market, its different types and its functioning

Program	Semester	Course Code	Course Name
BBA	4	SDC241PEL	Personality Enhancement and Leadership

By successful completion of the course, students will be able to:

CO 1: Develop comprehensive understanding of personality

CO 2: Know how to assess and enhance one's own personality

CO 3: Comprehend leadership qualities and their importance

CO 4: Understand how to develop leadership qualities

Program	Semester	Course Code	Course Name

BBA	5	BBA351TM	Talent Management
By the end of the course the student should be able to: CO 1: To develop a clear understanding of Talents that are inculcated among the Employees in today's Business Environment. CO 2: To measure the various strengths and weakness of the employees and establishing theories and practices. CO 3: To Monitor the current trends in utilization of Employees team spirit and also in analyzing their abilities and skills CO 4: To bring out the learning and conceptual skills aiming the employees in order to reach the target. CO 5: To analyze the 360 Degree Feedback from the existing staff and to implement the measures needed.			

Program	Semester	Course Code	Course Name
BBA	5	BBA352GHRM	Global Human Resource Management
CO 1: To develop the understanding of the concept of human resource management and to understand its relevance in organizations. CO 2: To develop necessary skill set for application of various HR issues. CO 3: To analyse the strategic issues and strategies required to select and develop manpower resources. CO 4: To integrate the knowledge of HR concepts to take correct business decisions. CO 5: Integrated perspective on role of HRM in modern business. Ability to plan human resources and implement techniques of job design			

Program	Semester	Course Code	Course Name
BBA	5	BBA353EI	Export and Import
CO 1: To Demonstrate understanding of export controls, intellectual property rights, and confidentiality in international trade. CO 2: To apply knowledge of export sales, insurance, finance, and licensing to develop competitive export pricing strategies. C0 3: Proficiently prepare export packaging, transportation methods, and documentation, optimizing benefits and duty drawbacks. CO 4: Solve complex shipment issues, negotiate shipping documents, and formulate effective corporate marketing strategies for international trade. CO 5: Exhibit competence in customs formalities, export/import documentation, and regulatory compliance in diverse import/export scenarios			

Program	Semester	Course Code	Course Name
BBA	5	BBA354BM	Brand Management

CO 1: To understand product management, corporate strategy, product life cycle and develop effective marketing strategies for products.
CO 2: Apply new product development techniques, include idea generation, concept testing, successful launch and tracking of new product programs.
CO 3: Demonstrate knowledge of brand management, crafting brand elements and building consumer brand associations.
CO 4: Effectively manage brand architecture and portfolios with insights into corporate branding tools for building brand equity.
CO 5: Learn to leverage and measure brand equity for strategic marketing decisions and brand development.

Program	Semester	Course Code	Course Name
BBA	5	COM355FEM	Foreign Exchange Management

After successful completion of this course, the students are able to
CO-1: Assess factors impacting exchange rates, understanding economic indicators and forces, which have impact in foreign markets and global markets.
CO-2: Apply financial instruments for hedging, optimizing international transactions with derivatives, like swaps, options futures.
CO-3: Navigate regulatory frameworks, ensuring compliance with legal and ethical considerations, which have impact in foreign markets and global markets
CO-4: Utilize quantitative techniques for assessing and managing foreign exchange exposure.
CO-5: Evaluate macroeconomic policies, formulating effective strategies for global financial environments that are helpful for traders in exchange markets.

Program	Semester	Course Code	Course Name
BBA	5	COM356EP	E-Payments

CO1: Understand E-cash and Virtual Money Electronic Data interchange and about NEFT/RTGS/E Payment modes
CO2: Demonstrate knowledge of Automated Clearing and Settlement process and ATM networks, Fed wire etc
CO3: Identify and describe terms of Cryptography, Hash functions and Algorithm applications

CO4: Understand the different types of Mobile Payments, Wireless payments and different Wallets, Security Challenges in mobile payments
CO5: Develop the Electronic invoice and Payment systems its process, EIPP providers and elimination of paper, Scan based payments.

DEPARTMENT OF CHEMISTRY			
Program	**Semester**	**Course Code**	**Course Name**
B. Sc (MPC, BZC, MBC, MFC)	I	CHE111IPC	General, Physical & Inorganic Chemistry

At the end of the course, the student will be able to;
CO 1: Understand the basic concepts of p-block d-block elements
CO 2: Explain the difference between solid, liquid and gasses in terms of intermolecular interactions.
CO 3: Understand the concept of orbitals & energy levels
CO 4: shape of covalent molecules, identify types of intermolecular forces and predict those that are important for a given molecule,
CO 5: relate the chemical and physical properties of substances to molecular structure, chemical bonding, and inter molecular interactions

Program	**Semester**	**Course Code**	**Course Name**
B. Sc (MPC, BZC, MBC, MFC)	II	CHE122OPC	Organic and physical Chemistry

At the end of the course, the student will be able to;
CO 1: Understand and explain the differential behaviour of organic compounds based on fundamental concepts learnt.
CO 2: Formulate the mechanism of organic reactions by recalling and correlating the fundamental properties of the reactants involved.
CO 3: Learn and identify many organic reaction mechanisms including Free Radical Substitution, Electrophilic Addition and Electrophilic Aromatic Substitution.
CO 4: Correlate and describe the stereo chemical properties of organic compounds and reactions.

Program	**Semester**	**Course Code**	**Course Name**
B. Sc (MPC, BZC, MBC, MFC)	III	CHE233POC	Physical and Organic Chemistry

At the end of the course students will be able to:
CO 1: Separate the liquid mixtures using distillation process.
CO 2: Importance of EMF measurements and its applications
CO 3: Study nitrogen containing function groups with respect to their reactivity
CO 4: Study synthesis and role of amino acids and Proteins.
CO 5: Study of structural elucidation of various mono and disaccharides.

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	IV	CHE244IPC	Inorganic and Physical Chemistry

At the end of the course students will be able to
CO 1: Understand the basic concepts of d-block elements
CO 2: Apply various theories of complex compounds
CO 3: Explain the difference between solid, liquid and gases
CO 4: Compute the order of a reaction.
CO 5: Interpret the defects in the crystals

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	CHE355OSC	Organic and Spectroscopy of Organic compounds

At the end of the course students will be able to:
CO 1: Learn basic concepts of bonding and symmetry.
CO 2: Correlate the reactivity of various Heterocyclic compounds.
CO 3: Acquire knowledge on synthesis of desired alcohols using Grignard reagents
CO 4: Interpret IR spectroscopic peaks for identifying functional groups
CO 5: Predict the number of proton NMR signals expected from a given compound

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	I	CHE111VA(P)	Volumetric Analysis

At the end of the course student will be able to
CO 1: Understand the basic concepts of quantitative analysis
CO 2: Perform the techniques involved in volumetric analysis
CO 3: Understand the concepts and role of indicators used
CO 4: Acquire an idea about the significant figures and accuracy of reporting.
CO 5: Estimate the unknown present in the solution by suitable methods

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	II	CHE122MA(P)	Mixture analysis

At the end of the course student will be able to; CO 1: Understand the basic concepts of qualitative analysis of inorganic mixture CO 2: Use glassware, equipment and chemicals and follow experimental procedures in the laboratory CO 3: Apply the concepts of common ion effect, solubility product and concepts related to qualitative analysis

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	III	CHE233AOC(P)	Analysis of Organic Compound
At the end of the course student will be able to CO 1: Perform systematic qualitative analysis of organic compound CO 2: Detect extra elements using Lassaigne's test CO 3: Identify the functional group of the compound CO 4: Analyze various organic compounds using documented procedures CO 5: Identify organic compound by determination of melting point			

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	IV	SDC244AS	Analytical Skills
At the end of the course student will be able to CO 1: Understand the basic concepts of qualitative analysis of inorganic mixture CO 2: Use glassware, equipment and chemicals and follow experimental procedures in the laboratory CO 3: Apply the concepts of common ion effect, solubility product and concepts related to qualitative analysis CO 4: Analyze various salt mixtures using documented procedures			

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	CHE355PI(P)	Physical and Instrumentation
CO 1: Determine the rate constant of acid catalyzed ester hydrolysis CO 2: Prove 1 st order kinetics of decomposition of hydrogen peroxide CO 3 : Determine the partition coefficient of benzoic acid distributed between benzene and water CO 4 : Find the viscosity of unknown composition of glycerol and water mixture CO 5 : Study the effect of electrolyte on CST of phenol + water system			

Program	Semester	Course Code	Course Name

B.Sc., (MPC, BZC, MBC, MFC)	V	CHE356IA(P)	Inorganic and Analytical
At the end of the course student will be able to CO 1: Independently use PH meter and Conductivity meter for quantitative determination CO 2: get hands on training in use of spectrophotometer			

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	CHE356SOC	synthetic organic chemistry
Students after successful completion of the course will be able to: CO 1: Identify the importance of reagents used in the synthesis of organic compounds. CO 2: Learn the fundamental ideas behind the many forms of pericyclic reactions. CO 3: Understand the importance of retro synthesis in organic chemistry. CO 4: Comprehend the applications of different reactions in synthetic organic chemistry.			

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	CHE357SAO	Separation tech. & Analysis of Org. Compounds
Students after successful completion of the course will be able to: CO 1: Describe the role of mass spectrometry in revealing the structural details of organic molecules. CO 2: Learn about the structural analysis of organic molecules. CO 3: Appraise the volumetric and gravimetric methods in analytical chemistry. CO 4: Understand various chromatography methods in the separation and identification of organic compounds. CO 5: Use knowledge of solvent extraction to separate organic molecules.			

DEPARTMENT OF ARTIFICIAL INTELLIGENCE			
Program	**Semester**	**Course Code**	**Course Name**
B.Sc(AAI)	I	CSC111PC	PROGRAMMING USING ‘C’

On successful completion of the course, students will be able to
CO1: Understand the evolution and functionality of a Digital Computer.
CO2: Apply logical skills to analyze a given problem
CO3: Develop an algorithm for solving a given problem.
CO4: Understand 'C' language constructs like Iterative statements, Array processing, Pointers, etc.
CO5: Apply 'C' language constructs to the algorithms to write a 'C' language program.

rogram	Semester	Course Code	Course Name
B.Sc(AAI)	II	CSC112DMS	Database Management System

On successful completion of the course, students will be able to
CO1: Describe the fundamental elements of relational database management systems.
CO2: Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL.
CO3: Design ER-models to represent simple database application scenarios.
CO4: Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data.
CO5: Design entity relationship and convert entity relationship diagrams into RDBMS and formulate SQL queries on the respect data into RDBMS and formulate SQL queries on the data

Program	Semester	Course Code	Course Name
B.Sc(AAI)	II	CSC123CN	COMPUTER NETWORKS

On successful completion of this practical course, the student will be able to:
CO1: Explain basic concepts, OSI reference model, services and role of each layer of OSI model and TCP/IP, networks devices and transmission media, Analog and digital data transmission
CO2: Apply channel allocation, framing, error and flow control techniques.
CO3: Describe the functions of Network Layer i.e. Logical addressing, subnetting & Routing Mechanism.
CO4: Explain the different Transport Layer function i.e. Port addressing, Connection Management, Error control and Flow control mechanism.
CO5: Explain the functions offered by session and presentation layer and their Implementation.
CO6: Explain the different protocols used at application layer i.e. HTTP, SNMP, SMTP, FTP, TELNET and VPN.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	III	CSC231AML	APPLIED MACHINE LEARNING

On successful completion of this practical course, the student will be able to:
CO1: Gain knowledge about basic concepts of Machine Learning
CO2: Identify machine learning techniques suitable for a given problem
CO3: Solve the problems using various machine learning techniques
CO4: Apply Dimensionality reduction techniques.
CO5: Design application using machine learning techniques.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	III	CSC232OOPJ	OBJECT ORIENTED PROGRAMMING USING JAVA

On successful completion of the course, students will be able to;
CO1: Understand object oriented programming concepts to solve real world problems.
CO2: Write programs using Java collection API as well as the java standard class library
CO3: Understand underlying principles of Object-Oriented Programming in Java.
CO4: Demonstrate the implementation of inheritance (multilevel, hierarchical and multiple) by using extend and implement keywords.
CO4: Use dynamic and static polymorphism to process objects depending on their class.
CO5: Demonstrate the user defined exceptions by exception handling keywords (try, catch, throw, throws and finally).
CO6: Use multithreading concepts to develop inter process communication.
CO7: Describe the backend connectivity process in java program by using JDBC drivers.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC243SML	Statistical Machine Learning

At the end of the course student will
CO 1 : Structure and divide statistical learning problems into tractable sub-problems, formulate a mathematical solution to the problems and implement this solution using statistical software.
CO 2 : Use and develop linear and nonlinear models for classification and regression.
CO 3 : Describe the limitations of linear models and understand how these limitations can be handled using nonlinear models.
CO 4 : Explain the basic ideas of Bayesian modeling and be able to use them for classification and regression.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC244TF	Tensor flow

At the end of the course student will

CO1: To learn how to create, train and deploy machine learning models using the Tensorflow framework.

CO2: Ability to implement best practices for data automation and model tracking.

CO3: Using production level tools to perform monitoring and model retrainging.

