

ANDHRA LOYOLA COLLEGE

AUTONOMOUS:: VIJAYAWADA - 520 008

Established: 1954

A CHRISTIAN MINORITY COLLEGE WITH CONSTITUTIONALLY PROVIDED RIGHT OF ADMISSION (AN ISO 14001 : 2015 INSTITUTION)

THE ONLY COLLEGE IN BOTH THE TELUGU STATES TO HAVE BEEN RANKED AMONG
THE TOP 150 COLLEGES BY NIRF SINCE THE INCEPTION OF THE RANKING IN 2017
SELECTED UNDER THE STAR COLLEGE SCHEME OF DBT AND FIST PROGRAMME OF DST, GOVT.OF INDIA
SELECTED FOR ENHANCEMENT OF QUALITY AND EXCELLENCE UNDER RUSA BY MHRD, GOVT.OF INDIA

A College Dedicated to All-Round Development of its Students

Andhra Loyola College

(Autonomous)

VIJAYAWADA-520 008.

Accredited in III Cycle at A* Grade with a CGPA of 3.66 / 4.00

Course Outcomes

DEPARTMENT OF ECONOMICS				
Program Semester Course Code Course Name				
B.A	I	ECO111 MEA	MICRO ECONOMIC ANALYSIS	

On successful completion of the course, students will be able to;

- CO 1: Explain evolution and growth of economics, what economics is and why it is important, how economists use economic models, Difference between positive and normative economics, static and dynamic economics.
- CO 2: Define the concept of utility and satisfaction, Differentiate between marginal utility and total utility, calculate the concept of marginal utility, how consumers maximize total utility within a given income using the Utility Maximizing Rule, Explain how consumer's utility changes when income or prices change, Describe the behavioral economics approach to understanding decision making.
- CO 3: Elucidate the determinants of demand, determinants of supply, concept of elasticity, price elasticity of demand and price elasticity of supply, and compute elasticity using common economic variables.
- CO 4: Describe the term "production" and explain what a production function is; define the term "production inputs," and differentiate between labor, land, capital, entrepreneurship, technology, economies of scale, diseconomies of scale, and constant returns to scale.
- CO 5: Analyze and differentiate between marginal, average, and total product; compute and graph marginal, average, and total product; diminishing marginal product and diminishing marginal returns, Explicit and Implicit Costs, Accounting and Economic Profit.

Program	Semester	Course Code	Course Name
B.A	II	ECO122 MEA	MACRO ECONOMIC ANALYSIS

On successful completion of the course, students will be able to

- CO 1: Define and explain the process of calculating national income, identify its components, demonstrate circular flow of income.
- CO 2: Understanding Say's law of market, classical theory of employment and Keynes' objection classical theory, demonstrate the principle of effective demand and income determination.
- CO 3: Explain the meaning of consumption function, relationship between APC and MPC, consumption and income, concept of multiplier and analyze the theories of absolute and relative income hypothesis.
- CO 4: Understand the relationship between investment and savings, demonstrate investment multiplier, and understand the meaning of MEC and MEI.
- CO 5: Demonstrate the meaning and function of money, high powered money, monetary and paper system, illustrate various versions of quantity theory of money.

Program	Semester	Course Code	Course Name
B.A	III	ECO233DE	DEVELOPMENT ECONOMICS

On successful completion of the course, students will be able to

- CO 1: Students will understand the importance of Economic Growth and development, the present chapter creates an awareness on covid-19 immunity aspects.
- CO 2: Student's become aware of the growth of different countries and it also help to understand ways to develop with different models.
- CO 3: It will develop knowledge among students about the role of developmental theories related to Economic development of a country.
- CO 4: Understand Strategies of Economic Development and Role of Infrastructure in Economic Development.
- CO 5: India is a developing country so as a student of this country there must know the role of economic development and also must have an idea about market failure and attaining economic development with the help of International Institutions.

Program	Semester	Course Code	Course Name
B.A	B.A IV	ECO244EDIAP	ECONOMIC DEVELOPMENT- INDIA
D.A	l V	ECO244EDIAP	AND ANDHRA PRADESH

On successful completion of the course, students will be able to

- CO 1: To understand the basic features of the Indian economy and its development since independence, and also to understand the planning structure and the place of the Indian economy in the Human Development Index.
- CO 2: Be able to understand the national income, trends and the problems of unemployment, poverty in the economy along with the measures to correct them.
- CO 3: Get to know about Indian agriculture, various policies relating to agriculture and the programmes implemented by the government to improve the industrial sector.
- CO 4: Utilize the knowledge of taxation to understand the impact on commerce and industry and also to analyze the state central relations.
- CO 5: The key changes in Andhra Pradesh state after bifurcation in 2014 and the problems faced by it after separation.

Program	Semester	Course Code	Course Name
B.A	IV	ECO245SME	STATISTICAL METHODS FOR ECONOMICS

On successful completion of the course, students will be able to

- CO 1: Understand about the nature and importance of statistics in economics, types of data and sampling, and its collection methods.
- CO 2: To analyze the data collection methods, and tabular and graphical presentation of data.
- CO 3: To understand about the measures of central tendency namely mean median, mode and measures of dispersion.
- CO 4: Able to know correlation and various types along with regression and its uses in real life.
- CO 5: Analyze time series and measurement of time series and also index numbers, types, uses and limitations.

Program	Semester	Course Code	Course Name
B.A	V	ECO356IS	INSURANCE SERVICES

On successful completion of the course, students will be able to

- CO 1: Understand the framework of insurance in India.
- CO 2: Assimilate different types of insurance products sold in India & how insurance policy satisfy customer requirements.
- CO 3: Adapt different types of life insurance products sold in India & how product meets customer needs.
- CO 4: Understand documentation & processing of life insurance proposal forms, claim settlement and surrender of life insurance policy.
- CO 5: Be provided with the knowledge of risk and rewards of general insurance

Program	Semester	Course Code	Course Name
B.A	V	ECO357IS	Banking and Financial Services

At the end of the course students will be able to

- 1. Financial Analysis Skills: Develop proficiency in analyzing financial statements, assessing risk, and evaluating investment opportunities.
- 2. Banking Operations Knowledge: Acquire knowledge of banking operations, including deposit-taking, lending, credit evaluation, and risk management.
- 3. Customer Relationship Management: Develop skills in building and maintaining customer relationships, understanding customer needs, and providing appropriate financial solutions.
- 4. Financial Products and Services: Gain familiarity with various financial products and services offered by banks and other financial institutions, such as loans, mortgages, investment products, and insurance.
- 5. Risk Management: Learn techniques for identifying, assessing, and mitigating financial risks faced by banks and financial institutions, including credit risk, market risk, and operational risk.
- 6. Ethical and Professional Standards: Understand the importance of ethical behavior and professionalism in the banking and financial industry and adhere to ethical standards and codes of conduct.
- 7. Financial Technology (Fintech): Explore the impact of technological innovations on banking

and financial services, including digital banking, mobile payments, block chain, and artificial intelligence.

DEPARTMENT OF HINDI			
Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	I	HIN 111 PNG	Prose, Non-Detailed & Applied Grammar - I

At the end of the course Student will

- CO 1: Get the scope for linguistic skills of Hindi.
- CO 2: Understand 'Unity in Diversity'.
- CO 3: For the better understanding in grammar concepts
- CO 4: Adapt noble values of Life.
- CO 5: Get the knowledge of different Grammar concepts in Hindi.
- CO 6: Help the society by their skills & abilities.

Program	Semester	Course Code	Course Name
B.A, B.Com &	II	HIN 122 PNG	Prose, Non-Detailed & Applied Grammar
B.Sc			- II

At the end of the course Student will

- CO 1: Get the scope for linguistic skills of Hindi.
- CO 2: Promote perfect use of Vocabulary
- CO 3: For the better understanding in grammar concepts
- CO 4: Adapt moral values and ethical values so that students can try to build good character
- CO 5: Understands the structure of translation methods
- CO 6: Help the society by their skills & abilities.

Program	Semester	Course Code	Course Name
B.A, B.Com &	III	HIN 233 HLT	Poetry, History of Hindi Literature &
B.Sc			Translation

- CO 1: Get a brief knowledge of history of Hindi literature
- CO 2: Get the scope for literary skills of Hindi
- CO 3: Gain Hindi translational skills.
- CO 4: Emphasize the responsibilities of humans towards nature.
- CO 5: Behave as a Virtual Oriented person in society.
- CO 6: Attain skills in writing and speaking.

	DEPARTMENT OF SANSKRIT				
Program Semester Course Code Course Name					
B.A, B.Com & B.Sc	I	SAN 111 PPG	Prose, Poetry and Grammar		

CO1: Get a brief knowledge of Sanskrit literature

CO2: Understand the Sanskrit syntax through the grammar

CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently.

CO4: Can analyze merit sand demerits of the society

CO5: Understand the structure of translation methods

CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavadgita which are the source of Indian culture and traditions

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	II	SAN 122 PPG	Prose, Poetry and Grammar

At the end of the course student will

CO1: Get a brief knowledge of Sanskrit literature

CO2: Understand the Sanskrit syntax through the grammar

CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently.

CO4: Can analyze merits and demerits of the society

CO5: Understand the structure of translation methods

CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavad Gita which are the source of Indian culture and traditions

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	III	SAN 233 DHS	Drama, Alankaras and History of Sanskrit Literature

At the end of the course student will

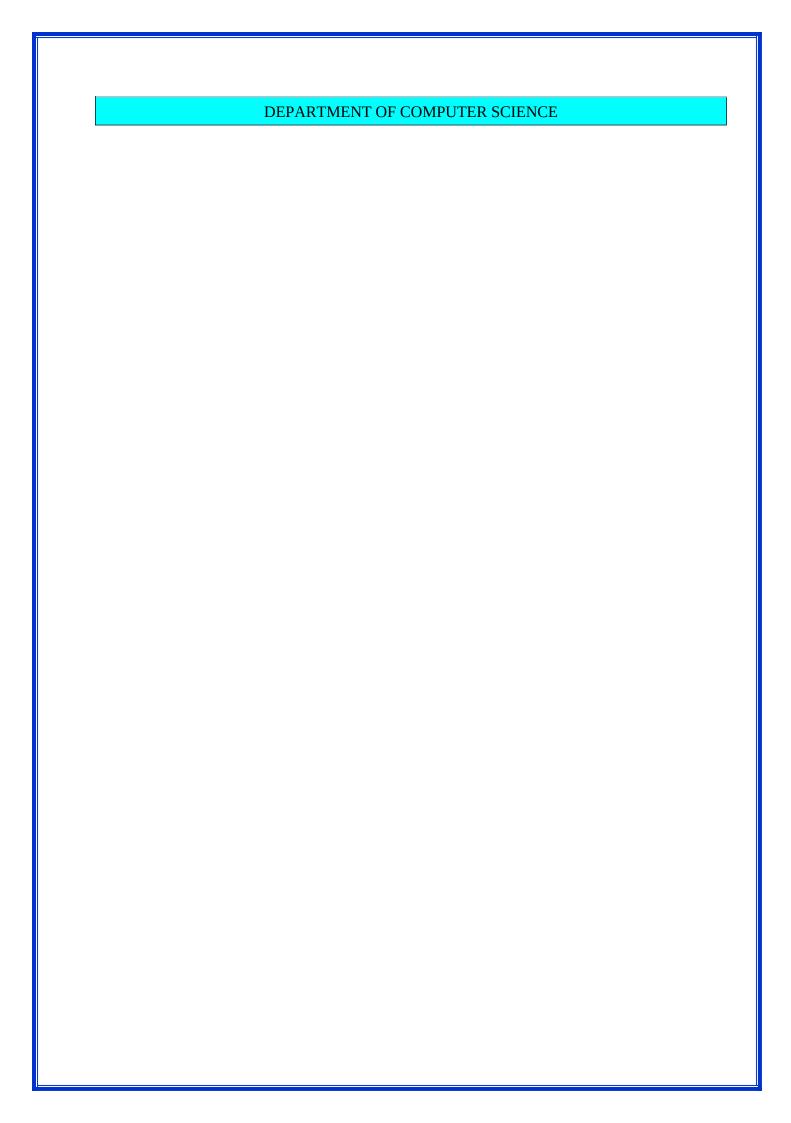

CO1: Get a brief knowledge of Sanskrit literature

CO2: Understand the Sanskrit syntax through the grammar

CO3: Get the skills of pronunciation, reading, writing and reciting Sanskrit accurately and fluently.

CO4: Can analyze merit and demerits of the society CO5: Understand the structure of translations

CO6: Can study Sanskrit texts such as Ramayana, Mahabharata and Bhagavad Gita which are the source of Indian culture and traditions

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	I	CSC111PPP	Problem Solving using Computers & Python Programming

Upon successful completion of the course, a student will be able to:

- CO 1: Learn to apply fundamental problem-solving techniques.
- CO 2: Describe the core syntax and semantics of Python programming language.
- CO 3: Learn and understand python looping, control statements and string manipulations.
- CO 4: Define and demonstrate the use of built-in data structures lists, dictionaries, tuples and sets
- CO 5: Understand the Python programming language and it's rich set of libraries, applications where Python programming is effective

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	II	CSC122DS	Data Structures

Upon successful completion of the course, a student will be able to:

- CO 1: Understand available Data Structures for data storage and processing.
- CO 2: Comprehend Data Structure and their real-time applications Stack, Queue, Linked List, Trees and Graph
- CO 3: Choose a suitable Data Structures for an application
- CO 4: Develop ability to implement different Sorting and Search methods
- CO 5: Have knowledge on Data Structures basic operations like insert, delete, search, update and traversal
- CO 6: Design and develop programs using various data structures
- CO 7: Implement the applications of algorithms for sorting, pattern matching etc

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	III	CS233DBMS	DBMS

On completing the subject, students will be able to:

- CO 1: Understand the fundamental concepts of DBMS with special emphasis on relational data model.
- CO 2: Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database
- CO 3: Model database using ER Diagrams and design database schemas based on the model.
- CO 4: Create a small database using SQL.
- CO 5: Store, Retrieve data in database.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	IV	CSC244OS	Operating Systems

- CO 1: Know Computer system resources and the role of operating system in resource management with algorithms
- CO 2: Understand Operating System Architectural design and its services.
- CO 3: Gain knowledge of various types of operating systems including Unix and Android.
- CO 4: Understand various process management concepts including scheduling, synchronization, and deadlocks. 5. Have a basic knowledge about multithreading.
- CO 5: Comprehend different approaches for memory management.
- CO 6: Understand and identify potential threats to operating systems and the security features design to guard against them.
- CO 7: Specify objectives of modern operating systems and describe how operating

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	IV	CSC 245OPJ	Object Oriented Programming With Java

After successful completion of the course, the students are able to At the end of the course student will

- CO 1: Understand the benefits of a well-structured program
- CO 2: Understand different computer programming paradigms
- CO 3: Understand underlying principles of Object-Oriented Programming in Java
- CO 4: Develop problem-solving and programming skills using OOP concepts
- CO 5: Develop the ability to solve real-world problems through software development in high-level programming languages like Java.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	V	CS356WDT	Web Interface Designing Technologies

Upon successful completion of the course, a student will be able to:

- CO 1: Understand and appreciate the web architecture and services.
- CO 2: Gain knowledge about various components of a website.
- CO 3: Demonstrate skills regarding creation of a static website and an interface to dynamic website.
- CO 4: Learn how to install word press and gain the knowledge of installing various plugins to use in their websites.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	V	CS356WDT	Web Interface Designing Technologies (LAB)

- . On successful completion of this practical course, student shall be able to:
- CO 1: Create a basic website with the help of HTML and CSS.
- CO 2: Acquire the skill of installing word press and various plugins of Word press.
- CO 3: Create a static website with the help of Word press.
- CO 4: Create an interface for a dynamic website.
- CO 5:Apply various themes for their websites using Word press.

Program	Semester	Course Code	Course Name
B.Sc.(MPCs, MSCs, MECs,	V	CS357WAD(P)	Web Applications Development using PHP & MYSQL LAB

On successful completion of this practical course, student shall be able to:

- CO1: Write, debug and implement the Programs by applying concepts and error handling techniques of PHP.
- CO2: Create an interactive and dynamic website.
- CO3: Create a website with reports generated from a database.
- CO4: Write programs to create an interactive website for e-commerce sites like online shopping, etc

DEPARTMENT OF STATISTICS			
Program	Semester	Course Code	Course Name
B. Sc., (MSP, MSCs)	I	STA111DSP	Descriptive Statistics & Theory of Probability

- CO 1: Organize, manage and present data and to analyse statistical data graphically using frequency distributions and cumulative frequency distributions.
- CO 2: Analyze statistical data using measures of central tendency, dispersion and location and to use the basic probability rules, including additive and multiplicative laws, using the terms, independent and mutually exclusive events
- CO 3: Translate real-world problems into probability models and to derive the probability density function of transformation of random variables.
- CO 4: Calculate probabilities and derive the marginal and conditional distributions of bi-variate random variables and to analyze Statistical data.
- CO 5: Expectation of random variable and its properties and various function of random variable.

Program	Semester	Course Code	Course Name
B.A.	I	LSC111ES	Elementary Statistics

- CO 1: Understand the concept of Statistics and its merits and demerits. Distinguishing Primary and secondary data. Classification, Tabulation and Pictorial representation of data.
- CO 2: Understand the basic nature of data and how a single value describes the entire data set. Measuring the degree of departure of a distribution from symmetry and Reveals the direction of scatteredness of the items.
- CO 3: Understand the spread of the data and to draw conclusions from the comparison of averages. To understand the concept of correlation and regression and to learn the degree of Association between two variables and establishing relationship between the variables

Program	Semester	Course Code	Course Name

B. Sc.,(MSP,	TT	STA112PD	Duck shiliter Distributions
MSCs)	11	31A112PD	Probability Distributions

- CO 1: Develop problem-solving techniques needed to accurately calculate probabilities.
- CO 2: Apply problem-solving techniques to solving real-world events.
- CO 3: Apply selected probability distributions to solve problems.
- CO 4: Equipping students with essential tools for statistical analyses at the graduate level.
- CO 5: Fostering understanding through real-world statistical applications.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	II	SDC112SAR	Survey and Reporting

COURSE OBJECTIVES: On successful completion of the course, students will be able to;

- CO1: Understand the basics of survey and reporting needs and methods
- CO2: Comprehend designing of a questionnaire
- CO3: Conduct a simple and valid survey and Collect data
- CO4: Organize and interpret data and Prepare and submit reports.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	III	STA233SMS	Statistical Methods & Exact Sampling Distributions

- CO 1: Analyze the data pertaining to attributes and to interpret the results.
- CO 2: To recognize and evaluate the relationship between two quantitative variables through simple linear correlation and regression.
- CO 3: To understand the relationship between sample statistics and population parameters.
- CO 4: Knowledge of interval estimation and estimation of parameters using the method of moments and MLE.

CO 5: To understand exact sampling distribution

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	IV	STA244SI	Statistical Inference

- CO 1: Advances knowledge of statistical modeling via point estimation, hypothesis testing and confidence intervals.
- CO 2: Ability to convert various problems of practical interest into statistical models and make inference on it.
- CO 3: Students will be able to discern the different aspects of statistical modeling.
- CO 4: Able to understand the difference between parametric and non parametric tests and applications of various non parametric tests
- CO 5: Ability to apply statistical concepts and statistical techniques with respect to the point estimation, hypothesis testing and confidence sets.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MSCs)	IV	STA245AS	Advanced Statistics

- CO 1: Understand census data, Fertility and Mortality rates, standardized death rates, components of complete and abridged life tables, reproduction rates. Notation of population projection.
- CO 2: Able to understand the different components of time series, analysis of time series data

and measurement of trend and its applications.

- CO 3: Analysis of time series data and measurement of seasonal variations methods and its applications. Use of multiplicative model in measurement of seasonal fluctuations.
- CO 4: Understanding the Concept of Index numbers, calculation of unweighted and weighted different index numbers for price and quantity, construction of cost of living index number and whole sale price index numbers.
- CO 5: Understanding the Concept of demand and supply, price elasticities of supply and demand, methods of determining demand and supply curves and Pareto law of income distribution curves of concentration

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MES, MSCs)	V	STA356OR	Operations Research

- CO 1: Development of Operations Research(OR), Scope, Features and Management application of OR, Role of OR in decision making, Development of OR in India. Role of computers in OR.
- CO 2: Understand the concept of Sequencing Problem, Johnson's algorithm for Processing n Jobs through two machines, processing n jobs through three machines, processing two jobs through m machines.
- CO 3: Understand the concept of Assignment problem, Formulation of mathematical model and to solve Assignment problems with Hungarian method.
- CO 4: Understand the concept of Transportation problem, Formulation of mathematical model and to find initial basic feasible solution and optimal solution using Modified Distribution method.
- CO 5: Understand the concept of Competitive strategies, Principle of Minimax and Maximin rule, definitions of Saddle point, Payoff matrix, Zero Sum game and Value of the game, Dominance and modified dominance property and its applications.

Program	Semester	Course Code	Course Name
B. Sc.,(MSP, MES, MSCs)	VI	STA357BDR	Basic Statistical Data Analysis Using R

- CO 1: Get basic knowledge on data types, functions and packages in R.
- CO 2: Understand the functioning of the data in R
- CO 3: Apply R-functions to data visualization.
- CO 4: Generate statistical analysis viz., fitting of curves and probability distribution using R.
- CO 5: Importing data and code editing, applying Hypothesis testing and generating statistical analysis.

Statistics - Big data Analytics, Artificial Intelligence			
Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	I	STA111SM	Statistical Methods

- CO 1: Organize, manage and present data and to analyze statistical data graphically using frequency distributions and cumulative frequency distributions
- CO 2: Concept of Principle of least squares and fitting of curves viz., polynomials, exponential and power curves
- CO 3: Bivariate data- graphical representation, frequency distribution, conditional frequency distribution. Karl Pearson's Correlation coefficient, Spearman's Rank Correlation Coefficient

and its properties.

CO 4: Regression line and its properties, diagnostics of regression line, Multiple correlation, Partial correlation and multiple regression lines for trivariate data

CO 5: Dealing attributive nature of data, classification and its frequencies, consistency, independency and association of attributes and their properties

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	II	STA112BPT	Basic Probability Theory

- CO 1: Understand the basic concepts of probability, various definitions and axioms and discrete and continuous random variables
- CO 2: Calculate probabilities, and derive the mathematical expectation, marginal and conditional distributions of bivariate random variables.
- CO 3: Expectation of random variable and its properties and various functions of random variable.
- CO 4: Concept of bivariate random variable and its joint and marginal probabilities. Properties of bivariate random variables. Applications of Cauchy Schwarz Inequality .
- CO 5: Concept of weak law of large numbers, Bernoulli's Law of Large Numbers. Applications of Chebyshev's Inequality and central limit theorem

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	III	STA233PD	Probability Distributions

- CO 1: Univariate discrete probability distributions viz., Bernoulli Binomial and Poisson distributions, properties and their applications
- CO 2: Univariate discrete probability distributions viz., Negative Binomial, Geometric and Hypergeometric distributions, properties and their applications
- CO 3: Univariate continuous probability distribution Normal distribution properties and its applications, standard normal variate, problems on normal area property
- CO 4: Univariate continuous probability distributions viz., Cauchy, Exponential, Gamma and Beta Hypergeometic distributions, properties and their applications
- CO 5: Concept of population, sample, parameter and statistic. Sampling distribution of data and basic sampling distribution viz., t, F and Chi square and its properties and their interrelationships

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	IV	STA244ETH	Basic Theory of Estimation & Testing of Hypothesis

- CO 1: Concept of Estimation –properties of good estimator and method of parametric estimation and confidence intervals
- CO 2: Applications of large sample tests for variables and attributes and Fishers Z transformation and its applications
- CO 3: Applications of small sample tests viz., t- test for single mean, equality of two means, paired observations and sample correlation coefficients,. F test for equality of two variances
- CO 4: Chi-Square test for Goodness of fit and Independence of Attributes
- CO 5: Able to understand the difference between parametric and non parametric tests and applications of various non parametric tests

Program	Semester	Course Code	Course Name
B. Sc., (Big data Analytics, Artificial Intelligence)	V	STA355AS	Applied Statistics

- CO 1: Concept of population and sample, census and sample survey, sampling errors, probability and non probability sampling techniques. Simple random sampling, Stratified and Systematic sampling and their properties
- CO 2: Select and design an appropriate method of data collection for a research project; Apply basic principles in the design of simple experiments viz., ANOVA, CRD and RBD designs
- CO 3: Able to understand the different components of time series, analysis of time series data and measurement of trend and its applications.
- CO 4: Understanding the Concept of Index numbers, calculation of unweighted and weighted different index numbers for price and quantity, construction of cost of living index number and whole sale price index numbers.
- CO 5: Idea of Statistical Quality Control (SQC), process and product control, 3 sigma limits and control charts for attributes and variables.

DEPARTMENT OF MATHEMATICS			
Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	I	MAT 111 DE	Differential Equations

- CO1: be able to find the General solution for the LDEs of first order.
- CO2: be able to solve a given Differential Equation of first order but not of first degree and identify Clairaut's Equations.
- CO3: be able to solve homogeneous LDEs of higher order with constant coefficients.
- CO4: be able to solve second order LDEs with Variable coefficients.
- CO5: be able to find Orthogonal Trajectories of a family of curves, be able to solve Simultaneous differential equations.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP,		MAT	Analytical Solid Geometry
MSCs, MCsP,	II	122 ASG	
MECs)			

- CO 1: get the knowledge of various forms of planes, straight line, sphere, cone and cylinder.
- CO 2: be able to find the angle between the planes, Bisector planes, perpendicular distance from a point to the plane, point of intersection of lines.
- CO 3: be able to describe coplanar lines and compute angle between planes and lines.
- CO 4: get the knowledge of skew lines and be able to find the shortest distance.
- CO 5: be able to define the plane section of the sphere and to find the limiting points.
- CO 6: be able to understand the concept of right circular cone and right circular cylinder.

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	III	MAT 233AA	Abstract Algebra

At the end of the course students will be able to:

- CO 1: acquire the basic knowledge and structure of groups, subgroups and cyclic groups.
- CO 2: get the significance of the notation of a normal subgroup.
- CO 3: understand permutations in Group Theory and operations on them.
- CO 4: study the homomorphisms and isomorphisms with applications.
- CO 5: understand the basic concepts in ring theory.
- CO 6: understand the applications of ring theory in various fields.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	III	MAT233DM	Discrete Mathematics

At the end of the course students will be

- CO 1: able to apply principles and concepts of discrete mathematics in practical situations.
- CO 2: able to Identify basic concepts of trees, rooted trees and boolean algebra expressions.
- CO 3: able to compute the distance in graphs and weighted graphs.
- CO 4: able to find a relation that is reflexive, anti symmetric and transitive.
- CO 5: able to apply this knowledge in computer science applications.
- CO 6: able to understand the various types of properties of sets and logical gates

Program	Semester	Course Code	Course Name
B. Sc (MPC, MSP, MSCs, MCsP, MECs)	IV	MAT244RA	Real Analysis

At the end of the course students will be able to:

- CO 1: identify the behavior of a sequence by employing relevant results
- CO 2: analyzethe nature of a series by applying suitable test of convergence
- CO 3: verify the continuity of a function and type of discontinuity
- CO 4: apply the geometrical interpretation of differentiation and mean value theorems
- CO 5: prove fundamental theorem and mean value theorems using the concept of Riemann integration
- CO 6: solve problems in Real analysis using the inter dependability of continuity and differentiation of the real valued functions and Riemann integration of a bounded function.

Program Sei	mester Course Code	Course Name
-------------	--------------------	-------------

B. Sc (MPC, MSP, MSCs, MCsP, MECs)	IV	MAT 245 LA	Linear Algebra
------------------------------------------	----	------------	----------------

- CO 1: understand the concepts of vector spaces, subspaces and their properties
- CO 2: understand the concepts of basis, dimension and their properties
- CO 3: understand the concepts of elementary matrix operations
- CO 4: understand the concepts of linear transformations and their properties
- CO 5: be able to describe the concepts of eigenvalue, eigenvector and characteristic polynomials
- CO 6: understand the properties of inner product spaces and determine orthogonality in inner product spaces.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	IV	MAT244NA	Numerical Analysis

At the end of the course students will be able CO CO 1: gain basic knowledge in Numerical methods.

- CO 2: use several methods of solving algebraic and transcendental equations of one variable.
- CO 3: recognize the contribution and impacts of Numerical Analysis in real life problems.
- CO 4: analyzeand interpret information from a variety of sources relevant to Numerical Analysis.
- CO 5: use information and communication technology to discuss problems relevant to Numerical Analysis.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	V	MAT256NM	Numerical Methods

- CO 1: understand the subject of various numerical methods that are used to obtain approximate solutions
- CO 2: Understand various finite difference concepts and interpolation methods.
- CO 3: Work out numerical differentiation and integration whenever and wherever routine methods are not applicable.
- CO 4: Find numerical solutions of ordinary differential equations by using various numerical methods.
- CO 5: Analyze and evaluate the accuracy of numerical methods.

Program	Semester	Course Code	Course Name
B.Sc., (M,BD,S) (M,AI,S)	V	MAT257MSF	Speciial Functions

- CO 1: Students will gain a comprehensive understanding of special functions,
- CO 2: Students will develop strong problem-solving skills by applying properties, transformations, and generating functions associated with special functions.
- CO 3: Students will learn to create mathematical models for real-world phenomena using special functions.
- CO 4: Students will master various analytical techniques, including orthogonal properties, recurrence relations, and generating functions.
- CO 5: Students will be introduced to advanced mathematical concepts such as differential equations and integrals.

Program	Semester	Course Code	Course Name
B.Sc / B.A (Mathematics CC)	I	MAT CC QA	Quantitative Aptitude

At the end of the course student will be able to

- CO 1: improve the basic Mathematical skills which will be useful in the preparation for any type of Competitive examination.
- CO 2: Enhance the problem solving skills by developing a strong foundation in Mathematics.
- CO 3: apply the skills and competencies acquired in the related areas.
- CO 4: demonstrate number sense, including dimensional analysis and conversions between fractions, decimals, and percentages.
- CO 5: determine when approximations are appropriate and when exact calculations are necessary.