CO4: Understand the deep learning concepts such as activation functions and gradient decent.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC245DS	DATA STRUCTURES

At the end of the course student will

CO 1: Understand available Data Structures for data storage and processing.

CO 2: Comprehend Data Structure and their real-time applications-Stack, Queue, Linked List, Trees and Graph

CO 3: Choose a suitable Data Structures for an application

CO 4: Develop ability to implement different Sorting and Search methods

CO 5: Have knowledge on Data Structures basic operations like insert, delete, search, update and traversal

CO 6: Design and develop programs using various data structures

CO 7: Implement the applications of algorithms for sorting, pattern matching etc

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC246SE	SOFTWARE ENGINEERING

At the end of the course student will

CO 1: Students will be able to decompose the given project in various phases of a lifecycle.

CO 2: Ability to apply software engineering principles and techniques.

CO 3: Ability to develop, maintain and evaluate large-scale software systems.

CO 4: To produce efficient, reliable, robust and cost-effective software solutions.

CO 5: Students will be able to choose appropriate process model depending on the user requirements.

CO 6: To communicate and coordinate competently by listening, speaking, reading and writing english for technical and general purposes.

CO 7: Ability to work as an effective member or leader of software engineering teams.

CO 8: To manage time, processes and resources effectively by prioritising competing demands to achieve personal and team goals Identify and analyses the common threats in each domain.

CO 9: Students will be able perform various life cycle activities like Analysis, Design, Implementation, Testing and Maintenance.

Program	Semester	Course Code	Course Name

B.Sc(DAI)	V	CSC3511INN	INTRO. TO NEURAL NETWORKS & DEEP LEARNING

On successful completion of the course, students will be able to;
CO1: Describe the feed-forward and deep networks.
CO2: Design single and multi-layer feed-forward deep networks and tune various hyper-parameters.
CO3: Implement deep neural networks to solve a problem.
CO1: Analyse performance of deep networks.
CO4: Understand the characteristics and types of artificial neural network and remember working of biological Neuron and Artificial Neural Network.
CO5: Apply different types of auto encoders with dimensionality reduction and regularization.
CO6: Design Convolutional Neural Network and classification using Convolutional Neural Network.

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3512OS	OPERATING SYSTEMS

Upon successful completion of the course, a student will be able to:
CO1: Know Computer system resources and the role of operating system in resource Management with algorithms
CO2: Understand Operating System Architectural design and its services.
CO3: Gain knowledge of various types of operating systems including Unix and Android.
CO4: Understand various process management concepts including scheduling, synchronization, and deadlocks.
CO5: Have a basic knowledge about multithreading.
CO6: Comprehend different approaches for memory management.
CO7: Understand and identify potential threats to operating systems and the security features design to guard against them.
CO8: Specify objectives of modern operating systems and describe how operating systems have evolved over time.
CO9: Describe the functions of a contemporary operating system

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3513NLP	NATURAL LANGUAGE PROCESSING

On successful completion of this practical course, the student will be able to

CO1: Show sensitivity to linguistic phenomena and an ability to model them with formal grammars

CO2: Understand and carry out proper experimental methodology for training and evaluating empirical NLP systems

CO3: Able to manipulate probabilities, construct statistical models over strings and trees, and estimate parameters using supervised and unsupervised training methods.

CO4: Able to design, implement, and analyze NLP algorithms

CO5: Able to design different language modelling Techniques

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3514NLP	Theoretical Machine Learning

On successful completion of this practical course, the student will be able to

CO1: Machine learning studies automatic methods for learning to make accurate predictions or useful decisions based on past observations.

CO2: This course introduces theoretical machine learning, including mathematical models of machine learning, and the design and rigorous analysis of learning algorithms.

CO3: Likely topics include: bounds on the number of random examples needed to learn;

CO4: learning from non-random examples in the on-line learning model;

CO5: how to boost the accuracy of a weak learning algorithm; support-vector machines; maximum-entropy modelling; portfolio selection; game theory.

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3515DOC	Digital Computer Organization And Introdoction To Computer System Architecture

On successful completion of this practical course, the student will be able to

CO1: Students will learn about what the main physical components of a computer are, why 0 and 1 are such important numbers within computer.

CO2: Ability to understand the internal components and basic structure of computer.

CO3: To know the background of internal communication of the computer.

CO4: Demonstrate a comprehensive understanding of basic logic gates, data representation and Boolean algebra.

CO5: To comprehend how the circuits are designed to process ALU and Memory operations.

CO6: The ability to know about how physical internal and external components communicate through bus.

DEPARTMENT OF BIG DATA ANALYTICS			
Program	**Semester**	**Course Code**	**Course Name**

B. Sc., Big Data Analytics	I	CS111PC	PROGRAMMING USING ‘C’

By successful completion of the course, students will be able to:
CO 1: Understand the evolution and functionality of a Digital Computer.
CO 2: Apply logical skills to analyse a given problem
CO 3: Develop an algorithm for solving a given problem.
CO 4: Understand ‘C’ language constructs like Iterative statements, Array processing, Pointers,
etc.
CO 5: Apply ‘C’ language constructs to the algorithms to write a ‘C’ language program.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	CS111PC (P)	C PROGRAMMING LAB

On successful completion of this practical course, the student will be able to:
CO 1: Read, understand and trace the execution of programs written in C language.
CO 2: Write the C code for a given algorithm.
CO 3: Implement Programs with pointers and arrays, perform pointer arithmetic, and
CO 4: use the pre-processor.
CO 5: Write programs that perform operations using derived data types.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	CS112DBMS	DATABASE MANAGEMENT SYSTEM

On successful completion of the course, students will be able to;
CO 1: Understand the database approach and acquire knowledge in Database Management Systems.
CO 2: Demonstrate an understanding of the relational data model.
CO 3: Perceive the essential elements in constructing ER, EER models
CO 4: Intuit the procedure in mapping the ER to relational schema
CO 5: Epitomize an understanding of normalization theory and apply such knowledge to the normalization of a database
CO 6: Able to use an SQL interface to create tables and views, insert/update/delete data and query a database

Program	Semester	Course Code	Course Name

B. Sc., Big Data Analytics	I	CS112DBMS(P)	MySQL LAB

On successful completion of this practical course, the student will be able to:
CO1: Understand how to create and maintain database using SQL Commands
CO 2: Using DDL Commands (Create, Alter, Drop, Truncate and Rename)
CO 3: Using DML Commands (Select, Insert, Update and Delete)
CO 4: Working with SQL Queries using where clause and Operators in, between, like etc

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	II	CSC123DV	Data Visualization

On successful completion of this practical course, the student will be able to:
CO 1: Design and create data visualizations.
CO 2: Conduct exploratory data analysis using visualization.
CO 3: Craft visual presentations of data for effective communication.
CO 4: Use knowledge of perception and cognition to evaluate visualization design alternatives.
CO 5: Design and evaluate color palettes for visualization based on principles of perception.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	II	CSC124BDA	BIG DATA ANALYTICS

At the end of the course student will
CO 1: Learn tips and tricks for Big Data use cases and solutions.
CO 2: Learn to build and maintain reliable, scalable, distributed systems with Apache Hadoop.
CO 3: Able to apply Hadoop Ecosystem components

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CSC235DWM	DATA WAREHOUSING & DATA MINING

On successful completion of the course, students will be able to:
CO 1: Understand Data Warehouse fundamentals, Data Mining Principles.
CO 2: Design appropriate classification techniques.
CO 3: Understand various tools of Data Mining and their techniques to solve the real time problems.
CO 4: Learn Multidimensional schemas suitable for data warehousing.
CO 5: Develop and apply critical thinking, problem solving, and decision-making skills.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CSC235DWM(P)	WEKA LAB

On successful completion of this practical course, the student will be able to:
CO 1: Identify source tables and populate sample data
CO 2: Build Data Warehouse
CO 3: Design multi-dimensional data models
CO 4: Work with DMLQ(Data Mining Query Language)
CO 5: Write ETL(Extract-Transform-Load.) scripts and implement using data warehouse tools.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CSC236DST	DATA STORAGE TECHNOLOGIES AND NETWORKS

On successful completion of the course, students will be able to:
CO 1: Understand Data storage Technologies and Networks.
CO 2: Learn about different types of storage systems, storage networking technologies
CO 3: Learn concepts related to SAN, NAS and Cloud Storage.
CO 4: This course will also cover key concepts related to cloud computing, and some of the new Trends in the storage industry.
CO 5: To explain the design of a data centre and storage requirements
CO 6: To discuss the various types of storage and their properties
CO 7: Understand concepts related to storage Architecture

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CS236DST(P)	DATA STORAGE TECHNOLOGIES LAB

On successful completion of this practical course, the student will be able to: CO 1: Understand Data storage Technologies and Networks
CO 2: Understand concepts related to storage Architecture
CO 3: Learn concepts related to SAN, NAS and Cloud Storage.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CS237JAVA	OBJECT ORIENTED PROGRAMMING USING JAVA

On successful completion of the course, students will be able to;
CO 1: Understand object oriented programming concepts to solve real world problems.
CO 2: Write programs using Java collection API as well as the java standard class library CO 3: Understand underlying principles of Object-Oriented Programming in Java.
CO 4: Demonstrate the implementation of inheritance (multilevel, hierarchical and multiple) by using extend and implement keywords.
CO 5: Use dynamic and static polymorphism to process objects depending on their class.
CO 6: Demonstrate the user defined exceptions by exception handling keywords (try, catch, throw, throws and finally).
CO 7: Use multithreading concepts to develop inter process communication.
CO 8: Describe the backend connectivity process in java program by using JDBC drivers.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CS237JAVA(P)	JAVA LAB

On successful completion of the course, students will be able to;
CO 1: develop an in depth understanding of programming in Java: data types, variables, operators, operator precedence, Decision and control statements, arrays, switch statement, Iteration Statements, Jump Statements, Using break, Using continue, return.
CO 2: write Object Oriented programs in Java: Objects, Classes constructors, returning and passing objects as parameter, Inheritance, Access Control, Using super, final with inheritance Overloading and overriding methods, Abstract classes, Extended classes.
CO 3: develop understanding of developing packages & Interfaces in Java: Package, concept of CLASSPATH, access modifiers, importing package, Defining and implementing interfaces.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	IV	CS24VIIIHDA	Hadoop & Data Analysis

At the end of the course student will
CO 1: Preparing for data summarization, query, and analysis.
CO 2: Applying data modelling techniques to large data sets
CO 3: Creating applications for Big Data analytics
CO 4: Building a complete business data analytic solution

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	IV	CS24IXPOS	Principles of Operating Systems

At the end of the course student will

CO 1: Know Computer system resources & the role of operating systems in resource management with algorithms CO2: Understand Operating System Architectural design and its services.

CO 3: Gain knowledge of various types of operating systems including Unix and Android.

CO 4: Understand various process management concepts including scheduling, synchronization, and deadlocks.

CO 5: Have a basic knowledge about multithreading.

CO 6: Comprehend different approaches for memory management.

CO 7: Understand and identify potential threats to operating systems and the security features design to guard against them.

CO 8: Specify objectives of modern operating systems & describe how operating systems have evolved over time.

CO 9: Describe the functions of a contemporary operating system

Program	Semester	Course Code	Course Name
B.Sc., (CS with Big Data)	IV	CS2XDCO	DIGITAL COMPUTER ORGANIZATION AND INTROD. TO COMPUTER SYSTEM ARCHITECTURE

At the end of the course student will

CO 1: To make the students to understand different types of Digital logic circuits

CO 2 : To design procedures

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XIDS	DISTRIBUTED SYSTEMS

By successful completion of the course, students will be able to:

CO 1: To understand the architectures of distributed systems.

CO 2: To understand and compare the technologies associated with presentation and interaction services.

CO 3: To acquire the knowledge in component models of Session and Entity Beans.

CO 4: To provide the better understanding of ASP.NET programming with web server controls.

CO 5: To be familiar with rich web controls and data access technology in ADO.NET

Program	Semester	Course Code	Course Name

B. Sc., Big Data Analytics	V	CSC35X1DS(P)	DISTRIBUTEDSYSTEMS LAB

On successful completion of this practical course, the student will be able to:
CO 1: Define terms related to the Internet, demonstrate the ability to use the World Wide Web,
CO 2: Understand and use common types of files found on the internet.
CO 3: Design web pages
CO 4: Create basic Web pages with HTML and CSS

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3512	Cyber Security

By successful completion of the course, students will be able to:
CO 1: Understand Basics of cyber security concepts
CO 2: Understand Different types of security attacks
CO 3: Study Roles of International law
CO 4: Get information about National cyber security policy Know what is a cyber crime
CO 5: How to provide security

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XIICS(P)	CYBER SECURITY LAB

By successful completion of the course, students will be able to:
CO 1: Provide security to Personal Computer
CO2: Protect documents
CO 3: Protect Databases
CO 4: Setting Credentials
CO 5: Cracking passwords

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3513	ADVANCED JAVA

By successful completion of the course, students will be able to:
CO 1: To understand the meaning and basic components of servlets and JSP
CO 2: To know the required software to run PHP programs
CO 3: Understanding the use of servers=

Program	Semester	Course Code	Course Name

B. Sc., Big Data Analytics	V	CS35XIIIJAVA(P)	ADVANCED JAVA PROGRAMMING LAB

By successful completion of the course, students will be able to:
CO 1: an ability to apply knowledge on JDBC,
CO 2: an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution, using various Sql operations,
CO 3: an ability to design, implement, database using HTML

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3514	DATA STRUCTURES

On successful completion of this practical course, the student will be able to
CO 1: Understand available Data Structures for data storage and processing.
CO 2: Comprehend Data Structure and their real-time applications-Stack, Queue, Linked List, Trees and Graph
CO 3: Choose a suitable Data Structures for an application
CO 4: Develop ability to implement different Sorting and Search methods
CO 5: Have knowledge on Data Structures basic operations like insert, delete, search, update and traversal
CO 6: Design and develop programs using various data structures
CO 7: Implement the applications of algorithms for sorting, pattern matching etc

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XIVDS(P)	DATA STRUCTURES USING C

On successful completion of this practical course, the student will be able to;
CO1: Identify the appropriate data structure for a given problem.
CO 2: Design programs for solving problems using different data structures.
CO 3: Solve problems using trees, graphs and hash tables addressing various issues.
CO 4: Ability to effectively use compilers includes library functions, debuggers and troubleshooting.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XVSE	SOFTWARE ENGINEERING

Upon successful completion of the course, a student will be able to:

CO 1: Students will be able to decompose the given project in various phases of a lifecycle.