DEPARTMENT OF ELECTRONICS				
Program	Semester	Course Code	Course Name	
B.Sc. (MECS)	I	ELE111NAE	Network Analysis and Analog Electronics	

- CO 1: Students will be able to know the basic concepts of an electrical circuit and can be able to analyze the networks
- CO 2: Ability to solve different electrical circuits and using different solving methods
- CO 3: Acquires the basic knowledge of physical and electrical conducting properties of semiconductor devices like diodes and their real time applications
- CO 4: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret device applications CO 5: Able to design various amplifier circuits using BJT and FET and observe their frequency of responses and applications.
- CO 6: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in electronic circuits
- CO 7: Will be able to analyze, build, and troubleshoot electronic circuits using diodes and transistors
- CO 8: Also, able to know a wide range of applications of transistors, feedback concepts and its applications as oscillators.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	II	ELE123LDC	Linear and Digital Integrated Circuits

CO 1: Understand the concepts needed to explain the basic electronics of logic circuits and be able to use integrated circuit packages.

CO 2: Analyze the fundamentals and areas of applications for the integrated circuits and analyze important types of integrated circuits.

CO 3: Demonstrate the ability to design practical circuits that perform the desired operations and will be

able to interpret logic functions, circuits, truth tables, and Boolean algebra expressions.

CO 4: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in integrated circuits

CO 5: Will be able to analyze, build, and troubleshoot combinatorial circuits using digital integrated circuits

CO 6: Design, set up, and carry out experiments; analyze data, Select the appropriate integrated circuit modules to build a given application

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	II	ELE124PEP	PCB and Electronic Product Design

At the end of the course student will

CO 1: Understanding the Electrical & Electronic Components: Different Active and passive Components and their Symbolic representations and notations, Electrical & Electronic circuit representations, Surface Mount Technology, Need for SMD, Surface Mount Semiconductor packages

CO 2: Understand the concepts needed to explain IPC standards block diagrams circuit Schematic representations, Circuit Documentation and Editing.

CO 3: Understand the evolution of PCBs, components of PCBs, Characteristics of PCB, Types of PCBs, IPC standards of PCBs, Terminology in PCB's PCB Design Techniques: Layout planning & Design – Block diagram, schematic diagram, General PCB design considerations, Artwork CO 4: Understanding the Types of laminates, properties of laminates-electric, dielectric strength, dielectric break down properties, selection of copper clad laminate, Useful standards, PCB design check list Image transfer techniques, plating process, etching process. Conformal coating, drilling, solder mask.

CO 5: Analyze Production methods Lead Forming, lead Stand Offs, Lead Clinching styles, soldering, importance of soldering Eutectic Solder, Wetting Actions, Soldering tools- Soldering iron, solder, Cutter, flux, tweezer & Cleaning sponge,

CO 6: Equipment harness and testing Wire Harness and Crimping - Different types of wires and cables, different terminations, different connector styles, Different types of Lugs, Crimping methods, Lacing methods, Wire wrapping method Testing Methods – Module testing, Functional Testing, Routine testing, Environmental testing, Reliability testing.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	III	ELE235MP	Microprocessors

- CO 1: Describe the architecture of 8085 and 8086:
- CO 2: Illustrate the organization of registers and memory in microprocessors.
- CO 3: Differentiate Minimum and Maximum Mode bus cycle.
- CO 4: Identify the addressing mode of an instruction.
- CO 5: Develop programming skills in assembly language. CO 6: Explain the need for different interfacing devices. CO 7: Compare the concepts of CISC and RISC processors.
- CO 8: Recall and apply a basic concept of digital fundamentals to Microprocessor based personal computer system.

CO 9: Identify a detailed s/w & h/w structure of the Microprocessor.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	III	ELE236LDF	LED Lighting Design Fundamentals and
			Testing

At the end of the course student will

- CO 1: Understand basics of LED technology and distinguish working principle of LED, incandescent, fluorescence, CFL and HID lamps.
- CO 2: Know importance of proper thermal, electrical, mechanical and optical design of LED luminaires and interpretation of LED data sheets.
- CO 3: Understand importance of secondary optics in LED luminaries and dependance of viewing angle, illuminance factor of a luminaire on secondary optics.
- CO 4: Analyze role of diffuser in elimination of multiple source shadow effect of LED luminaire and minimizing glaring effect.
- CO 5: Estimate viewing angle, Illuminance pattern and efficacy of a given luminaire.
- CO 6: Design constant voltage, constant current power supplies with required power rating and protections.
- CO 7: Estimate heat dissipation at different stages of LED luminaire- at junction, on PCB footprints, bottom of PCB and inside the enclosure. Thermal performance'

CO 8: Access LED luminaire electrically, thermally, optically and mechanically.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	IV	ELE248SLA	Solid State Lighting Applications

- CO 1: Understand various photometric quantities, importance of these quantities in lighting applications.
- CO 2: Identify different types of solid state luminaires and their applications. Suggested illuminance levels for various applications.
- CO 3: Plan and design lighting for residential and retail areas, able to draw lighting design layout and ableto evaluate lighting design.
- CO 4: Plan and lighting design for any type of road, able to design lighting poles with arm inclination.
- CO 5: Evaluate given light source electrically, optically and thermally. Estimate efficiency of given light source.
- CO 6: Understand difference between rail and road signal lighting and evaluation Design smart lighting control system with Wi-Fi, Bluetooth and IR communication.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	V	ELE359MCI	Micro Controller and Interfacing

- CO 1: Give an understanding about the concepts and basic architecture of 8051
- CO 2: Provide an overview of difference between microprocessor and microcontroller
- CO 3: Provide background knowledge and core expertise in microcontroller
- CO 4: Study the architecture and addressing modes of 8051
- CO 5: Impart knowledge about assembly language programs of 8051
- CO 6: Help understand the importance of different peripheral devices & their interfacing to 8051
- CO 7: Impart knowledge of different types of external interfaces including LEDS, LCD, Keypad

Matrix, Switches & Seven segment display

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	V	ELE35XCS	Communication Systems

At the end of the course student will

CO 1: Understand different modulation and demodulation techniques used in analog communication Compare and contrast design issues, advantages, disadvantages and limitations of analog communication systems

CO 2: Apply knowledge in

- A. Elements of Pulse and Digital Communication systems
- B. Various types of pulse modulations
- C. Digitization techniques such as PCM & DPCM
- D. both the multiplexing techniques
- E. Digital carrier modulation techniques ASK, FSK
- CO 3: Overview of optical fiber communication system, its importance and applications
- CO 4: To make students familiar with various generations of mobile communications 2G, 2: 5G, 3G with their characteristics and limitations.
- A. To understand the concept of cellular communication
- B. To understand the basics of wireless communication
- CO 5: Understand GSM, CDMA concepts and architecture, frame structure, system capacity, services provided.
- A. summarize the principles and applications of wireless systems and standards
- B. Demonstrate an ability explain multiple access techniques for Wireless Communication

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	VI	ELE36XIAMC	Advanced Microcontrollers

At the end of the course student will

- CO 1: Importance of C in embedded systems, ANSI standards, fundamentals of C, data types, constants, formatted IO, loops, function, arrays and pointers.
- CO 2: Understanding of PIC microcontroller, features of PIC, register organization, PIC reset actions, oscillator connections, PIC memory organization, PIC instructions, PIC addressing modes, I/O ports & interrupts, PIC timers, PIC ADC.
- CO 3: Understand the ARM7TDMI, cortex –m0, m3, m4, multi core processors and feature trends, study of ARM cortex-m3 and core and controllers, introduction to firmware life cycle basics on firmware IDE's and their debugging & simulation technologies.
- CO 4: Data communication, Serial communication, communication modes and

interruptprogramming.

Program	Semester	Course Code	Course Name
B.Sc. (MECS)	VI	ELE36XIIC1PE	Power Electronics

At the end of the course student will

CO 1: Will know about the generation of power electronics and family of thyristors

- CO 2: Will know about the basic thyristor-SCR and its applications.
- CO 3: Will know about other thyristors like diac, triac ,igbt, power MOSFET.
- CO 4: Will know about the procedure to convert ac to dc as a chopper concept.
- CO 5: Will know about single phase power supply and their types with and without reactive feedback.
- CO 6: Will know about the types of motor, their construction, thyristor-based motors

Electronics Technology					
Program Semester Course Code Course Name					
B.Sc.(ELE CS)	Ι	ELE111NAE	Network Analysis and Analog Electronics		

- CO 1: Students will be able to know the basic concepts of an electrical circuit and can be able to analyze the networks
- CO 2: Ability to solve different electrical circuits and using different solving methods
- CO 3: Acquires the basic knowledge of physical and electrical conducting properties of semiconductor devices like diodes and their real time applications
- CO 4: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret device applications
- CO 5: Able to design various amplifier circuits using BJT and FET and observe their frequency of responses and applications.
- CO 6: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in electronic circuits
- CO 7: Will be able to analyze, build, and troubleshoot electronic circuits using diodes and transistors
- CO 8: Also, able know wide range of applications of transistors, feedback concepts and its applications as oscillators

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	I	ELE112FEC	Fundamentals of
			Electrical and Electronic Components

- CO 1: Understand generation of AC signal, different types of AC wave forms, and terms of AC signal, rectangular to polar and polar to rectangular conversions.
- CO 2: Know about basic circuit elements and their behavior in DC circuits. Transient response of RC & RL in DC circuits.
- CO 3: Analyses frequency response, Q- factor and bandwidth of series and parallel resonant circuits.
- CO 4: Understand construction and working of Transformers & analyzes line and load regulation in transformers.
- CO 5: To identify different types of switches and select suitable switches for specific applications.
- CO 6: Know the construction and working of DC linear motor, stepper motor, buzzer and loudspeaker.
- CO 7: Identify different types of sensors, know their sensing techniques of LDR, Thermistor, LPG, Load cell and LVDT.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	I	ELT111CE	Consumer Electronics

- CO 1: Will know about the Microwaves (Range used in Microwave Ovens), Microwave oven block diagram, LCD timer with alarm, Single Chip Controllers, Types of Microwave oven, Wiring and Safety instructions, Care and Cleaning.
- CO 2: Will know about the Electronic controller for washing machines, Washing machine hardware and software, Types of washing machines, Fuzzy logic washing machines Features of washing machines.
- CO 3: Will know about the Air Conditioning, Components of air conditioning systems, All water air conditioning systems, All air conditioning systems, Unitary and central air conditioning systems, Split air conditioners.
- CO 4: Will know about the Facsimile machine, Xerographic copier, Calculators, Structure of a calculator, Internal Organization of a calculator, Servicing electronic calculators, Digital clocks, Block diagram of a digital clock.
- CO 5: Will know about the Digital computer, Internet access, Online ticket reservation, Functions and networks, Barcode Scanner and decoder, Electronic Fund Transfer, Automated Teller Machines (ATMs), Set-Top boxes, Digital cable TV, Video on demand.

Program	Semester	Course Code			Course Name
B.Sc.(ELE CS)	II	ELE123LDC	Linear	and	Digital Integrated Circuits

- CO 1: Understand the concepts needed to explain the basic electronics of logic circuits and be able to use integrated circuit packages.
- CO 2: Analyze the fundamentals and areas of applications for the integrated circuits and analyze important types of integrated circuits.
- CO 3: Demonstrate the ability to design practical circuits that perform the desired operations and will be able to interpret logic functions, circuits, truth tables, and Boolean algebra expressions.
- CO 4: Integrate and apply a wide range of mathematical techniques to derive various differences between theoretical, practical & simulated results in integrated circuits
- CO 5: Will be able to analyze, build, and troubleshoot combinatorial circuits using digital integrated circuits
- CO 6: Design, set up, and carry out experiments; analyze data, Select the appropriate integrated circuit modules to build a given application

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	II	ELE124PEP	PCB and Electronic Product Design

- CO 1: Understanding the Electrical & Electronic Components: Different Active and passive Components and their Symbolic representations and notations, Electrical & Electronic circuit representations, Surface Mount Technology, Need for SMD, Surface Mount Semiconductor packages
- CO 2: Understand the concepts needed to explain IPC standards block diagrams circuit Schematic representations, Circuit Documentation and Editing.
- CO 3: Understand the evolution of PCBs, components of PCBs, Characteristics of PCB, Types of PCBs, IPC standards of PCBs, Terminology in PCB's PCB Design Techniques: Layout planning & Design Block diagram, schematic diagram, General PCB design considerations, Artwork
- CO 4: Understanding the Types of laminates, properties of laminates-electric, dielectric strength, dielectric break down properties, selection of copper clad laminate, Useful standards, PCB design checklist Image transfer techniques, plating process, etching process. Conformal coating, drilling, solder mask.
- CO 5: Analyze Production methods Lead Forming, lead Stand Offs, Lead Clinching styles, soldering, importance of soldering Eutectic Solder, Wetting Actions, Soldering tools-Soldering iron, solder, Cutter, flux, tweezer & Cleaning sponge,
- CO 6: Equipment harness and testing Wire Harness and Crimping Different types of wires

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	II	ELT122PMT	PC Maintenance and Trouble Shooting

- CO 1: Will know about the generations of computers based on technology, what things he/she sees inside the central processing cabin, and different types of input and out devices.
- CO 2: Will know about motherboard design, different types of components presented on the motherboard and internal process of motherboard.
- CO 3: Will know about different ports and their communication between inputs, output devices with the CPU section.
- CO 4: Will know about different power connection sockets and their importance and different ways to apply power to the computers.
- CO 5: Will know about different types of memory and storage devices with internal structures.
- CO 6: Will know how to assemble a personal computer and installation procedures of operating systems and applications with examples like windows XP, MS office etc.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELE235MP	Microprocessors

- CO 1: Describe the architecture of 8085 and 8086:
- CO 2: Illustrate the organization of registers and memory in microprocessors.
- CO 3: Differentiate Minimum and Maximum Mode bus cycle.
- CO 4: Identify the addressing mode of an instruction.
- CO 5: Develop programming skills in assembly language.
- CO 6: Explain the need for different interfacing devices.
- CO 7: Compare the concepts of CISC and RISC processors.
- CO 8: Recall and apply a basic concept of digital fundamentals to Microprocessor based personal computer systems.
- CO 9: Identify a detailed s/w & h/w structure of the Microprocessor.
- CO 10: Illustrate how the different peripherals (8255, 8253 etc.) are interfaced with Microprocessor.
- CO 11: Train their practical knowledge through laboratory experiments.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELE236LDF	LED Lighting Design
			Fundamentals and Testing

- CO 1: Understand basics of LED technology and distinguish working principle of LED, incandescent, fluorescence, CFL and HID lamps.
- CO 2: Know importance of proper thermal, electrical, mechanical and optical design of LED luminaires and interpretation of LED data sheets.
- CO 3: Understand importance of secondary optics in LED luminaries and dependence of viewing angle, illuminance factor of a luminaire on secondary optics.
- CO 4: Analyze role of diffuser in elimination of multiple source shadow effect of LED luminaire and minimizing glaring effect.
- CO 5: Estimate viewing angle, Illuminance pattern and efficacy of a given luminaire.
- CO 6: Design constant voltage, constant current power supplies with required power rating and protections.
- CO 7: Estimate heat dissipation at different stages of LED luminaire- at junction, on PCB footprints, bottom of PCB and inside the enclosure. Thermal performance'

CO 8: Access LED luminaire electrically, thermally, optically and mechanically.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	III	ELT233BN	Basics of Networks

- CO 1: Know about Computer Network basics and types of Networking, different types of Network Topologies. Definitions and introduction of Internet, Ethernet, Wi-Fi, Bluetooth, Mobile Networking, Wire and wireless Networking.
- CO 2: Know about Communication Media & Connectors and different types of cable. Understand color codes of CAT5 cable.
- CO 3: Know about Data Communication types of Communication and Serial port Checking Software in both terminal and nonterminal methods.
- CO 4: Know about Sessions and presentation aspects of DNS, Telnet, rlogin, FTP, SMTP WWW Basics of Firewalls
- CO 5: Packet switching networks, Frame Relay networks, Asynchronous transfer mode ATM in detail.
- CO 6: Know about different types of Networking Components like Hubs, Bridges, Gateways.
- CO 7: How to address, types of addressing, Subnetting , types of subnetting, Domain, types of domain.
- CO 8: Know about networking protocols.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE247EI	Electronic Instrumentation

- CO 1: Measure various electrical parameters with accuracy, precision, resolution.
- CO 2: Use AC and DC bridges for relevant parameter measurement.
- CO 3: Select appropriate passive or active transducers for measurement of physical Phenomenon.
- CO 4: Use Signal Generator, frequency counter, CRO and digital IC tester for Appropriate measurement.
- CO 5: Test and troubleshoot electronic circuits using various measuring instruments. vi. Maintain various types of test and measuring instruments.
- CO 6: Ability to identify, apply and distinguish sensor and transducers for measurement of Biological parameters in medical instrumentation systems.
- CO 7: Ability to design, assemble, analyze, and evaluate basic circuits in medical Instrumentation.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE248SLA	Solid State Lighting Applications

At the end of the course student will

- CO 1: Understand various photometric quantities, importance of these quantities in lighting applications.
- CO 2: Identify different types of solid state luminaires and their applications. Suggested illuminance levels for various applications.
- CO 3: Plan and design lighting for residential and retail areas, able to draw lighting design layout and able to evaluate lighting design.
- CO 4: Plan and lighting design for any type of road, able to design lighting poles with arm inclination.
- CO 5: Evaluate given light source electrically, optically and thermally. Estimate efficiency of given light source.
- CO 6: Understand difference between rail and road signal lighting and evaluation Design smart lighting control system with Wi-Fi, Bluetooth and IR communication

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELE249MCI	Micro controller and Interfacing

- CO 1: Give an understanding about the concepts and basic architecture of 8051
- CO 2: Provide an overview of difference between microprocessor and microcontroller
- CO 3: Provide background knowledge and core expertise in microcontroller
- CO 4: Study the architecture and addressing modes of 8051
- CO 5: Impart knowledge about assembly language programs of 8051
- CO 6: Help understand the importance of different peripheral devices & their interfacing to 8051
- CO 7: Impart knowledge of different types of external interfaces including LEDS, LCD, Keypad Matrix, Switches & Seven segment display

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	IV	ELT244CNS	Computer Networks and Network Security

- CO 1: Know about implementing a computer network mainly on fundamentals of wireless network, performance, Wireless Network Structure and components, Difference between Wired and Wireless Network
- CO 2: Know about Packet switching and circuit switching and different types of data processing methods
- CO 3: Know about Hardware upgrade, Software upgrades and Network upgradesCO 4: Know about Backing up network data- different types of Backups, scheduling backups, backing up and restoring data.
- CO 5: Know about Network security, Authentication and authorization, user level security and share level security. Auditing and configuring auditing audit policy.
- CO 6: Know about Firewall-architecture of firewall, types of firewalls, internet protocol security-enabling Internet Protocol Security (IP Sec) on windows 2000 server.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XCS	Communication Systems

- CO 1: Overview of optical fiber communication system, its importance and applicationsCO 4: To make students familiar with various generations of mobile communications 2G, 2: 5G, 3G with their characteristics and limitations.
- CO 2: Understand GSM, CDMA concepts and architecture, frame structure, system capacity, services provided.
 - A. summarize the principles and applications of wireless systems and standards
 - B. Demonstrate an ability explain multiple access techniques for Wireless Communication
- CO 3: Solve problems pertaining to modulation schemes, transmitters and receivers.

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIAMC	Advanced Microcontrollers

- CO 1: Importance of C in embedded systems, ANSI standards, fundamentals of C, data types, constants, formatted IO, loops, function, arrays and pointers.
- CO 2: Understanding of PIC microcontroller, features of PIC, register organization, PIC reset actions, oscillator connections, PIC memory organization, PIC instructions, PIC addressing modes, I/O ports & interrupts, PIC timers, PIC ADC.
- CO 3: Understand the ARM7TDMI, cortex —m0, m3: m4, multi core processors and feature trends, study of ARM cortex-m3 and core and controllers, introduction to firmware life cycle basics on firmware IDE's and their debugging & simulation technologies.
- CO 4: Data communication, Serial communication, communication modes and interrupt programming.
- CO 5: Introduction and interfacing controllers of wired & wireless communication UART, SPI, I2C, CAN interfacing Zigbee, wi-fi and Bluetooth.
- CO 6: Understanding the basic concepts of sensors and actuators, cloud computing and atmega328 microcontrollers, Arduino platform, open source microcontroller platforms, Arduino board layout & architecture Arduino programming fundamentals, sensors interfacing with Arduino, temperature sensor, DHT11, Ultrasonic sensor and wi-fi

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIIPE	Power Electronics

- CO 1: Will know about the generation of power electronics and family of thyristors
- CO 2: Will know about the basic thyristor-SCR and its applications.
- CO 3: Will know about other thyristors like diac, triac, igbt, power MOSFET.
- CO 4: Will know about the procedure to convert ac to dc as a chopper concept.
- CO 5: Will know about single phase power supply and their types with and without reactive feedback.
- CO 6: Will know about the types of motor, their construction, thyristor-based motor

Program	Semester	Course Code	Course Name
B.Sc.(ELE CS)	V	ELE35XIIIRES	Renewable Energy Sources

- CO 1: Identify energy demand and relate with available energy resources. Describe the environmental aspects of non-conventional energy resources. In Comparison with various conventional energy systems, their prospects and limitations. Know the need of renewable energy resources, historical and latest developments.
- CO 2: Estimate the solar energy, Utilization of it, Principles involved in solar energy collection and conversion of it to electricity generation with respect to applications like heating, cooling, desalination, power generation, drying, cooking etc.
- CO 3: Explore the concepts involved in wind energy conversion system by studying its components used in energy generation and know the classifications, types and performance.
- CO 4: Illustrate Ocean energy and explain the operational methods of their utilization.
- CO 5: Acquire the knowledge on Geothermal energy.
- CO 6: Solve problems pertaining to modulation schemes, transmitters and receivers.
- CO 7: Acquire the knowledge of fuel cells, wave power, tidal power and geothermal principles and applications.

Program	Semester	Course Code	Course Name
B.Sc.	I		MECHANICS WAVES AND OSCILLATIONS

- CO 1: Understand Newton's laws of motion and motion of variable mass system and its application to rocket motion and the concepts of impact parameter, scattering cross section.
- CO 2: Apply the rotational kinematic relations, the principle and working of gyroscope and it applications and the precessional motion of a freely rotating symmetric top.
- CO 3: Comprehend the general characteristics of central forces and the application of Kepler's laws to describe the motion of planets and satellite in circular orbit through the study of law of Gravitation.
- CO 4: Understand postulates of Special theory of relativity and its consequences such as length contraction, time dilation, relativistic mass and mass-energy equivalence.
- CO 5: Examine phenomena of simple harmonic motion and the distinction between undamped, damped and forced oscillations and the concepts of resonance and quality factor with reference to damped harmonic oscillator.
- CO 6: Evaluation of Fourier constants and the analysis of square wave and Saw-tooth wave using Fourier's theorem.
- CO 7: Figure out the formation of harmonics and overtones in a stretched string and acquire the knowledge on Ultrasonic waves, their production and detection and their applications in different fields.

Program	Semester	Course Code	Course Name
B.Sc.	II	SDC122SE	ELECTRICAL APPLIANCES

By successful completion of the course, students will be able to:

- **CO 1:** Acquire necessary skills/hand on experience/ working knowledge on multimeters, galvanometers, ammeters, voltmeters, ac/dc generators, motors, transformers, single phase and three phase connections, basics of electrical wiring with electrical protection devices.
- **CO 2:** Understand the working principles of different household domestic appliances.
- **CO 3:** Check the electrical connections at house-hold but will also learn the skill to repair the electrical appliances for the general trouble -hoots and wiring faults.

Program	Semester	Course Code	Course Name
B.Sc.	II	PHY122WO	OPTICS

On successful completion of this course, the student will be able to:

- CO 1: Understand the phenomenon of interference of light and its formation in (i) Lloyd's single mirror due to division of wave front and (ii) Thin films, Newton's rings and Michelson interferometer due to division of amplitude.
- CO 2: Distinguish between Fresnel's diffraction and Fraunhofer diffraction and observe the diffraction patterns in the case of single slit and the diffraction grating.
- CO 3: Describe the construction and working of the zone plate and make the comparison of the zone plate with a convex lens.
- CO 4: Explain the various methods of production of plane, circularly and polarized light and their detection and the concept of optical activity.
- CO 5: Comprehend the basic principle of laser, the working of He-Ne laser and Ruby lasers and their applications in different fields.
- CO 6: Explain about the different aberrations in lenses and discuss the methods of minimizing them.
- CO 7: Understand the basic principles of fiber optic communication and explore the field of Holography and Nonlinear optics and their applications

Program	Semester	Course Code	Course Name
B.Sc.	II	PHY121SE	SOLAR ENERGY

After successful completion of the course, students will be able to:

- CO 1: Acquire knowledge on solar radiation principles with respect to solar energy estimation.
- CO 2: Get familiarized with various collecting techniques of solar energy and its storage
- CO 3: Learn the solar photovoltaic technology principles and different types of solar cells for energy conversion and different photovoltaic applications.
- CO 4: Understand the working principles of several solar appliances like Solar cookers, Solar hot water systems, Solar dryers, Solar Distillation, Solar greenhouses

Program	Semester	Course Code	Course Name
B.Sc.	III	РНҮ233ТН	THERMODYNAMICS

On successful completion of this course, the student will be able to:

- CO 1: Understand the basic aspects of kinetic theory of gasses, Maxwell-Boltzman distribution law, equipartition of energies, mean free path of molecular collisions and the transport phenomenon in ideal gasses
- CO 2: Gain knowledge on the basic concepts of thermodynamics, the first and the second law of thermodynamics, the basic principles of refrigeration, the concept of entropy ,the thermodynamic potentials and their physical interpretations.
- CO 3: Understand the working of Carnot's ideal heat engine, Carnot cycle and its efficiency
- CO 4: Develop critical understanding of the concept of Thermodynamic potentials, the formulation of Maxwell's equations and its applications.
- CO 5: Differentiate between principles and methods to produce low temperature and liquefy air and also understand the practical applications of substances at low temperatures.
- CO 6: Examine the nature of black body radiations and the basic theories.

Program	Semester	Course Code	Course Name
B.Sc.	IV	PHY244EME	ELECTRICITY MAGNETISM & ELECTRONICS

On successful completion of this course, the students will be able to:

- CO 1: Apply knowledge of electricity and magnetism to explain natural physical processes and related technological advances.
- CO 2: Use an understanding of calculus along with physical principles to effectively solve problems encountered in everyday life, further study in science, and in the professional world.
- CO 3: Design experiments and acquire data in order to explore physical principles, effectively communicate results, and critically evaluate related scientific studies.
- CO 4: Assess the contributions of physics to our evolving understanding of global change and sustainability while placing the development of physics in its historical and cultural context.
- CO 5: Understand electric and magnetic fields in matter
- CO 6: Apply Maxwell's equations to various physical problems
- CO 7: Calculate EM wave propagation

Program	Semester	Course Code	Course Name
B.Sc.	IV	PHY245MP	MODERN PHYSICS

Successful completion of this course, the students will be able to:

- CO 1: Develop an understanding on the concepts of Atomic and Modern Physics, basic elementary quantum mechanics and nuclear physics.
- CO 2: Develop critical understanding of concept of Matter waves and Uncertainty principle.
- CO 3:Get familiarized with the principles of quantum mechanics and the formulation of Schrodinger wave equation and its applications.
- CO 4: Examine the basic properties of nuclei, characteristics of Nuclear forces, salient features of Nuclear models and different nuclear radiation detectors.
- CO 5: Classify Elementary particles based on their mass, charge, spin, half life and interaction.
- CO 6: Get familiarized with the nano materials, their unique properties and applications.
- CO 7: Increase the awareness and appreciation of superconductors and their practical applications.

Program	Semester	Course Code	Course Name
B.Sc.	V		APPLICATIONS OF ELECTRICITY & ELECTRONICS

On completion of this course, the students will be able to:

- CO 1: Define, state and explain various Electronic components, batteries, AC & DC generators, Modulations techniques, Transformers etc
- CO 2: Understand the concepts needed to explain charging and discharging of capacitors understand the applications of thermodynamics in other disciplines like materials science and chemistry.
- CO 3: Apply the laws of thermodynamics to real physical systems and processes, isothermal and adiabatic processes to heat engines, Maxwell's relations to latent and specific heat calculations and adiabatic demagnetization technique for cooling expressions.
- CO 4: Integrate and apply a wide range of mathematical techniques to derive various thermodynamic laws and principles and for analyzing and solving problems in thermal physics.
- CO 5: Analyze radiation phenomena in thermodynamic systems, radiation principles in designing pyrometers, Carnot's cycle in designing automobile engines, transport phenomena in process industries with reference to fluids and fluid mixtures.
- CO 6: Design, set up, and carry out experiments; analyze data, compare with theoretical predictions and understand the orders of magnitudes of various quantities.

Program	Semester	Course Code	Course Name
B.Sc.	V	PHY35EI	ELECTRONIC INSTRUMENTATION

On completion of this course, the students will be able to:

- CO 1: Students will be able to understand the fundamental concepts of measurements, differentiate between analog and digital instruments, and analyze sources of errors in measurements. They will also gain proficiency in using analog and digital multimeters, comprehend their specifications, and identify the significance of instrument accuracy and sensitivity in practical applications.
- CO 2: Upon completion of this unit, students will acquire a comprehensive understanding of cathode ray oscilloscopes, including their principles, functioning, and various controls. They will be capable of utilizing oscilloscopes to measure DC and AC voltages, frequencies, and time periods. Additionally, students will gain knowledge about different types of oscilloscopes and their specific applications, including digital storage oscilloscopes.
- CO 3: After completing this unit, students will be skilled in designing and analyzing A/D and D/A converters, specifically understanding binary ladder and successive approximation types. They will also comprehend the principles of operation for display devices, including LED displays, seven-segment displays
- CO 4: Students will have a deep understanding of amplifier classification, including RC-coupled amplifiers and their frequency response characteristics. They will be proficient in analyzing feedback in electronic circuits, understanding positive and negative feedback, gains expressions, and the advantages of negative feedback. Additionally, students will comprehend the basic operating principles and applications of biomedical instruments such as ECG machines, radiography, ultrasound scanning, ventilators, and pulse oximeters.

Program	Semester	Course Code	Course Name
B.Sc.	I	CC111PEL	PHYSICS OF EVERYDAY LIFE

Students will understand

- CO 1: The importance of applications of Applied Physics in daily life
- CO 2: The cause behind the relative change in motion of fluids
- CO 3: The relationship between physics & technology
- CO 4: To have questions & analyze the world around them
- CO 5: to make students think and have abstract thinking

DEPARTMENT OF BOTANY					
PROGRAM SEMESTER CODE COURSE					
B. Sc., - BZC	I	BOT111FMN	Fundamentals of Microbes and Non - vascular Plants.		

On completion of this course, the students will be able to:

- CO 1: Understand the classification of Micro organisms. Understand the Origin and Evolution of Life. Understand the general characters of special groups of Bacteria and their Importance.
- CO 2: Understand the structure, replication Viruses and transmission of Plant viral diseases and their control.
- CO 3: Understand and identify the structure and metabolic processes like mode of Nutrition, reproduction and economic importance in Bacteria.
- CO 4: Understand and identify morphological characters, reproduction in algae(Oedogonium, Ectocarpus and Polysiphonia), classification and economic importance of Algae.
- CO 5: Understand and identify morphological characters, reproduction in Rhizopus, Penicillium, Puccinia, Classification of Fungi and Economic Importance.

Understand and differentiate the structure of Lichens and their Economic Importance.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	II		Basics of Vascular plants and Phytogeography

On completion of this course, the students will be able to:

- CO 1: Understand the general characters and classification of vascular plants and realize the structure of representative examples. Understand the evolutionary process
- CO 2: Understand the general characters and classification of and realize the structure of representative examples
- CO 3: Understand the general characters and classification of Gymnosperms and realize the structure of representative examples. To gain knowledge about life cycles of Gymnosperm plants.
- CO 4: To gain knowledge of phytogeography
- CO 5: To gain knowledge of geographical distribution, factors.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	III		Anatomy, Embryology of Angiosperms, Ecology and Biodiversity

On completion of this course, the students will be able to:

- CO 1: Understand the general characters and classification of Bryophytes and realize the structure of representative examples. Understand the evolutionary process of Sporophyte in Bryophytes..
- CO 2: Understand the general characters and classification of Pteridophytes and realize the structure of representative examples.
- CO 3: Understand the general characters and classification of Gymnosperms and realize the structure of representative examples.
- CO 4: To gain knowledge of Plant cells, tissues and their functions.
- CO 5: Understand the Process of Normal secondary growth and Anomalous secondary growth and realize the structure of representative examples. To gain knowledge of locally available timber plants and their economic importance

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	V	ВОТЗ56ТС	TISSUE CULTURE

On completion of this course, the students will be able to:

- CO 1: Comprehend the basic knowledge and applications of plant tissue culture.
- CO 2: Identify various facilities required to set up a plant tissue culture laboratory.
- CO 3: Acquire critical knowledge on sterilization techniques related to plant tissue culture.
- CO 4: Demonstrate skills of callus culture through hands-on experience.
- CO 5: Understand the biotransformation technique for production of secondary metabolites.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	V	вот357мС	MUSHROOM CULTIVATION

On completion of this course, the students will be able to:

- CO 1: Understand the structure and life of a mushroom and discriminate edible
- CO 2: Identify the basic infrastructure to establish a mushroom culture unit.
- CO 3: Demonstrate skills in preparation of compost and spawn.
- CO 4: Acquire critical knowledge on cultivation of some edible mushrooms.
- CO 5: Explain the methods of storage, preparation of value-added products and marketing different types of casing mixtures, commonly used materials.

PROGRAM	SEMESTER	CODE	COURSE
B. Sc., - BZC	I	SDC111PN	PLANT NURSARY

On successful completion of the course, students will be able to

- CO 1: Gain the knowledge of different types of Nurseries, Plant Propagation, Management of Nurseries and Economics of Nurseries
- CO 2: Understand the importance of a Plant Nursery and Basic Infrastructure to establish a Nursery.
- CO 3: Learn to use the tools and techniques required for a Nursery.
- CO 4: Obtain skills to get employment or become an entrepreneur in the Plant Nursery sector.
- CO 5: Gain expertise related to various practices in a Nursery.

DEPARTMENT OF COMMERCE

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Com(GENERAL,	I	COM111FOA	FUNDAMENTALS OF
COMPUTERS)			ACCOUNTING

On completion of this course, the students will be able to:

- CO 1 To develop conceptual understanding of fundamentals of financial accounting system & to impart skills in accounting for various kinds of business transactions.
- CO 2 To understand knowledge of new trends in corporate accounting, preparation of subsidiary books, bank reconciliation statements, final accounts.
- CO 3 To develop the skills of recording financial transactions & preparation of reports using accounting packages tally etc.
- CO 4 Enables students to pursue professional courses like CA, CMA & CS.
- CO 5 Students will be ready for employment in functional areas of accounting.
- CO 6 Each student shall understand economic and industry issues and role of accounting within that environment

- CO 5 Understand the meaning and terms used in Leasing-Popularity of Leasing-Advantages and Disadvantages-Classification-Operating and Financial Lease-Accounting for Financial Lease-Books of Lessee and Lessor-Operating Lease-Accounting for Operating Lease-Books of the Lessee and lessor

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com GENERAL	V		STOCK MARKET

- CO 1: The basic trade off between risk and return and how it applies to various types of financial instruments, stocks, bonds, futures, options
- CO 2: Market efficiency and arbitrage. Are markets efficient or are they dominated by irrational investors
- CO 3: Diversification: how to select a portfolio of securities that maximizes returns, while minimizing risk? How does diversification work in practice?
- CO 4: Financial instruments: bonds, stocks, currencies and derivatives (futures options). How are these related to Hedging and speculation?
- CO 5: The money management industry and its key players: Mutual funds and pension funds. Do they have any superior investment skills?

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.Com (COMPUTERS)	V	7A	Data Science using Python

On completion of this course, the students will be able to:

- CO 1 Understand basic concepts of data science
- CO 2 Understand why python is a useful scripting language for developers.
- CO 3 Use standard programming constructs like selection and repetition.
- CO 4 Use aggregated data (list, tuple, and dictionary).
- CO 5 Implement functions and modules.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V		General insurance procedure and practice

On completion of this course, the students will be able to:

- CO 1 Students apprehend the various products and their significance of General Insurance
- CO 2 Students realize the statutory requirements and procedure to be followed while filling the various General Insurance policy forms and documents
- CO 3 Students know the prospects of Indian and International General Insurance Market
- CO 4 Students will understand the role of underwriters & Actuaries in fixing the premiums by Risk Sharing and Risk Management techniques
- CO 5 Students understand the process and documents necessary for different types of claims.
- CO 6 Students also learn about the frauds, fraud prevention and different types of reserves of Insurance Companies

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V		ADVERTISING AND MEDIA PLANNING

On completion of this course, the students will be able to:

- CO 1 Determine, analyze and respond to clients' advertising and marketing communications objectives by applying principles of marketing and communications
- CO 2 Perform a market segmentation analysis, determine the organization's target market/audience and define the consumer behaviour of each segment.
- CO 3 Evaluate the effectiveness of integrated advertising and marketing communications initiatives.
- CO 4 Evaluate the effectiveness of integrated advertising and marketing communications initiatives.
- CO 5 Develop advertising and marketing communications material in compliance with current Canadian legislation, industry standards and business practices
- CO 6 Develop creative solutions to address advertising and marketing communications challenges

Programme	Semester	Course code	Course Name
B.Com (General &Computers)	V	COM355LIP	Life insurance with Practice.

On completion of this course, the students will able to :-

- CO-1 Understand the features of Life insurance, schemes and policies and insurance companies in India.
- CO-2 Analyze various schemes and policies related to the life insurance sector.
- CO-3 Choose a suitable insurance policy for a given situation and respective persons.
- CO-4 Acquire insurance agency skills and other administrative skills.
- CO-5 Acquire skill of settlement of claims under various circumstances.

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V		GST WITH TALLY

On completion of this course, the students will be able to:

- CO 1 To introduce the students to Basic of Accounts and the usage of Tally for accounting purpose and basic concepts of gst
- CO 2 Students will learn to create company, enter accounting voucher entries including advance voucher entries, do reconcile bank statement, do accrual adjustments, and also print financial statements, etc. in Tally ERP.9 software.
- CO 3 Demonstrate an understanding of various predefined inventory vouchers to suit the various business requirements and flexibility to create unlimited stock items, use simple to complex conversion units and generate invoices with the required information and dimensions.
- CO 4 Demonstrate an understanding of how to maintain a payroll register. This helps to understand how to maintain management related information, statutory forms and reports in the prescribed formats such as: Pay Slip, Payroll Statements, Attendance and Overtime Registers et
- CO 5 Develop the students use the Tally software, that helps to prepare Accounting, Payroll, Billing, Sales and Profit Analysis, Auditing Banking Inventory, Taxation such as GST
- CO 6 Synthesize company accounts into Tally software Evaluate GST in the accounting software .Create a career as Accounting professional.

Programme	Semester	Course code	Course Name
B.Com (General	V	COM357SMA	Stock Market Analysis
&computers)			

On completion of this course, the students will able to :-

- CO-1: Understand overall share market.
- CO-2: To identify the trends, support and resistance in the stock market.
- CO-3: Understand how to build portfolio and investment decision in appropriate manner
- CO-4: Understand fundamental, technical and quantitative analysis of stock.
- CO 5: To identify bullish and bearish patterns of securities in stock markets.

Programme	Semester	Course code	Course Name
B.Com (General)	V	COM351ITAPP	Income tax procedure and practice

On completion of this course, the students will able to :-

- CO 1: Understand the application of taxation knowledge in both theoretical and practical.
- CO 2: Determine the procedure and schedule to be followed on preparing financial statements of companies
- CO 3: File income tax return and compute tax liability of individuals.
- CO 4: Develop critical thinking skills in students
- CO 5: Understand E-Filling of tax returns and tax procedures

PROGRAM	SEMESTER	COURSE CODE	COURSE NAME
B.com (GENERAL)	V		SALES PROMOTION AND PRACTICE

On completion of this course, the students will be able to:

- CO 1: Understanding of basic concepts of sales promotion and to develop the skills to manage sales operations in a business firm.
- CO 2: Discuss and make the student understand complexities of sales promotions involved in various organizations

- CO 5: To develop the skills among the students to enable them to design the personal selling strategies and make them aware of the selling strategies in the current era.

Programme	Semester	Course Code	Course Name
B.Com (Computer Applications)	V	COM-351 BDAR	Big Data Analytics using 'R'

On Completion of this Course, The students will able to:-

- CO 1: Understand data and classification of digital data.
- CO 2: Understand Big Data Analytics.
- CO 3: What is R? advantages of R over other programming languages, Data types in R
- CO 4: Data frames in R,Operations performed on data Frames.Load data into R.
- CO 5: Reading and getting data into R (External Data), Working with R Charts and Graphs

DEPARTMENT OF VISUAL COMMUNICATION & ELECTRONIC MEDIA

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	ENG111BWS	Basic Writing Skills

- CO 1: To enable the students to heighten their awareness of correct usage of English Grammar in writing and reading
- CO 2: To enable the students to improve their speaking ability in global language both in terms of fluency and comprehensibility
- CO 3: To help the students to enlarge their vocabulary by keeping a vocabulary journa
- CO 4: To enable the students, strengthen their ability to write academic papers, essays and summaries using the process approach
- CO 5: To enhance the ability to use the conventions of grammar when creating paragraphs

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	VIS112ICT	Introduction to Communication Theories

On successful completion of the course, students will be able to;

- CO 1: Understand the role of communication in personal & professional success.
- CO 2: Develop awareness of appropriate communication strategies.
- CO 3: Prepare and present messages with a specific intent.
- CO 4: Analyse a variety of communication acts.
- CO 5: Ethically use, document and integrate sources.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	VIS113WM	Writing for Media

- CO 1: Understand and be able to apply the principles of news language and news story structure
- CO 2: Understand news values and concepts of newsworthiness and be able to apply these
- CO 3: Develop an understanding of writing and news story structure that is sufficient to write for news media
- CO 4: Apply news writing and news story structure concepts and skills to writing for print, broadcast and online news media
- CO 5: Be aware of some common sources of news and how these can be incorporated in news writing.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	VIS114VC	Visual Communication

- CO 1: Demonstrate critical and innovative thinking.
- CO 2: Display competence in oral, written, and visual communication.
- CO 3: Apply communication theories.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm &	I	VIS115AAC	Art, Architecture and
E Media)			Culture (T)

- CO 1: Recognize functional, structural, and aesthetic qualities in architecture and read visual and experiential elements, major monuments, architectural and cultural styles, and symbols. Demonstrate an understanding of works of art and architecture from diverse genres and from a range of historical periods and geographical locations.

Students will demonstrate an effective knowledge of visual vocabulary appropriate for careers in the visual arts, architecture, visual studies, and the media.
- CO 3: Produce an extended work involving visual analysis, reading research, critical thinking, writing, and standard methods of documentation. They will demonstrate skills necessary for effective preparation of artwork for public presentation, using a variety of materials and techniques.
- CO 4: Acquire a deeper knowledge of a range of chronological periods, geographical areas and methods of analysis of the built world. Learn oral communication of art historical arguments.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	SDC111VC	Visual Communication (P)

- CO 1: Students will learn how the light works with a camera. Students will learn how colour theory works.
- CO 2: Students will be able to analyse visual messages in six different perspectives like Personal, Historical, Technical, Ethical, Cultural and Critical.
- CO 3: Students will be able to create Ideas for Visual ads, TV ads etc.
- CO 4: Students will be able to work in industries like Graphic Designing, Television, Film etc.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I		Digital Still Photography

On successful completion of the course, students will be able to;

- CO 1: An understanding of the industrial and commercial applications of photographic technique
- CO 2: Functional knowledge of photographic history and theory, the relationship of photography to the visual disciplines, and its influence on culture.
- CO 3: The ability to work in experimental and manipulative techniques, candid and contrived imagery, documentary photography, archival processing, and interpretive studies.
- CO 4: The ability to work and study independently.
- CO 5: A familiarity with and command of materials, equipment, and library resources related to the study of photography.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	SDC113GD	Graphic Designing - 1

- CO 1: They will demonstrate skills necessary for effective preparation of artwork for public presentation, using a variety of materials and techniques.
- CO 2: Students will demonstrate an effective knowledge of visual vocabulary appropriate for careers in the visual arts, architecture, visual studies, and the media
- CO 3: The students will employ both analogue media (drawing with pencil and paper, etc.) and digital media -- using up-to-date computer tools (graphics hardware and software for drawing, painting, layout, typography)
- CO 4: Apply graphic design principles in the idealization, development, and production of visual messages.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	SDC114SW	Screen Writing

- CO 1: To learn the fundamental principles of screenwriting and apply them to your own work in progress.
- CO 2: To complete the first half of a feature length screenplay (approx20 pages) over the course.
- CO 3: To learn how to read and analyse your own work and the work of others as a screenwriter.
- CO 4: To gain an understanding of the business side of screenwriting.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	I	SDC115TA	Theatre Arts

On successful completion of the course, students will be able to;

- CO 1: Demonstrate understanding of the social and artistic movements that have shaped theatre and dance as we know it today.
- CO 2: Apply discipline-specific skills to the creation of performance.
- CO 3: Analyse, and interpret texts and performances both in writing and orally.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	VIS122MCT	Mass Communication Theories

- CO 1: To critical think using mass communication theories
- CO 2: To know the historical necessity for mass communication as a subject in the west in the backdrop of propaganda
- CO 3: Apply critical thinking and analytical skills in order to create a proposal for a Mass Communication research project grounded in a specific theory.
- CO 4: Effectively present and defend ideas/concepts orally and in writing.

Semester	Course Code	Course Name
II	VIS123IJ	Introduction to
		Journalism
	Semester II	

On successful completion of the course, students will be able to; CO 1: A student will learn the history of journalism in the world.

- CO 2: A student will be exposed to the evolving journalism across India.
- CO 3: A student will learn news editing and gathering of news stories.
- CO 4: A student will learn about hard and soft stories besides feature news writing.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	ENG121JE	Journalist English

- CO 1: Demonstrate how the journalistic approach to problem solving and storytelling can produce locally engaged, globally competent citizens
- CO 2: Demonstrate competence in a core set of journalistic crafts in reporting, research and storytelling that show versatility across media
- CO 3: Express a critical understanding of the contextual factors that shape the media message in a diverse, globalized media landscape
- CO 4: Produce journalistic work that showcases an area of specialization that draws on the creativity and entrepreneurial spirit of the students
- CO 5: Produce a portfolio of work that demonstrates work produced in a public media setting

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	VIS124EF	Elements of Film

- CO 1: Students will demonstrate that the critical study of cinema informs their filmmaking and that the study and practice of film production enhance their work as film scholars and analysts.
- CO 2: Students will demonstrate that they understand the pre-production, production, and post production film making process
- CO 3: Students will demonstrate the relationship between film form and aesthetic effect through both film
- CO 4: Analysis and the creation of motion pictures.
- CO 5: Students will be able to conduct film research and compose cogent, persuasive, and valid essays about film.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	VIS125BC	Broadcast Communication

- CO 1: The course is beneficial to develop the communication skills of students for broadcasting purposes and to prepare them as competent professionals to meet the challenges posed by rapidly changing environments.
- CO 2: It makes the student aware of the art and technology used in broadcasting.
- CO 3: The program imparts a deeper understanding of journalism and the forms it takes, and the focus is on content as much as on skills.
- CO 4: The course is suitable to provide the students with an insight into the broadcast media and its relevance to rural and urban development, to train students in the basic skills required for broadcast media.
- CO 5: It helps to expose students to the basic concepts, characteristics of Indian society to enable them to plan suitable programs on current political, economic, environmental and rural problem.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	LSC121PSP	Public Speaking & Presentation

- CO 1: To make the student to present to a group, company and individual, learn to speak to the public.
- CO 2: Smart way of presenting materials to the public, to understand the nuances of presentation.
- CO 3: To gain confidence in whatever one presents to the other
- CO 4: Utilizing a variety of delivery skills such as eye contact, gestures, movement & vocal variety.
- CO 5: Critically assess their own speaking, and that of others.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	SDC121GD	Graphic Designing – 2

On successful completion of the course, students will be able to;

- CO 1: Analyse, synthesize, and utilize design processes and strategy from concept to delivery to creatively solve communication problems. Create communication solutions that address audiences and contexts, by recognizing the human factors that determine design decisions.
- CO 2: Utilize relevant applications of tools and technology in the creation, reproduction, and distribution of visual messages. Apply graphic design principles in the ideation, development, and production of visual messages.
- CO 3: Identify and utilize design history, theory, and criticism from a variety of perspectives, including: art history, communication/information theory, and the social/cultural use of design objects.
- CO 4: Confidently participate in professional design practice and management within a collaborative work environment. Employ best practices and management in the design profession and within a collaborative work environment.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	SDC122DVE	Digital Video Editing

- CO 1: Learn to combine basic design principles in video editing.
- CO 2: Learn Adobe Premiere Pro & Final Cut Pro software in basic level.
- CO 3: Able to learn techniques of handling the different types edit setup.
- CO 4: Application of video software to edit and produce.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	II	SDC123DAP	Digital Audio Production

- CO 1: Learn fundamental knowledge of how sound is digitally produced and recorded.
- CO 2: An understanding of how the digital and the analogue protocols differ and the relative advantages of each.
- CO 3: Ability to work at a basic level in the Presonus Studio 5 live recording from multiple sources.
- CO 4: Hands on experience with live recording, from concept, mixing, and then to mastering a CD.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	VIS232MC	Media & Culture

- CO 1: Learn several theories to discuss the relationship between media and culture.
- CO 2: Understanding how different communities and cultures are represented in the media.
- CO 3: Examine the ethical implications of media culture.
- CO 4: Examine and evaluate the relevance of the various ideas studied in today's world.
- CO 5: Apply different ideas and perspectives in order to critically evaluate their existence and role in society.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	VIS234TP	Television Production - 1 (T)

- CO 1: Gain overall understanding on history of print media during pre and postindependence era.
- CO 2: Acquire knowledge on growth of news agencies.
- CO 3: Gain understanding on emergence of different genres within newspapers.
- CO 4: Acquire knowledge on the role of print media in developed countries.
- CO 5: Gain understanding of trends in print media.

Program	Semester	Course Code	Course Name
B.Sc (Vis Comm & E Media)	III	LSC231CINA	Contemporary Issues & News Analysis

On successful completion of the course, students will be able

- CO 1: Identify an issue and argue from ideological perspective.
- CO 2: Apply a range of theoretical perspectives to interpret social problems associated with gender, race and ethnicity.
- CO 3: Identify the major social problems evident in contemporary Indian society at micro and macro level and interpret it using semiotics and hermeneutics.
- CO 4: Critically evaluate social problems in terms of the organization and structure of contemporary Indian society.

After successful completion of this course, the students are able to

- CO 1: Know the retailing business, its growth in India and social impact
- CO 2: Understand the and organization and supply in retailing
- CO 3: Comprehend the opportunities and challenges in retailing
- CO 4: Learn the functions that support outlet operations, sales and services
- CO 5: Create a shopping experience model that builds customer loyalty and business promotion

Program	Semester	Course Code	Course Name
BBA	4	BBA 241TD	Training and development

By successfully completion of the course, student will be able to

- CO 1: To develop an understanding of the evolution of training & development from a tactical to a strategic function.
- CO 2: To provide an insight into what motivates adults to learn and the most appropriate methodologies to impart training
- CO 3: To understand the concept of training audit & training evaluation
- CO 4: To learn how design a training module and execute it
- CO 5: To understand the need for and concept of Performance Management
- CO 6: To understand various strategies used by organizations to measure performance & reward for the same

Program	Semester	Course Code	Course Name
BBA	4		Micro,Small and Medium Enterprises Management

- CO 1: To create an awareness on various Entrepreneurship Development Programme
- CO 2: To enable them to understand project formulation
- CO 3: To familiarize the students with EDP schemes
- CO 4: To give an introduction about MSME and Various measures for their development
- CO 5: To create an awareness on various sources of finance

Program	Semester	Course Code	Course Name
BBA	4	BB241IB	International Business

- CO 1: Basic informational learning by the students regarding Domestic and International/Foreign Trade. Modes of entry- trade theories
- CO 2: Determining Factors influencing exchange rate fluctuations and Euro market, instruments.
- CO 3: Analysis of Balance of payment: Contents, disequilibria in BOP, measures to bring back equilibrium in BOP
- CO 4: Analysis of WTO and Trade blocks WTO Foundation, advantages and Disadvantages of WTO Procedure and Documents: Export and Import Procedure, Principal and Auxiliary documents

Program	Semester	Course Code	Course Name
BBA	4	BBA 241CMA	Cost and management accounting

- CO 1: Introduction of Cost Accounting and management accounting Cost Concept and Classification.
- CO 2: A practical exposer of FIFO, LIFO, Weighted average, (including problems). Labour: Control of labour costs time keeping and time booking Idle time Methods of remuneration labour incentives schemes
- CO 3: Determining of Financial statement Analysis: Financial Statements Need for analysis of financial statements-comparative statements- common size statements- Trend analysis.
- CO 4: Practical expose of Ratio Analysis: Meaning Accounting Ratios uses limitations types of ratios.
- CO 5: Problematic to the students Marginal Costing -cost classification- differences between marginal costing and absorption costing marginal cost equation- contribution- p/v ratiomargin of safety

Program	Semester	Course Code	Course Name
BBA	4	BBA232OB	Business Law

After successful completion of this course, the students are able to

- CO 1: Understand the essentials of a valid contract and its kinds. Understand the essentials of offer and acceptance, consideration. Will know how a contract is discharged and when the breach of contract arises followed by its remedies.
- CO 2: Make understand the impact of companies act and its kinds. This also helps students to know about the documents lie MOA & AOA in relation to incorporation of a company.
- CO 3: Know the impact of factories act 1948 of how the health safety and welfare measures of the labourers are taken into consideration.
- CO 4: Ensure about the concept of sale of goods act 1930 of understanding them the differences between sale and agreement to sell , conditions and warranties etc.. Will also know when a seller was unpaid and the various rules of delivery .

Program	Semester	Course Code	Course Name
BBA	4	BBA241FS	Financial services

After successful completion of this course, the students are able to

- CO 1: Understand the various services offered and various risks faced by banks
- CO 2: Determine the need of financial system and describe how and why financial system works.
- CO 3: Have a practical understanding of various financial institutions and their functioning
- CO 4: Understand the dynamic changes of the banking industry and the policy responses because of the recent crisis
- CO 5: Have a practical understanding of the various financial services both domestic and international wise.

Program	Semester	Course Code	Course Name
BBA	4	SDC241PEL	Personality Enhancement and Leadership

By successful completion of the course, students will be able to:

- CO 1: Develop comprehensive understanding of personality
- CO 2: Know how to assess and enhance one's own personality
- CO 3: Comprehend leadership qualities and their importance
- CO 4: Understand how to develop leadership qualities

Program	Semester	Course Code	Course Name
BBA	5	BBA351TM	Talent Management

By the end of the course the student should be able to:

- CO 1: To develop a clear understanding of Talents that are inculcated among the Employees in today's Business Environment.
- CO 2: To measure the various strengths and weakness of the employees and establishing theories and practices.
- CO 3: To Monitor the current trends in utilization of Employees team spirit and also in analyzing their—abilities and skills
- CO 4: To bring out the learning and conceptual skills aiming the employees in order to reach the target.
- CO 5: To analyze the 360 Degree Feedback from the existing staff and to implement the measures needed.

Program	Semester	Course Code	Course Name
BBA	5	BBA352GHRM	Global Human Resource Management

By successfully completion of the course, student will be able to

- CO 1: To develop the understanding of the concept of human resource management and to understand its relevance in organizations.
- CO 2: To develop necessary skill set for application of various HR issues.
- CO 3: To analyse the strategic issues and strategies required to select and develop manpower resources.
- CO 4: To integrate the knowledge of HR concepts to take correct business decisions.
- CO 5: Integrated perspective on role of HRM in modern business. Ability to plan human resources and implement techniques of job design

Program	Semester	Course Code	Course Name
BBA	5	BBA353EI	Export and Import

- CO 1: To Demonstrate understanding of export controls, intellectual property rights, and confidentiality in international trade.
- CO 2: To apply knowledge of export sales, insurance, finance, and licensing to develop competitive export pricing strategies.
- C0 3: Proficiently prepare export packaging, transportation methods, and documentation, optimizing benefits and duty drawbacks.
- CO 4: Solve complex shipment issues, negotiate shipping documents, and formulate effective corporate marketing strategies for international trade.
- CO 5: Exhibit competence in customs formalities, export/import documentation, and regulatory compliance in diverse import/export scenarios.

Program	Semester	Course Code	Course Name
BBA	5	BBA354BM	Brand Management

- CO 1: To understand product management, corporate strategy, product life cycle and develop effective marketing strategies for products.
- CO 2: Apply new product development techniques, include idea generation, concept testing, successful launch and tracking of new product programs.
- CO 3: Demonstrate knowledge of brand management, crafting brand elements and building consumer brand associations.
- CO 4: Effectively manage brand architecture and portfolios with insights into corporate branding tools for building brand equity.
- CO 5: Learn to leverage and measure brand equity for strategic marketing decisions and brand development.

Program	Semester	Course Code	Course Name
BBA	5	COM355FEM	Foreign Exchange Management

After successful completion of this course, the students are able to

- CO-1: Assess factors impacting exchange rates, understanding economic indicators and forces, which have impact in foreign markets and global markets.
- CO-2: Apply financial instruments for hedging, optimizing international transactions with derivatives, like swaps, options futures.
- CO-3: Navigate regulatory frameworks, ensuring compliance with legal and ethical considerations, which have impact in foreign markets and global markets
- CO-4: Utilize quantitative techniques for assessing and managing foreign exchange exposure.
- CO-5: Evaluate macroeconomic policies, formulating effective strategies for global financial environments that are helpful for traders in exchange markets.

Program	semester	Course code	Course name
BBA	5	COM356EP	E-Payments

CO1: Understand E-cash and Virtual Money Electronic Data interchange and about NEFT/RTGS/E Payment modes

CO2: Demonstrate knowledge of Automated Clearing and Settlement process and ATM networks, Fed wire etc

CO3: Identify and describe terms of Cryptography, Hash functions and Algorithm applications

CO4: Understand the different types of Mobile Payments, Wireless payments and different Wallets, Security Challenges in mobile payments

CO5: Develop the Electronic invoice and Payment systems its process, EIPP providers and elimination of paper, Scan based payments.

DEPARTMENT OF CHEMISTRY

Program	Semester	Course Code	Course Name
B. Sc (MPC, BZC, MBC, MFC)	I		General, Physical & Inorganic Chemistry

At the end of the course, the student will be able to;

- CO 1: Understand the basic concepts of p-block d-block elements
- CO 2: Explain the difference between solid, liquid and gasses in terms of intermolecular interactions.
- CO 3: Understand the concept of orbitals & energy levels
- CO 4: shape of covalent molecules, identify types of intermolecular forces and predict those that are important for a given molecule,
- CO 5: relate the chemical and physical properties of substances to molecular structure, chemical bonding, and inter molecular interactions

Program	Semester	Course Code	Course Name
B. Sc (MPC, BZC, MBC, MFC)	II	CHE122OPC	Organic and physical Chemistry

At the end of the course, the student will be able to;

- CO 1: Understand and explain the differential behavior of organic compounds based on fundamental concepts learnt.
- CO 2: Formulate the mechanism of organic reactions by recalling and correlating the fundamental properties of the reactants involved.
- CO 3: Learn and identify many organic reaction mechanisms including Free Radical Substitution, Electrophilic Addition and Electrophilic Aromatic Substitution.
- CO 4: Correlate and describe the stereo chemical properties of organic compounds and reactions.