CO 2: Ability to apply software engineering principles and techniques.

CO 3: Ability to develop, maintain and evaluate large-scale software systems.

CO 4: To produce efficient, reliable, robust and cost-effective software solutions.

CO 5: Students will be able to choose appropriate process model depending on the user requirements.

CO 6: To communicate and coordinate competently by listening, speaking, reading and writing English for technical and general purposes.

CO 7: Ability to work as an effective member or leader of software engineering teams.

CO 8: To manage time, processes and resources effectively by prioritizing competing demands to achieve personal and team goals Identify and analyze the common threats in each domain.

CO 9: Students will be able perform various life cycle activities like Analysis, Design, Implementation, Testing and Maintenance.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XVSE(P)	SOFTWARE DESIGE TOOLS (UML)

On successful completion of this practical course, the student will be able to

CO 1: Understand the Case studies and design the Model..

CO 2: Understand how design patterns solve design problems.

CO 3: Develop design solutions using creational patterns.

CO 4: Construct design solutions by using structural and behavioural patterns

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	FOU111ICT	INFORMATION COMMUNICATION TECHNOLOGY (ICT)

On successful completion of this practical course, the student will be able to;

CO 1: Discovering the milestones of ICT history;

CO 2: Acknowledging the role of technologies in modern society and the potential of social web

CO 3: Identifying IT uses in digital citizenship contexts.

CO 4: Briefly exploring different tools and communication environments on the Internet;

CO 5:Choosing the appropriate IT tool for the relevant context.

Program	Semester	Course Code	Course Name

B. Sc., Big Data Analytics	I	SDC122AE	ADVANCED EXCEL
On successful completion of the course, students will be able to; CO 1: Work with basic functions of Excel CO 2: Formatting worksheet CO 3: Can perform operations like Filter, Sort etc. CO 4: Do date and time validations CO 5: Can work with Lookup Functions			

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	SDC122PL	PROGRAMMING IN PL/SQL
On successful completion of the course, students will be able to; CO 1: Understand the fundamentals of Creating and Running PL/SQL Code. CO 2: Learn about PL/SQL Program Structure CO 3: Understand the Loop Basics CO 4: Learn about PL/SQL Program Data CO 5: Get the knowledge about Procedures, Functions, and Parameters CO 6: Learn about the I/O and PL/SQL			

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	SDC122SQL	ANALYSIS BIG DATA WITH SQL
On successful completion of the course, students will be able to; CO 1: Structured Query Language (SQL) to extract and analyse data stored in databases. CO 2: Extract data, join tables together, and perform aggregations. CO 3: learn to do more complex analysis and manipulations using subqueries CO 4: SQL queries to successfully handle a variety of data analysis tasks.			

DEPARTMENT OF AGRICULTURE AND RURAL DEVELOPMENT			
Program	**Semester**	**Course Code**	**Course Name**
B. Sc., Agriculture and rural development	I	AECO 141	Fundamentals of Agriculture economics

At the end of the course student will

CO1: Identify elements of business success in agriculture and food-processing as well as elements that determine the economic role of agriculture in the national economy.

CO2: Propose methods of micro- and macroeconomic decision making in agriculture in different agro- ecological and Agro-economic circumstances.

CO3: Describe and explain models of production, supply and demand of agricultural and food products on national and international markets

CO4: Understand the concepts of consumer choice and how it affect the farm / ranch level agriculture firm.

CO5: Understand the macroeconomics aspects of the economy as they affect the agricultural sector.

CO6: Apply economics principles to understand the conduct and performance of the agricultural industry.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	AGRO101	Fundamentals of Agronomy

At the end of the course student will

CO 1: Understand the Crop production techniques and crop growth in relation to environment

CO 2: Understand the Zero and minimum tillage: their basics and application

CO 3: Learn Precision agriculture and Precision farming, their concepts and application

CO 4: Understand the Biotic and abiotic stresses; concept of ideal plant type

CO 5: Learn Types of tillage and types sowing methods

CO 6: Basics and application crop production under protective agriculture

CO 7: Learn Irrigation methods

CO 8: Understand the Herbicides, bio-herbicides- their classification and biological control of weeds

CO 9: Learn control of weed in non-cropped situations using different methods

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	HORT181	Fundamentals of Horticulture

At the end of the course student will

CO 1: Students will be able to identify plant vegetative structure

CO 2: Students will understand basic principles, processes and plant propagation methods.

CO 3: Students will understand how to propagate plants, manage and harvest a variety of plant.

CO 4: Students will understand how to propagate plant, manage and harvest a variety of plant.

CO 5: Students will understand recognize various crop harvesting, transportation, and processing

CO 6: Students will Understand the Kitchen gardening, Lawn making

CO 7: Understand transplantation Medicinal, Aromatic plants Spices and Condiments

CO 8: Learn Irrigation and fertilizer application techniques for horticulture crops

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	BICM101	Fundamentals of Plant Biochemistry and Soil Science

At the end of the course student will

CO 1: Understanding of Biochemistry as a discipline and milestone discoveries in life sciences that led to establishment of Biochemistry as a separate discipline.

CO 2: Fundamental properties of elements, their role in formation of biomolecules and in chemical reactions within living organisms.

CO 3: Understand plant cell structure, organization, and apply specific biochemical functions to all compartments of the plant cell.

CO 4: Learn amino acid structures and relate their chemical properties to the synthesis and function of proteins and enzymes.

CO 5: Understand protein structural hierarchy and relate structure to function.

CO 6: understand central metabolism, its plant-specific components, and their functional significance at multiple levels and explore principles of metabolic modeling.

CO 7: To aware the students about causes, effects and remedies to prevention and mitigation of soil pollution.

CO 8: Knowledge about soil forming rocks and minerals, their weathering and soil forming processes and climatic factors affect them

CO 9: To be able about physical and chemical properties of soil and their effect on plant’s health

Program	Semester	Course Code	Course Name

B. Sc., Agriculture and rural development	I	CC111 MSP	Minimum supporting Price for Agriculture Crops In AP

At the end of the course student will

CO 1: Understanding of MSP in Agricultural Crops
CO 2: Understanding of MSP in Horticultural Crops
CO 3: Understanding of MSP in Indian Economy
CO 4: Understanding of MSP in AP Economy

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	SDC 111 VC	VERMICOMPOST

At the end of the course student will
CO 1: Understanding brief description methods of preparation of vermicompost
CO 2: Materials used for vermicompost bed
CO 3: Procedure for preparation of vermicompost by step by step
CO 4: Advantages and Disadvantages in Vermicompost.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	AGRO103	Introductory Agrometeorology And Climate Change

At the end of the course student will understand
CO 1: Earth atmosphere, composition, extent and structure; Atmospheric weather variables; Atmospheric pressure, its variation with height
CO 2: Nature and properties of solar radiation, solar constant, depletion of solar radiation, short wave, long wave and thermal radiation, net radiation.
CO 3: Artificial rainmaking; Monsoon, mechanism and importance in Indian agriculture.
CO 4: Weather forecasting, types of weather forecast and their uses.
CO 5: Climate change, climatic variability, global warming, causes of climate change
CO 6: Atmospheric temperature, temperature inversion
CO 7: Precipitation, process of precipitation

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	PATH171	Fundamentals Of Plant Pathology

At the end of the course student will

Course Outcomes

CO 1: Importance of plant diseases, scope and objectives of Plant Pathology.

CO 2: Diseases and symptoms due to abiotic causes. Fungi: General characters, definition of fungus, somatic structures.

CO 3: Nomenclature, Binomial system of nomenclature, rules of nomenclature.

CO 4: Basic methods of classification and reproduction.

CO 5: Nematodes: General morphology and reproduction

CO 6: classification, symptoms and nature of damage caused by plant nematodes (Heterodera, Meloidogyne, Anguina etc.)

CO 7: viruses: nature, architecture, multiplication and transmission. Study of phanerogamic plant parasites.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	ENTO131	Fundamentals Of Entomology

At the end of the course student will understand

CO 1: History of Entomology in India

CO 2: Structure and modifications of insect antennae, mouth parts, legs, wing venation, modifications and wing coupling apparatus

CO 3: Types of reproduction in insects

CO 4: Insect Taxonomy

CO 5: Classification of class Insecta Upto orders

CO 6: Relationship of class Insecta with other classes of Arthropoda

Program	Semester	Course Code	Course Name

B. Sc., Agriculture and rural development	II	GPBR111	Genetics & Plant Breeding
At the end of the course student will understand CO 1: Pre Mendelian concepts of heredity CO 2: Chromosome - Structure of chromosome, types of chromosomes CO 3: Linkage CO 4: Sex determination in plants CO 5: Cell division , Cell cycle , Mitosis CO 6: Mutation - Classification - Gene mutations			

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	AENG151	Soil And Water Conservation Engineering
CO 1: Introduction to soil and water conservation and causes soil erosion CO 2: Wind erosion –Mechanics of wind erosion, types of soil movement CO 3: Open channel hydraulics CO 4: Soil loss estimation by universal soil loss equation CO 5: Fundamental components of micro irrigation systems CO 6: Definition and agents of soil erosion			

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	SDC121SBP	Seed Bed Preparation
At the end of the course student will understand CO 1: Introduction to seed bed CO 2: preparation of beds CO 3: Design criteria and constructional details of seed bed CO 4: Uses of seed bed			

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	CC121 ZBNF	Zero Budget Natural Farming

At the end of the course student will understand CO 1: For the capacity building of resources persons and farmer experts CO 2: On farm farmer trainings CO 3: Organic certification CO 4: ZBNF input shops

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III	AGRO 201	Crop Production Technology – I (Cereals, Millets and Pulses)
CO1: Introduction and development of agriculture. CO2: Nutrient management with special emphasis on nitrogen dynamics, micro nutrients -INM CO3: Harvesting -Yield attributes - yield - post harvest operations CO4: Land Preparation - seeds and sowing - nutrient management - water management - weed management - climate resilient technologies			

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III	AGRO 202	CROP PRODUCTION TECHNOLOGY– II (OIL SEEDS, FIBER, SUGAR, TOBACCO AND FODDER CROPS
Course Outcomes CO1: Importance of oilseed crops- edible and non – edible oils – nutritional value importance in Indian economy CO2: Soil and climatic requirements - types - growth stages - land Preparation -seeds and sowing-seed treatment-seed rate-spacing-season-time and method of sowing varieties CO3: Nutrient management- water management- weed management yield attributes – yield-Harvesting – post harvest operations- quality considerations – cropping systems CO4: Nursery management-seeds and sowing for different types- seed treatment-seed rate-spacing-season-time and method of sowing CO5: Ratoon cane management – factors affecting quality of sugarcane – arrowing– jaggery making – clarification CO6: Origin - geographical distribution and productivity in India and Andhra Pradesh of ground nut, soyabean, sunflower, sesame, safflower, castor, Rapeseed and mustard. CO7: Forage crops- Importance- terminology in forage production-classification of fodders			

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III	AENG-351	Protected cultivation and post harvest technologies

Course outcomes

CO1: Understanding the concepts in greenhouse technology.
CO2: Acquaintance with the types of greenhouses.
CO3: Acquaintance with different materials for construction of greenhouses.
CO4: Understanding the concepts of Irrigation systems used in greenhouses.
CO5: Understanding the concepts of drying of agriculture produced in greenhouses.
CO6: Understanding the handling equipment that used in greenhouses.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	AGR303	RAINFED AGRICULTURE AND WATERSHED MANAGEMENT

Course Outcomes

CO1: Definition – dimensions of the problem – area and production from dry lands in India and Andhra Pradesh
CO2: Problems and prospects of rainfed agriculture in India- climate – rainfall pattern – distribution
CO3: Problems and prospects of rainfed agriculture in India - soil characteristics – soil fertility status
CO4: Effect of water deficits on physio-morphological characteristics of the plants
CO5: Tillage for rainfed crops – off-season tillage – primary tillage –secondary tillage – year round tillage
CO6: Soil erosion – definition – losses due to erosion- factors affecting erosion – universal soil loss equation.
CO7: Management of crops in rainfed areas - Agronomic measures of soil and water conservation.
CO8- Watershed – definition – concept— objectives and principles of water shed management

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	SMCA301	AGRICULTURE INFORMATICS

Course Outcomes

CO1: Explain Windows explorer- Creating folder - Copy and paste functions - Control panel Notepad -WordPad etc.
CO2: Summarize MS word - Creating a document, saving and editing
CO3: Discuss Use of options from tool bars – Format - Insert and tools (Spelling and Grammar) - Alignment of paragraphs and text.
CO4: Explain to Creating a table - Merging of cells - columns and row width - Formats etc.