Program	Semester	Course Code	Course Name
B. Sc (MPC, BZC, MBC, MFC)	III	СНЕ233РОС	Physical and Organic Chemistry

At the end of the course students will be able to:

- CO 1: Separate the liquid mixtures using distillation process.
- CO 2: Importance of EMF measurements and its applications
- CO 3: Study nitrogen containing function groups with respect to their reactivity
- CO 4: Study synthesis and role of amino acids and Proteins.
- CO 5: Study of structural elucidation of various mono and disaccharides.

Program	Semster	Course code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	IV		Inorganic and Physical Chemistry

At the end of the course students will be able to

- CO 1: Understand the basic concepts of d-block elements
- CO 2: Apply various theories of complex compounds
- CO 3: Explain the difference between solid, liquid and gases
- CO 4: Compute the order of a reaction.
- CO 5: Interpret the defects in the crystals

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V		Organic and Spectroscopy of Organic compounds

At the end of the course students will be able to:

- CO 1: Learn basic concepts of bonding and symmetry.
- CO 2: Correlate the reactivity of various Heterocyclic compounds.
- CO 3: Acquire knowledge on synthesis of desired alcohols using Grignard reagents
- CO 4: Interpret IR spectroscopic peaks for identifying functional groups
- CO 5: Predict the number of proton NMR signals expected from a given compound

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	I	CHE111VA(P)	Volumetric Analysis

At the end of the course student will be able to

- CO 1: Understand the basic concepts of quantitative analysis
- CO 2: Perform the techniques involved in volumetric analysis
- CO 3: Understand the concepts and role of indicators used
- CO 4: Acquire an idea about the significant figures and accuracy of reporting.
- CO 5: Estimate the unknown present in the solution by suitable methods

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	II	CHE122MA(P)	Mixture analysis

At the end of the course student will be able to;

- CO 1: Understand the basic concepts of qualitative analysis of inorganic mixture
- CO 2: Use glassware, equipment and chemicals and follow experimental procedures in the laboratory
- CO 3: Apply the concepts of common ion effect, solubility product and concepts related to qualitative analysis

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	III	` ′	Analysis of Organic Compound

At the end of the course student will be able to

- CO 1: Perform systematic qualitative analysis of organic compound
- CO 2: Detect extra elements using Lassaigne's test
- CO 3: Identify the functional group of the compound
- CO 4: Analyze various organic compounds using documented procedures
- CO 5: Identify organic compound by determination of melting point

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	IV	244	Analytical Skills

At the end of the course student will be able to

- CO 1: Understand the basic concepts of qualitative analysis of inorganic mixture
- CO 2: Use glassware, equipment and chemicals and follow experimental procedures in the laboratory
- CO 3: Apply the concepts of common ion effect, solubility product and concepts related to qualitative analysis
- CO 4: Analyze various salt mixtures using documented procedures

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	` ′	Physical and Instrumentation

At the end of the course student will be able to

- CO 1: Determine the rate constant of acid catalyzed ester hydrolysis
- CO 2: Prove 1 st order kinetics of decomposition of hydrogen peroxide
- CO 3 : Determine the partition coefficient of benzoic acid distributed between benzene and water
- CO 4: Find the viscosity of unknown composition of glycerol and water mixture
- CO 5 : Study the effect of electrolyte on CST of phenol + water system

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V	` ′	Inorganic and Analytical

CO 1: Independently use PH meter and Conductivity meter for quantitative determination

CO 2: Get hands on training in use of spectrophotometer

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V		synthetic organic chemistry

Students after successful completion of the course will be able to:

- CO 1: Identify the importance of reagents used in the synthesis of organic compounds.
- CO 2: Learn the fundamental ideas behind the many forms of pericyclic reactions.
- CO 3: Understand the importance of retro synthesis in organic chemistry.
- CO 4: Comprehend the applications of different reactions in synthetic organic chemistry.

Program	Semester	Course Code	Course Name
B.Sc., (MPC, BZC, MBC, MFC)	V		Separation tech. &Analysis of Org. Compounds

Students after successful completion of the course will be able to:

- CO 1: Describe the role of mass spectrometry in revealing the structural details of organic molecules.
- CO 2: Learn about the structural analysis of organic molecules.
- CO 3: Appraise the volumetric and gravimetric methods in analytical chemistry.
- CO 4: Understand various chromatography methods in the separation and identification of organic compounds.
- CO 5: Use knowledge of solvent extraction to separate organic molecule

DEPARTMENT OF COMPUTERS (AI)				
Program	Semester	Course Code	Course Name	
B.Sc(AAI)	I	CSC111PC	PROGRAMMING USING 'C'	

On successful completion of the course, students will be able to

CO1: Understand the evolution and functionality of a Digital Computer.

CO2: Apply logical skills to analyze a given problem

CO3: Develop an algorithm for solving a given problem.

CO4: Understand 'C' language constructs like Iterative statements, Array processing, Pointers

CO5: Apply 'C' language constructs to the algorithms to write a 'C' language program.

Program	Semester	Course Code	Course Name
B.Sc(AAI)	II	CSC112DMS	Database Management System

On successful completion of the course, students will be able to

CO1: Describe the fundamental elements of relational database management systems.

CO2: Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL.

CO3: Design ER-models to represent simple database application scenarios.

CO4: Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data.

CO5: Design entity relationship and convert entity relationship diagrams into RDBMS and formulate SQL queries on the respect data into RDBMS and formulate SQL queries on the data

Program	Semester	Course Code	Course Name
B.Sc(AAI)	II	CSC123CN	COMPUTER NETWORKS

On successful completion of this practical course, the student will be able to:

CO1: Explain basic concepts, OSI reference model, services and role of each layer of OSI model and TCP/IP, networks devices and transmission media, Analog and digital data transmission

CO2: Apply channel allocation, framing, error and flow control techniques.

CO3: Describe the functions of Network Layer i.e. Logical addressing, subnetting & Routing Mechanism.

CO4: Explain the different Transport Layer function i.e. Port addressing, Connection Management, Error control and Flow control mechanism.

CO5: Explain the functions offered by session and presentation layer and their Implementation.

CO6: Explain the different protocols used at application layer i.e. HTTP, SNMP, SMTP, FTP, TELNET and VPN

Program	Semester	Course Code	Course Name
B.Sc(NAI)	III	CSC231AML	APPLIED MACHINE LEARNING

On successful completion of this practical course, the student will be able to:

CO1: Gain knowledge about basic concepts of Machine Learning

CO2: Identify machine learning techniques suitable for a given problem

CO3: Solve the problems using various machine learning techniques

CO4: Apply dimensional reduction techniques.

CO5: Design application using machine learning techniques.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	III		OBJECT ORIENTED PROGRAMMING USING JAVA

On successful completion of the course, students will be able to:

- CO1: Understand object oriented programming concepts to solve real world problems.
- CO2: Write programs using Java collection API as well as the java standard class library
- CO3: Understand underlying principles of Object-Oriented Programming in Java.
- CO4: Demonstrate the implementation of inheritance (multilevel, hierarchical and multiple) by using extend and implement keywords.
- CO4: Use dynamic and static polymorphism to process objects depending on their class.
- CO5: Demonstrate the user defined exceptions by exception handling keywords (try, catch, throw, throws and finally).
- CO6: Use multithreading concepts to develop inter process communication.
- CO7: Describe the backend connectivity process in java program by using JDBC drivers.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC243SML	Statistical Machine Learning

At the end of the course student will

- CO 1: Structure and divide statistical learning problems into tractable sub-problems, formulate a mathematical solution to the problems and implement this solution using statistical software.
- CO 2: Use and develop linear and nonlinear models for classification and regression.
- CO 3 : Describe the limitations of linear models and understand how these limitations can be handled using nonlinear models.
- CO 4: Explain the basic ideas of Bayesian modeling and be able to use them for classification and regression.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC244TF	Tensor flow

At the end of the course student will

CO1: To learn how to create, train and deploy machine learning models using the Tensorflow framework.

CO2: Ability to implement best practices for data automation and model tracking.

CO3: Using production level tools to perform monitoring and model retrainging.

CO4: Understand the deep learning concepts such as activation functions and gradient decent.

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC245DS	DATA STRUCTURES

At the end of the course student will

- CO 1: Understand available Data Structures for data storage and processing.
- CO 2: Comprehend Data Structure and their real-time applications-Stack, Queue, Linked List, Trees and Graph
- CO 3: Choose a suitable Data Structures for an application
- CO 4: Develop ability to implement different Sorting and Search methods
- CO 5: Have knowledge on Data Structures basic operations like insert, delete, search, update and traversal
- CO 6: Design and develop programs using various data structures
- CO 7: Implement the applications of algorithms for sorting, pattern matching etc

Program	Semester	Course Code	Course Name
B.Sc(NAI)	IV	CSC246SE	SOFTWARE ENGINEERING

At the end of the course student will

- CO 1: Students will be able to decompose the given project in various phases of a lifecycle.
- CO 2: Ability to apply software engineering principles and techniques.
- CO 3: Ability to develop, maintain and evaluate large-scale software systems.
- CO 4: To produce efficient, reliable, robust and cost-effective software solutions.
- CO 5: Students will be able to choose appropriate process model depending on the user requirements.

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V		INTRO. TO NEURAL NETWORKS & DEEP LEARNING

On successful completion of the course, students will be able to:

CO1: Describe the feed-forward and deep networks.

CO2: Design single and multi-layer feed-forward deep networks and tune various hyperparameters.

CO3: Implement deep neural networks to solve a problem.

CO1: Analyse performance of deep networks.

CO4: Understand the characteristics and types of artificial neural network and remember working of biological Neuron and Artificial Neural Network.

CO5: Apply different types of auto encoders with dimensionality reduction and regularization.

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3512OS	OPERATING SYSTEMS

Upon successful completion of the course, a student will be able to:

CO1: Know Computer system resources and the role of operating system in resource Management with algorithms

CO2: Understand Operating System Architectural design and its services.

CO3: Gain knowledge of various types of operating systems including Unix and Android.

CO4: Understand various process management concepts including scheduling, synchronization, and deadlocks.

CO5: Have a basic knowledge about multi threading.

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3513NLP	NATURAL LANGUAGE PROCESSING

On successful completion of this practical course, the student will be able to

CO1: Show sensitivity to linguistic phenomena and an ability to model them with formal grammars

CO2: Understand and carry out proper experimental methodology for training and evaluating empirical NLP systems

CO3: Able to manipulate probabilities, construct statistical models over strings and trees, and estimate parameters using supervised and unsupervised training methods.

CO4: Able to design, implement, and analyze NLP algorithms

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3514NLP	Theoretical Machine Learning

On successful completion of this practical course, the student will be able to

CO1: Machine learning studies automatic methods for learning to make accurate predictions or useful decisions based on past observations.

CO2: This course introduces theoretical machine learning, including mathematical models of machine learning, and the design and rigorous analysis of learning algorithms.

CO3: Likely topics include: bounds on the number of random examples needed to learn;

CO4: learning from non-random examples in the on-line learning model;

CO5: how to boost the accuracy of a weak learning algorithm; support-vector machines; maximum-entropy modeling; portfolio selection; game theory

Program	Semester	Course Code	Course Name
B.Sc(DAI)	V	CSC3515DOC	Digital Computer Organization And
			Introdoction To Computer System Architecture

CO1: Students will learn about what the main physical components of a computer are, why 0 and 1 are such important numbers within computer.

CO2: Ability to understand the internal components and basic structure of computer.

CO3: To know the background of internal communication of the computer.

CO4: Demonstrate a comprehensive understanding of basic logic gates, data representation and Boolean algebra.

CO5: To comprehend how the circuits are designed to process ALU and Memory operations.

DEPARTMENT OF COMPUTERS (BIG DATA ANALYTICS)

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	CS111PC	PROGRAMMING USING 'C'

By successful completion of the course, students will be able to:

CO 1: Understand the evolution and functionality of a Digital Computer.

CO 2: Apply logical skills to analyse a given problem

CO 3: Develop an algorithm for solving a given problem.

CO 4: Understand 'C' language constructs like Iterative statements, Array processing, Pointers,

CO 5: Apply 'C' language constructs to the algorithms to write a 'C' language program.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	CS111PC (P)	C PROGRAMMING LAB

On successful completion of this practical course, the student will be able to:

CO 1: Read, understand and trace the execution of programs written in C language.

CO 2: Write the C code for a given algorithm.

CO 3: Implement Programs with pointers and arrays, perform pointer arithmetic, and

CO 4: use the pre-processor.

CO 5: Write programs that perform operations using derived data types.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	I	DATABASE MANAGEMENT SYSTEM

On successful completion of the course, students will be able to;

- CO 1: Understand the database approach and acquire knowledge in Database Management Systems.
- CO 2: Demonstrate an understanding of the relational data model.
- CO 3: Perceive the essential elements in constructing ER, EER models
- CO 4: Intuit the procedure in mapping the ER to relational schema
- CO 5: Epitomize an understanding of normalization theory and apply such knowledge to the normalization of a database

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	I	CS112DBMS(P)	MySQL LAB

On successful completion of this practical course, the student will be able to:

- CO1: Understand how to create and maintain database using SQL Commands
- CO 2: Using DDL Commands (Create, Alter, Drop, Truncate and Rename)
- CO 3: Using DML Commands (Select, Insert, Update and Delete)
- CO 4: Working with SQL Queries using where clause and Operators in, between, like etc.

Program	Sem	Course Code	Course Name
B. Sc., Big Data Analytics	II	CSC123DV	Data Visualization

- CO 1: Design and create data visualizations.
- CO 2: Conduct exploratory data analysis using visualization.
- CO 3: Craft visual presentations of data for effective communication.
- CO 4: Use knowledge of perception and cognition to evaluate visualization design alternatives.
- CO 5: Design and evaluate color palettes for visualization based on principles of perception.

Program Semester Course Code Course Name

B. Sc., Big Data Analytics	II	ICSC124BDA	BIG DATA ANALYTICS
F J			[

At the end of the course student will

- CO 1: Learn tips and tricks for Big Data use cases and solutions.
- CO 2: Learn to build and maintain reliable, scalable, distributed systems with Apache Hadoop.
- CO 3: Able to apply Hadoop Ecosystem components

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III		DATA WAREHOUSING & DATA MINING

On successful completion of the course, students will be able to:

- CO 1: Understand Data Warehouse fundamentals, Data Mining Principles.
- CO 2: Design appropriate classification techniques.
- CO 3: Understand various tools of Data Mining and their techniques to solve the real time problems.
- CO 4: Learn Multidimensional schemas suitable for data warehousing.
- CO 5: Develop and apply critical thinking, problem solving, and decision making skills.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CSC235DWM(P)	WEKA LAB

On successful completion of this practical course, the student will be able to:

- CO 1: Identify source tables and populate sample data
- CO 2: Build Data Warehouse
- CO 3: Design multi-dimensional data models
- CO 4: Work with DMLQ(Data Mining Query Language)
- CO 5: Write ETL(Extract-Transform-Load.) scripts and implement using data warehouse tools.

Semester	Course Code	Course Name
III		DATA STORAGE TECHNOLOGIES AND NETWORKS
		III CSC236DST

On successful completion of the course, students will be able to:

- CO 1: Understand Data storage Technologies and Networks.
- CO 2: Learn about different types of storage systems, storage networking technologies
- CO 3: Learn concepts related to SAN, NAS and Cloud Storage.
- CO 4: This course will also cover key concepts related to cloud computing, and some of the new Trends in the storage industry.
- CO 5: To explain the design of a data centre and storage requirements

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	\ /	DATA STORAGE TECHNOLOGIES LAB

On successful completion of this practical course, the student will be able to: CO 1: Understand Data storage Technologies and Networks

CO 2: Understand concepts related to storage Architecture

CO 3: Learn concepts related to SAN, NAS and Cloud Storage.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III		OBJECT ORIENTED PROGRAMMING USING JAVA

On successful completion of the course, students will be able to;

- CO 1: Understand object oriented programming concepts to solve real world problems.
- CO 2: Write programs using Java collection API as well as the java standard class library
- CO 3: Understand underlying principles of Object-Oriented Programming in Java.
- CO 4: Demonstrate the implementation of inheritance (multilevel, hierarchical and multiple) by using extend and implement keywords.

CO 5: Use dynamic and static polymorphism to process objects depending on their class.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	CS237JAVA(P)	JAVA LAB

On successful completion of the course, students will be able to;

- CO 1: develop an in depth understanding of programming in Java: data types, variables, operators, operator precedence, Decision and control statements, arrays, switch statement, Iteration Statements, Jump Statements, Using break, Using continue, return.
- CO 2: write Object Oriented programs in Java: Objects, Classes constructors, returning and passing objects as parameter, Inheritance, Access Control, Using super, final with inheritance Overloading and overriding methods, Abstract classes, Extended classes.
- CO 3: develop understanding of developing packages & Interfaces in Java: Package, concept of CLASSPATH, access modifiers, importing package, Defining and implementing interfaces.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	III	N3/4VIII (III) (A	Hadoop & Data Analysis

At the end of the course student will

- CO 1: Preparing for data summarization, query, and analysis.
- CO 2: Applying data modelling techniques to large data sets
- CO 3: Creating applications for Big Data analytics
- CO 4: Building a complete business data analytic solution

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	IV	CS24IXPOS	Principles of Operating Systems

At the end of the course student will

- CO 1: Know Computer system resources & the role of operating systems in resource management with algorithms
- CO2: Understand Operating System Architectural design and its services.
- CO 3: Gain knowledge of various types of operating systems including Unix and Android.
- CO 4: Understand various process management concepts including scheduling, synchronization, and deadlocks.
- CO 5: Have a basic knowledge about multithreading.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	IV	CS2XDCO	DIGITAL COMPUTER ORGANIZATION AND INTROD. TO COMPUTER SYSTEM ARCHITECTURE

At the end of the course student will

CO 1: To make the students to understand different types of Digital logic circuits

CO 2 : To design procedures

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V		STRIBUTED SYSTEMS

By successful completion of the course, students will be able to:

- CO 1: To understand the architectures of distributed systems.
- CO 2: To understand and compare the technologies associated with presentation and interaction services.
- CO 3: To acquire the knowledge in component models of Session and Entity Beans.
- CO 4: To provide the better understanding of ASP.NET programming with web server controls.
- C O 5: To be familiar with rich web controls and data access technology in ADO.NET

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC35X1DS(P)	DISTRIBUTEDSYS TEMS LAB

On successful completion of this practical course, the student will be able to:

- CO 1: Define terms related to the Internet, demonstrate the ability to use the World Wide Web
- CO 2: Understand and use common types of files found on the internet.
- CO 3: Design web pages
- CO 4: Create basic Web pages with HTML and CSS.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3512	Cyber Security

By successful completion of the course, students will be able to:

- CO 1: Understand Basics of cyber security concepts
- CO 2: Understand Different types of security attacks
- CO 3: Study Roles of International law
- CO 4: Get information about National cyber security policy
- CO 5: How to provide security

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CS35XIICS(P)	CYBER SECURITY LAB

By successful completion of the course, students will be able to:

CO 1: Provide security to Personal Computer

CO2: Protect documents CO 3: Protect Databases CO 4: Setting Credentials

CO5:Cracking password

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3513	ADVANCED JAVA

By successful completion of the course, students will be able to:

CO 1: To understand the meaning and basic components of servlets and JSP

CO 2: To know the required software to run PHP programs

CO 3: Understanding the use of servers

Program	Semester	Course Code	Course Name
B. Sc., Big	V	CS35XIIIJAVA(P)	ADVANCED JAVA
Data Analytics			PROGRAMMING LAB

By successful completion of the course, students will be able to:

CO 1: an ability to apply knowledge on JDBC,

CO 2: an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution, using various Sql operations,

CO 3: an ability to design, implement, database using HTML

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	CSC3514	DATA STRUCTURES

On successful completion of this practical course, the student will be able to

CO 1: Understand available Data Structures for data storage and processing.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	[0000111 + 20(1)	DATA STRUCTURES USING C

CO1: Identify the appropriate data structure for a given problem.

CO 2: Design programs for solving problems using different data structures.

CO 3: Solve problems using trees, graphs and hash tables addressing various issues.

CO 4: Ability to effectively use compilers includes library functions, debuggers and troubleshooting.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	COOOVACE	SOFTWARE ENGINEERING

Upon successful completion of the course, a student will be able to:

CO 1: Students will be able to decompose the given project in various phases of a lifecycle.

CO 2: Ability to apply software engineering principles and techniques.

CO 3: Ability to develop, maintain and evaluate large-scale software systems.

CO 4: To produce efficient, reliable, robust and cost-effective software solutions.

CO 5: Students will be able to choose appropriate process model depending on the user requirements.

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	000011 (02(1)	SOFTWARE DESIGE TOOLS (UML)

Upon successful completion of the course, a student will be able to:

CO 1: Understand the Case studies and design the Model..

CO 2: Understand how design patterns solve design problems.

CO 3: Develop design solutions using creational patterns.

CO 4: Construct design solutions by using structural and behavioral patterns

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	SDC122AE	ADVANCED EXCEL

On successful completion of the course, students will be able to;

- CO 1: Work with basic functions of Excel
- CO 2: Formatting worksheet
- CO 3: Can perform operations like Filter, Sort etc.
- CO 4: Do date and time validations
- CO 5: Can work with Lookup Functions

Program	Semester	Course Code		Course Name
B. Sc., Big Data Analytics	V	SDC122PL	PROG	GRAMMING IN PL/SQL

On successful completion of the course, students will be able to;

- CO 1: Understand the fundamentals of Creating and Running PL/SQL Code.
- CO 2: Learn about PL/SQL Program Structure
- CO 3: Understand the Loop Basics
- CO 4: Learn about PL/SQL Program Data
- CO 5: Get the knowledge about Procedures, Functions, and Parameters

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	SDC122PL	PROGRAMMING IN PL/SQL

On successful completion of the course, students will be able to;

- CO 1: Understand the fundamentals of Creating and Running PL/SQL Code.
- CO 2: Learn about PL/SQL Program Structure
- CO 3: Understand the Loop Basics
- CO 4: Learn about PL/SQL Program Data
- CO 5: Get the knowledge about Procedures, Functions, and Parameters

Program	Semester	Course Code	Course Name
B. Sc., Big Data Analytics	V	`	ANALYSIS BIG DATA WITH SQL

- CO 1: Structured Query Language (SQL) to extract and analyse data stored in databases.
- CO 2: Extract data, join tables together, and perform aggregations.
- CO 3: learn to do more complex analysis and manipulations using subqueries
- CO 4: SQL queries to successfully handle a variety of data analysis tasks.

DEPARTMENT OF AGRICULTURE AND RURAL DEVELOPMENT				
Program	Semester	Course Code	Course Name	
B. Sc., Agriculture and rural development	I		Fundamentals of Agriculture economics	

CO1: Identify elements of business success in agriculture and food-processing as well as elements that determine the economic role of agriculture in the national economy.

CO2: Propose methods of micro- and macroeconomic decision making in agriculture in different agro- ecological and Agro-economic circumstances.

CO3: Describe and explain models of production, supply and demand of agricultural and food products on national and international markets

CO4: Understand the concepts of consumer choice and how it affect the farm / ranch level agriculture firm.

CO5: Understand the macroeconomics aspects of the economy as they affect the agricultural sector.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	AEXT 191	Rural sociology, educational psychology and human values

On successful completion of this practical course, the student will be able to;

- CO 1: Understand concept of rural sociology, its importance in agricultural extension, characteristics of Indian rural society .
- CO 2: Understand social groups, social stratification, culture, social values, social control and attitudes, leadership and training.
- CO 3: Understand concept of educational psychology, intelligence, personality, perceptions, emotions, frustration, motivation, teaching and learning
- CO 4: Acquaint with characteristics of rural society, village institutions and social organizations. Select lay leaders and train them.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	Ι	IAGKU101	Fundamentals of Agronomy

- CO 1: Understand the Crop production techniques and crop growth in relation to environment
- CO 2: Understand the Zero and minimum tillage: their basics and application
- CO 3: Learn Precision agriculture and Precision farming, their concepts and application
- CO 4: Understand the Biotic and abiotic stresses; concept of ideal plant type
- CO 5: Learn Types of tillage and types sowing methods

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	I	IHUKTIKI	Fundamentals of Horticulture

- CO 1: Students will be able to identify plant vegetative structure
- CO 2: Students will understand basic principles, processes and plant propagation methods.
- CO 3: Students will understand how to propagate plants, manage and harvest a variety of plant.
- CO 4: Students will understand how to propagate plant, manage and harvest a variety of plant.
- CO 5: Students will understand recognize various crop harvesting, transportation, and processing
- CO 6: Students will Understand the Kitchen gardening, Lawn making

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	Ι	RICM101	Fundamentals of Plant Biochemistry and Soil Science

On successful completion of this practical course, the student will be able to;

- CO 1: Understanding of Biochemistry as a discipline and milestone discoveries in life sciences that led to establishment of Biochemistry as a separate discipline.
- CO 2: Fundamental properties of elements, their role in formation of biomolecules and in chemical reactions within living organisms.
- CO 3: Understand plant cell structure, organization, and apply specific biochemical functions to all compartments of the plant cell.
- CO 4: Learn amino acid structures and relate their chemical properties to the synthesis and function of proteins and enzymes.
- CO 5: Understand protein structural hierarchy and relate structure to function.
- CO 6: understand central metabolism, its plant-specific components, and their functional significance at multiple levels and explore principles of metabolic modeling.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	Ι	CC111 MSP	Minimum supporting Price for Agriculture Crops In AP

- CO 1: Understanding of MSP in Agricultural Crops
- CO 2: Understanding of MSP in Horticultural Crops
- CO 3: Understanding of MSP in Indian Economy
- CO 4: Understanding of MSP in AP Economy

Program	Semester	Course Code	Course Name
B. Sc., Agriculture		SDC 111 VC	VERMICOMPOST

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	AGRO103	Introductory Agrometeorology and Climate Change

- CO 1: Artificial rainmaking; Monsoon, mechanism and importance in Indian agriculture.
- CO 2: Weather forecasting, types of weather forecast and their uses.
- CO 3: Climate change, climatic variability, global warming, causes of climate change
- CO 4: Atmospheric temperature, temperature inversion
- CO 5: Precipitation, process of precipitation

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	PATH171	Fundamentals Of Plant Pathology

On successful completion of this practical course, the student will be able to;

- CO 1: Importance of plant diseases, scope and objectives of Plant Pathology.
- CO 2: Diseases and symptoms due to abiotic causes. Fungi: General characters, definition of fungus, somatic structures.
- CO 3: Nomenclature, Binomial system of nomenclature, rules of nomenclature.
- CO 4: Basic methods of classification and reproduction.
- CO 5: Nematodes: General morphology and reproduction
- CO 6: classification, symptoms and nature of damage caused by plant nematodes

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II		Genetics & Plant Breeding

- CO 1: Pre Mendelian concepts of heredity
- CO 2: Chromosome Structure of chromosome, types of chromosomes
- CO 3: Linkage
- CO 4: Sex determination in plants
- CO 5: Cell division , Cell cycle , Mitosis
- CO 6: Mutation Classification Gene mutations

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II		Genetics & Plant Breeding

- CO 1: Introduction to soil and water conservation and causes soil erosion
- CO 2: Wind erosion Mechanics of wind erosion, types of soil movement
- CO 3: Open channel hydraulics
- CO 4: Soil loss estimation by universal soil loss equation
- CO 5: Fundamental components of micro irrigation systems

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	SDC121SBP	Seed Bed Preparation

- CO 1: Introduction to seed bed
- CO 2: preparation of beds
- CO 3: Design criteria and constructional details of seed bed
- CO 4: Uses of seed bed

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	II	K'('121 ZRNF	Zero Budget Natural Farming

On successful completion of this practical course, the student will be able to;

- CO 1: For the capacity building of resources persons and farmer experts
- CO 2: On farm farmer training
- CO 3: Organic certification
- CO 4: ZBNF input shops

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III	AGRO 201	Crop Production Technology – I (Cereals, Millets and Pulses)

- CO1: Introduction and development of agriculture.
- CO2: Nutrient management with special emphasis on nitrogen dynamics, micro nutrients -INM
- CO3: Harvesting -Yield attributes yield post harvest operations
- CO4: Land Preparation seeds and sowing nutrient management water management weed management climate resilient technologies
- CO5: Maize- Origin- geographical distribution

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III	7101to 202	CROP PRODUCTION TECHNOLOGY–II (OIL SEEDS, FIBER, SUGAR, TOBACCO AND FODDER CROPS

CO1: Importance of oilseed crops- edible and non – edible oils – nutritional value importance in Indian economy

CO2: Soil and climatic requirements - types - growth stages - land Preparation -seeds and sowing- seed treatment-seed rate-spacing-season-time and method of sowing varieties

CO3: Nutrient management- water management- weed management yield attributes – yield-Harvesting – post harvest operations- quality considerations – cropping systems

CO4: Nursery management-seeds and sowing for different types- seed treatment-seed ratespacing-season-time and method of sowing

CO5: Ratoon cane management – factors affecting quality of sugarcane – arrowing– jaggery making – clarification

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	III		Protected cultivation and post harvest technologies

On successful completion of this practical course, the student will be able to;

CO1: Understanding the concepts in greenhouse technology.

CO2: Acquaintance with the types of greenhouses.

CO3: Acquaintance with different materials for construction of greenhouses.

CO4: Understanding the concepts of Irrigation systems used in greenhouses.

CO5: Understanding the concepts of drying of agriculture produced in greenhouses.

CO6: Understanding the handling equipment that used in greenhouses.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	AGR303	RAINFED AGRICULTURE AND WATERSHED MANAGEMENT

CO1: Definition – dimensions of the problem – area and production from dry lands in India and Andhra Pradesh

CO2: Problems and prospects of rainfed agriculture in India- climate – rainfall pattern distribution

CO3: Problems and prospects of rainfed agriculture in India - soil characteristics – soil fertility status

CO4: Effect of water deficits on physio-morphological characteristics of the plants

CO5: Tillage for rainfed crops – off-season tillage – primary tillage –secondary tillage – year round tillage

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	SMCA301	AGRICULTURE INFORMATICS

On successful completion of this practical course, the student will be able to;

CO1: Explain Windows explorer- Creating folder - Copy and paste functions - Control panel Notepad -WordPad etc.

CO2: Summarize MS word - Creating a document, saving and editing

CO3: Discuss Use of options from tool bars — Format - Insert and tools (Spelling and Grammar) - Alignment of paragraphs and text.

CO4: Explain to Creating a table - Merging of cells - columns and row width - Formats etc.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V		Crop improvement- II (Fibres, Sugars, Starches, Narcotics

On successful completion of this practical course, the student will be able to;

CO1: Idea on Centers of origin, distribution of species, wild relatives

CO2: Knowledge on Plant genetic resources, its utilization and conservation.

CO3: Clear idea on plant morphology and floral biology of the crops under study.

CO4. Knowledge on major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield and adaptability.

CO5. To know emasculation and hybridization techniques in different crop species; fibers, sugars, starches, narcotics, vegetables, fruits and flowers.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	I ENIT∩ 222	PESTS OF HORTICULTURAL CROPS AND THEIR MANAGEMENT & BENEFICIAL INSECTS

CO1: General account on nature and type of damage by pest of various various vegetable crops, fruit crops, plantation crops, ornamental crops, narcotics, spices and condiments.

CO2: Study of Bhendi- Shoot and fruit borer

CO3: insect pest of Mango- Leafhoppers, stem borer, nut weevil

CO4: insect pest of Crucifers- Diamond back moth, cabbage head borer, leaf webber, aphid, painted bug, tobacco caterpillar and cabbage butterfly.

CO5: Silk worm diseases- Pebrine- Symptoms, mode of transmission.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V		FARM MANAGEMENT AND PRODUCTION RESOURCE ECONONMICS

On successful completion of this practical course, the student will be able to;

CO1: Definitions and Concepts Farm management and production Economics

CO2: To understand the Determination of optimum input and optimum output and decision rules.

CO3: To understand the types of production Function

CO4: To understand the Meaning and concept of cost, cost function /cost-output relationship - Types of production costs and their interrelationship - Importance of costs in managing farm business

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V		DISEASES OF FIELD AND HORTICULTURAL CROPS AND THEIR MANAGEMENT-II

On successful completion of this practical course, the student will be able to;

CO1: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in fruit crops.

CO2: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in vegetable crops.

CO3: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in flower crops.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V		DISEASES OF FIELD AND HORTICULTURAL CROPS AND THEIR MANAGEMENT-II

CO1: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in fruit crops.

CO2: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in vegetable crops.

CO3: Etiology, symptoms, host-parasite relationship and specific management practices of diseases in flower crops.

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V	HORT 381	POST-HARVEST MANAGEMENT AND VALUE ADDITION OF FRUITS AND VEGETABLES

On successful completion of this practical course, the student will be able to;

CO1: Idea on fruits and vegetables that needs post harvest management

CO2: Clear idea on causes for post harvest loses

CO3: Knowledge on different preservation methods to avoid post harvest loses.

CO4. Idea on packaging methods to avoid post harvest loses .

Program	Semester	Course Code	Course Name
B. Sc., Agriculture and rural development	V		COMMUNICATION SKILLS AND PERSONALITY DEVELOPMENT

On successful completion of this practical course, the student will be able to;

CO1: Improvement in communication and grammar

CO2: Improved writing skill which is required for teaching and research purpose.

CO3: Holistic personality development

CO4: Coordinated functioning and time management.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	I	RR A 111ID∩	INTRODUCTION TO RETAIL OPERATIONS

CO1: The learners will be able to comprehend the process, procedures of Retail Sector.

CO2: The learners will be able to relate the systems & protocols of retail stores operations.

CO3: The learners will be able to deconstruct the procedures of retail store practices.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	I	BBA111IC	IN STORE CASHIERING AND MERCHANDISING OPERATIONS

On successful completion of this practical course, the student will be able to;

CO1: The Learners will be able to demonstrate prompt practices at retail stores.

CO2: The learners will be able to assimilate the knowledge into practice of maintaining inventory, warehousing, etc

CO3: The Learners will be able to demonstrate practical knowledge associated with Visual Merchandising.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	I		BUSINESS COMMUNICATION SKILL

On successful completion of this practical course, the student will be able to;

CO1: The learner will be able to apply communication skills with proficiency.

CO2: The learners will be well equipping with effective communication skills within professional skill.

CO3: The learners will be able to understand various nuances of communication to a greater extent

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	RRA121RRM	BASICS OF BUSINESS MANAGEMENT

CO1: The learners will be able to comprehend know how of the business environment.

CO2: The learners will be able to operate the framework for effective retailing.

CO3: The learners will be able to predict various sales & marketing strategy for retail.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II	BBA121IC	IN STORECASHIERING &MERCHANDISINGO PERATIONS

On successful completion of this practical course, the student will be able to;

CO1: Understand the basics of POS.

CO2: Distinguish the mechanism of defining products in a retail store.

CO3: Analyze & Interpret various activities linked to sales management.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	II		BUSINESS ECONOMICS

On successful completion of this practical course, the student will be able to;

CO1: Understand the role of managerial economist in a firm.

CO2: Apply the knowledge of costing in decision making.

CO3: Identify and analyze market practices and process in real life.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231CRM	CUSTOMER RELATIONSHIP MANAGEMENT

On successful completion of this practical course, the student will be able to;

CO1: The equip learners with the foundational knowledge of CRM

CO2: The learners will be able to identify the importance of customer value management

CO3: The learners will be able to know the best practices for long term profitability.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231ECS	ERP & COMPUTER SKILLS

CO1: The learners will be able to identify the impact of using ERP

CO2: The learners will be able to know the working knowledge of how data is integrated in ERP

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	DD 4004634	SALES MANAGEMENT

On successful completion of this practical course, the student will be able to;

CO1: The learners will be able to understand the process of sales management

CO2: The learners will be able to identify the role and responsibilities of the sales manager

CO3: The learners will be able to know the concept of sales force and its responsibilities.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III	BBA231CRM	CUSTOMER REDRESSAL MECHANISM

On successful completion of this practical course, the student will be able to;

CO1: Learners able to know the key concepts in grievance redress mechanisms

CO2: The learner will be able to investigate the key personal skills required and main roles and responsibilities of the grievance redress committee.

CO3: Learner will be able to know what are the key elements of effective complaint handling and the steps undertaken in handling complaints.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	III		FUNDAMENTALS OF FINANCIAL & COST ACCOUNTING

On successful completion of this practical course, the student will be able to;

CO1: The student will be able to understand the importance of management accounting as a key input for managerial/ financial decision making.

The students will be able to take financial decisions using tools of management accounting.

CO2: Students will be able to apply the Basic knowledge of Management and cost accounting in the real-life situation

CO3: This subject will enable them to enhance their ability and professional skills

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	IV	BBA241FMD	FMCG DISTRIBUTION

CO1: To know the roles & responsibilities of FMCG Distribution professionals

CO2: Helps to understand the distribution management process.

Program	Semester	Course Code	Course Name
BBA., RETAIL OPERATIONS	IV		NON-STORE RETAILING

On successful completion of this practical course, the student will be able to;

CO1: To develop knowledge of contemporary E- retail management issues at the strategic level.

CO2: To describe and analyse the way E-retailing works, specifically the key activities and relationships.

CO3: To provide an academic underpinning to the above through the application of E retailing theory and research.

DEPARTMENT OF HOTEL MANAGEMENT

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111HK	HOUSEKEEPING

- CO 1: The subject aims to establish the importance of Housekeeping and its role in the hospitality Industry.
- CO 2: It also prepares the student to acquire basic knowledge and skills necessary for different tasks and aspects of housekeeping.
- CO 3: Students to understand various procedures in Housekeeping.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111HK (P)	HOUSEKEEPING LAB

On successful completion of this practical course, the student will be able to;

- CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar
- CO 2: Understand the Rooms layouts and standard Amenities placed in the room
- CO 3: Develop skill in Identification of cleaning equipments (manual and Mechanical)
- CO 4: Acquire skills to study and perform the procedure of Bed making

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM 111 FP(P)	FOOD PRODUCTION

- CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar
- CO 2: Understanding the usage and identification of equipments
- CO 3: Develop skill in Cuts of vegetables
- CO 4: Gain knowledge on different food preparations

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111FBS	Food & Beverage service

- CO 1: The course will give the students a comprehensive knowledge and develop technical skills in the basic aspects of food & beverage service operations in the Hotel Industry.
- CO 2: To learn about Food & Beverage Service equipment- uses and sizes.

CO 3: Notice the Ancillary Areas of Food and Beverage Service

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111FO	Front Office

- CO 1: This course aims to establish the importance of Front Office within the hospitality industry.
- CO 2: It also prepares the student to acquire basic skills.
- CO 3: Get Knowledge on necessary to identify the required standards.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HM111FO(P)	Front Office practical

By successful completion of the course, students will be able to;

- CO 1: Get Knowledge of equipment.
- CO 2: Develop skill in handling situations in the front office department.

CO 3: Gain knowledge on different Front office terminology

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	I	HR111PR	Public Relations

By successful completion of the course, students will be able to;

- CO 1: To learn Public Relations Role in Business, Government, Politics, NGOs and Industry.
- CO 2: Importance Tools of Public Relations.
- CO 3: A brief Review of the Ethics of Public Relations Social Responsibility.
- CO 4: Finally learn the Present and future of Public Relations in India.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	IHM 122HU	Housekeeping Operations

- CO 1: The subject aims to establish the cleaning science and types of cleaning agents
- CO 2: The student to acquire basic knowledge cleaning of various surfaces and metals and Public Areas
- CO 3: Adopted to improve skills necessary for different tasks and aspects of housekeeping.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122MSC	Meat & Sauce Cookery

- CO 1: Based on the sound knowledge of commodities and storing
- CO 2: Principles and methods of cooking it is desired
- CO 3: To prepare students to evolve good understanding and prepare Classification of mother sauces.
- CO 4: The course further introduces the students to the concepts of bakery & confectionery.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	IHM122FSO	Food Service Operations

On successful completion of this practical course, the student will be able to;

- CO 1: The courses will give the students a comprehensive knowledge on menu
- CO 2: To develop technical skills in the basic aspects of types of meals
- CO 3: To acquire food service methods and control methods in the Hotel Industry.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122RD	Room Division

On successful completion of this practical course, the student will be able to;

- CO 1: This course aims to establish the structure of Front Office organization within the hospitality industry.
- CO 2: It also prepares the student to acquire basic skills Equipments used at front office and
- CO 3: Get knowledge in necessary to successfully Front desk operations
- CO 4: Identify the required standards in this area and to consider all aspects of this department.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	НМ122НН	Health & Hygiene

- CO 1: What is a healthy diet
- CO 2: How can we use available information to optimize our diet?
- CO 3: Can nutrition be used for a healthy life?
- CO 4: Is there a one-size-fits-all "good" diet or should we individualize our dietary goals?
- CO 5: Disaster management and responsiveness of public in pandemic and epidemic diseases
- CO 6: Assess the impact of policies on health and hygiene Health measures to consider while traveling
- CO 7: Awareness in public through digital media viz., mobile apps

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	II	HM122FVP	Fruit & Vegetable Preservation

- CO 1:Identify various types of fruits and vegetables and explain their nutritive value.
- CO 2: Understand the fragile nature of fruits and vegetables and causes for their damage.
- CO 3: Explain various methods of preservation for fresh fruits and vegetables.
- CO 4: Get to know the value-added products made from fruits and vegetables.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233LLO	Linen & Laundry Operations

On successful completion of this practical course, the student will be able to;

- CO 1: To learn about the Housekeeping Supervision.
- CO 2: Understand the importance of linen in housekeeping
- CO 3: To know the types of Linen, cleaning and guest supplies.
- CO 4: Student will get knowledge on laundry operation.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	233НК(Р)	HOUSE KEEPING PRACTICALS

On successful completion of this practical course, the student will be able to;

- CO 1: Idealize and perform the Layout of Linen and Uniform Room
- CO 2: Gets knowledge on operation of Laundry Machinery
- CO 3: Develop skill in Flower Arrangement

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	НМ233ІС	Indian cooking & menu planning

- CO 1: Based on the sound knowledge of commodities and principles and methods of cooking.
- CO 2: It is desired to prepare students to evolve good understanding and prepare Indian regional menus in large quantities to suit the occasion.
- CO 3: After doing this course, students should be able to plan and execute quantity menus.
- CO 4: The course further introduces the students to the concepts of Rechauffe cookery.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233FP	Food production Practical

- CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar with practicals.
- CO 2: Develop cooking skill in Indian cuisine.
- CO 3: Gain knowledge on cooking meat preparations.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233BSO	Beverage service operations

On successful completion of this practical course, the student will be able to;

- CO 1: This course will give a comprehensive knowledge of the various alcoholic beverage.
- CO 2: Non-alcoholic beverage used in the Hospitality Industry.
- CO 3: It will give an insight into their history, manufacture.
- CO 4: Classification, and also to develop technical and specialized skills in the service of the Beverage.

CO 5: Gets knowledge on bar and restaurant planning.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233BS	Beverage Service Practical

- CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar with practicals.
- CO 2: Get knowledge on beverage equipment.
- CO 3: Develop skill in service of alcoholic and non alcoholic beverages.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233SFO	Specialized Front office

- CO 1: This course aims to establish the Registration and reservations within the Front office department.
- CO 2: It also prepares the student to acquire basic skills.
- CO 3: Knowledge necessary to successfully identify the required standards in this area.
- CO 4: Knowing and considering all aspects of Accounting fundamentals.
- CO 5: Learn how to control cash and guest safety and security.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233FO(P)	Front Office Practical

On successful completion of this practical course, the student will be able to;

- CO 1: Gain knowledge on operation of keys
- CO 2: Understand the process of making reservation and registration
- CO 3: Acquire skilled knowledge on front office operation system

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	НМ233ОВ	Online Business

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the online business and its advantages and disadvantages
- CO 2: Recognize new channels of marketing, their scope and steps involved
- CO 3: Analyze the procurement, payment process, security and shipping in online business
- CO 4: Create new marketing tools for online business

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233EE	Environmental Education

- CO 1: Understand the nature, components of an ecosystem and that humans are an integral part of nature.
- CO 2: Realize the importance of the environment, the goods and services of a healthy biodiversity, and the dependence of humans on the environment.
- CO 3: Evaluate the ways and ill effects of destruction of the environment, population explosion on ecosystems and global problems consequent to anthropogenic activities.
- CO 4: Discuss the laws/ acts made by the government to prevent pollution, to protect biodiversity and the environment as a whole.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	III	HM233ICS	Indian Culture and Science

- CO 1: Understand the evolution of India's culture
- CO 2: Analyze the process of modernization of Indian society and culture from past to future
- CO 3: Comprehend objective education and evaluate scientific development of India in various spheres
- CO 4: Inculcate nationalist and moral fervor and scientific temper

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	HM351ACD	ADVANCED CULINARY PREPARATION

On successful completion of this practical course, the student will be able to;

- CO 1: This course develops the knowledge and understanding of international cuisine among students.
- CO 2: To impart knowledge on the function of Larder and Garbageman.
- CO 3: Finally the course further introduces the students to the concepts of bakery & confectionery.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	HM351FP	Food Production – Lab IV

On successful completion of this practical course, the student will be able to;

- CO 1: It is recommended that Demonstrations be conducted in the initial stages to make the students familiar with practicals.
- CO 2: Develop cooking skill in international cuisine
- CO 3: Gain knowledge on different famous dishes in international cuisine

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	HM354FBM	Food & Beverage Management

- CO 1: To impart knowledge of cost controls aspect of the F & B department and related functions.
- CO 2: This course enables the student to gain a better understanding of the roll of Food and Beverage Management
- CO 3: It also helps them to acquire finer skills and thorough understanding of the managerial principles for overall development.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	НМ352АМ	Accommodation Management

- CO 1: The subject tends to establish the importance of accommodation management within the hospitality industry.
- CO 2: It equips the student to acquire knowledge & skills.
- CO 3: To planning & designing aspects of the front office as Sales Department.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	НМ353ВМ	BAR MANAGEMENT

On successful completion of this practical course, the student will be able to;

- CO 1: This course enables the student to gain a better understanding of the role of Bar and Beverage Operation in the context.
- CO 2: Overall bar operations.
- CO 3: To familiarize the student with the current trends.
- CO 4: The Art of Mixology like cocktails mixing methods, equipment, Accessories used.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	LINTOEECANT	AND AIR TICKETING MANAGEMENT

On successful completion of this practical course, the student will be able to;

- CO 1: To understand meaning of Role of AAI and DGCA in air transportation
- CO 2: Learn about methods of Cargo transportation.
- CO 3: To understand the Airline Terminology and knowing types of journeys.
- CO 4: Finally learn the types of fares according to the Passengers.

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	HM356SM	Sales and Marketing

- CO 1: The subject aims to make the students understand the importance of Sales and marketing in the Hospitality Industry.
- CO 2: Concepts of the marketing, buying behaviors, market segmentation and marketing mix strategies for effective marketing of the hotel industry.
- CO 3: The student will understand the concept of product, price, promotion, sales and consumers behavior

Program	Semester	Course Code	Course Name
B. Sc., Hotel Management	V	НМ357ТМ	Tourism Management

- CO 1: To inculcate a sense of importance and establish a link between the tourism industry and the hotel industry.
- CO 2: To highlight the tourism industry as an alternative career path.
- CO 3: Acquire knowledge on the role & functions of tourism organizations.
- CO 4: Able to learn the procedure and operations of the Travel Agent and Tour operator.

DEPARTMENT OF POLITICAL SCIENCE

Program	Semester	Course Code	Course Name
			INTRODUCTION TO
BA	I	POL111IPS	POLITICAL SCIENCE

- CO 1: Recall the previous knowledge about Political Science and understand the nature and scope, traditional and modern approaches of Political Science.
- CO 2: Understand concepts intrinsic to the study of Political Science.
- CO 3: Have solid theoretical understanding of Rights and its theories along with the basic aspects of certain political ideologies.
- CO 4: Apply the knowledge to observe the field level phenomena

Program	Semester	Course Code	Course Name
BA	I	POL122BOG	BASIC ORGANS OF THE GOVERNMENT

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the Origin and Evolution of the concept of Constitutionalism and classification of Constitutions.
- CO 2: Acquaint themselves with different theories of Origin of State.
- CO 3: Understand and analyze organs and forms of Government along with a deep insight into the various agents involved in the political process.
- CO 4: Apply the knowledge to analyze and evaluate the existing systems.

Program	Semester	Course Code	Course Name
BA	III	POL233IGP	INDIAN GOVERNMENT AND POLITICS

- CO 1: Acquire knowledge about the historical background of Constitutional development in India, appreciate philosophical foundations and salient features of the Indian Constitution.
- CO 2: Analyze the relationship between State and individual in terms of Fundamental Rights and Directive Principles of State Policy.
- CO 3: Understand the composition of and functioning of Union Government as well as State Government and finally
- CO 4: Acquaint themselves with the judicial system of the country and its emerging trends such as judicial reforms.

Program	Semester	Course Code	Course Name
BA	IV	POL244IPP	INDIAN POLITICAL PROCESS

- CO 1: Know and understand the federal system of the country and some of the vital contemporary emerging issues.
- CO 2: Evaluate the electoral system of the country and to identify the areas of Electoral Reforms.
- CO 3: Know the constitutional base and functioning of local governments with special emphasis on 73rd and 74th Constitutional Amendment Acts.
- CO 4: Understand the Dynamics of Indian politics, challenges faced and gain a sensitive comprehension of the Contribution Factors.

Program	Semester	Course Code	Course Name
BA	IV	POL245WPT	WESTERN POLITICAL THOUGHT

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the fundamental contours of classical, western political philosophy, basic features of medieval political thought and shift from medieval to modern era.
- CO 2: Understand the Social Contract Theory and appreciate its implications on the perception of state in terms of its purposes and role. Acquaint yourself with the Liberal and Marxist philosophy and analyze some trends in western political thought.
- CO 3: Critically analyze the Evolution of Western Political Thought.

Program	Semester	Course Code	Course Name
BA	V	POL355IPT	INDIAPOLITICAL
			THOUGHT

- CO 1: Helping the students in acquiring knowledge in the field of Indian Political thought in the initial stage of their study.
- CO 2: Apprising the students about India' contribution towards the enrichment of the field of political thought.
- CO 3: Gathering knowledge regarding India's orientation towards politics and apprising the students about the growth of modern democratic political consciousness in India.
- CO 4: Helping the students in their future course of study in India's political thought.

Program	Semester	Course Code	Course Name
BA	V	POL356OM	OFFICE MANAGEMENT

- CO 1: Understand fundamental knowledge of Office Management that can be applied to a career.
- CO 2: Have knowledge on office administration and identify job competencies.
- CO 3: Understand the importance of record management, allied sections and to identify the challenges in the background of ICT
- CO 4: Enhance skills, strategies and techniques to compete with the global competencies in office management.

Program	Semester	Course Code	Course Name
BA	V		PRINCIPLES OF
		POL367PPAA	PUBLIC
			ADMINISTRATION

On successful completion of this practical course, the student will be able to;

- CO 1: This course aims to familiarize students with the need to recognize Public Administration as a Discipline
- CO 2: The course encourages students on the importance of development administration and its elements
- CO 3: It enhances the students the Role of Governance in 21st Century

DEPARTMENT OF ENGLISH

Program	Semester	Course Code	Course Name
BA	I	ENG111ACS	ENGLISH PRAXIS COURSE-1- A COURSE IN COMMUNICATION AND SOFT SKILLS

- CO 1: Use listening and communication skills effectively
- CO 2: Develop awareness of appropriate communication strategies
- CO 3: Identify the needs communication help us meet
- CO 4: Identify common misconceptions about communication and reasons for committing perceptual errors
 - CO 5: Explain communication competence
 - CO 6: Understand the role of soft skills and communication skills in personal life
 - CO7: Focus on the International Pronunciation, Word Stress and Intonation Patterns and improve their accent

Program	Semester	Course Code	Course Name
BA	I		SKILL DEVELOPMENT COURSE- OFFICE SECRETARYSHIP

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the organizational hierarchy and outlines of functioning
- CO 2: Comprehend the role of office secretaryship in a small and medium organization
- CO 3: Acquire knowledge on office procedures and interpersonal skills
- CO 4: Apply the skills in preparing and presenting notes, letters, statements, reports in different situations

Program	Semester	Course Code	Course Name
BA	I	CC111ECD	CERTIFICATE COURSE - ENGLISH ENRICHMENT AND CAREER DEVELOPMENT SKILLS [EECDS]

- CO 1: Speak intelligibly using appropriate word stress, sentence stress and intonation patterns
- CO 2: Narrate events and incidents, real or imaginary in a logical sense
- CO 3: Acquire knowledge on office procedures and interpersonal skills
- CO 4: Adopt different strategies to convey ideas effectively according to purpose, topic and audience
- CO 5: Present oral reports or summaries, make announcements clearly and confidently
- CO 6: Express and argue a point of view clearly and effectively
- CO 7: Concentrate on problem solving skills and building healthy relations
- CO 8: Take active part in group discussions, debates, seminars and conferences

Program	Semester	Course Code	Course Name
BA	I	ENG111HEL L	HISTORY OF ENGLISH ANGUAGE AND LITERATURE

- CO 1: Know the beauty of the coherence of Language and Literature
- CO 2: Demonstrate the awareness of evolution theory of languages by varied culture
- CO 3: Study the formation of new words
- CO 4: Apply literary terminology for Narrative, Poetic and Dramatic Genres
- CO 5: Present oral reports or summaries, make announcements clearly and confidently
- CO 6: Explore literary elements
- CO 7: Identify and use Figures of Speech
- CO 8: Appreciate literary form and structure in shaping a text's meaning

Program	Semester	Course Code	Course Name
BA	II		ENGLISH PRAXIS COURSE-II- A COURSE IN READING AND WRITING SKILLS

On successful completion of this practical course, the student will be able to;

- CO 1: Heighten their awareness of correct usage of English Grammar in writing and reading
- CO 2: Improve their reading both in terms of fluency and comprehensibility
- CO 3: Increase their vocabulary count by learning new words
- CO 4: Strengthen their ability to use the conventions of grammar when creating paragraphs, essays and formal letters
- CO 5: Review the grammatical forms of English and the use of these forms in specific communicative contexts, which include: class activities and home tasks
- CO 6: Improve writing skills independently for future needs

Program	Semester	Course Code	Course Name
BA	II	OD CANAD	SKILL DEVELOPMENT COURSE- JOURNALISTIC REPORTING

- CO 1: Understand the evolution of journalism with a focus on its development in India
- CO 2: Comprehend the role of Press in Indian Democracy and various reporting methods
- CO 3: Realize the ethical aspects of Journalism in India
- CO 4: Develop basic writing skills for Newspapers, Radio and Television

Program	Semester	Course Code	Course Name
BA	II	CC122EPC	CERTIFICATE COURSE- ENGLISH PROFICIENCY FOR COMMUNICATION SKILLS [EPCS]

- CO 1: Present oral reports or summaries, make announcements clearly and confidently
- CO 2: Express and present with ease and clarity
- CO 3: Take active part in discussions, talks and debates showing ability to express agreement and disagreement
 - CO 4: Frame questions to elicit the desired response and respond appropriately to questions
 - CO 5: Participate in spontaneous spoken discourse in familiar social situations
 - CO 6: Translate simple texts from a native language to a global language

Program	Semester	Course Code	Course Name
BA	II	ENG122ILC	N INTRODUCTION TO LITERARY CRITICISM AND LITERARY THEORY

On successful completion of this practical course, the student will be able to;

- CO 1: Articulate the broader ways in which literary theory applies to their own culture, global culture and their own values
- CO 2: Demonstrate through written work and in-class comments their ability to apply various theories to works of literature and aspects of contemporary literature
- CO 3: Demonstrate their ability to compare and synthesize the theories presented in a group discussion
- CO 4: Articulate theoretical concepts orally by their class participation and formal presentations
- CO 5: Locate, cite and intelligently incorporate several sources into their presentations and writings

Program	Semester	Course Code	Course Name
BA	III	ENG233EE	ENGLISH FOR EMPOWERMENT-III

- CO 1: Form an idea about the various stages in the development of English language
- CO 2: Distinguish between the different varieties of English used all over the world
- CO 3: Understand the total content and underlying meaning in the context
- CO 4: Write analytically in a variety of formats, including essays, reflective writing and critical reviews of secondary sources
- CO 5: Understand the process of communicating and interpreting human experiences through literary representation using historical contexts and disciplinary methodologies
 - CO 6: Identify and understand phrase or sentence groups to make inferences
 - CO 7: Learn and apply the techniques of persuasion and negotiation

Program	Semester	Course Code	Course Name
BA	III	ENG233BL	BRITISH LITERATURE

- CO 1: Exposure to English Literature in all its variety from the 16th Century to the present day
- CO 2: Insights into the major trends in English Literature
- CO 3: Familiarize with the different genres of English Literature
- CO 4: Understand and appreciate the different forms of literature
- CO 5: Identify and discuss the main analytical concepts used in analyzing literature
- CO 6: Have an awareness of the role of analysis to inform appreciation and understanding of literature
- CO 7: Display a working knowledge of literature as a literary genre

Program	Semester	Course Code	Course Name
BA	IV	ENG244EE	ENGLISH FOR EMPOWERMENT-IV [CSS-III]

On successful completion of this practical course, the student will be able to;

- CO 1: Think and analyse situations using critical and creative skills
- CO 2: Display competence in oral and written communication
- CO 3: Understand the importance and realize the opportunities available in learning communication and soft skills
 - CO 4: Develop awareness of appropriate communication strategies
 - CO 5: Understand the concepts related to high communicative approach
 - CO 6: Participate in discussions, ted talks, talk shows and live shows

Program	Semester	Course Code	Course Name
BA	IV	ENG244LCC	LITERARY CROSS CURRENTS

- CO 1: Write and appreciate different types of prose and literature
- CO 2: Critically engage with different cultures and history
- CO 3: Establish connections across frontiers of disciplines
- **CO 5:** Understand the different trends of English Prose style and theme in the course of the evolution of English Prose from the 16th century to the late 20th century
 - CO 4: Familiar with important aspects of different genres of prose

Program	Semester	Course Code	Course Name
BA	V	ENG355CD	CULTURAL DIVERSITY, GENDER & HUMAN RIGHTS

- CO 1: Develop and expand imagination and expression and reduce self-consciousness and inhibition
- CO 2: Write and appreciate different types of prose and literature
- CO 3: Discover and break down blocks and barriers while exploring facets of their personality that were previously subdued
- CO 4: Ability to speak in the actor's vocabulary of behaviour and action
- CO 5: Build strong supple bodies that are capable of playing a variety of characters with various physical demands
- CO 6: Ability to distinguish the difference between the story of the script and what the story is about

Program	Semester	Course Code	Course Name
BA	V	ENG356CIW	CONTEMPORARY INDIAN WRITINGS AND FILM STUDIES

On successful completion of this practical course, the student will be able to;

- CO 1: Apply literary terminology for Narrative, Poetic and Dramatic genres
- CO 2: Appreciate literary form and structure in shaping text's meaning
- CO 3: Interpret literary texts in English by nurturing and utilizing their ability to understand drama in a skilled, knowledgeable and ethical manner
- CO 4: Become well acquainted with the rhetorical aspect of Drama, historical contexts and psycho-social aspects
- CO 5: Develop a broadly interdisciplinary approach to an understanding of film and its role in society
- CO 6: Be competent in developing critical responses to cinematic work based upon aesthetic or cultural values other than the entertainment model that dominates the mainstream

Program	Semester	Course Code	Course Name
BA	VI	ENG367EL	ENGLISH FOR LANGUAGE AND LINGUISTICS