Program	Semester	Course Code	Course Name

B. Sc., Agriculture and rural development	V	GPBR312	Crop improvement- II (Fibres, Sugars, Starches, Narcotics

Course Outcomes

CO1: Idea on Centers of origin, distribution of species, wild relatives

CO2: Knowledge on Plant genetic resources, its utilization and conservation.

CO3: Clear idea on plant morphology and floral biology of the crops under study.

CO4. Knowledge on major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield and adaptability.

CO5. To know emasculation and hybridization techniques in different crop species; fibers, sugars, starches, narcotics, vegetables, fruits and flowers.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	ENTO 332	PESTS OF HORTICULTURAL CROPS AND THEIR MANAGEMENT & BENEFICIAL INSECTS

Course Outcomes

CO1: General account on nature and type of damage by pest of various various vegetable crops, fruit crops, plantation crops, ornamental crops, narcotics, spices and condiments.

CO2: Study of Bhendi- Shoot and fruit borer

CO3: insect pest of Mango- Leafhoppers, stem borer, nut weevil

CO4: insect pest of Crucifers- Diamond back moth, cabbage head borer, leaf webber, aphid, painted bug, tobacco caterpillar and cabbage butterfly.

CO5: Silk worm diseases- Pebrine- Symptoms, mode of transmission.

CO6: Beekeeping- Importance and multiple source of income

CO7: Insect orders bearing predators and parasitoids used in pest control and their key identification characters

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	AECO341	FARM MANAGEMENT AND PRODUCTION RESOURCE ECONONMICS

Course Outcomes

CO1: Definitions and Concepts Farm management and production Economics

CO2: To understand the Determination of optimum input and optimum output and decision rules.

CO3: To understand the types of production Function

CO4: To understand the Meaning and concept of cost, cost function /cost-output relationship - Types of production costs and their interrelationship - Importance of costs in managing farm business

CO5: Farm inventory - Meaning and importance of taking inventory on farm business - Different methods of appraisal and valuation of farm resources and products

CO6: Computation of depreciation cost of farm assets

CO7: Types of farming and types of Farm business Organization

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	PATH-372	DISEASES OF FIELD AND HORTICULTURAL CROPS AND THEIR MANAGEMENT-II

Course Outcomes

CO1: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in fruit crops.

CO2: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in vegetable crops.

CO3: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in flower crops.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	HORT 381	POST-HARVEST MANAGEMENT AND VALUE ADDITION OF FRUITS AND VEGETABLES

Course Outcomes

CO1: Idea on fruits and vegetables that needs post harvest management

CO2: Clear idea on causes for post harvest loses

CO3: Knowledge on different preservation methods to avoid post harvest loses.

CO4. Idea on packaging methods to avoid post harvest loses .

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	AEXT 391	COMMUNICATION SKILLS AND PERSONALITY DEVELOPMENT

Course Outcomes

CO1: Improvement in communication and grammar

CO2: Improved writing skill which is required for teaching and research purpose.

CO3: Holistic personality development

CO4: Coordinated functioning and time management.

DEPARTMENT OF BBA-RETAIL OPERATIONS			
Program	**Semester**	**Course Code**	**Course Name**
BBA., RETAIL OPERATIONS	I	BBA111IRO	INTRODUCTION TO RETAIL OPERATIONS

COURSE OUTCOME:

CO1: The learners will be able to comprehend the process, procedures of Retail Sector.

CO2: The learners will be able to relate the systems & protocols of retail stores operations.

CO3: The learners will be able to deconstruct the procedures of retail store practices.

Program	**Semester**	**Course Code**	**Course Name**
BBA., RETAIL OPERATIONS	I	BBA111IC	IN STORE CASHIERING AND MERCHANDISING OPERATIONS

COURSE OUTCOME:

CO1: The Learners will be able to demonstrate prompt practices at retail stores.

CO2: The learners will be able to assimilate the knowledge into practice of maintaining inventory, warehousing, etc

CO3: The Learners will be able to demonstrate practical knowledge associated with Visual Merchandising.

Program	**Semester**	**Course Code**	**Course Name**
BBA., RETAIL OPERATIONS	I	BBA111BCS	BUSINESS COMMUNICATION SKILL

COURSE OUTCOME:

CO1: The learner will be able to apply communication skills with proficiency.

CO2: The learners will be well equipping with effective communication skills within a professional skill.

CO3: The learners will be able to understand various nuances of communication to a greater extent.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	BBA121BBM	BASICS OF BUSINESS MANAGEMENT

COURSEOUTCME:

CO1: The learners will be able to comprehend know how of the business environment.

CO2: The learners will be able to operate the framework for effective retailing.

CO3: The learners will be able to predict various sales & marketing strategy for retail.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	BBA121IC	IN STORE CASHIERING & MERCHANDISING OPERATIONS

CO1: The learners will be abletounderstandthebasics ofPOS.

CO2: Thelearners willbeabletodistinguishthemechanismofdefiningproducts in a retail store.

CO3: Thelearnerswillbeabletoanalyze&interpretvariousactivitieslinkedtosales management.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	BBA121BE	BUSINESS ECONOMICS

COURSEOUTCOME:

CO1: Thelearnerswillbeabletounderstandtheroleofmanagerialeconomistinafirm.

CO2: Thelearners willbeabletoapplytheknowledgeofcostingindecisionmaking.

CO3: Thelearnerswillbeabletoidentifyandanalyzemarketpracticesandprocess in real life.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	BBA121AP	RETAILASSOCIATECUMCASHIER

CourseOutcome:

The learners will be able to perform retail cashiers &; retail trainee associate role within the organization.

Program	Semester	Course Code	Course Name

BBA., RETAIL OPERATIONS	III	BBA231CRM	CUSTOMER RELATIONSHIP MANAGEMENT
COURSE OUTCOME: CO1: The equip learners with the foundational knowledge of CRM CO2: The learners will be able to identify the importance of customer value management CO3: The learners will be able to know the best practices for long term profitability.			

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231ECS	ERP & COMPUTER SKILLS
COURSE OUTCOME: CO1: The learners will be able to identify the impact of using ERP CO2: The learners will be able to know the working knowledge of how data is integrated in ERP			

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231SM	SALES MANAGEMENT
.COURSE OUTCOME: CO1: The learners will be able to understand the process of sales management CO2: The learners will be able to identify the role and responsibilities of the sales manager CO3: The learners will be able to know the concept of sales force and its responsibilities.			

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231CRM	CUSTOMER REDRESSAL MECHANISM

COURSE OUTCOMES:

CO1: Learners able to know the key concepts in grievance redress mechanisms

CO2: The learner will be able to investigate the key personal skills required and main roles and responsibilities of the grievance redress committee.

CO3: Learner will be able to know what are the key elements of effective complaint handling and the steps undertaken in handling complaints.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	IV	BBA241FCA	FUNDAMENTALS OF FINANCIAL & COST ACCOUNTING

COURSE OUTCOMES:

CO1: The student will be able to understand the importance of management accounting as a key input for managerial/ financial decision making.

The students will be able to take financial decisions using tools of management accounting.

CO2: Students will be able to apply the Basic knowledge of Management and cost accounting in the real-life situation

CO3: This subject will enable them to enhance their ability and professional skills

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	IV	BBA241FMD	FMCG DISTRIBUTION

COURSE OUTCOME:

CO1: To know the roles & responsibilities of FMCG Distribution professionals

CO2: Helps to understand the distribution management process.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	IV	BBA241NSR	NON-STORE RETAILING

COURSE OUTCOME:

CO1: To develop knowledge of contemporary E- retail management issues at the strategic level.

CO2: To describe and analyse the way E-retailing works, specifically the key activities and relationships.

CO3: To provide an academic underpinning to the above through the application of E retailing theory and research.

DEPARTMENT OF HOTEL MANAGEMENT			
Program	**Semester**	**Course Code**	**Course Name**
B. Sc., Hotel Management	I	HM111HK	HOUSEKEEPING
By successful completion of the course, students will be able to; CO 1: The subject aims to establish the importance of Housekeeping and its role in the hospitality Industry. CO 2: It also prepares the student to acquire basic knowledge and skills necessary for different tasks and aspects of housekeeping. CO 3: Students to understand various procedures in Housekeeping.			

Program	**Semester**	**Course Code**	**Course Name**
B. Sc., Hotel Management	I	HM111HK (P)	HOUSEKEEPING LAB
By successful completion of the course, students will be able to; CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar CO 2: Understand the Rooms layouts and standard Amenities placed in the room CO 3: Develop skill in Identification of cleaning equipments (manual and Mechanical) CO 4: Acquire skills to study and perform the procedure of Bed making			

Program	**Semester**	**Course Code**	**Course Name**
B. Sc., Hotel Management	I	HM 111 FP(P)	FOOD PRODUCTION
By successful completion of the course, students will be able to; CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar CO 2: Understanding the usage and identification of equipments CO 3: Develop skill in Cuts of vegetables CO 4: Gain knowledge on different food preparations			

Program	**Semester**	**Course Code**	**Course Name**
B. Sc., Hotel Management	I	HM111FBS	Food & Beverage service

By successful completion of the course, students will be able to; CO 1: The course will give the students a comprehensive knowledge and develop technical skills in the basic aspects of food & beverage service operations in the Hotel Industry. CO 2: To learn about Food & Beverage Service equipment- uses and sizes. CO 3: Notice the Ancillary Areas of Food and Beverage Service

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM123FBS	Food and Beverage Service
By successful completion of the course, students will be able to; CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar CO 2: Develop skill inCarrying Salvers and Holding of equipments. CO 3: Understand the Basic Etiquettes for Restaurant Staff. CO 4: GetKnowledge to operate with other interlink department			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111FO	Front Office
By successful completion of the course, students will be able to; CO 1: This course aims to establish the importance of Front Office within the hospitality industry. CO 2: It also prepares the student to acquire basic skills. CO 3: Get Knowledge on on necessary to identify the required standards			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111FO(P)	Front Office practical
By successful completion of the course, students will be able to; CO 1: Get Knowledge of equipment. CO 2: Develop skill in handling situations in the front office department. CO 3: Gain knowledge on different Front office terminology			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HR111PR	Public Relations

By successful completion of the course, students will be able to; CO 1: To learn Public Relations Role in Business, Government, Politics, NGOs and Industry. CO 2: Importance Tools of Public Relations. CO 3: A brief Review of the Ethics of Public RelationsSocial Responsibility. CI 4: Finally learn the Present and future of Public Relations in India.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122HO	Housekeeping Operations
By successful completion of the course, students will be able to; CO 1: The subject aims to establish the cleaning science and types of cleaning agents CO 2: The student to acquire basic knowledge cleaning of various surfaces and metals and Public Areas CO 3: Adopted to improve skills necessary for different tasks and aspects of housekeeping.			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122MSC	Meat & Sauce Cookery
By successful completion of the course, students will be able to; CO 1: Based on the sound knowledge of commodities and storing CO 2: Principles and methods of cooking it is desired CO 3: To prepare students to evolve good understanding and prepare Classification of mother sauces. CO 4: The course further introduces the students to the concepts of bakery & confectionery			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122FSO	Food Service Operations
By successful completion of the course, students will be able to; CO 1: The courses will give the students a comprehensive knowledge on menu CO 2: To develop technical skills in the basic aspects of types of meals CO 3: To acquire food service methods and control methods in the Hotel Industry.			

Program	Semester	Course Code	Course Name

B. Sc., Hotel Management	II	HM122RD	Room Division

By successful completion of the course, students will be able to;

CO 1: This course aims to establish the structure of Front Office organization within the hospitality industry.

CO 2: It also prepares the student to acquire basic skills Equipments used at front office and

CO 3: Get knowledge in necessary to successfully Front desk operations

CO 4: Identify the required standards in this area and to consider all aspects of this department.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122HH	Health & Hygiene

On successful completion of the course, students will be able to;

CO 1: What is a healthy diet

CO 2: How can we use available information to optimize our diet?

CO 3: Can nutrition be used for a healthy life?

CO 4: Is there a one-size-fits-all “good” diet or should we individualize our dietary goals?

CO 5: Disaster management and responsiveness of public in pandemic and epidemic diseases

CO 6: Assess the impact of policies on health and hygiene Health measures to consider while traveling

CO 7: Awareness in public through digital media viz., mobile apps

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122FVP	Fruit & Vegetable Preservation

On successful completion of the course, students will be able to;

CO 1:Identify various types of fruits and vegetables and explain their nutritive value.

CO 2: Understand the fragile nature of fruits and vegetables and causes for their damage.