- CO 1: Practice in phonemic transcription as an aid to develop facility in the use of a pronouncing dictionary
 - CO 2: Familiarize with important literary theories
 - CO 3: Apply principles of criticism to literary texts and undertake further reading of literary
- CO 4: Understand the basic methods of comparative literary terms and categories relating to literary history, theory and criticism including figurative language and prosody
- CO 5: Recognize and appreciate the importance of major literary genres, sub genres and periods in different traditions
 - CO 6: Explicate texts written in a wide variety of forms, styles, structures and modes

Program	Semester	Course Code	Course Name
BA	VI	ENG368ELT	CLUSTER PAPER: ENGLISH LANGUAGE TEACHING

- CO 1: Develop their knowledge in relation to a selected ELT specialism
- CO 2: Develop knowledge of ELT curriculum and syllabus design principles and apply this knowledge to a context and an actual learner or group of learners to whom they have access
- CO 3: Develop critical awareness of syllabuses and courses and implications for the selected specialism
- CO 4: Develop skills in the design and implementation of syllabuses and courses in relation to the selected specialism
- CO 5: Develop critical awareness of types and methods of assessment in relation to the selected specialism CO 6: Apply knowledge and understanding of assessment to the production of a form of assessment for the selected specialism

Program	Semester	Course Code	Course Name
BA	VI		CLUSTER PAPER: SECOND LANGUAGE ACQUISITION

On successful completion of this practical course, the student will be able to;

- CO1: Familiarize with key concepts, theories and empirical research on child and adult Second Language Acquisition
 - CO2: Acquire the ability to intelligently discuss aspects of the theory and practice of language Learning based on knowledge of the scholarly research in the field
 - CO3: Discuss problems and challenges in current research theory
 - CO4: Summarize important studies and idea of research studies
 - CO5: Analyse second language learner data from multiple perspectives
 - CO6: Write coherent papers on the above topics using the conventions of Applied Linguistics

Program	Semester	Course Code	Course Name
BA	VI	ENCACOLO	CLUSTER PAPER: INTRODUCTION TO SOCIO LINGUISTICS

- CO1: Maintain group identity and social relationships among the speakers
- CO2: Learn about a variety of topics dealing with the general theme of language in its social context
- CO3: Relate between language and society
- CO4: Principals' concepts of Sociolinguistics
- CO5: Draw on variation sociolinguistics, ethnography of communication, conversation analysis and critical discourse analysis

DEPARTMENT OF LOGISTICS MANAGEMENT

Program	Semester	Course Code	Course Name
BBA	I	BBA111FL	Fundamental of Logistics

On successful completion of this practical course, the student will be able to;

- CO 1: Students will be able to apply the Basic knowledge of Logistics in the real-life situation
- CO 2: This subject will enable them to enhance their ability and professional skills in Logistics

Program	Semester	Course Code	Course Name
BBA	I	BBA111MM	Materials Management

On successful completion of this practical course, the student will be able to;

CO 1: Students will be able to apply the knowledge about material management in the real-life business situation

CO 2: This subject will enable them to enhance their managerial ability and professional skills

Program	Semester	Course Code	Course Name
BBA	I	BBA111WD	Warehouse and Distribution Operations

On successful completion of this practical course, the student will be able to;

CO 1: Students will be able to apply the Basic knowledge of Warehousing and distribution centre operations in the real-life situation

CO 2: This subject will enable them to enhance their ability and professional skills

SKILL DEVELOPMENT COURSES

Program	Semester	Course Code	Course Name
B. Sc	I	SDC111FIC	Food Infestation Control

CO 1: To understand the principles of food infestation

CO 2: To study the types of infestation during food storage

CO 3: To study the methods for protection food from infest-ants

Program	Semester	Course Code	Course Name
B. Sc	II	SDC122NPD	New Product Development

On successful completion of this practical course, the student will be able to;

CO 1: Under the scope of R & D

CO 2: Develop new, Innovative products through knowledge gained

Program	Semester	Course Code	Course Name
B. Sc Food Tech	III	SDC233NUT	Nutraceutical

On successful completion of this practical course, the student will be able to;

- CO 1: To understand the basic concepts or nutraceuticals and their application in day today life
- CO 2: To impart the knowledge of the molecular basis of using phytochemical in prevention of chronic diseases
- CO 3: Identify major type of nutraceuticals products in the market and evaluate their safety and efficacy

DEPARTMENT OF ORIENTAL LANGUAGES

Program	Semester	Course Code	Course Name
B.A	II	SDC 121 PA	Performing Arts

- CO 1: Acquire the basic knowledge in Performing Arts
- CO 2: Understand the modern stage and performance on the stage
- CO 3: Comprehend and improve the skills related to performing arts on the stage
- CO 4: Understand various Telugu folk arts and their significance
- CO 5: Know the modes of presentation and skills pertaining to folk arts.

HUMAN VALUES AND PROFESSIONAL ETHICS

Program	Semester	Course Code	Course Name
B.A, B.Com & B.Sc	I & II	LSC 111 HVPE	Human Values and Professional Ethics

- CO 1: Understand the significance of value inputs in a classroom and start applying them in their Life and profession
- CO 2: Distinguish between values and skills, happiness and accumulation of physical
- CO 3: Facilities, the Self and the body, intention and Competence of an individual, etc.
- CO 4: Understand the value of harmonious relationship based on trust and respect in their life and profession
- CO 5: Understand the role of a human being in ensuring harmony in society and nature.
- CO 6: Distinguish between ethical and unethical practices and start working out the strategy to Actualize a harmonious environment wherever they work.

DEPARTMENT OF ZOOLOGY

Program	Semester	Course Code	Course Name
B.Sc (BZC)	I		Animal Diversity-Biology of Non Chordates

- CO 1: Describe general taxonomic rules on animal classification
- CO 2: Knowledge about important life processes and unique systems of non chordates.
- CO 3: Describing the parasitic adaptations and pathogenecity in Helminthes, Vermicompost in annelida
- CO 4: Describe higher invertebrate phyla using examples and importance of insects and Molluscans
- CO 5: Describe Echinodermata to Hemichordata with suitable examples and larval stages in relation to the phylogeny

Program	Semester	Course Code	Course Name
B.Sc (BZC)	II	` '	Animal Diversity- Biology of Chordates

- CO 1:Describe salient features of Protochordates and unique mode of metamorphosis in Herdmania.
- CO 2:Describe the general characters of Cyclostomes and .
- CO 3:Aquantained with the knowledge of important general accounts like migration in fishes and aves, parental care in amphibia, flight adaptations in aves and dentition in mammals.
- CO 4:Understand the significance of dentition and evolutionary significance
- CO 5:Understand the evolution of important organ systems in different classes of chordates.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III		Cell Biology, Genetics, Molecular Biology and Evolution

Program	Semester	Course Code	Course Name
---------	----------	-------------	-------------

- CO 1: Describe structure and functions of cell and cell organelles and to differentiate the organisms by their cell structure.
- CO 2: Understand what life is and how it functions at cellular level.
- CO 3:Have knowledge of history of origin of genetics, heredity, interaction of genes, inheritance patterns existing.
- CO 4: be aquaintained with various aspects of genetics involved in sex determination, human karyotyping and chromosomal aberrations
- CO 5: gain knowledge about the central dogma of molecular biology and flow of genetic information from DNA to proteins.
- CO 6: Understand the principles, forces and process of evolution of life and new species on the planet earth.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	IV	ZOOPME244	Animal Physiology, Cellular Metabolism and Embryology

On successful completion of this practical course, the student will be able to;

- CO 1: Describe the functions of important animal physiological systems including digestion, cardio-respiratory and renal systems.
- CO 2: Understand the muscle contraction and nerve impulse transmission in vertebrates and knowledge of various hormones and their affects.
- CO 3: Describe the structure, classification and chemistry of biomolecules and enzymes responsible for sustenance of life in living organisms
- CO 4: Understand the basic metabolic activities in animals related to the catabolism and anabolism of various biomolecules
- CO 5: Understands various in early embryonic development of vertebrates from gametogenesis to gastrulation and formation of primary germ layers.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	V		Immunology and Animal Biotechnology

- CO 1: Have knowledge of the organs of Immune system, types of immunity,cells and organs of immunity.
- CO 2: Describe immunological response as to how it is triggered (antigens) and regulated (antibodies)
- CO 3: Understand the applications of Biotechnology in the fields of industry and agriculture including animal cell/tissue culture, stem cell technology and genetic engineering.
- CO 4: Get familiarity with the tools and techniques of animal biotechnology.

Program	Semester	Course Code	Course Name
B.Sc (BZC)	V	ZOOLSMBDA356B(T)	Live Stock Management-I (Biology of diary animals)

- CO 1: Students at the successful completion of the course will be able to
- CO 2: Select the suitable breeds of livestock for rearing
- CO 3: Relate the anatomy of udder with letdown of milk
- CO 4: Identify and manipulate the reproductive behavior of cattle
- CO 5: Inspect the economics of dairy farming

Program	Semester	Course Code	Course Name
B.Sc (BZC)	V	ZOOLSMDPM35/B(1)	Live Stock Management-II (Dairy Production And Management)

On successful completion of this practical course, the student will be able to;

- CO 1: Identify and suggest the suitable housing system for the dairy farming
- CO 2: Understand management practices for the dairy farming
- CO 3: Learn the process of milk pasteurization and Prepare cream from milk
- CO 4: Apprise the various breeding techniques employed in livestock.

Program	Semester	Course Code	Course Name
II	ZOOSDC	Dairy Technology	II

- CO 1:Understand the pre-requisites for starting a Dairy farm
- CO 2:Recognize different breeds of Cows & buffaloes following safety precautions.
- CO 3:Prepare and give recommended feed and water for livestock
- CO 4: Maintain health of livestock along with productivity
- CO 5: Vaccination of cattle, nutrients requirements

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	LIFE SKILL COURSE	Health and Hygiene

- CO 1:what is a healthy diet and how nutritious diet is used for healthy life.
- CO 2:how can we use available information to optimize our diet?
- CO 3:the importance of health and hygiene in life
- CO 4:the importance of nutrition for a healthy life
- CO 5:different health care programs of India
- CO 6:basic concept of health impact assessment as a means of assessing the policies, plans and projects using quantitative and qualitative techniques
- CO 7:importance of community and personal health & hygiene measures

Program	Semester	Course Code	Course Name
B.Sc (BZC)	III	SKILL DEVELOPMENT COURSE	Poultry farming

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the poultry scenario in India, and various poultry systems, poultry farming.
- CO 2: Have knowledge of management of broilers, growers, chicks and also about banking insurance.
- CO 3:know about feed management, various diseases occur in poultry industry and their management and also about product harvesting.

DEPARTMENT OF FOOD TECHNOLOGY

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	I	FTE111FC	Food Chemistry

- CO 1-To know about various biochemical components of foods and their properties and application in food processing
- CO 2 To study about Classification structure and functions of Carbohydrates
- CO-3 To know about the importance of Biochemistry of proteins, amino acids and Enzymes
- CO- 4To know about the importance and application of enzymes in Food processing
- CO- 5- To study about classification, structure and functions of important fatty acids

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	II	FTE121FBN	Food Biochemistry and Nutrition

On successful completion of this practical course, the student will be able to;

- CO 1 To know about the emulsions, gels and foams and their application in food processing
- CO 2 To Study the Importance of carbohydrate metabolism.
- CO-3 To know about Fats and their Metabolism biologically important fatty acids
- CO-4 To know about the Fundamental prosperities of water classification of vitamins and minerals

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	II	FTE122IPE	Industrial processing equipment

- CO 1 -Students will be able to acquire the knowledge about different terms and measurements used in a food industry and the other operations involved in processing.
- CO 2 The students will acquire knowledge about the different drying techniques involved and extraction procedures involved during processing of different foods.
- CO-3- The students will be able to acquire the knowledge about filtration techniques involved in the processing industry and their limitations
- CO- 4- The students will be able to acquire the knowledge about working of equipment and how to maintain the equipment hygiene and sanitizing.
- CO- 5- The students will be able to acquire the knowledge about refrigeration procedures involved in a food industry.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	II	FTE123FAT	Food Additives and Toxicology

- CO-1 Students will be able to acquire the knowledge about substances added to food to maintain or improve its safety
- CO-2 Students will be able to acquire the knowledge about food additives need to be checked for potential harmful effects on human health before they can be used.
- C0-3 Students will be able to acquire the knowledge about assessing the presence of toxic compounds in food and their relation to adverse effects.
- CO-4 Students will be able to acquire the knowledge about harmful actions of chemical substances, to study their mechanisms of action.
- CO- 5- Students will be able to acquire the knowledge about the harmful toxicants which are naturally added and artificially added in different food

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	III	FTE234PHT	Post Harvest Technology of field crops

On successful completion of this practical course, the student will be able to;

CO-1 Knowledge about food spoilage agents and prevention

CO-2 Understand the safety control measures in handling foods from harvest to consumption agencies of control.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	III	FTE235TP	Technology of milk and milk products

On successful completion of this practical course, the student will be able to;

CO-1 To know the need for and importance of dairy industry

CO-2 To know the compositional and technological aspects of milk and Processed milk products

CO-3 To develop young entrepreneurs for self-employment through dairy technology and associated

activities

CO-4 to know the utilization of by-products of dairy industry

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	IV	FTE245TF	Technology of oils and fats

- CO-1- Students will be able to acquire the knowledge about oils, fats, and their derivatives as fundamental ingredients of many food products.
- CO- 2- To provide students with the knowledge necessary for a conscious use of oils and fats in food formulations
- CO-3 Students will be able to acquire the knowledge about optimization of production processes of the foods containing fats and oils.
- CO- 4- Students will be able to acquire the knowledge about the best oils and fats for food formulations, taking into account their chemical and physical characteristics, technological properties.
- CO- 5 Students will be able to acquire the knowledge about the byproducts that are derived

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	IV	FTE246TC	Technology of Confectionery

On successful completion of this practical course, the student will be able to;

- CO-1- Students will be able to acquire the knowledge about the role of ingredients in confectionaries.
- CO-2- Students will be able to acquire the knowledge about the sugar processing and treatment.
- CO-3 -Students will be able to acquire the knowledge about the technology involved in chocolate preparation.
- CO-4 Students will be able to acquire the knowledge about the technology involved in confectionary and miscellaneous production.
- CO-5 Students will be able to acquire the knowledge about the manufacturing of miscellaneous products.

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	V	SKILL DEVELOPMENT COURSE	Technology of Meat, Fish, poultry and its products

- CO I- students will be able to acquire the knowledge about the structure and nutritive value of the met.
- CO-2 students will be able to acquire the knowledge about slaughtering techniques of poultry and meat.
- CO-3 Students will be Able to acquire the knowledge about the processing of meat
- CO-4- Students will be able to acquire the knowledge about different processing techniques of poultry and fish

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	V	FTE358BST	Baking science and Technology

- CO-1 To understand the science and technology of baking
- CO-2 To the role of different ingredients in baking
- CO-3 To develop skills in planning and maintenance of a baking institution
- CO-4 To gain knowledge about the bread, formulation & ingredients
- CO-5 To learn the preparation of frozen dough products & application of starches in bakery industry

Program	Semester	Course Code	Course Name
B.Sc (Food Technology)	V	FTE358BST	Baking science and Technology

On successful completion of this practical course, the student will be able to;

- CO-1 To understand the science and technology of baking
- CO-2 To the role of different ingredients in baking
- CO-3 To develop skills in planning and maintenance of a baking institution
- CO-4 To gain knowledge about the bread, formulation & ingredients
- CO-5 To learn the preparation of frozen dough products & application of starches in bakery industry

DEPARTMENT OF FOOD TECHNOLOGY

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	I	BTY111CBG	Cell Biology & Genetics

- CO 1: Students will be able to acquire, articulate, retain, and apply knowledge relevant to cell and various cell organelles.
- CO 2: The students will gain thorough knowledge about the structure of gene, chromosome organization, and gene transfer methods.
- CO 3: The students will be able to know the basic and classical genetics concepts, thereby enhancing their knowledge about how genes segregate and patterns followed by them during inheritance.
- CO 4: This teaches about various phases in the cell cycle and division. It also gives insights into how chromosome number varies in each phase and by the end of the cell division.
- CO 5: Students shall be equipped with basic knowledge of microbiology, sterilization techniques regularly followed in the laboratory.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	II	BTY122PMB	Principles and Methods in Biological Separation Techniques

- CO 1: The course delves into the principles and working methods of various centrifuges, empowering students to acquire the knowledge necessary for the effective separation of diverse biological samples.
- CO 2: This unit's primary strength lies in imparting knowledge on the fundamental principles of instrumentation and the applications of chromatography for evaluating and measuring biological systems.
- CO 3: Detailed discussions on electrophoretic techniques, which have revolutionized the fields of medicine, genetics, and drug delivery strategies, are a key focus of this course.
- CO 4: The course elucidates the applications of radioactivity in evaluating various biological systems and covers the principles and laws of spectroscopy.
- CO 5: Students gain basic knowledge of widely used terminology in Biostatistics, along with an understanding of common research tools, including their scope, advantages, and disadvantages.

Program	Semester	Course Code	Course Name
B.Sc	III	ВТҮ233МОВ	Molecular Biology
(Biotechnology)			

- CO 1: Students will be able to acquire and articulate knowledge relevant to genome structure, and they will study the evidences regarding DNA proving as genetic material.
- CO 2: The students will be able to know the role of enzymes involved in Transcription process, general characteristics, and its mechanism.
- CO 3: Acquire the features and properties of genetic code and how the translation process begins.
- CO 4: Understand the concepts needed to explain gene regulation and expression.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	III	BTY234IMT	Immuno Technology

On successful completion of this practical course, the student will be able to;

- CO 1: Understanding the overview of the immune system and how it acts in the body.
- CO 2: Understanding the concepts and structure, types, and functions of antigens and antibodies. Factors affecting these structures will also be learned.
- CO 3: The student will be able to gain knowledge of all the mechanisms involved in antigenantibody interactions.
- CO 4: To make them understand the MHC concept, reactions, and antigen presentation concept, immune responses to infectious organisms and tumors, allergies, and immuno deficiencies.
- CO 5: To make them communicate efficiently all the basic concepts regarding immunological responses, mechanisms of this response, its regulation, and the genetic basis.
- CO 6: The techniques involved in diagnosis, treatment, and their applications are taught.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	IV	COURSE CODE	COURSE NAME

- CO 1: This course aims to facilitate students in acquiring knowledge about various types of enzymes involved in genetic engineering and their applications in recombinant technology.
- CO 2: Students will gain extensive knowledge of various gene transfer mechanisms based on different cell sources, along with a comprehensive understanding of their unique mechanisms, advantages, and disadvantages.
- CO 3: The course delves into advanced application techniques such as Restriction Fragment Length Polymorphism (RFLP), Random Amplified Polymorphic DNA (RAPD), and various other important applications of recombinant DNA technology.

Program	Semester	Course Code	Course Name
B.Sc (Biotechnology)	VI	BTY366PABT	Plant & Animal Biotechnology

- CO 1: Students will gain knowledge in micropropagation, understanding various steps involved, production of haploid plants, and exploring their applications. The curriculum covers plant regeneration, methods of organogenesis, cryopreservation, and secondary metabolites.
- CO 2: This section focuses on various types of animal cell culture media, emphasizing the importance of serum, and delves into the physicochemical properties of media. Key concepts include the establishment and maintenance of cell lines, along with an exploration of commonly used cell lines.
- CO 3: The unit emphasizes gene therapy applications and explores various animal models used in biological research. Gene recombination methods involved in the production of insulin and somatostatin are taught.
- CO 4: The course places a spotlight on Intellectual Property Rights (IPR) and patents, addressing the right of protection for inventions.
- CO 5: Students will acquire proficiency in handling basic aseptic techniques essential in the fields of plant and animal biotechnology.

Program	Semester	Course Code	Course Name
B.Sc	VI	BTY367EIBT	Environmental And
(Biotechnology)			Industrial Biotechnology

- CO 1: Acquiring and articulating knowledge relevant to various types of pollution, key compounds causing pollution, their measurement techniques, and control measures using biotechnological processes.
- CO 2: Gaining knowledge on various bio processes in the degradation and remediation of pollutants, wastes, and understanding the role of biotechnology in these processes.
- CO 3: Emphasizing concepts of biofuels, their importance in addressing current challenges, the significance of biogas, and the concepts of phytoremediation.
- CO 4: Understanding the basic design of a bioreactor, knowledge on downstream processing, and discussing various processes involved. Highlighting the industrial production of vaccines and insulin based on current technological developments.
- CO 5: Recognizing the need for bioinformatics and its applications. Developing knowledge in searching for DNA/protein sequences, retrieving them, and aligning them for better analysis.
- CO 6: Exploring various measurement techniques of pollutants, including dry lab techniques such as searching, retrieving, and aligning them.

DEPARTMENT OF MASTER OF PUBLIC POLICY

Program	Semester	Course Code	Course Name
B.A. Public policy	I	NBAPPA 104	Introduction to public Policy

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the meaning, scope, need, and importance of public policy, demonstrating a comprehensive knowledge of the fundamental concepts in the field.
- CO 2: Evaluate the contributions and perspectives of prominent scholars in the field of policy sciences, such as David Easton, Harold Lasswell, and Yehezkel Dror, and critically analyze their theories to comprehend the evolution of policy science over time.
- CO 3: Analyze the distinct roles played by the legislature, executive, bureaucracy, and judiciary in policy formulation, implementation, and evaluation processes within the Indian context.
- CO 4: Develop the ability to critically evaluate public policies, considering their effectiveness, efficiency, and impact on society, and apply appropriate evaluation methods.
- CO 5: Apply theoretical knowledge and analytical skills to real-world policy issues, demonstrating the ability to formulate, implement, and evaluate policies in diverse contexts.
- CO 6: Understand the significance of political parties in shaping public policy and analyze their impact on the decision-making process.

Program	Semester	Course Code	Course Name
B.A. Public policy	II	INBAPPA204	Public policy–organs of state

- CO 1: Understand Indian Parliament's structure, including Lok Sabha, Rajya Sabha, Budget, and Parliamentary Committees, enhancing knowledge of legislative processes.
- CO 2: Gain insights into the Indian Judiciary system, including court hierarchy, Supreme Court jurisdiction, and landmark judgments, and analyze differences between Union and State Judiciary, along with the Uniform Civil Code concept.
- CO 3: Acquire knowledge about State Government, roles of Governor, Chief Minister, legislative bodies like Vidhan Sabha, Vidhan Parishad, legislative procedures, and administration of Scheduled Areas, enhancing understanding of state-level governance.
- CO 4: Explore Local Self-Government history, focusing on Panchayati Raj, 73rd Amendment Act, PESA Act, and rights of Scheduled Tribes. Analyze Urban Local Government, 74th Amendment Act, and cooperatives, understanding grassroots democracy and community participation.
- CO 5: Compare Union, State, and Local Governments, analyzing their powers, functions, and interrelationships. Develop a comprehensive understanding of India's political system, enabling critical evaluation of policies and governance mechanisms

Program	Semester	Course Code	Course Name
B.A. Public policy	III		Introduction to political system

- CO 1: Understand the executive branch of government, roles, and powers of key officials at union and state levels.
- CO 2: Analyze Indian legislative framework, including Lok Sabha, Rajya Sabha functions, parliamentary proceedings, and budgetary process.
- CO 3: Examine State Legislature organization, roles of presiding officers, legislative processes, and state-level legislation dynamics.
- CO 4: Gain knowledge of India's judicial system, focusing on Supreme Court, High Courts, judicial review, and importance of an independent judiciary.
- CO 5: Develop critical understanding of Indian legal system, roles of subordinate courts, judge appointment, powers, and hierarchical structure.

Program	Semester	Course Code	Course Name
B.A. Public policy	IV		Public policy and Good Governance

- CO 1: Understand the various types of public policies and analyze their significance in governance.
- CO 2: Examine the nature of public policy in India and critically evaluate the achievements and shortcomings of planned policymaking, along with the challenges in policy implementation.
- CO 3: Analyze and evaluate specific government schemes such as Beti Bachao Beti Padhao, Mahatma Gandhi National Rural Employment Guarantee Act, and Pradhan Mantri Awas Yojana, understanding their objectives, implementation, and impact
- CO 4: Comprehend the dimensions of development and identify the challenges associated with the development process in the context of India
- CO 5: Recognize the role of social capital organizations in society, classify them according to their functions, and assess the implications of national policies related to the voluntary sector and non-governmental organizations

DEPARTMENT OF AGRISTORAGE AND SUPPLY CHAIN MANAGEMENT

Course Name
Agricultural Economics

On successful completion of this practical course, the student will be able to;

- CO 1: Understand fundamental economic concepts, including micro and macroeconomics, agricultural economics, and factors influencing agricultural development.
- CO 2: Analyze demand and supply principles, including elasticity, utility theory, and consumer equilibrium.
- CO 3: Examine the evolution, functions of money, inflation, deflation, and banking roles in the economy.
- CO 4: Explore agricultural and public finance, taxation, revenue, expenditure, and economic systems.
- CO 5: Evaluate emerging trends in production, processing, marketing, exports, and policy controls in agro-business enterprises.

Program	Semester	Course Code	Course Name
BMS	I	BMS111IAL	Introduction to Agri Logistics

- CO 1: Grasp the core concepts of agri logistics and supply chain management, recognizing their importance in diverse agricultural settings.
- CO 2: Apply logistics principles to address challenges in procurement, processing, packaging, storage, transportation, and distribution of agricultural products.
- CO 3: Analyze handling and transport systems, including air, sea, road, and rail logistics, along with related terminology and regulations .
- CO 4: Explore the role of IT in agri logistics, especially in processing, marketing, and exports, while understanding relevant policies and regulations.
- CO 5: Evaluate outsourcing in supply chain management, including the roles of 3PLs and 4PLs, reverse logistics, and market-driven activities, and suggest strategies for effective agri logistics management.

Program	Semester	Course Code	Course Name
BMS	I	BMS11IPHM	Post – Harvest Management

- CO 1: Grasp fundamental post-harvest management concepts, including horticulture geography and pre-harvest operations.
- CO 2: Apply effective post-harvest handling practices, maturity indices, and postharvest treatments.
- CO 3: Understand post-harvest physiological changes, ethylene's role, and packaging methods.
- CO 4: Adhere to pack house hygiene, safety standards, and quality protocols for various fruits and vegetables.
- CO 5: Implement best practices for flowers, tubular crops, and grain crops post-harvest management

Program	Semester	Course Code	Course Name
BMS	I	BMS111POM	Principles of management

On successful completion of this practical course, the student will be able to;

- CO 1: Understand foundational management concepts, contemporary challenges, and managerial roles.
- CO 2: Master planning, decision-making processes, creativity, and strategic planning.
- CO 3: Gain insights into directing, motivation theories, leadership styles, and staffing processes.
- CO 4: Grasp organizational design, structure, departmentation, and principles of delegation.
- CO 5: Analyze ethics, corporate social responsibility, and environmental factors affecting businesses.

Program	Semester	Course Code	Course Name
BMS	I	BMS11IWAP	Warehousing for Agricultural Produce

- CO 1: Understand warehousing concepts, challenges, and the role of technology in post-harvest management of agricultural produce.
- CO 2: Develop and implement effective Standard Operating Procedures for warehouse operations, covering goods receipt, storage, quality control, risk mitigation, and delivery processes.
- CO 3: Proficiently manage warehouse information, including capturing key data, maintaining records, and integrating IT for efficient Warehouse Management Systems.
- CO 4: Comprehend the conceptual framework of Warehouse Receipt Management, including negotiability, components, and legal aspects, especially related to Electronic Negotiable Warehouse Receipts.
- CO 5: Identify opportunities and challenges in the warehousing sector, recognizing required skill sets, exploring business options, and understanding employment prospects while addressing key sector challenges in India.

Program	Semester	Course Code	Course Name
BMS	II	BMS121OB	Organizational Behaviour

- CO 1: Understand Organizational Behaviour fundamentals, including nature, structure, and behaviorist frameworks, and grasp individual behaviors and personality development concepts.
- CO 2: Gain insights into Perception, Attitudes, and Job Satisfaction, understanding their nature, sources, and consequences, as well as job stress causes and effects.
- CO 3: Develop knowledge of Organizational Conflicts, Group Dynamics, Committee Organizations, and Informal Communication Systems within groups.
- CO 4: Acquire expertise in Organizational Change and Development, including strategies to overcome resistance, change processes, and various Organizational Development interventions.
- CO 5: Explore Leadership Theories, Types, and Styles, understanding Trait theory, Michigan studies, Fiedler's contingency model, and modern leadership approaches.

Program	Semester	Course Code	Course Name
BMS	II	BMS121TAC	Trading in Agri Commodities

On successful completion of this practical course, the student will be able to;

- CO 1: Understand agricultural marketing concepts, market structure, and demand-supply dynamics. Calculate producer's surplus of agri-commodities.
- CO 2: Evaluate pricing strategies, market promotion techniques, and assess advantages/disadvantages.
- CO 3: Analyze market functionaries, channels, integration, costs, and propose methods to reduce marketing expenses.
- CO 4: Study agricultural prices, policies, marketable surplus, and historical price trends of commodities.
- CO 5: Grasp international trade theories, GATT, WTO implications, and analyze IPR and GST impact on agricultural trade.

Program	Semester	Course Code	Course Name
BMS	II	BMS121CA	Cost accounting

- CO 1: Student will be able to apply costing techniques in different types of industries.
- CO 2: Student will be able to apply costing techniques in business decisions.
- CO 3: Understand and use the basic concepts of costing and costing systems in their professional life.
- CO 4: Integrate cost accounting with financial accounting for management decision making.

Program	Semester	Course Code	Course Name
BMS	II	BMS121QAA	Quality Control, Assurance & Audit

- CO 1: To understand basic concept of quality and systems of quality management.
- CO 2: To be able to get ready for implementing a quality management system in the organization.
- CO 3: To enable the students in getting ready for a quality audit of the supply chain system.

Program	Semester	Course Code	Course Name
BMS	II	BMS121DCF	Derivatives with Commodity Futures

On successful completion of this practical course, the student will be able to;

- CO 1: Understand fundamental concepts of commodity derivatives, including products, participants, and market functions.
- CO 2: Apply various commodity futures instruments for trading, analyzing payoff structures and comparing futures and options use.
- CO 3: Demonstrate knowledge of futures trading systems, including trading cycles, order types, margins, charges, and risk management.
- CO 4: Analyze the regulatory framework governing commodity derivatives, including rules, participants, and dispute resolution procedures.
- CO 5: Evaluate trading patterns, market efficiency, and compile information on recognized stock

Program	Semester	Course Code	Course Name
BMS	III	BMS231CHT	Cold Chain Technology

- CO 1: Understand the fundamental concepts of Cold Chain and its importance in the preservation of agricultural produce.
- CO 2: Demonstrate knowledge of Cold Chain infrastructure components, including refrigeration systems, insulation techniques, and distribution centers.
- CO 3: Implement effective monitoring systems for temperature and humidity in Cold Chain logistics, utilizing automated and remote monitoring technologies.
- CO 4: Apply principles of Reefer Logistics in transporting agricultural produce, including reefer container operations, handling chilled and frozen cargos, and ensuring good transportation practices.
- CO 5: Practice good Cold Chain management, including SOPs for specific fruits and vegetables commodities, traceability, and adherence to quality standards for domestic and export markets.

Program	Semester	Course Code	Course Name
BMS	III	BMS231ES	ENVIRONMENTAL STUDIES

- CO 1: Understand the components of ecosystems, ecological structures, energy flow, and agrochemical cycles
- CO 2: Analyze different types of pollution, their sources, standards, and adverse effects (Unit II: Pollution).
- CO 3: Demonstrate knowledge of solid waste management, including classification, collection, disposal, and resource recovery methods (Unit III: Solid Waste Management).
- CO 4: Explore non-conventional energy sources and assess their potential, especially in the context of India (Unit IV: Non-Conventional Energy Sources).
- CO 5: Comprehend social issues related to environmental conservation, sustainable development, public awareness, and key environmental legislations in India (Unit V: Social Issues and EIA).

Program	Semester	Course Code	Course Name
BMS	III	BMS231HFP	Handling of Fresh Produces

On successful completion of this practical course, the student will be able to;

- CO 1: Understand fresh produce market preparation and categorization.
- CO 2: Apply value addition techniques such as sanitation, canning, and dehydration.
- CO 3: Implement tropical fruits ripening and grading techniques.
- CO 4: Proficiently execute fresh cut packing methods, including retail and special techniques.
- CO 5: Analyze challenges and opportunities in E-commerce delivery for fresh produce.

Program	Semester	Course Code	Course Name
BMS	III	BMS231HFP	Mechanization In Agri Logistics

- CO 1: Understand agricultural mechanisation principles, transportation methods, and benchmarking processes.
- CO 2: Apply knowledge of product handling methods, automated systems, and traceability options in agri-logistics.
- CO 3: Demonstrate proficiency in automated storage management techniques, including palletisation, conveyors, silos, and AS&RS.
- CO 4: Utilize automation technologies for tracking and traceability, such as GPS, RFID, AGVS, RTWCS, CIW, and RFDT.
- CO 5: Grasp the basics of block chain technology and its applications in sustainable agriculture, transparency, and trust in agri-food systems.

Program	Semester	Course Code	Course Name
BMS	III	BMS231PM	Pest Management

- CO 1: Understand pest categorization, significance in agriculture, and relevant laws and regulations.
- CO 2: Identify and assess major storage pests, recognize signs of infestation, and detect hidden infestation sources.
- CO 3: Learn insect pest control methods, including prophylactic treatments, insecticide application, and fumigation techniques.
- CO 4: Grasp methodologies for non-insect pest management, including fungi, bacteria, rodents, and birds, utilizing various control measures.
- CO 5: Comprehend Integrated Pest Management (IPM) principles, including sanitation, pest monitoring, preventive methods, and judicious curative measures, applying strategies in supply chain management.

Program	Semester	Course Code	Course Name
BMS	III		Risk Assessment and Management

On successful completion of this practical course, the student will be able to;

- CO 1: Understand fundamental concepts of risk in supply chain management, including peril & hazard, risk categories, and risk prioritization.
- CO 2: Develop a risk management framework with strategies for identifying, mitigating, and auditing potential risks, and ensuring health and safety in warehousing.
- CO 3: Recognize insurable risks, understand insurance functions, and effectively manage insurance policies for agricultural produce.
- CO 4: Learn techniques for preventing and managing major perils like fire, flood, and ensuring security in agricultural storage and transport.
- CO 5: Comprehend regulatory compliance processes, identify non-insurable risks, and understand indemnification for risk mitigation in agricultural supply chains.

Program	Semester	Course Code	Course Name
BMS	IV	BMS24IMM	Marketing Management

- CO 1: Understand fundamental concepts of risk in supply chain management, including peril & hazard, risk categories, and risk prioritization.
- CO 2: Develop a risk management framework with strategies for identifying, mitigating, and auditing potential risks, and ensuring health and safety in warehousing.
- CO 3: Recognize insurable risks, understand insurance functions, and effectively manage insurance policies for agricultural produce.
- CO 4: Learn techniques for preventing and managing major perils like fire, flood, and ensuring security in agricultural storage and transport.

Program	Semester	Course Code	Course Name
BMS	IV	BMS24IMM	Marketing Management

- CO 1: Discuss the importance of macro and micro environment in the company's marketing function.
- CO 2: Differentiate the consumer and institutional buyer behaviour.
- CO 3: Define the target segments for the product
- CO 4: Justify the importance of products, branding, and new product development.
- CO 5: Understand the importance of Channel of distribution

Program	Semester	Course Code	Course Name
BMS	IV	BMS241AP	Agri-Preneurship

On successful completion of this practical course, the student will be able to;

- CO 1: To get an understanding of the conceptual framework of entrepreneurship development in India.
- CO 2: To learn about various processes involved in the development of an agri preneurship venture.
- CO 3: To know about various potential options available towards setting up an agri-business venture.
- CO 4: To learn about various challenges in the way of agri preneurship and strategies to overcome them.
- CO 5: To know as to how to avail various benefits available under governmental support programmes for agri-business development.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241AEI	Agricultural Exports & Imports

- CO 1: Understand the legal framework in agriculture, focusing on post-harvest management challenges and strategies for higher returns to farmers.
- CO 2: Analyze the importance of quality standards in agricultural produce, including relevant acts and enforcement mechanisms.
- CO 3: Evaluate legal aspects related to transportation logistics during post-harvest, including relevant acts governing transportation of agricultural produce.
- CO 4: Assess the legal framework for storage, preservation, and warehousing of agricultural produce, including acts governing these aspects.
- CO 5: Understand the legal aspects of marketing agricultural produce, including relevant acts, taxation, and trade regulations.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241PT	Packaging Technology

- CO 1: Understand the history, importance, and functions of food and agri-products packaging, including material properties, design, and testing.
- CO 2: Analyze wood, paper, glass, and metal packaging materials, including their structure, types, and uses, and compare wooden containers with CFB boxes.
- CO 3: Apply packaging rules, labeling techniques, and technology usage for packaging fruits, vegetables, and their products.
- CO 4: Comprehend aseptic packaging, active food packaging, edible films, coatings, and intelligent/smart/active packaging systems, and their food applications.
- CO 5: Implement various packaging techniques, including knowledge of containers, primary and secondary packaging, and packaging machines, for effective food and agri-products packaging.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241DVCM	Dairy Value Chain & Marketing

- CO 1: Understand the historical development and current trends in dairy production globally and in India.
- CO 2: Apply techniques for ensuring clean milk production and procurement, and comprehend milk contamination sources.
- CO 3: Demonstrate knowledge of dairy operations, milk processing, quality assurance, and various milk products.
- CO 4: Analyze milk marketing structures, distribution channels, and pricing factors, considering market segmentation.
- CO 5: Evaluate the milk value chain, government policies, international regulations, and technology impact on dairy marketing.

Program	Semester	Course Code	Course Name
BMS	IV	BMS111POM	Principles of Management

- CO 1: Understand the nature, definition, characteristics, and scope of management.
- CO 2: Apply the principles of planning, including objectives, policy, procedures, forecasting, and decision making.
- CO 3: Demonstrate knowledge of directing principles, motivation theories, leadership styles, and staffing techniques.
- CO 4: Understand organization design, structure, departmentalization, span of control, authority, responsibility, and delegation.

Program	Semester	Course Code	Course Name
BMS	IV	BMS111POM	Principles of Management

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the nature, definition, characteristics, and scope of management.
- CO 2: Apply the principles of planning, including objectives, policy, procedures, forecasting, and decision making.
- CO 3: Demonstrate knowledge of directing principles, motivation theories, leadership styles, and staffing techniques.
- CO 4: Understand organization design, structure, departmentalization, span of control, authority, responsibility, and delegation.

DEPARTMENT OF e COMMERCE OPERATIONS

Program	Semester	Course Code	Course Name
BMS	I	BMS111IEO	Introduction to E- Commerce Operations

- CO 1: Understand the basics of e-commerce logistics and its changing dynamics.
- CO 2: Analyze different types of e-commerce logistics models, including B2C, B2B, C2C, G2B, and G2G.
- CO 3: Examine the impact of technology on e-commerce logistics, including AI, GPS tracking, and drone delivery.
- CO 4: Explore the future prospects of e-commerce logistics in India, including upcoming regulations and technologies.
- CO 5: Understand the growth projections for e-commerce in India and analyze the technologies under development for e-commerce logistics.

Program	Semester	Course Code	Course Name
BMS	II	BMS121MM	Marketing Management

On successful completion of this practical course, the student will be able to;

- CO 1: Discuss the importance of macro and microenvironment in the company's marketing function.
- CO 2: Define the target segments for the product and understand factors influencing consumer buying behavior.
- CO 3: Justify the importance of products, branding, and new product development.
- CO 4: Understand the importance of Channel of distribution and analyze elements of promotion mix. (
- CO 5: Discuss social responsibility, ethical issues in marketing, global marketing, and marketing in the 21st Century.

Program	Semester	Course Code	Course Name
BMS	II	BMS121WM	Warehouse Management

- CO 1: Explain the types of warehouses, functions, and layout-related functions.
- CO 2: Understand various stages involved in receiving and dispatching goods, including quality parameters and quality checks.
- CO 3: Describe various warehouse activities such as sorting, loading, unloading, picking, packing, and dispatch.
- CO 4: Manage warehouse utilization, handling of hazardous cargo, and use of Material Handling Equipment.
- CO 5: Implement safety rules and procedures in a warehouse and understand the principles of Materials Handling system.

Program	Semester	Course Code	Course Name
BMS	II	BMS121MH	Material Handling

- CO 1: Understand the concepts of Materials Management, Logistics, and Supply Chain Management.
- CO 2: Describe various types of Material Handling Equipment and their applications.
- CO 3: Explain Material Requirement Planning (MRP), forecasting, and material flow in MRP.
- CO 4: Implement quality control measures, inventory control techniques, and value engineering concepts.
- CO 5: Apply health and safety measures in Materials Handling systems and understand the principles of Physical distribution logistics.

Program	Semester	Course Code	Course Name
BMS	II	BMS121FMO	First Mile Operations

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the importance and flow of First Mile operations in e-commerce logistics.
- CO 2: Describe the shipment pickup process, including coordination, documentation, and safety measures.
- CO 3: Explain various shipment processing operations, layout of Processing Centres, and roles of Processing Centre staff.
- CO 4: Analyze First Mile analytics, metrics, and tools for monitoring and improving operations.
- CO 5: Address key challenges in First Mile operations and apply communication techniques to resolve exceptions.

Program	Semester	Course Code	Course Name
BMS	II	BMS121BE	Business Environment

- CO 1: Understand the framework of the business environment, including its internal and external elements.
- CO 2: Analyze the economic, political, legal, socio-cultural, technological, and international aspects of the business environment.
- CO 3: Examine how different factors and trends in the external environment impact a proposed business venture.
- CO 4: Conduct a business analysis of the local and national environment considering various environmental elements.

Program	Semester	Course Code	Course Name
BMS	II	BMS121ME	Managerial Economics

- CO 1: Distinguish between micro and macroeconomics and understand the concepts of utility and substitution.
- CO 2: Explain demand, supply, market equilibrium, production concepts, and cost functions.
- CO 3: Understand market structures, pricing strategies, and national income measurement.
- CO 4: Analyze trade cycles, causes, and methods to control trade cycles.

Program	Semester	Course Code	Course Name
BMS	III	BMS231ELO	E-Commerce Logistics Operations

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the basics of logistics in E-Commerce and its role in the supply chain.
- CO 2: Comprehend the process of capacity management and its application in inbound and outbound logistics.
- CO 3: Explain the strategies used in logistics planning and execution, and understand the systems used in E-Commerce logistics.
- CO 4: Understand the concepts of logistics and systems integration, and the interlink between logistics and operations.
- CO 5: Evaluate the integration of logistics into operations, assess logistics operations, and understand partner termination processes.

Program	Semester	Course Code	Course Name
BMS	III	BMS231LMO	Last Mile Operations

- CO 1: Understand the basics of last mile logistics in E-Commerce and its challenges.
- CO 2: Describe the last mile processes, including forward and reverse logistics stages.
- CO 3: Analyze various metrics and customer service processes involved in last mile logistics.
- CO 4: Explain the prospects and innovations in last mile logistics, including technology trends.
- CO 5: Understand the value creation aspects through network design, process improvement, and strategic decisions in reverse logistics.

Program	Semester	Course Code	Course Name
BMS	III	BMS231MIS	MIS for E-Commerce

- CO 1: Understand the concepts of Management Information Systems and their historical context.
- CO 2: Explore global E-business processes and comprehend electronic commerce concepts.
- CO 3: Understand the relationship between decision making and information systems, and analyze systems for planned organizational change.
- CO 4: Grasp the concepts of business intelligence, strategic, tactical, and operational decisions in MIS.
- CO 5: Evaluate the role of MIS in managing global systems and understand system analysis and design.

Program	Semester	Course Code	Course Name
BMS	III	BMS231RLE	Reverse Logistics for E- Commerce

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the importance and challenges of reverse logistics in E-Commerce.
- CO 2: Describe the stages and tools in reverse logistics processes.
- CO 3: Analyze the shipping and information systems in reverse logistics, and assess the innovations and market prospects.
- CO 4: Understand the creation of value through network design, strategic decisions, and maintaining partnerships in reverse logistics.
- CO 5: Explore the impact of new technology trends and digital transformation on reverse logistics.

Program	Semester	Course Code	Course Name
BMS	III	BMS231TFE	Transportation for E- Commerce

- CO 1: Understand the importance and functions of transportation in the supply chain.
- CO 2: Comprehend various transportation management techniques and modalities.
- CO 3: Understand transportation management systems and their integration with supply chain functions.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241HLO	Hub and Line Operations

- CO 1: Understand the concepts of Hub & Line Operations in E-commerce and the importance of Line Haul logistics.
- CO 2: Analyze inbound and outbound logistics in the context of E-commerce and comprehend the layout of Processing Centers.
- CO 3: Explain the various machines and equipment used in hub operations and assess prospects in Line Haul Logistics.
- CO 4: Evaluate the relationship between logistics and fulfillment services and explore innovations and technology trends in Line Haul Logistics.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241HLO	Hub and Line Operations

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the concepts of Hub & Line Operations in E-commerce and the importance of Line Haul logistics.
- CO 2: Analyze inbound and outbound logistics in the context of E-commerce and comprehend the layout of Processing Centers.
- CO 3: Explain the various machines and equipment used in hub operations and assess prospects in Line Haul Logistics.
- CO 4: Evaluate the relationship between logistics and fulfillment services and explore innovations and technology trends in Line Haul Logistics.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241OIE	Outsourcing in e Commerce

- CO 1: Understand the fundamentals of Outsourcing and its implementation in E-commerce businesses.
- CO 2: Analyze E-commerce outsourcing, assess strategic assessments, and understand risk management in outsourcing.
- CO 3: Explore the future trends and innovations in E-commerce outsourcing.
- CO 4: Evaluate the best practices in outsourcing assessments and techniques to assess and manage risks associated with outsourcing.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241PFE	Packaging for e Commerce

- CO 1: Understand the concept of packaging in E-commerce, including types, functions, and materials.
- CO 2: Analyze the concept of brand equity and its relation to packaging in E-commerce.
- CO 3: Explain the packaging journey in E-commerce, from consumer research to order delivery and receipt.
- CO 4: Evaluate packaging techniques, technologies, and future prospects in the E-commerce industry.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241ECS	e Commerce Customer Service

On successful completion of this practical course, the student will be able to;

- CO 1: Create customer-centric organizations and develop active listening and communication skills.
- CO 2: Implement effective customer service strategies, handle customer encounters, and manage customer hand-offs.
- CO 3: Understand customer behavior, analyze customer service tools, and implement customer service surveys and analysis.
- CO 4: Evaluate various communication styles and strategies used in E-commerce customer service.

Program	Semester	Course Code	Course Name
BMS	IV	BMS241FO	Fulfillment Operations

- CO 1: Understand the basics of Fulfillment operations in E-commerce, including operational models and key drivers.
- CO 2: Analyze the relationship between logistics and Fulfillment services, including warehousing aspects and packaging.
- CO 3: Explore the role of technology in Fulfillment processes and platforms.
- CO 4: Evaluate prospects in Fulfillment, including bundled orders, mini Fulfillment via technology, and market trends.

DEPARTMENT OF HISTORY

Program	Semester	Course Code	Course Name
B.A,	I	HIS111IHC	ANCIENT INDIAN HISTORY & CULTURE

On successful completion of this practical course, the student will be able to;

- CO 1: Identify and define various kinds of sources and understand how history books are shaped
- CO 2: Compare and contrast various stages of progress from IVC to Vedic age and analyze the Jain, Buddhist and Vedic faiths
- CO 3: Increase the awareness and appreciation of Transition from Territorial States to Emergence of Empires
- CO 4: Analyze the emergence of the Mauryan and Gupta empires during the "classical age" in India
- CO 5: Evaluate the key facets of ancient society, polity and culture in South India—the feudalism, and the rise of technology and commerce.

Program	Semester	Course Code	Course Name
B.A,	II	HIS122IHC	MEDIEVAL INDIAN HISTORY &CULTURE (1206 A.D to 1764 A.D)

On successful completion of this practical course, the student will be able to;

- CO 1: Understand the socio, economic and cultural conditions of medieval India
- CO 2: Describe the advent of Islam in India and study the traces of political and cultural expansion of Turks & Afghans
- CO 3: Explain the Administration and art and architecture of Vijayanagar Rulers, Mughal and also analyse the rise of the Marathas and the contribution of Shivaji
- CO 4: Evaluate the establishment of the British rule in India and understand the dangerous consequences disunity at all levels

Program	Semester	Course Code	Course Name
B.A,	III	HIS233MHC	MODERN INDIAN HISTORY & CULTURE (1764-1947 A. D)

- CO 1: Unearth the true nature of the British rule and its disastrous impact on Indian economy and society
- CO 2: Gauge the disillusionment of people against the Company's rule even during the early 19th century
- CO 3: Assess the causes and effects of Reformation movements and also inspire the public to overthrow inequalities of the present day society
- CO 4: Rise above petty parochial issues after understanding the sacrificial saga of freedom struggle

Program	Semester	Course Code	Course Name
B.A,	IV	HIS244HCA	HISTORY & CULTURE OF ANDHRA (FROM 1512 TO 1956 AD)

- CO 1: Interpret social and political and cultural transformation from medieval modern Andhra
- CO 2: Relate key historical developments during medieval period occurring in coastal Andhra and Telangana regions and analyze socio political and economic changes under Qutb Shahi rulers
- CO 3: Understand gradual change, or change in certain aspects of society in Andhra, rather than rapid or fundamental changes
- CO 4: Explain how the English East India Company became the most dominant power and outline the impact of colonial policies on different aspects in Andhra
- CO 5: Outline the issues related to caste, women, widow remarriage, child marriage, social reforms and the laws and policies of colonial administration towards these issues

Program	Semester	Course Code	Course Name
B.A,	V	HIS356THS	Tourism and Hospitality Services

On successful completion of this practical course, the student will be able to;

- CO 1: Understand hospitality as a career
- CO 2: Inculcate interpersonal skills
- CO 3: Develop the ability for multitasking and crisis management
- CO 4: Understands the spirit of teamwork
- CO 5: Acknowledge the importance of guest service and satisfaction

Program	Semester	Course Code	Course Name
B.A,	V	HIS35/IGO	Tourism Guidance and Operating Skills

- CO 1: Acquire tour guiding, operating and soft skills
- CO 2: Understand different situations under which one has to work
- CO 3: Cultivate cultural awareness and flexibility
- CO 4: Understand and apply team spirit
- CO 5: Plan and organize tour operations efficiently

DEPARTMENT OF HISTORY

Program	Semester	Course Code	Course Name
B.Sc.,	I	MIB111IMD	INTRODUCTION TO MICROBIOLOGYAND MICROBIAL DIVERSITY

On successful completion of this practical course, the student will be able to;

- CO 1: Students will be able to differentiate between the three major microbial classification systems. Haeckel's three kingdoms, Whittaker's five kingdoms, and Carl Woese's three domains.
- CO 2: Students will classify archaebacteria, rickettsias, mycoplasmas, cyanobacteria, and actinomycetes based on their general characteristics
- CO 3: Students will acquire skills in pure culture techniques, including enrichment culturing, dilution-plating, streak-plate, spread-plate, and micromanipulator usage.
- CO 4: Students will exhibit proficiency in staining techniques, encompassing principles and types of stains (simple, differential, negative), as well as structural stains (spore, capsule, flagella), and hanging-drop methods
- CO 5: Students will gain insight into the general characteristics of prokaryotes and eukaryotes, specifically micro-algae and micro-fungi, and appreciate the economic importance of algae and fungi, including the production of single-cell protein (SCP)

Program	Semester	Course Code	Course Name
B.Sc.,	II	MIB122MPB	MICROBIAL PHYSIOLOGY&BIOCH EMISTRY

- CO 1 The ensure students to gain knowledge about structure ,properties and functions of bio molecules
- CO 2 To ensure students to gain knowledge about amino acids necessary for daily life and structure and its properties
- CO 3 To gain knowledge about the genetic materials and its functions and its overview
- CO 4 Understand the physiological aspects of microbes and its role as biochemical reactions through different pathways
- CO 5 To understand the role of enzymes in metabolism of microbes

Program	Semester	Course Code	Course Name
B.Sc.,	III	MIB233MHMD	MANAGEMENT OF HUMAN MICROBIAL DISEASES AND DIAGNOSIS

- CO 1 To study about the pathogenic of diseases and diagnostic methods
- CO 2 Able to explain the collection of clinical specimens and their transport methods
- CO 3 Understand the principles and applications of all microorganisms by cultural methods
- CO 4 Perform the immunological tests for the identification of microorganisms
- CO 5 Perform the antibiotic sentivity methods for bacteria

Program	Semester	Course Code	Course Name
B.Sc.,	IV	MIB244MAM	MOLECULAR BIOLOGY AND MICROBIAL GENETICS

On successful completion of this practical course, the student will be able to;

- CO 1 Understand the terms and technologies related to Microbial genetics and Molecular biology
- CO 2 know the concept of horizontal gene transfer mechanisms among the bacteria
- CO 3 Understand the basic levels of gene concepts and features of genetic code
- CO 4 Know the basic concepts of regulation of gene expressions in bacteria
- CO 5 Understand the basic concepts of transcription and translation

Program	Semester	Course Code	Course Name
B.Sc.,	V	MIB356EAM	FOOD, AGRICULTURE AND ENVIRONMENTAL MICROBIOLOGY

- CO 1: understand the role and significance of microbial inactivation, adaptation and environmental factors (i.e., Aw, pH, temperature) on growth and response of microorganisms in various environments
- CO 2: Able to identify the important pathogens and spoilage microorganisms in foods and the conditions under which they will grow.
- CO 3 Identify techniques applicable for Improvement of microorganisms based on known biochemical pathways and regulatory mechanisms.
- CO 4 Understand the rationale in medium formulation & design for microbial fermentation, sterilization of medium and different types of fermentation processes.

Program	Semester	Course Code	Course Name
B.Sc.,	V	MIB357FIB	INDUSTRIAL & FOOD MICROBIOLOGY

- CO 1 \cdot Understand the role and significance of microbes adaptation in industry
- CO 2 · Know about the product recovery and purification process
- CO 3 · Role of enzymes in industry and its usage
- CO4· Understand the rationale in medium formulation & design for microbial fermentation, sterilization of medium and different types of fermentation processes
- CO $5 \cdot Acquire$ experimental knowledge of microbial production of various industrial products such as alcohol.

DEPARTMENT OF ANTHROPOLOGY

Program	Semester	Course Code	Course Name
B.A,	I	ANT111FA	Foundations of Anthropology-I

- CO 1: Familiarity with anthropological literature and data sources, and a knowledge of how to critically access such information.
- CO 2: Knowledge of the methodologies used to collect and assess critically anthropological data.
- CO 3: The ability to present and communicate appropriately in at least one of the sub disciplines of anthropology.
- CO 4: Knowledge of the history of anthropology (theoretical approaches) and the major current issues in the sub disciplines.
- CO 5: An understanding and appreciation for the role of anthropology in the workplace and the real world.

Program	Semester	Course Code	Course Name
B.A,	II	ANT122FA	Foundations of Anthropology- II

On successful completion of this practical course, the student will be able to;

- CO 1: To have a measurable understanding of the fundamentals of Biological and Cultural evolution naryaspectsofHumanEvolutionwithinsightsintomultipletheoriesregardingthesame.
- CO 2: To comprehend various parameters, terms, and concepts in Evolutionary Biology.
- CO 3 To have a deep grasp on the differences between man and apes with respect to their anatomy and skeletal changes that arose due to erect posture in the process of evolution.

Program	Semester	Course Code	Course Name
B.A,	III	ANT233SCA	Socio-Cultural Anthropology

- CO 1: By the time of completion of the subject the students should get a broader picture of society culture and its economic organization political operations regions believes in customs in different societies
- CO2: An understanding and appreciation of human biological, linguistic, and cultural diversity, especially those features that separates humans from other species.
- CO 3: An appreciation and awareness of the origin of both cultural and human biological diversity through time.
- CO 4: A positive appreciation of the diversity in contemporary and past societies and cultures.

Program	Semester	Course Code	Course Name
B.A,	IV	ANT244AT	Anthropological Theories

- CO 1: By the time of completion of the subject the students should get a broader picture of society culture and its economic organization political operations regions believes in customs in different societies
- CO2: An understanding and appreciation of human biological, linguistic, and cultural diversity, especially those features that separates humans from other species.
- CO 3: An appreciation and awareness of the origin of both cultural and human biological diversity through time.
- CO 4: A positive appreciation of the diversity in contemporary and past societies and cultures.

DEPARTMENT OF PSYCHOLOGY

Program	Semester	Course Code	Course Name
B.A,	I	PSY111GP	GENERAL PSYCHOLOGY-I

CO1: Acquire a foundational understanding of core concepts in psychology, including cognition, learning, memory, perception, and motivation.

CO2: Develop an introductory understanding of the scientific method and basic research techniques used in psychology, with the ability to critically assess and interpret psychological research.

CO3: Demonstrate an awareness of ethical considerations in psychological research and behavior, and apply basic ethical principles to psychological scenarios.

CO4: Apply psychological concepts to practical situations, demonstrating an understanding of how psychological principles can be relevant in everyday life.

Program	Semester	Course Code	Course Name
B.A,	II	PSY122GP	GENERAL PSYCHOLOGY-II

- CO 1: Develop a nuanced and advanced understanding of major psychological theories and perspectives, including their historical context and contemporary relevance.
- CO 2: Acquire advanced research skills, including the ability to design complex experiments, analyze sophisticated data sets, and critically evaluate advanced research literature.
- CO 3: Integrate knowledge from various subfields within psychology, demonstrating an understanding of the inter connectedness of topics such as cognitive psychology, social psychology, and neuroscience.
- CO 4: Develop advanced critical thinking skills by critically evaluating and synthesizing information from diverse sources, theories, and research studies within the field of psychology. CO 5: Apply advanced psychological concepts to complex real-world scenarios, demonstrating an ability to address intricate issues and provide sophisticated insights based on psychological principles.

Program	Semester	Course Code	Course Name
B.A,	IV	PSY244AP	Abnormal Psychology

CO1:Acquiring knowledge and skills for distinguishing normal and abnormal behaviour and learning the criteria for determining abnormality.

CO2: Developing familiarity with the current diagnostic systems (current edition of the Diagnostic

and Statistical Manual of Mental Disorders and International Classification of Diseases- Mental Disorder section).

CO3:Acquiring knowledge about anxiety disorders and Trauma & Stressor-related, Dissociative, and

Personality Disorders.

CO4: Developing sensitivity towards individual and cultural diversity. Counseling.

Program	Semester	Course Code	Course Name
B.A,	IV	PSY245SP	SOCIAL PSYCHOLOGY

On successful completion of this practical course, the student will be able to;

CO 1:The paper aims at providing an overview about the concept of abnormality and the clinical picture and dynamics of various psychological disorders.

CO2:This will sensitize the students to information on psychopathology and dispel myths regarding it.

CO3:Acquiring knowledge and skills for distinguishing normal and abnormal behaviour.

DEPARTMENT OF MBA

Program	Semester	Course Code	Course Name
MBA	I	MBA101	Managing People and
			Organizations

CO1: Comprehend and apply the principal concepts of the field of management at the individual, group, and organizational levels of analysis and identify how these concepts affect organizational and individual performance.

CO2: Recognize the relationship of the basic human resource functions to managerial roles and responsibilities.

CO3: Manage organizational culture and conflict in organizations, and how to manage sustainability and effectiveness of organizations.