CO 3: Explain various methods of preservation for fresh fruits and vegetables.

CO 4: Get to know the value-added products made from fruits and vegetables.

Program	Semester	Course Code	Course Name

B. Sc., Hotel Management	III	HM233LLO	Linen & Laundry Operations

On successful completion of the course, students will be
CO 1: To learn about the Housekeeping Supervision.
CO 2: Understand the importance of linen in housekeeping
CO 3: To know the types of Linen, cleaning and guest supplies.
CO 4: Student will get knowledge on laundry operation.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	233HK(P)	HOUSE KEEPING PRACTICALS

By successful completion of the course, students will be able to;
CO 1: Idealize and perform the Layout of Linen and Uniform Room
CO 2: Gets knowledge on operation of Laundry Machinery
CO 3: Develop skill in Flower Arrangement

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233IC	Indian cooking & menu planning

On successful completion of the course, students will be able to;
CO 1: Based on the sound knowledge of commodities and principles and methods of cooking.
CO 2: It is desired to prepare students to evolve good understanding and prepare Indian regional menus in large quantities to suit the occasion.
CO 3: After doing this course, students should be able to plan and execute quantity menus.
CO 4: The course further introduces the students to the concepts of Rechauffe cookery.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233FP	Food production Practical

On successful completion of the course, students will be able to;
CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar with practicals.
CO 2: Develop cooking skill in Indian cuisine.
CO 3: Gain knowledge on cooking meat preparations.

Program	Semester	Course Code	Course Name

B. Sc., Hotel Management	III	HM233BSO	Beverage service operations

On successful completion of the course, students will be able to;

CO 1: This course will give a comprehensive knowledge of the various alcoholic beverage.

CO 2: Non-alcoholic beverage used in the Hospitality Industry.

CO 3: It will give an insight into their history, manufacture.

CO 4: Classification, and also to develop technical and specialized skills in the service of the Beverage.

CO 5: Gets knowledge on bar and restaurant planning.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233BS	Beverage Service Practical

On successful completion of the course, students will be able to;

CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar with practicals.

CO 2: Get knowledge on beverage equipment.

CO 3: Develop skill in service of alcoholic and non alcoholic beverages.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233SFO	Specialized Front office

By successful completion of the course, students will be able to;

CO 1: This course aims to establish the Registration and reservations within the Front office department.

CO 2: It also prepares the student to acquire basic skills.

CO 3: Knowledge necessary to successfully identify the required standards in this area.

CO 4: Knowing and considering all aspects of Accounting fundamentals.

CO 5: Learn how to control cash and guest safety and security.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233FO(P)	Front Office Practical

On successful completion of the course, students will be able to; CO 1: Gain knowledge on operation of keys CO 2: Understand the process of making reservation and registration CO 3: Acquire skilled knowledge on front office operation system

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233OB	Online Business
By successful completion of the course, students will be able to; CO 1: Understand the online business and its advantages and disadvantages CO 2: Recognize new channels of marketing, their scope and steps involved CO 3: Analyze the procurement, payment process, security and shipping in online business CO 4: Create new marketing tools for online business CO 5: Define search engine, payment gateways and SEO techniques.			

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233EE	Environmental Education
By successful completion of the course, students will be able to; CO 1: Understand the nature, components of an ecosystem and that humans are an integral part of nature. CO 2: Realize the importance of the environment, the goods and services of a healthy biodiversity, and the dependence of humans on the environment. CO 3: Evaluate the ways and ill effects of destruction of the environment, population explosion on ecosystems and global problems consequent to anthropogenic activities. CO2: Learn about a variety of topics dealing with the general theme of language in its social context

CO3: Relate between language and society

CO4: Principals' concepts of Sociolinguistics

CO5: Draw on variationist sociolinguistics, ethnography of communication, conversation analysis and critical discourse analysis

CO6: Address the educational, political and social repercussions of language use from a sociolinguistic.

CO7: Introduce the various sociolinguistic approaches and methods used for collecting and presenting data for the study of language in society

CO8: Think critically over the nature and function of language in our society and to work collaboratively on the projects for Sociolinguistics study

DEPARTMENT OF LOGISTICS MANAGEMENT			
Program	**Semester**	**Course Code**	**Course Name**
BBA	I	BBA111FL	Fundamental of Logistics

On Successful completion of the course, the students will be ableto:

CO 1: Students will be able to apply the Basic knowledge of Logistics in the real-life situation

CO 2: This subject will enable them to enhance their ability and professional skills in Logistics

Program	Semester	Course Code	Course Name
BBA	I	BBA111MM	Materials Management

On Successful completion of the course, the students will be able to:

CO 1: Students will be able to apply the knowledge about material management in the real-life business situation
CO 2: This subject will enable them to enhance their managerial ability and professional skills

Program	Semester	Course Code	Course Name
BBA	I	BBA111WD	Warehouse and Distribution Operations

On Successful completion of the course, the students will be able to:

CO 1: Students will be able to apply the knowledge about material management in the real-life business situation
CO 2: This subject will enable them to enhance their managerial ability and professional skills

Program	Semester	Course Code	Course Name
B. Sc	II	SDC122NPD	New Product Development

By Successful completion of the course, student will be

CO 1: Under the scope of R & D
CO 2: Develop new, Innovative products through knowledge galned

Program	Semester	Course Code	Course Name
B. Sc	I	SDC111FIC	Food Infestation Control

By Successful completion of the course, student will be able to

CO 1: To understand the principles of food infestation
CO 2: To study the types of infestation during food storage
CO 3: To study the methods for protection food from infest-ants

Program	Semester	Course Code	Course Name
B. Sc Food Tech	III	SDC233NUT	Nutraceuticals

By Successful completion of the course, student will be able to

CO 1: To understand the basic concepts or nutraceuticals and their application in day today life

CO 2: To impart the knowledge of the molecular basis of using phytochemical in prevention of chronic diseases

DEPARTMENT OF ORIENTAL LANGUAGES			
Program	**Semester**	**Course Code**	**Course Name**
B.A	II	SDC 121 PA	Performing Arts

On successful completion of the course, Students will be able to:

CO 1: Acquire the basic knowledge in Performing Arts

CO 2: Understand the modern stage and performance on the stage

CO 3: Comprehend and improve the skills related to performing arts on the stage

CO 4: Understand various Telugu folk arts and their significance

CO 5: Know the modes of presentation and skills pertaining to folk arts.

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	I & II	LSC 111 HVPE	Human Values and Professional Ethics

On successful completion of the course, Students will be able to:

CO 1: Understand the significance of value inputs in a classroom and start applying them in their Life and profession

CO 2: Distinguish between values and skills, happiness and accumulation of physical

CO 3: Facilities, the Self and the body, intention and Competence of an individual, etc.

CO 4: Understand the value of harmonious relationship based on trust and respect in their life And profession

CO 5: Understand the role of a human being in ensuring harmony in society and nature.

CO 6: Distinguish between ethical and unethical practices and start working out the strategy to Actualize a harmonious environment wherever they work

DEPARTMENT OF ZOOLOGY			
Program	**Semester**	**Course Code**	**Course Name**
B.Sc (BZC)	I	ZOOADBNC111	Animal Diversity-Biology of Non Chordates

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Describe general taxonomic rules on animal classification
CO 2: Knowledge about important life processes and unique systems of non chordates.
CO 3: Describing the parasitic adaptations and pathogenecity in Helminthes, Vermicompost in annelida
CO 4: Describe higher invertebrate phyla using examples and importance of insects and Molluscans
CO 5: Describe Echinodermata to Hemichordata with suitable examples and larval stages relation to the phylogeny

Program	Semester	Course Code	Course Name
B.Sc (BZC)	II	ZOOADBC122(T)	Animal Diversity- Biology of Chordates

Course Outcomes: By successful completion of the course, students will be able to;
CO 1:Describe salient features of Protochordates and unique mode of metamorphosis in Herdmania.
CO 2:Describe the general characters of Cyclostomes and .
CO 3:Aquantained with the knowledge of important general accounts like migration in fishes and aves, parental care in amphibia, flight adaptations in aves and dentition in mammals.
CO 4:Understand the significance of dentition and evolutionary significance
CO 5:Understand the evolution of important organ systems in different classes of chordates.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	ZOOCGME233(T)	Cell Biology, Genetics, Molecular Biology and Evolution

Course Outcomes: By successful completion of the course, students will be able to;

CO 1: Describe structure and functions of cell and cell organelles and to differentiate the organisms by their cell structure.
CO 2: Understand what life is and how it functions at cellular level.
CO 3:Have knowledge of history of origin of genetics, heredity, interaction of genes, inheritance patterns existing.
CO 4: be aquaintained with various aspects of genetics involved in sex determination, human karyotyping and chromosomal aberrations
CO 5: gain knowledge about the central dogma of molecular biology and flow of genetic information from DNA to proteins.
CO 6: Understand the principles, forces and process of evolution of life and new species on the planet earth.

Program	Semester	Course Code	Course Name

B.Sc (BZC)	IV	ZOO244PME	Animal Physiology, Cellular Metabolism and Embryology

Course Outcomes: By successful completion of the course, students will be able to;

CO 1: Describe the functions of important animal physiological systems including digestion, cardio-respiratory and renal systems.

CO 2: Understand the muscle contraction and nerve impulse transmission in vertebrates and knowledge of various hormones and their affects.

CO 3: Describe the structure, classification and chemistry of biomolecules and enzymes responsible for sustenance of life in living organisms

CO 4: Understand the basic metabolic activities in animals related to the catabolism and anabolism of various biomolecules

CO 5: Understands various in early embryonic development of vertebrates from gametogenesis to gastrulation and formation of primary germ layers.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	V	ZOO	Immunology and Animal Biotechnology

Course Outcomes: By successful completion of the course, students will be able to

CO 1: Have knowledge of the organs of Immune system, types of immunity,cells and organs of immunity.

CO 2: Describe immunological response as to how it is triggered (antigens) and regulated (antibodies)

CO 3: Understand the applications of Biotechnology in the fields of industry and agriculture including animal cell/tissue culture, stem cell technology and genetic engineering.

CO 4: Get familiarity with the tools and techniques of animal biotechnology.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	VI B	ZOOLSMBDA356B(T)	Live Stock Management-I (Biology of diary animals)

Course Outcomes: By successful completion of the course, students will be able to

CO 1: Students at the successful completion of the course will be able to

CO 2: Select the suitable breeds of livestock for rearing

CO 3: Relate the anatomy of udder with letdown of milk

CO 4: Identify and manipulate the reproductive behavior of cattle

CO 5: Inspect the economics of dairy farming

Program	Semester	Course Code	Course Name
B.Sc (BZC)	VII B	ZOOLSMDPM357B(T)	Live Stock Management-II (Dairy Production And Management)

Course Outcomes: By successful completion of the course, students will be able to

CO 1: Identify and suggest the suitable housing system for the dairy farming

CO 2: Understand management practices for the dairy farming

CO 3: Learn the process of milk pasteurization • Prepare cream from milk

CO 4: Apprise the various breeding techniques employed in livestock.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	II	ZOOSDC	Dairy Technology

Course Outcomes:
After successful completion of the course, students will be able to;
CO 1:Understand the pre-requisites for starting a Dairy farm
CO 2:Recognize different breeds of Cows & buffaloes following safety precautions.
CO 3:Prepare and give recommended feed and water for livestock
CO 4: Maintain health of livestock along with productivity
CO 5:Vaccination of cattle, nutrients requirements

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	LIFE SKILL COURSE	Health and Hygiene

Course Outcomes: On completion of this course, the students will be able to understand

CO 1:what is a healthy diet and how nutritious diet is used for healthy life.
CO 2:how can we use available information to optimize our diet?
CO 3:the importance of health and hygiene in life
CO 4:the importance of nutrition for a healthy life
CO 5:different health care programs of India
CO 6:basic concept of health impact assessment as a means of assessing the policies, plans and projects using quantitative and qualitative techniques
CO 7:importance of community and personal health & hygiene measures
CO 8:Importance of food, social tenets, mental condition, physical activity on health

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	SKILL DEVELOPMENT COURSE	Poultry farming

Course Outcomes:

By successful completion of the course, students will be able to;

CO 1: Understand the poultry scenario in India, and various poultry systems, poultry farming.
CO 2: Have knowledge of management of broilers, growers, chicks and also about banking insurance.
CO 3:know about feed management, various diseases occur in poultry industry and their management and also about product harvesting.

DEPARTMENT OF FOOD TECHNOLOGY			
Program	**Semester**	**Course Code**	**Course Name**
B.Sc (Food Technology)	I	FTE111FC	Food Chemistry

COURSE OUTCOMES

To enable students

CO 1 – To know about various biochemical components of foods and their properties and application in food processing
CO 2 To study about Classification structure and functions of Carbohydrates
CO-3 To know about the importance of Biochemistry of proteins, amino acids and Enzymes
CO- 4To know about the importance and application of enzymes in Food processing
CO- 5- To study about classification, structure and functions of important fatty acids

Program	Semester	Course Code	Course Name

B.Sc (Food Technology)	II	FTE121FBN	Food Biochemistry and Nutrition

COURSE OUTCOMES
To enable the students

CO 1 – To know about the emulsions, gels and foams and their application in food processing

CO 2 To Study the Importance of carbohydrate metabolism.