Program	Semester	Course Code	Course Name
MBA	I	MBA102	Managerial Economics

On successful completion of this practical course, the student will be able to;

CO1: To introduce the fundamentals, tools and theories of managerial economics

CO2: To orient on micro economic techniques as a decision making process

CO3: To understand macro-economic analysis essential for business managers

Program	Semester	Course Code	Course Name
MBA	I	MBA103	Quantitative Analysis for Business
			Decisions

On successful completion of this practical course, the student will be able to;

CO1: Understand a Problem(s) in Business. Explore and analyze the problem(s)

CO2:To improve policy making to develop strategy and improve day to day performance of organizations.

CO3: Explore data to find new patterns and relationships (Data Mining)

CO4: Predict the relationship between different variables (Predictive Analytics and Predictive Modeling)

CO5: Estimate the value created using business analytics to address an opportunity/Problem. Understand and use statistical techniques for analysis of research data.

Program	Semester	Course Code	Course Name
MBA	I	MBA104	Business, Government &

Program	Semester	Course Code	Course Name
MBA	I	MBA105	Managerial Communication

CO1: Understand communication skills and sensitize them to their potential to become successful managers

CO2: Explain the various types of communication in Business Organizations

CO3: Identify the role of communication conflict in intercultural relationships

Program	Semester	Course Code	Course Name
MBA	I	MBA106	Accounting for Managers

On successful completion of this practical course, the student will be able to;

CO1: Explain fundamental accounting concepts, the elements of financial statements, and basic accounting vocabulary.

CO2: Explain and use the accounting equation in basic financial analysis and explain how the equation is related to the financial statements.

CO3: Explain and Use the financial reporting and auditing procedures.

CO4: Explain and use various cost management techniques.

Program	Semester	Course Code	Course Name
MBA	I	MBA107	Legal Framework for Business

On successful completion of this practical course, the student will be able to;

CO1: enable students understand the legal framework of business

CO2: gain a comprehensive understanding of the fundamental legal principles and concepts that underpin business operations and transactions.

CO3: apply legal principles to real-world business situations, identifying potential legal issues and developing strategies to address them.

CO4: understand the different forms of business organizations, such as sole proprietorships, partnerships, corporations, and limited liability companies, including their formation, management, and dissolution.

Program	Semester	Course Code	Course Name
MBA	I	MBA108	Foundation Course

CO1: To acquaint students with fundamentals of accounting, mathematics, computers, economics and business and help them to transform their communication abilities.

CO2: To help students to acquire some of the necessary skills to handle day-to-day managerial responsibilities, such as making speeches, controlling one to one communication, enriching group activities and processes, giving effective presentations, writing letters, memos, reports, advertising, and maintaining one's poise in public and in private.

CO3: To build the students' confidence and to enhance competitiveness by project in a positive Image of themselves and of their future.

Program	Semester	Course Code	Course Name
MBA	I	MBA109	Emotional Intelligence And
			Managerial Effectiveness

On successful completion of this practical course, the student will be able to;

CO1: To enlighten students to the ideation, concept and application of emotional intelligence.

CO2: To examine how our soul prevail over our minds for innovative establishment.

CO3: It will however deal with how fundamentals of test anxiety handbook us through diverse situations of social lives.

CO4: Get to recognize about the many unknowable of existence, will further certainly assist them to boost their appreciation to still be beneficial on their responsibilities.

CO5: Learn and offer insight into self-regulation and revelation of one's maximum prospects for higher performance.

Program	Semester	Course Code	Course Name
MBA	II	MBA201	Marketing Management

On successful completion of this practical course, the student will be able to;

CO1: Understand the role of Marketing in underpinning the Success of the Organization

CO2: Understand the various types of marketing environments

CO3: Understand the role of Marketing mix elements in the success of marketing strategies

CO4: Know new product development and consumer adoption of the same

CO5: Various pricing methods and techniques followed in marketing of products and Services

CO6: Know the effective and Efficient Channel management

Program	Semester	Course Code	Course Name
MBA	II	MBA202	Human Resource
			Management

CO1: To develop a meaningful understanding of HRM theory, functions and practices;

CO2: To apply HRM concepts and skills across various types of organizations.

Program	Semester	Course Code	Course Name
MBA	II	MBA203	Financial Management

On successful completion of this practical course, the student will be able to;

CO1: explain the basic functions and responsibilities of a financial department in a business/

CO2: elaborate the key decision areas in financial management-investment, financing, dividend and working capital management;

CO3: explain the various techniques of evaluation of investment proposals;

CO4: Discuss the various factors to be considered in designing the target capital structure.

Program	Semester	Course Code	Course Name
MBA	II	MBA204	Operations Research

On successful completion of this practical course, the student will be able to;

CO1: Gain knowledge of formulating mathematical models for quantitative analysis of managerial problems in industry so that they are able to use resources (capitals, materials, staffing, and machines) more effectively.

CO2: Improve skills in the use of various mathematical models with Operations Research approach in solving real problems in industry and thereby facilitates the managerial decision making process.

CO3: understand operations research concepts that yield a competitive advantage through operational excellence.

Program	Semester	Course Code	Course Name
MBA	II	MBA205	Entrepreneurship Theory and
			Practice

On successful completion of this practical course, the student will be able to;

CO1: Recognize and understand the concept of entrepreneurship and the types and

Program	Semester	Course Code	Course Name
MBA	II	MBA206	Business Research Methods

CO1: learn the basic concepts of research and formulate research problems and process.

CO2: develop an awareness of research design and data collection methods.

CO3: generate and understand of sampling design and techniques.

CO4: know how to analyse and interpret the data.

CO5: give knowledge about to write a research report and thesis.

Program	Semester	Course Code	Course Name
MBA	II	MBA207	Project Management

On successful completion of this practical course, the student will be able to;

CO1: Understand the basic concepts of project management

CO2: gain knowledge about Network analysis and techniques

CO3: Manage team dynamics, resolve conflicts, and foster a collaborative work environment.

CO4: Communicate effectively with stakeholders through regular updates, meetings, and reports.

Program	Semester	Course Code	Course Name
MBA	II	MBA208	Critical thinking and Problem
			Solving

On successful completion of this practical course, the student will be able to;

CO1: Understand the dynamics of the external world

CO2: understand various issues in general to the outside world and Develop empathy.

CO3: Manage team dynamics, resolve conflicts, and foster a collaborative work environment.

CO4: Communicate effectively with stakeholders through regular updates, meetings, and reports.

CO5: Work effectively with team members to solve problems collaboratively.

Program	Semester	Course Code	Course Name
MBA	III	MBA301	Strategic Management

On successful completion of this practical course, the student will be able to;

CO1: Understand the core concepts of Strategic Management

CO2: provide an understanding of how strategic decisions are to be taken and implemented in the changing environment scenario.

CO3:Develop strategies to foster innovation and entrepreneurial thinking within organizations.

CO4:Collaborate with peers in team-based projects to analyze strategic issues and develop solution

CO5:Understand the role of innovation and entrepreneurship in strategic management.

Program	Semester	Course Code	Course Name
MBA	III	MBA302HRMOB	Human Resource Planning

CO1: create a critical appreciation and knowledge for understanding the determinants of human resource requirements in the organization

CO2: develop conceptual as well as practical understanding of human resource planning, deployment, maintaining HR information, preparing report on HR performance.

CO3: Develop strategies to foster innovation and entrepreneurial thinking within organizations.

CO4: Collaborate with peers in team-based projects to analyze strategic issues and develop solution

CO5: Understand the role of innovation and entrepreneurship in strategic management.

CO6: Leverage technology to improve HR planning and decision-making processes.

Program	Semester	Course Code	Course Name
MBA	III	MBA304HRMOB	Training and development

On successful completion of this practical course, the student will be able to;

CO1: learn the concept and practice of training and development

CO2: To gain an experimental skill-based exposure to the process of planning, organizing, and implementing of training program in a globalized organization.

CO3: understand the role of training in the development process of an employee and also to educate the employee about career objectives and career planning.

Program	Semester	Course Code	Course Name
MBA	III	MBA306HRMOB	Industrial Relations and
			Employment Laws

On successful completion of this practical course, the student will be able to;

CO1: to grasp and apply the principles of IR and develop an awareness of the significance of industrial peace

CO2: to give an understanding of the components and meaning of sustaining Industrial peace anchored on harmonious Employee-Management relations.

CO3; Integrate ethical considerations and social responsibility into industrial relations practices.

CO4: Understand the impact of globalization on industrial relations and labor standards.

CO5: Demonstrate a comprehensive understanding of the theories and concepts of industrial relations

Program	Semester	Course Code	Course Name
MBA	III	MBA302FIN	Financial Institutions &Markets

On successful completion of this practical course, the student will be able to;

CO1: familiarize with the financial institutions, markets and its regulations.

Program	Semester	Course Code	Course Name
MBA	III	MBA304FIN	Security Analysis and Portfolio
			Management

CO1: Understand an overview of investment management, focusing on the application of finance theory to the issue faced by portfolio managers and investors in general

CO2: Identify and describe various financial instruments, including stocks, bonds, derivatives, and alternative investments.

CO3: Utilize technical analysis tools and techniques to assess market trends and price movements.

CO4: Identify and assess various types of investment risks, including market risk, credit risk, and liquidity risk.

Program	Semester	Course Code	Course Name
MBA	III	MBA305FIN	Investment Management and
			Commercial Banking

On successful completion of this practical course, the student will be able to;

CO1: identify and describe terms and concepts associated with investments Describe and discuss various investment opportunities Differentiate between short-term and long-term investments

CO2: Demonstrate knowledge of corporate rational for the issuance of corporate stocks and bonds Describe and discuss the basic concepts of the stock, bond, and mutual fund markets CO3: Describe and discuss the real estate market and the advantages and disadvantages of real estate in an investment portfolio

CO4: Understand the different types of banking, different banking products/activities to understand the main components of commercial and investment banking business

Program	Semester	Course Code	Course Name
MBA	III	MBA302MKT	Consumer Behaviour and
			Marketing Research

On successful completion of this practical course, the student will be able to;

CO1: To understand the concept of consumer behavior, decision making by consumers, behavior variables and influences on consumer behavior.

CO2: To comprehend the social and cultural dimensions of consumer behavior, factors impacting attitudes and behavior.

CO3: To arm the budding marketers with an insight of the psychological and behavioral concepts of consumers thus enabling them to achieve their objectives and excel.

		0 0 1	0 17	
Program	Semester	Course Code	Course Name	
i iogiuiii	ocincatei	Course Cour	Course Hunne	

Program	Semester	Course Code	Course Name
MBA	III	MBA305MKT	Services Marketing

CO1: Explain the unique challenges of services marketing, including the elements of product, price, place, promotion, processes, physical evidence, and people.

CO2: Describe how customer relationship marketing (CRM), including retention strategies, creates an environment that achieves excellence in customer service.

CO3: Design service quality measurements to build customer loyalty and evaluate the effectiveness and efficiency of customer service offerings.

CO4: Explain service blueprinting, the integration of new technologies, and other key issues facing today's customer service providers and service managers.

CO5: Discuss the influences of the multicultural marketplace, business ethics, and socially responsible marketing on services marketing.

Program	Semester	Course Code	Course Name
MBA	III	MBA308	Leadership

On successful completion of this practical course, the student will be able to;

CO1: to understand their leadership journeys and their crucibles by reflecting upon and framing their life stories and experiences to date.

CO2: to understand why leaders lose their way and the self-awareness needed to avoid derailment

CO3: gain clarity about their leadership principles, values, and ethical boundaries, and how they will respond under pressure when challenged.

CO4: can explore how to build support teams and lead an integrated life

CO5: create personal leadership development plans to guide them throughout their lives

Program	Semester	Course Code	Course Name
MBA	IV	MBA401	International Business

CO1: Understand how political, economic, and legal systems collectively influence a country's ability to achieve meaningful economic progress.

CO2: Discuss how culture is different because of differences in social structure, religion, language, education, economic philosophy, and political philosophy.

CO3: Explain the important implications that international trade theory holds for business practice.

CO4: Reason why some governments intervene in international trade to restrict imports and promote exports.

CO5: Describe the need and prospects of the world's most important regional economic agreements.

CO6: Demonstrate how currency exchange rates are determined.

Program	Semester	Course Code	Course Name
MBA	IV	MBA402HRMOB	Human Resource Development

On successful completion of this practical course, the student will be able to;

CO1: get awareness of the concepts, techniques and practices of human resource development.

CO2: apply the principles and techniques as professionals for developing human resources in an organization.

CO3: Demonstrate a comprehensive understanding of the key concepts, theories, and practices in human resource development.

CO4: Implement training and development initiatives using various instructional methods and technologies.

CO5: Facilitate organizational change initiatives that promote growth and adaptability.

Program	Semester	Course Code	Course Name
MBA	IV	MBA404HRMOB	Strategic Human Resource
			Management

On successful completion of this practical course, the student will be able to;

CO1: understand Strategic HRM

CO2: align HR systems with business strategy, Strategy formulation, Strategies for performance and development with knowledge of global economy factors.

Program	Semester	Course Code	Course Name
MBA	IV	MBA405HRMOB	International Human Resource
			Management

CO1: gain an understanding on International HRM, Basics of IHRM

CO2: understand functional Aspects of IHRM, IHRM Practices in Selected Countries, and Special Issues in IHRM.

CO3: Gain insights into developing and nurturing leadership talent in an international context, including the role of cultural intelligence.

CO4:Analyze the role of HRM in multinational corporations (MNCs), including the challenges of coordinating HRM practices across multiple countries.

CO5: Learn about different staffing approaches for international operations, including expatriation, localization, and global talent management.

Program	Semester	Course Code	Course Name
MBA	IV	MBA403MKT	Sales and Distribution
			Management

On successful completion of this practical course, the student will be able to;

CO1: Understand the concept of sales and distribution management and their interrelationship

CO2: Explain role and responsibility of sales personal, and essential selling skills

CO3: Understand the concept and effect of sales organization and sales effort

CO4: Explain the skills and methods required for sales force management

CO5: Understand the Management of Marketing Channels

CO6: Explore the concept and theories of rural distribution

Program	Semester	Course Code	Course Name
MBA	IV	MBA404MKT	Retail Management

On successful completion of this practical course, the student will be able to;

CO1: develop an understanding of the contemporary retail management, issues, strategies and trends in Retailing

CO2: highlight the significance of retailing and its role in the success of modern business houses

CO3: acclimatize with the insights of retailing, key activities and relationships.

Program	Semester	Course Code	Course Name
MBA	IV	MBA406MKT	E-Marketing

CO1: understand the important concepts related to e-marketing

CO2: learn the use of different electronic media for constructing marketing activities

CO3: know the current tools in e-marketing space.

Program	Semester	Course Code	Course Name
MBA	IV	MBA403FIN	Financial Derivatives

On successful completion of this practical course, the student will be able to;

CO1: get awareness about the importance of commodities market, meaning, scope and types of derivatives

CO2: understand the operational mechanism and the various hedging options to avoid/minimize the risks involved in investment.

CO3: Understand the ethical issues related to the use of derivatives, including conflicts of interest and insider trading.

CO4: Evaluate the risks and benefits of using derivatives in different financial scenarios.

CO5: Effectively communicate their analysis and recommendations regarding derivative instruments in both written and oral formats.

Program	Semester	Course Code	Course Name
MBA	IV	MBA404FIN	Global Finance

On successful completion of this practical course, the student will be able to;

CO1: Get awareness among the students about the importance of internationalfinancial management, international financial markets

CO2: Understand about management of exposure, international capital budgeting, international portfolio management and international working capital management.

CO3: understand financial management at international scenario and also about various hedging options to manage the exposure.

Program	Semester	Course Code	Course Name
MBA	IV	MBA406FIN	Strategic Cost Management

CO1: understand the costing systems and their application in different manufacturing environments

CO2: Identify the conventions and doctrines of managerial and cost accounting and other generally accepted principles which may be applied in the contemporary cost management models

CO3: Identify major contemporary issues that have emerged in managerial accounting

CO4: discuss a number of issues relating to the design and implementation of cost management models in modern firms.

Program	Semester	Course Code	Course Name
MBA	IV	MBA409	Employability Skills

On successful completion of this practical course, the student will be able to;

CO1: develop non-technical skills and competencies that has always been an important part of effective and successful participation in the workplace.

CO2: Get employment by honing their skills to meet the demands of today's world. enhance performance.

DEPARTMENT OF MCA

Program	Semester	Course Code	Course Name
MCA	I	20MCA101	Discrete mathematics
			structures

CO1: use logical notation and mathematical induction for solving problems.

CO2: apply permutations and combinations for solving combinatorial problems

CO3: apply the concepts of linear homogeneous and non-homogeneous recurrence relations

CO4: know the properties of relations. Use different types of graphs to solve problems.

Program	Semester	Course Code	Course Name
MCA	I	20MCA102	Database management
			system

On successful completion of this practical course, the student will be able to;

CO1: describe the concepts of data storage and indexing, transaction

CO2: management, query evaluations and optimization techniques.

CO3: list the importance of dbms and differentiate how dbms is better than traditional file processing systems.

CO4: analyze the basic structure of database and recognize the different views of the data base.

CO5: formulate data retrieval queries in sql for real time scenario.

CO6: construct and normalize conceptual data models

CO7: handle the dead locks that occurs in the system.

Program	Semester	Course Code	Course Name
MCA	I	20MCA103	Programming and problem
			solving using python

On successful completion of this practical course, the student will be able to;

CO1: define and demonstrate the use of built-in data structures "lists" and "dictionary".

CO2: design and implement a program to solve a real world problem.

CO3: design and implement gui application and how to handle exceptions and files.

CO4:make database connectivity in python programming language.

Program	Semester	Course Code	Course Name
MCA	I	20MCA104	Java

CO1: the model of object oriented programming and fundamental features of an object oriented language.

CO2: how to test, document and prepare a professional looking package for each business project.

CO3: student have the ability to write a computer program to solve specified problems and to use the java sdk environment to create, debug and run simple java programs.

CO4: student will be able to explain and develop programs for inheritance, multithreading, applets, exception handling and file handling.

Program	Semester	Course Code	Course Name
MCA	I	20MCA105	Operating systems

On successful completion of this practical course, the student will be able to;

CO1: apply optimization techniques for the improvement of system performance.

CO2: ability to understand the synchronous and synchronous communication mechanisms in their respective os.

CO3: learn about minimization of turnaround time, waiting time and response time and also maximization of through put with keeping cpu as busy as possible.

CO4: ability to compare the different os

Program	Semester	Course Code	Course Name
MCA	I	20MCA106	Computer organization

On successful completion of this practical course, the student will be able to;

CO1: ability to understand basic structure of computer

CO2: ability to perform computer arithmetic operations

CO3:ability to understand control unit operations.

CO4: ability to design memory organization that uses banks for different word size operations.

CO5: ability to understand the concept of cache mapping techniques.

CO6:ability to understand the concept of i/o organization

CO7: ability to conceptualize instruction level parallelism.

Program	Semester	Course Code	Course Name
MCA	I	20MCA107	Programming and problem
			solving using python

CO1: understand and comprehend the basics of python programming.

CO2: demonstrate the principles of structured programming and be able to describe, design, implement, and test structured programs using currently accepted methodology.

CO3: explain the use of the built-in data structure list, sets, tuples and diction nary.

Program	Semester	Course Code	Course Name
MCA	I	20MCA108	DBMS lab

On successful completion of this practical course, the student will be able to;

CO1: describe the concepts of data storage and indexing ,transactions

CO2: management, quary evaluations and optimization techniques

CO3: list the importance of dbms and differentiate how dbms is better then rational file processing systems

CO4: analyze the basic structure of data base and recognize the different views of data base

CO5: formulate data retrieval queries in sql for real time scenario

CO6: construct and normalize conceptual data models

CO7: handle the dead locks that occurs in the system

CO8.list the differences between relational data bases and a non-relational (no-sql)

Program	Semester	Course Code	Course Name
MCA	II	20MCA201	Design and analysis of
			algorithms

On successful completion of this practical course, the student will be able to;

CO1: analyze the asymptotic performance of algorithms.

CO2: write rigorous correctness proofs for algorithms.

CO3: demonstrate a familiarity with major algorithms and data structures.

CO4 :apply important algorithmic design paradigms and methods of analysis.

CO5:synthesize efficient algorithms in common engineering design situations.

CO6:algorithm design and analysis provide the theoretical backbone of computer science and are a must in the daily work of the successful programmer. The goal of this course is to provide a solid background in the design and analysis of the major classes of algorithms.

Program	Semester	Course Code	Course Name
MCA	II	20MCA202	Software engineering

CO1: how to apply the software engineering lifecycle by demonstrating competence in communication, planning, analysis, design, construction, and deployment

CO2: an ability to work in one or more significant application domains

CO3: work as an individual and as part of a multidisciplinary team to develop and deliver quality software

CO4: demonstrate an understanding of and apply current theories, models, and techniques that provide a basis for the software lifecycle

CO5: demonstrate an ability to use the techniques and tools necessary for engineering practice

Program	Semester	Course Code	Course Name
MCA	II	20MCA203	Data structure

On successful completion of this practical course, the student will be able to;

CO1: analyze the complexities for recursive and non recursive algorithms.

CO2: apply adt concepts such as arrays, stacks and queues for solving infix to post fix, postfix evaluation, priority queues.

CO3: apply the concepts of dynamic memory allocation for reducing the time and space complexity of algorithms.

CO4: implement linear, binary, interpolation, hashing searching techniques and sorting techniques namely bubble, insertion, selection, quick, merge sort.

CO5: design and implement the no linear data structures (trees and graphs) to optimize the solution.

Program	Semester	Course Code	Course Name
MCA	II	20MCA204	Computer networks

On successful completion of this practical course, the student will be able to;

CO1: ability to set up install and configure networks

CO2: ability to do network programming

CO3: ability to use network protocols efficiently

CO4: it facilitates communications from one computer to another computer.

CO5: it allows the exchange of data and information among users through a network.

Program	Semester	Course Code	Course Name
MCA	II	20MCA205	Web technologies

CO1: explain different components and technologies of world wide web as a platform.

CO2: design and develop websites using fundamental web languages, technologies, and tools.

CO3: distinguish between server-side and client-side web technologies.

CO4: describe various web technology and application development issues and trends.

CO5: conduct independent research on a subject related to the course material

Program	Semester	Course Code	Course Name
MCA	II	20MCA206	Research methodology -i

On successful completion of this practical course, the student will be able to;

CO1:explain key research concepts and issues.

CO2: read, comprehend, and explain research articles in their academic discipline.

CO3: propose the required numerical skills necessary to carry out research.

CO4: assess the basic function and working of analytical instruments used in research

Program	Semester	Course Code	Course Name
MCA	II	20MCA207	Web technologies lab

On successful completion of this practical course, the student will be able to;

CO1: introduction to object oriented programming concepts- java as an object oriented programming language. Introduction to java application and applets control structures methods-arrays.

CO2: object based and object oriented programming creating packages-using overloaded constructors-static class variables-data abstraction and information hiding-relation between super class objects and subclass objects composition verses inheritance polymorphism-dynamic method binding abstract super classes and concrete super classes—inheriting interfaceuse of inner classes and wrapper classes-string to kenizer and string suffer classes.

CO3: role of object oriented programming in designing gui –graphs and java20overview of swing- event handling, adapter classes and layout managers. Advance gui components- jpopup menus- jdesktoppane- advance layout managers.

Program	Semester	Course Code	Course Name
MCA	II	20MCA208	Data structure lab

CO1: engineering knowledge: apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

CO2: problem analysis: identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

CO3: design / development of solutions: design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Program	Semester	Course Code	Course Name
MCA	III	20MCA301	Big data analytics

On successful completion of this practical course, the student will be able to;

CO1: after successful completion of this course, student will be able to

CO2: apply mathematical principles to the analysis of data

CO3: analyse very large data sets in the context of real world problems

CO4: develop and implement data analysis strategies base on theoretical principles, ethical considerations, and detailed knowledge of the underlying data

Program	Semester	Course Code	Course Name
MCA	III	20MCA302	Mobile computing

On successful completion of this practical course, the student will be able to;

CO1:understand fundamentals of wireless communications.

CO2: analyze security, energy efficiency, mobility, scalability, and their unique characteristics in wireless networks.

CO3: demonstrate basic skills for cellular networks design.

CO4: apply knowledge of tcp/ip extensions for mobile and wireless networking.

Program	Semester	Course Code	Course Name
MCA	III	20MCA303	Artificial intelligences

CO1: understanding of the major areas and challenges of ai.

CO2: ability to apply basic ai algorithms to solve problems.

CO3: understanding of ethical issues in ai.

CO4: understand the various searching techniques, constraint satisfaction problem and example problems- game playing techniques.

CO5: apply these techniques in applications which involve perception, reasoning and learning.

Program	Semester	Course Code	Course Name
MCA	III	20MCA304	Internet of things

On successful completion of this practical course, the student will be able to;

CO1: understand the application areas of iot

CO2: realize the revolution of internet in mobile devices, cloud & sensor networks

CO3: understand building blocks of internet of things and characteristics

CO4: identify the components that forms part of iot architecture

CO5: determine the most appropriate iot devices and sensors based on case studies.

Program	Semester	Course Code	Course Name
MCA	III	20MCA305	Software testing and fault
			analysis

On successful completion of this practical course, the student will be able to;

CO1: after the successful completion of the course the students will be able to:

CO2: various test processes and continuous quality improvement

CO3: types of errors and fault models

CO4: methods of test generation from requirements

CO5: behaviors modeling using uml: finite state machines (fsm)

Program	Semester	Course Code	Course Name
MCA	III	20MCA306	Research methodology –ii

On successful completion of this practical course, the student will be able to;

CO1: know how to sample the data, sample size and to find out errors in sampling

CO2: know the data collection techniques

CO3: have basic knowledge on measurement and scaling techniques

CO4: develop a hypothesis testing

CO5: gain experience with writing the research paper research methodology

Program	Semester	Course Code	Course Name
MCA	III	20MCA307	Bigdata analytics using r
			programming lab

CO1: . Ability to understand installation of hadoop.

CO2.understanding hadoop frame work.

CO3: ability to work on map reduce.

CO4: analyze large amount of data sets using apache pig. 5.ability to write commands using pig latin .

Program	Semester	Course Code	Course Name
MCA	III	20MCA308	Technical report
			writing lab and
			mini project

On successful completion of this practical course, the student will be able to;

CO1: Analyze an appropriate spectators for a variety of technical and scientific documents.

CO2: communicate in ethical ways that demonstrate sensitivity to scientific audience of a lab report.

CO3: prepare technical documents that demonstrate clear mastery of professional language, grammar.

Program	Semester	Course Code	Course Name
MCA	IV	20MCA403	Android apllication
			developemnt

On successful completion of this practical course, the student will be able to;

CO1: understand the requirements of mobile programming environment

CO2: learn about basic methods, tools and techniques for developing apps

CO3: explore and practice app development on android platform

CO4: develop working prototypes of working systems for various uses in daily lives

Program	Semester	Course Code	Course Name
MCA	IV	20MCA404	Distributed computing

On successful completion of this practical course, the student will be able to;

CO1: in distributed systems this course, you will learn a range of fundamental and applied techniques in distributed systems. The learning objectives for distributed systems are:

CO2: apply knowledge of distributed systems techniques and methodologies.

CO3: explain the design and development of distributed systems and distributed systems applications.

CO4: use the application of fundamental computer science methods and algorithms in the development of distributed systems and distributed systems applications.

Program	Semester	Course Code	Course Name
MCA	IV	20MCA405	Software project
			management

CO1: develop the model from the conventional software product to the modern.

CO2: analyze and design the software architecture.

CO3: have an exposure for organizing and managing a software project.

CO4: apply, analyze, design and develop the software project.

CO5: design various estimation levels of cost and effort.

Program	Semester	Course Code	Course Name
MCA	V	20MCA501	Data science

On successful completion of this practical course, the student will be able to;

CO1: after successful completion of this course, student will be able to

CO2: apply mathematical principles to the analysis of data

CO3: analyse very large data sets in the context of real world problems

Program	Semester	Course Code	Course Name
MCA	V	20MCA502	Design and analysis of
			algorithms

On successful completion of this practical course, the student will be able to;

CO1: argue the correctness of algorithms using inductive proofs and invariants.

CO2: Analyse worst-case running times of algorithms using asymptotic analysis.

CO3: describe the dynamic-programming paradigm and explain when an algorithmic design situation calls for it.

CO4:synthesize dynamic programming algorithms and analyze them.

Program	Semester	Course Code	Course Name
MCA	V	20MCA503	Dot net programming

On successful completion of this practical course, the student will be able to;

CO1: understand the Microsoft .NET Framework and ASP.NET page structure.

CO2: design web applications with variety of controls.

CO3: access the data using inbuilt data access control.

CO4: develop secured web applications.

Program	Semester	Course Code	Course Name
MCA	V	20MCA504	Artificial intelligence

CO1: understanding of the major areas and challenges of ai.

CO2: ability to apply basic ai algorithms to solve problems.

CO3: understanding of ethical issues in ai.

CO4: acquire the knowledge of real world knowledge representation.

Program	Semester	Course Code	Course Name
MCA	V	20MCA505	Internet of things

On successful completion of this practical course, the student will be able to;

CO1: understand the application areas of iot

CO2: realize the revolution of internet in mobile devices, cloud & sensor networks

CO3: understand building blocks of internet of things and characteristics

Program	Semester	Course Code	Course Name
MCA	V	20MCA506	Data Science Lab

On successful completion of this practical course, the student will be able to;

CO1: Ability to understand installation of hadoop.

CO2: understanding hadoop frame work.

CO3: ability to work on map reduce.

CO4: analyze large amount of data sets using apache pig.

Program	Semester	Course Code	Course Name
MCA	V	20MCA507	Dot Net Programming Lab

CO1: Create user interactive web pages using ASP.NET.

CO2: Create simple data binding application using ADO.NET connectivity.

CO3: performing database operations for windows form and web applications

Program	Semester	Course Code	Course Name
MCA	VI	2OMCA	Project

On successful completion of this practical course, the student will be able to;

CO1: students will apply software engineering principles by working on a real software projects.

CO2: students will learn to develop software product using agile methodology