CO-3 To know about Fats and their Metabolism biologically important fatty acids

CO-4 To know about the Fundamental prosperities of water classification of vitamins and minerals

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	II	FTE122IPE	Industrial processing equipment

COURSE OUTCOMES
CO 1 – Students will be able to acquire the knowledge about different terms and measurements used in a food industry and the other operations involved in processing.
CO 2 – The students will acquire knowledge about the different drying techniques involved and extraction procedures involved during processing of different foods.
CO-3- The students will be able to acquire the knowledge about filtration techniques involved in the processing industry and their limitations
CO- 4- The students will be able to acquire the knowledge about working of equipment and how to maintain the equipment hygiene and sanitizing.
CO- 5- The students will be able to acquire the knowledge about refrigeration procedures involved in a food industry.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	II	FTE123FAT	Food Additives and Toxicology

COURSE OUTCOMES
CO-1 - Students will be able to acquire the knowledge about substances added to food to maintain or improve its safety
CO-2 - Students will be able to acquire the knowledge about food additives need to be checked for potential harmful effects on human health before they can be used.
C0- 3 - Students will be able to acquire the knowledge about assessing the presence of toxic compounds in food and their relation to adverse effects.
CO-4 - Students will be able to acquire the knowledge about harmful actions of chemical substances, to study their mechanisms of action.
CO- 5- Students will be able to acquire the knowledge about the harmful toxicants which are naturally added and artificially added in different foods.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	III	FTE234PHT	Post Harvest Technology of field crops

COURSE OUTCOMES
To enable the students
CO-1 Knowledge about food spoilage agents and prevention
CO-2 Understand the safety control measures in handling foods from harvest to consumption agencies of control.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	FTE235TP	Technology of milk and milk products

COURSE OUTCOMES
Enable the students
CO-1 To know the need for and importance of dairy industry
CO-2 To know the compositional and technological aspects of milk and Processed milk products
CO-3 To develop young entrepreneurs for self-employment through dairy technology and associated
activities
CO-4 to know the utilization of by-products of dairy industry

Program	Semester	Course Code	Course Name
B.Sc (Food Technolgy)	IV	FTE245TF	Technology of oils and fats

COURSE OUTCOMES

CO-1- Students will be able to acquire the knowledge about oils, fats, and their derivatives as fundamental ingredients of many food products.

CO- 2- To provide students with the knowledge necessary for a conscious use of oils and fats in food formulations

CO-3 - Students will be able to acquire the knowledge about optimization of production processes of the foods containing fats and oils.

CO- 4- Students will be able to acquire the knowledge about the best oils and fats for food formulations, taking into account their chemical and physical characteristics, technological properties.

CO- 5 – Students will be able to acquire the knowledge about the byproducts that are derived from the oil refining.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	IV	FTE246TC	Technology of Confectionery

COURSE OUTCOMES

CO-1- Students will be able to acquire the knowledge about the role of ingredients in confectionaries.

CO-2- Students will be able to acquire the knowledge about the sugar processing and treatment.

CO-3 -Students will be able to acquire the knowledge about the technology involved in chocolate preparation.

CO-4 - Students will be able to acquire the knowledge about the technology involved in confectionary and miscellaneous production.

CO-5 - Students will be able to acquire the knowledge about the manufacturing of miscellaneous products.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	V	SKILL DEVELOPMENT COURSE	Technology of Meat, Fish, poultry and its products

COURSE OUTCOMES

CO I- students will be able to acquire the knowledge about the structure and nutritive value of the met.

CO-2 – students will be able to acquire the knowledge about slaughtering techniques of poultry and meat.

CO-3 – Students will be Able to acquire the knowledge about the processing of meat

CO-4- Students will be able to acquire the knowledge about different processing techniques of poultry and fish

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	V	FTE358BST	Baking science and Technology

COURSE OUTCOMES

To enable the Enable the students

CO-1 To understand the science and technology of baking

CO-2 To the role of different ingredients in baking

CO-3 To develop skills in planning and maintenance of a baking institution

CO-4 To gain knowledge about the bread, formulation & ingredients

CO-5 To learn the preparation of frozen dough products & application of starches in bakery industry

DEPARTMENT OF BIOTECHNOLOGY			
Program	**Semester**	**Course Code**	**Course Name**
B.Sc (Biotechnology)	II	BTY122PMB	Principles and Methods in Biological Separation Techniques
Course Outcomes: By successful completion of the course, students will be able to; CO 1: The course delves into the principles and working methods of various centrifuges, empowering students to acquire the knowledge necessary for the effective separation of diverse biological samples. CO 2: This unit's primary strength lies in imparting knowledge on the fundamental principles of instrumentation and the applications of chromatography for evaluating and measuring biological systems. CO 3: Detailed discussions on electrophoretic techniques, which have revolutionized the fields of medicine, genetics, and drug delivery strategies, are a key focus of this course. CO 4: The course elucidates the applications of radioactivity in evaluating various biological systems and covers the principles and laws of spectroscopy. CO 5: Students gain basic knowledge of widely used terminology in Biostatistics, along with an understanding of common research tools, including their scope, advantages, and disadvantages. CO 6: The course emphasizes skill and application-based research or clinical methods, including the accurate reporting of observations and the thorough analysis of results.			

Program	**Semester**	**Course Code**	**Course Name**
B.Sc (Biotechnology)	III	BTY233MOB	Molecular Biology
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Students will be able to acquire and articulate knowledge relevant to genome structure, and they will study the evidences regarding DNA proving as genetic material. CO 2: The students will gain thorough knowledge about the enzymes involved in DNA replication and its mechanism. CO 3: The students will be able to know the role of enzymes involved in Transcription process, general characteristics, and its mechanism. CO 4: Acquire the features and properties of genetic code and how the translation process begins. CO 5: Understand the concepts needed to explain gene regulation and expression. With this explanation, they will gain knowledge regarding the operon concepts. CO 6: Learn molecular biology skills applicable to molecular biology research or clinical methods, including accurately reporting observation and analysis.			

Program	**Semester**	**Course Code**	**Course Name**
B.Sc (Biotechnology)	III	BTY234IMT	Immuno Technology

Course Outcomes: By successful completion of the course, students will be able to
CO 1: Understanding the overview of the immune system and how it acts in the body.
CO 2: Understanding the concepts and structure, types, and functions of antigens and antibodies. Factors affecting these structures will also be learned.
CO 3: The student will be able to gain knowledge of all the mechanisms involved in antigen-antibody interactions.
CO 4: To make them understand the MHC concept, reactions, and antigen presentation concept, immune responses to infectious organisms and tumors, allergies, and immunodeficiencies.
CO 5: To make them communicate efficiently all the basic concepts regarding immunological responses, mechanisms of this response, its regulation, and the genetic basis.
CO 6: The techniques involved in diagnosis, treatment, and their applications are taught

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	IV	BTY245rDT	rDNA technology

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: This course aims to facilitate students in acquiring knowledge about various types of enzymes involved in genetic engineering and their applications in recombinant technology.
CO 2: Students will develop a thorough understanding of various cloning vehicles, their unique features, and the necessity for additional gene elements in them. The course covers topics such as genomic library construction, maintenance, and a discussion of their advantages and disadvantages.
CO 3: The focus of this course is on Polymerase Chain Reaction (PCR), including its main principles, amplification strategies, and applications, with a special emphasis on its relevance during situations like the COVID-19 pandemic. Additionally, the course explores the application of PCR in sequencing amplified products and gene transfer techniques for permanent use.
CO 4: Students will gain extensive knowledge of various gene transfer mechanisms based on different cell sources, along with a comprehensive understanding of their unique mechanisms, advantages, and disadvantages.
CO 5: The course delves into advanced application techniques such as Restriction Fragment Length Polymorphism (RFLP), Random Amplified Polymorphic DNA (RAPD), and various other important applications of recombinant DNA technology.
CO 6: Emphasis is placed on skill-based applications in research or clinical methods, ensuring students are equipped for accurate analysis and reporting of study observations.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	VI	BTY366PABT	Plant & Animal Biotechnology

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: The course is designed to impart fundamental knowledge to students in plant biotechnology, including proficiency in sterile techniques, media preparation, and plant tissue culture techniques.
CO 2: Students will gain knowledge in micropropagation, understanding various steps involved, production of haploid plants, and exploring their applications. The curriculum covers plant regeneration, methods of organogenesis, cryopreservation, and secondary metabolites.
CO 3: This section focuses on various types of animal cell culture media, emphasizing the importance of serum, and delves into the physicochemical properties of media. Key concepts include the establishment and maintenance of cell lines, along with an exploration of commonly used cell lines.
CO 4: The unit emphasizes gene therapy applications and explores various animal models used in biological research. Gene recombination methods involved in the production of insulin and somatostatin are taught.
CO 5: The course places a spotlight on Intellectual Property Rights (IPR) and patents, addressing the right of protection for inventions.
CO 6: Students will acquire proficiency in handling basic aseptic techniques essential in the fields of plant and animal biotechnology.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	VI	BTY367EIBT	Environmental And Industrial Biotechnology

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Acquiring and articulating knowledge relevant to various types of pollution, key compounds causing pollution, their measurement techniques, and control measures using biotechnological processes.
CO 2: Gaining knowledge on various bio processes in the degradation and remediation of pollutants, wastes, and understanding the role of biotechnology in these processes.
CO 3: Emphasizing concepts of biofuels, their importance in addressing current challenges, the significance of biogas, and the concepts of phytoremediation.
CO 4: Understanding the basic design of a bioreactor, knowledge on downstream processing, and discussing various processes involved. Highlighting the industrial production of vaccines and insulin based on current technological developments.
CO 5: Recognizing the need for bioinformatics and its applications. Developing knowledge in searching for DNA/protein sequences, retrieving them, and aligning them for better analysis.
CO 6: Exploring various measurement techniques of pollutants, including dry lab techniques such as searching, retrieving, and aligning them.

DEPARTMENT OF M.C.A.

Program Objectives

- Ability to analyze real world problems, develop feasible and environmentally acceptable solutions to achieve peer recognition as an individual or in a

team.

- Identify the opportunity to evolve as an entrepreneur and pursue the same for the benefit of individual and society.

Program Outcomes

PSO 1: Work with sustainable computing in a multi-disciplinary atmosphere challenging the trends and technologies engaging in lifelong learning.

PSO 2: Utilize the computing knowledge efficiently in projects with concern for societal, environmental and cultural aspects.

PSO 3: Function Competently as an individual and as a leader in multidisciplinary projects.

PSO 4: Create and design innovative methodologies to solve complex problems for the betterment of the society.

PSO 5: Apply the inherent skills with absolute focus to function as a successful entrepreneur.

PSO 6: Apply the knowledge of mathematics and computing fundamentals to various real life applications for any given requirement.

PSO 7: Design and develop applications to analyze and solve all computer science related problems.

PSO 8: Design applications for any desired needs with appropriate considerations for any specific need on societal and environmental aspects.

PSO 9: Analyze and review literatures to invoke the research skills to design, interpret and make inferences from the resulting data.

PSO 10: Integrate and apply efficiently the contemporary IT tools to all computer applications.

DEPARTMENT OF M.B,A,

Master of Business Administration is a two year professional post graduate programme which provides enormous knowledge in various disciplines of management such as Financial Management, Human Resource Management and Marketing Management. Students can choose any management and administrative profession in various sectors such as information technology, banking and insurance, stock broking, mutual funds, hospitality, tourism, Pharmaceutical, FMCG, Retail, any field from manufacturing sector and any public sector undertaking entity. Students can opt and pursue their Doctorate in Philosophy (Ph.D) in subareas of management.

Program Outcomes

A Student of Master of Business Administration programme will demonstrate:

PSO 1: Knowledge: Understanding the fundamental concepts of management such as functions of management, levels and skills of management, theories of management, Leadership and motivation and their significance in professional life.

PSO 2: Awareness: Understanding the legislative and regulatory framework available for the smooth functioning of business in a lawful manner.

PSO 3: Application: Recognize professional prospects outline and execute innovation in the workplace

PSO 4: Communication skills: Improving proficiency in business correspondence and able to communicate with different stakeholders

PSO 5: Intrapersonal skills: Ability to improve self-confidence, emotional balance, self esteem and engage in self-learning

PSO 6: Analytical skills: Ability to develop analytical thinking and thought process to estimate and analyze different business scenarios and various tends in the economy to make use of various business opportunities

PSO 7: Problem solving skills: Enhance competencies to adopt and face any situation in the business, formulate strategies to solve the complexities and managerial problems faced by the business enterprises

PSO 8: Managerial skills: Ability to improve Conceptual, human and technical skills to perform the job in an efficient manner

PSO 9: Professional skills: To improve the ability to handle, manage and learn the tactics in the management profession mainly focusing on improving leadership skills

PSO 10: Ethical values: Capability to realise, examine and relate international, economic, legal, and ethical aspects of business. Execute, implement and follow the organizational ethics

DEPARTMENT OF PUBLIC POLICY			
Program	**Semester**	**Course Code**	**Course Name**
B.A. Public policy	I	NBAPPA 104	Introduction to public Policy

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the meaning, scope, need, and importance of public policy, demonstrating a comprehensive knowledge of the fundamental concepts in the field.
CO 2: Evaluate the contributions and perspectives of prominent scholars in the field of policy sciences, such as David Easton, Harold Lasswell, and Yehezkel Dror, and critically analyze their theories to comprehend the evolution of policy science over time.
CO 3: Analyze the distinct roles played by the legislature, executive, bureaucracy, and judiciary in policy formulation, implementation, and evaluation processes within the Indian context.
CO 4: Develop the ability to critically evaluate public policies, considering their effectiveness, efficiency, and impact on society, and apply appropriate evaluation methods.
CO 5: Apply theoretical knowledge and analytical skills to real-world policy issues, demonstrating the ability to formulate, implement, and evaluate policies in diverse contexts.
CO 6: Understand the significance of political parties in shaping public policy and analyze their impact on the decision-making process.
CO 7: Understand the fundamental concepts and theories related to public policy, including the various models and approaches used in policy analysis.
CO 8: Analyze the impact of industrial policy on administrative structures in India, evaluating its implications on economic growth, employment generation, and administrative efficiency.

Program	Semester	Course Code	Course Name
B.A. Public policy	II	INBAPPA204	Public policy–organs of state

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand Indian Parliament's structure, including Lok Sabha, Rajya Sabha, Budget, and Parliamentary Committees, enhancing knowledge of legislative processes.
CO 2: Gain insights into the Indian Judiciary system, including court hierarchy, Supreme Court jurisdiction, and landmark judgments, and analyze differences between Union and State Judiciary, along with the Uniform Civil Code concept.
CO 3: Acquire knowledge about State Government, roles of Governor, Chief Minister, legislative bodies like Vidhan Sabha, Vidhan Parishad, legislative procedures, and administration of Scheduled Areas, enhancing understanding of state-level governance.
CO 4: Explore Local Self-Government history, focusing on Panchayati Raj, 73rd Amendment Act, PESA Act, and rights of Scheduled Tribes. Analyze Urban Local Government, 74th Amendment Act, and cooperatives, understanding grassroots democracy and community participation.
CO 5: Compare Union, State, and Local Governments, analyzing their powers, functions, and interrelationships. Develop a comprehensive understanding of India's political system, enabling critical evaluation of policies and governance mechanisms

Program	Semester	Course Code	Course Name
B.A. Public policy	III	INBAPPA 104	Introduction to political system

CO 1: Understand the executive branch of government, roles, and powers of key officials at union and state levels.
CO 2: Analyze Indian legislative framework, including Lok Sabha, Rajya Sabha functions, parliamentary proceedings, and budgetary process.
CO 3: Examine State Legislature organization, roles of presiding officers, legislative processes, and state-level legislation dynamics.
CO 4: Gain knowledge of India's judicial system, focusing on Supreme Court, High Courts, judicial review, and importance of an independent judiciary.
CO 5: Develop critical understanding of Indian legal system, roles of subordinate courts, judge appointment, powers, and hierarchical structure

Program	Semester	Course Code	Course Name
B.A. Public policy	IV	INBAPPA401	Public policy and Good Governance

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the various types of public policies and analyze their significance in governance.
CO 2: Examine the nature of public policy in India and critically evaluate the achievements and shortcomings of planned policymaking, along with the challenges in policy implementation.
CO 3: Analyze and evaluate specific government schemes such as Beti Bachao Beti Padhao, Mahatma Gandhi National Rural Employment Guarantee Act, and Pradhan Mantri Awas Yojana, understanding their objectives, implementation, and impact
CO 4: Comprehend the dimensions of development and identify the challenges associated with the development process in the context of India
CO 5: Recognize the role of social capital organizations in society, classify them according to their functions, and assess the implications of national policies related to the voluntary sector and non-governmental organizations

DEPARTMENT OF AGRI STIRAGE &SUPPLY CHAIN MANAGEMENT			
Program	**Semester**	**Course Code**	**Course Name**
BMS	I	BMS111AE	Agricultural Economics

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand fundamental economic concepts, including micro and macroeconomics, agricultural economics, and factors influencing agricultural development.
CO 2: Analyze demand and supply principles, including elasticity, utility theory, and consumer equilibrium.
CO 3: Examine the evolution, functions of money, inflation, deflation, and banking roles in the economy.
CO 4: Explore agricultural and public finance, taxation, revenue, expenditure, and economic systems.
CO 5: Evaluate emerging trends in production, processing, marketing, exports, and policy controls in agro-business enterprises

Program	Semester	Course Code	Course Name
BMS	I	BMS111IAL	Introduction to Agri Logistics
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Grasp the core concepts of agri logistics and supply chain management, recognizing their importance in diverse agricultural settings. CO 2: Apply logistics principles to address challenges in procurement, processing, packaging, storage, transportation, and distribution of agricultural products. CO 3: Analyze handling and transport systems, including air, sea, road, and rail logistics, along with related terminology and regulations . CO 4: Explore the role of IT in agri logistics, especially in processing, marketing, and exports, while understanding relevant policies and regulations. CO 5: Evaluate outsourcing in supply chain management, including the roles of 3PLs and 4PLs, reverse logistics, and market-driven activities, and suggest strategies for effective agri logistics management			

Program	Semester	Course Code	Course Name
BMS	I	BMS11IPHM	Post – Harvest Management
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Grasp fundamental post-harvest management concepts, including horticulture geography and pre-harvest operations. CO 2: Apply effective post-harvest handling practices, maturity indices, and postharvest treatments. CO 3: Understand post-harvest physiological changes, ethylene's role, and packaging methods. CO 4: Adhere to pack house hygiene, safety standards, and quality protocols for various fruits and vegetables. CO 5: Implement best practices for flowers, tubular crops, and grain crops post-harvest management			

Program	Semester	Course Code	Course Name
BMS	I	BMS111POM	Principles of management
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand foundational management concepts, contemporary challenges, and managerial roles. CO 2: Master planning, decision-making processes, creativity, and strategic planning. CO 3: Gain insights into directing, motivation theories, leadership styles, and staffing processes. CO 4: Grasp organizational design, structure, departmentation, and principles of delegation. CO 5: Analyze ethics, corporate social responsibility, and environmental factors affecting businesses.			

Program	Semester	Course Code	Course Name
BMS	I	BMS11IWAP	Warehousing for Agricultural Produce

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand warehousing concepts, challenges, and the role of technology in post-harvest management of agricultural produce.
CO 2: Develop and implement effective Standard Operating Procedures for warehouse operations, covering goods receipt, storage, quality control, risk mitigation, and delivery processes.
CO 3: Proficiently manage warehouse information, including capturing key data, maintaining records, and integrating IT for efficient Warehouse Management Systems.
CO 4: Comprehend the conceptual framework of Warehouse Receipt Management, including negotiability, components, and legal aspects, especially related to Electronic Negotiable Warehouse Receipts.
CO 5: Identify opportunities and challenges in the warehousing sector, recognizing required skill sets, exploring business options, and understanding employment prospects while addressing key sector challenges in India.

Program	Semester	Course Code	Course Name
BMS	II	BMS121OB	Organisational Behaviour

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand Organizational Behaviour fundamentals, including nature, structure, and behaviorist frameworks, and grasp individual behaviors and personality development concepts.
CO 2: Gain insights into Perception, Attitudes, and Job Satisfaction, understanding their nature, sources, and consequences, as well as job stress causes and effects.
CO 3: Develop knowledge of Organizational Conflicts, Group Dynamics, Committee Organizations, and Informal Communication Systems within groups.
CO 4: Acquire expertise in Organizational Change and Development, including strategies to overcome resistance, change processes, and various Organizational Development interventions.
CO 5: Explore Leadership Theories, Types, and Styles, understanding Trait theory, Michigan studies, Fiedler's contingency model, and modern leadership approaches

Program	Semester	Course Code	Course Name
BMS	II	BMS121TAC	Trading in Agri Commodities

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand agricultural marketing concepts, market structure, and demand-supply dynamics. Calculate producer's surplus of agri-commodities. CO 2: Evaluate pricing strategies, market promotion techniques, and assess advantages/disadvantages. CO 3: Analyze market functionaries, channels, integration, costs, and propose methods to reduce marketing expenses. CO 4: Study agricultural prices, policies, marketable surplus, and historical price trends of commodities. CO 5: Grasp international trade theories, GATT, WTO implications, and analyze IPR and GST impact on agricultural trade.

Program	Semester	Course Code	Course Name
BMS	II	BMS121CA	Cost accounting
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Student will be able to apply costing techniques in different types of industries. CO 2: Student will be able to apply costing techniques in business decisions. CO 3: Understand and use the basic concepts of costing and costing systems in their professional life. CO 4: Integrate cost accounting with financial accounting for management decision making.			

Program	Semester	Course Code	Course Name
BMS	II	BMS121QAA	Quality Control, Assurance & Audit
Course Outcomes: By successful completion of the course, students will be able to; CO 1: To understand basic concept of quality and systems of quality management. CO 2: To be able to get ready for implementing a quality management system in the organization. CO 3: To enable the students in getting ready for a quality audit of the supply chain system			

Program	Semester	Course Code	Course Name
BMS	II	BMS121DCF	Derivatives with Commodity Futures

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand fundamental concepts of commodity derivatives, including products, participants, and market functions.
CO 2: Apply various commodity futures instruments for trading, analyzing payoff structures and comparing futures and options use.
CO 3: Demonstrate knowledge of futures trading systems, including trading cycles, order types, margins, charges, and risk management.
CO 4: Analyze the regulatory framework governing commodity derivatives, including rules, participants, and dispute resolution procedures.
CO 5: Evaluate trading patterns, market efficiency, and compile information on recognized stock exchanges, commodities traded, and market governing bodies in India.

Program	Semester	Course Code	Course Name
BMS	III	BMS231CHT	Cold Chain Technology

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the fundamental concepts of Cold Chain and its importance in the preservation of agricultural produce.
CO 2: Demonstrate knowledge of Cold Chain infrastructure components, including refrigeration systems, insulation techniques, and distribution centers.
CO 3: Implement effective monitoring systems for temperature and humidity in Cold Chain logistics, utilizing automated and remote monitoring technologies.
CO 4: Apply principles of Reefer Logistics in transporting agricultural produce, including reefer container operations, handling chilled and frozen cargos, and ensuring good transportation practices.
CO 5: Practice good Cold Chain management, including SOPs for specific fruits and vegetables commodities, traceability, and adherence to quality standards for domestic and export markets.

Program	Semester	Course Code	Course Name
BMS	III	BMS231ES	ENVIRONMENTAL STUDIES

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the components of ecosystems, ecological structures, energy flow, and biogeochemical cycles (Unit I: Ecology). CO 2: Analyze different types of pollution, their sources, standards, and adverse effects (Unit II: Pollution). CO 3: Demonstrate knowledge of solid waste management, including classification, collection, disposal, and resource recovery methods (Unit III: Solid Waste Management). CO 4: Explore non-conventional energy sources and assess their potential, especially in the context of India (Unit IV: Non-Conventional Energy Sources). CO 5: Comprehend social issues related to environmental conservation, sustainable development, public awareness, and key environmental legislations in India (Unit V: Social Issues and EIA).

Program	Semester	Course Code	Course Name
BMS	III	BMS231HFP	Handling of Fresh Produces
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand fresh produce market preparation and categorization. CO 2: Apply value addition techniques such as sanitation, canning, and dehydration. CO 3: Implement tropical fruits ripening and grading techniques. CO 4: Proficiently execute fresh cut packing methods, including retail and special techniques. CO 5: Analyze challenges and opportunities in E-commerce delivery for fresh produce.			

Program	Semester	Course Code	Course Name
BMS	III	BMS231HFP	Mechanization In Agri Logistics
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand agricultural mechanisation principles, transportation methods, and benchmarking processes. CO 2: Apply knowledge of product handling methods, automated systems, and traceability options in agri-logistics. CO 3: Demonstrate proficiency in automated storage management techniques, including palletisation, conveyors, silos, and AS&RS. CO 4: Utilize automation technologies for tracking and traceability, such as GPS, RFID, AGVS, RTWCS, CIW, and RFDT. CO 5: Grasp the basics of block chain technology and its applications in sustainable agriculture, transparency, and trust in agri-food systems.			

Program	Semester	Course Code	Course Name
BMS	III	BMS231PM	Pest Management

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand pest categorization, significance in agriculture, and relevant laws and regulations. CO 2: Identify and assess major storage pests, recognize signs of infestation, and detect hidden infestation sources. CO 3: Learn insect pest control methods, including prophylactic treatments, insecticide application, and fumigation techniques. CO 4: Grasp methodologies for non-insect pest management, including fungi, bacteria, rodents, and birds, utilizing various control measures. CO 5: Comprehend Integrated Pest Management (IPM) principles, including sanitation, pest monitoring, preventive methods, and judicious curative measures, applying strategies in supply chain management.

Program	Semester	Course Code	Course Name
BMS	III	BMS231RAM	Risk Assessment and Management
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand fundamental concepts of risk in supply chain management, including peril & hazard, risk categories, and risk prioritization. CO 2: Develop a risk management framework with strategies for identifying, mitigating, and auditing potential risks, and ensuring health and safety in warehousing. CO 3: Recognize insurable risks, understand insurance functions, and effectively manage insurance policies for agricultural produce. CO 4: Learn techniques for preventing and managing major perils like fire, flood, and ensuring security in agricultural storage and transport. CO 5: Comprehend regulatory compliance processes, identify non-insurable risks, and understand indemnification for risk mitigation in agricultural supply chains			

Program	Semester	Course Code	Course Name
BMS	IV	BMS24IMM	Marketing Management
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Discuss the importance of macro and micro environment in the company’s marketing function. CO 2: Differentiate the consumer and institutional buyer behaviour. CO 3: Define the target segments for the product CO 4: Justify the importance of products, branding, and new product development. CO 5: Understand the importance of Channel of distribution			

Program	Semester	Course Code	Course Name

BMS	IV	BMS241AP	Agri-Preneurship
Course Outcomes: By successful completion of the course, students will be able to; CO 1: To get an understanding of the conceptual framework of entrepreneurship development in India. CO 2: To learn about various processes involved in the development of an agri preneurship venture. CO 3: To know about various potential options available towards setting up an agri-business venture. CO 4: To learn about various challenges in the way of agri preneurship and strategies to overcome them. CO 5: To know as to how to avail various benefits available under governmental support programmes for agri-business development			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241AEI	Agricultural Exports & Imports
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the legal framework in agriculture, focusing on post-harvest management challenges and strategies for higher returns to farmers. CO 2: Analyze the importance of quality standards in agricultural produce, including relevant acts and enforcement mechanisms. CO 3: Evaluate legal aspects related to transportation logistics during post-harvest, including relevant acts governing transportation of agricultural produce. CO 4: Assess the legal framework for storage, preservation, and warehousing of agricultural produce, including acts governing these aspects. CO 5: Understand the legal aspects of marketing agricultural produce, including relevant acts, taxation, and trade regulations.			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241PT	Packaging Technology
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the history, importance, and functions of food and agri-products packaging, including material properties, design, and testing. CO 2: Analyze wood, paper, glass, and metal packaging materials, including their structure, types, and uses, and compare wooden containers with CFB boxes. CO 3: Apply packaging rules, labeling techniques, and technology usage for packaging fruits, vegetables, and their products. CO 4: Comprehend aseptic packaging, active food packaging, edible films, coatings, and intelligent/smart/active packaging systems, and their food applications. CO 5: Implement various packaging techniques, including knowledge of containers, primary and secondary packaging, and packaging machines, for effective food and agri-products packaging.			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241DVCM	Dairy Value Chain & Marketing
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the historical development and current trends in dairy production globally and in India. CO 2: Apply techniques for ensuring clean milk production and procurement, and comprehend milk contamination sources. CO 3: Demonstrate knowledge of dairy operations, milk processing, quality assurance, and various milk products. CO 4: Analyze milk marketing structures, distribution channels, and pricing factors, considering market segmentation. CO 5: Evaluate the milk value chain, government policies, international regulations, and technology impact on dairy marketing.			

DEPARTMENT OF E-COMMERCE OPERATIONS			
Program	**Semester**	**Course Code**	**Course Name**
BMS	I	BMS111POM	Principles of Management
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the nature, definition, characteristics, and scope of management. CO 2: Apply the principles of planning, including objectives, policy, procedures, forecasting, and decision making. CO 3: Demonstrate knowledge of directing principles, motivation theories, leadership styles, and staffing techniques. CO 4: Understand organization design, structure, departmentalization, span of control, authority, responsibility, and delegation. CO 5: Analyze contemporary issues, challenges in management, and the impact of ethics and social responsibility.			

Program	Semester	Course Code	Course Name
BMS	I	BMS111IM	Principles of Management

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the basics of inventory management, its importance, and its role in e-commerce supply chains.
CO 2: Compare various inventory management techniques, including economic order quantity, safety stock, and demand forecasting.
CO 3: Explain key inventory management metrics, such as inventory turnover, safety stock, and carrying cost.
CO 4: Evaluate inventory management software, its features, and the selection process for warehousing management systems.
CO 5: Analyze the latest trends in inventory management, including predictive picking, omni channel solutions, and advanced sales forecasting.

Program	Semester	Course Code	Course Name
BMS	I	BMS111AFS	Analysing Financial Statements

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Apply fundamental accounting concepts and prepare financial statements for a sole proprietorship business.
CO 2: Record accounting transactions related to dissolution, amalgamation, and sale of partnership firms.
CO 3: Understand business income concepts, revenue recognition, expenses, and methods of computing depreciation.
CO 4: Prepare trading account, profit & loss account, and balance sheet for a sole proprietor.
CO 5: Explain the concepts of operating and financial lease, and understand the relationship between metrics and customer service

Program	Semester	Course Code	Course Name
BMS	I	BMS111BO	Business Organization

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand fundamental concepts of business trade, industry, commerce, and trade classifications.
CO 2: Describe the characteristics, advantages, and disadvantages of sole proprietorship and joint Hindu family businesses.
CO 3: Explain the meaning, characteristics, kinds of partners, registration of partnership, and rights and obligations of partners in a partnership business.
CO 4: Analyze the meaning, characteristics, advantages, and differences between private and public companies.
CO 5: Design corporate organizational structures and understand the distribution of powers and responsibilities within a company.

Program	Semester	Course Code	Course Name
BMS	I	BMS111IEO	Introduction to E-Commerce Operations

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the basics of e-commerce logistics and its changing dynamics.
CO 2: Analyze different types of e-commerce logistics models, including B2C, B2B, C2C, G2C, G2B, and G2G.
CO 3: Examine the impact of technology on e-commerce logistics, including AI, GPS tracking, and drone delivery.
CO 4: Explore the future prospects of e-commerce logistics in India, including upcoming regulations and technologies.
CO 5: Understand the growth projections for e-commerce in India and analyze the technologies under development for e-commerce logistics.

Program	Semester	Course Code	Course Name
BMS	II	BMS121MM	Marketing Management

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Discuss the importance of macro and microenvironment in the company's marketing function.
CO 2: Define the target segments for the product and understand factors influencing consumer buying behavior.
CO 3: Justify the importance of products, branding, and new product development.
CO 4: Understand the importance of Channel of distribution and analyze elements of promotion mix.
CO 5: Discuss social responsibility, ethical issues in marketing, global marketing, and marketing in the 21st Century.

Program	Semester	Course Code	Course Name
BMS	II	BMS121WM	Warehouse Management

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Explain the types of warehouses, functions, and layout-related functions.
CO 2: Understand various stages involved in receiving and dispatching goods, including quality parameters and quality checks.
CO 3: Describe various warehouse activities such as sorting, loading, unloading, picking, packing, and dispatch.
CO 4: Manage warehouse utilization, handling of hazardous cargo, and use of Material Handling Equipment.
CO 5: Implement safety rules and procedures in a warehouse and understand the principles of Materials Handling system.

Program	Semester	Course Code	Course Name
BMS	II	BMS121MH	Material Handling

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the concepts of Materials Management, Logistics, and Supply Chain Management.
CO 2: Describe various types of Material Handling Equipment and their applications.
CO 3: Explain Material Requirement Planning (MRP), forecasting, and material flow in MRP.
CO 4: Implement quality control measures, inventory control techniques, and value engineering concepts.
CO 5: Apply health and safety measures in Materials Handling systems and understand the principles of Physical distribution logistics.

Program	Semester	Course Code	Course Name
BMS	II	BMS121FMO	First Mile Operations

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the importance and flow of First Mile operations in e-commerce logistics.
CO 2: Describe the shipment pickup process, including coordination, documentation, and safety measures.
CO 3: Explain various shipment processing operations, layout of Processing Centres, and roles of Processing Centre staff.
CO 4: Analyze First Mile analytics, metrics, and tools for monitoring and improving operations.
CO 5: Address key challenges in First Mile operations and apply communication techniques to resolve exceptions.

Program	Semester	Course Code	Course Name
BMS	II	BMS121BE	Business Environment

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Understand the framework of the business environment, including its internal and external elements.
CO 2: Analyze the economic, political, legal, socio-cultural, technological, and international aspects of the business environment.
CO 3: Examine how different factors and trends in the external environment impact a proposed business venture.
CO 4: Conduct a business analysis of the local and national environment considering various environmental elements

Program	Semester	Course Code	Course Name
BMS	II	BMS121ME	Managerial Economics

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Distinguish between micro and macroeconomics and understand the concepts of utility and substitution. CO 2: Explain demand, supply, market equilibrium, production concepts, and cost functions. CO 3: Understand market structures, pricing strategies, and national income measurement. CO 4: Analyze trade cycles, causes, and methods to control trade cycles

Program	Semester	Course Code	Course Name
BMS	III	BMS231ELO	E-Commerce Logistics Operations
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the basics of logistics in E-Commerce and its role in the supply chain. CO 2: Comprehend the process of capacity management and its application in inbound and outbound logistics. CO 3: Explain the strategies used in logistics planning and execution, and understand the systems used in E-Commerce logistics. CO 4: Understand the concepts of logistics and systems integration, and the interlink between logistics and operations. CO 5: Evaluate the integration of logistics into operations, assess logistics operations, and understand partner termination processes.			

Program	Semester	Course Code	Course Name
BMS	III	BMS231LMO	Last Mile Operations
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the basics of last mile logistics in E-Commerce and its challenges. CO 2: Describe the last mile processes, including forward and reverse logistics stages. CO 3: Analyze various metrics and customer service processes involved in last mile logistics. CO 4: Explain the prospects and innovations in last mile logistics, including technology trends. CO 5: Understand the value creation aspects through network design, process improvement, and strategic decisions			

Program	Semester	Course Code	Course Name
BMS	III	BMS231MIS	MIS for E-Commerce

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the concepts of Management Information Systems and their historical context. CO 2: Explore global E-business processes and comprehend electronic commerce concepts. CO 3: Understand the relationship between decision making and information systems, and analyze systems for planned organizational change. CO 4: Grasp the concepts of business intelligence, strategic, tactical, and operational decisions in MIS. CO 5: Evaluate the role of MIS in managing global systems and understand system analysis and design.

Program	Semester	Course Code	Course Name
BMS	III	BMS231RLE	Reverse Logistics for E-Commerce
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the importance and challenges of reverse logistics in E-Commerce. CO 2: Describe the stages and tools in reverse logistics processes. CO 3: Analyze the shipping and information systems in reverse logistics, and assess the innovations and market prospects. CO 4: Understand the creation of value through network design, strategic decisions, and maintaining partnerships in reverse logistics. CO 5: Explore the impact of new technology trends and digital transformation on reverse logistics.			

Program	Semester	Course Code	Course Name
BMS	III	BMS231TFE	Transportation for E-Commerce
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the importance and functions of transportation in the supply chain. CO 2: Comprehend various transportation management techniques and modalities. CO 3: Understand transportation management systems and their integration with supply chain functions. CO 4: Analyze the socio-economic factors affecting transportation and explore the future trends in transportation. CO 5: Evaluate the benefits and risks of different transportation equipment and comprehend the upcoming tools and techniques in transportation.			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241HLO	Hub and Line Operations

Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the concepts of Hub & Line Operations in E-commerce and the importance of Line Haul logistics. CO 2: Analyze inbound and outbound logistics in the context of E-commerce and comprehend the layout of Processing Centers. CO 3: Explain the various machines and equipment used in hub operations and assess prospects in Line Haul Logistics. CO 4: Evaluate the relationship between logistics and fulfillment services and explore innovations and technology trends in Line Haul Logistics.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241OIE	Outsourcing in Ecommerce
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the fundamentals of Outsourcing and its implementation in E-commerce businesses. CO 2: Analyze E-commerce outsourcing, assess strategic assessments, and understand risk management in outsourcing. CO 3: Explore the future trends and innovations in E-commerce outsourcing. CO 4: Evaluate the best practices in outsourcing assessments and techniques to assess and manage risks associated with outsourcing			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241PFE	Packaging for Ecommerce
Course Outcomes: By successful completion of the course, students will be able to; CO 1: Understand the concept of packaging in E-commerce, including types, functions, and materials. CO 2: Analyze the concept of brand equity and its relation to packaging in E-commerce. CO 3: Explain the packaging journey in E-commerce, from consumer research to order delivery and receipt. CO 4: Evaluate packaging techniques, technologies, and future prospects in the E-commerce industry			

Program	Semester	Course Code	Course Name
BMS	IV	BMS241ECS	Ecommerce Customer Service

Course Outcomes: By successful completion of the course, students will be able to;
CO 1: Create customer-centric organizations and develop active listening and communication skills.
CO 2: Implement effective customer service strategies, handle customer encounters, and manage customer hand-offs.
CO 3: Understand customer behavior, analyze customer service tools, and implement customer service surveys and analysis.
CO 4: Evaluate various communication styles and strategies used in E-commerce customer service.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241FO	Fulfillment Operations

Course Outcomes: By successful completion of the course, students will be able to;
Course Outcomes:
CO 1: Understand the basics of Fulfillment operations in E-commerce, including operational models and key drivers.
CO 2: Analyze the relationship between logistics and Fulfillment services, including warehousing aspects and packaging.
CO 3: Explore the role of technology in Fulfillment processes and platforms.
CO 4: Evaluate prospects in Fulfillment, including bundled orders, mini Fulfillment via technology, and market trends.
